

Brigade Automation Corporation

ANNUAL REPORT

1525 Gold Street, #3327

San Jose, CA 95002

(516) 713-9590

<https://baggerbot.com/>

This Annual Report is dated November 22, 2023.

BUSINESS

Brigade Automation Corporation (the "Company") is a C Corporation organized under the laws of the state of Delaware that has designed The BaggerBot, an autonomous, robotic bag filling machine. The Company's business model consists of leasing and/or renting these highly sophisticated bag filling machines, focusing on emergency, infrastructure, construction, and business applications. Our goal is that the BaggerBot will be leased and/or rented across the United States of America, and eventually worldwide, to government entities like the United States of America Army Corps as well as non-governmental agencies that assist communities when there are natural disasters and companies who can get good use of the efficiency and high speed that the BaggerBot is capable of when needing to fill multiple bag types with all sorts of different materials for purposes involved with infrastructure, construction, and business applications.

This highly sophisticated, robotic machine can rapidly and efficiently fill and sew sandbags using minimal human labor up to a rate of 1600/bags an hour and is able to function 24 hours a day to ensure communities are ready for any impending natural disaster. Its lightweight design gives it mobility so that it can be trucked to any destination on demand. And it's easy to use, requiring only 3 operators to load the bags onto the machine, thus eliminating the risk of human fatigue and injury. The BaggerBot was created by a team of engineers who spent thousands of hours perfecting the functionality and design.

The BaggerBot is the game-changer in the way the world responds to natural disasters, and with a working prototype, we're ready to bring it to market. Once we are able to build several machines of the perfected model, our plan is to strategically lease and deploy dozens of machines all over the country. We're looking for a partner who can see our vision of a rapid response robotic machine that will save billions of dollars in damages to businesses and homes all over the country.

Brigade Automation Corporation currently licenses its main Intellectual Property assets via an exclusive IP agreement with Golden Gate Mechanical, Inc. with a term in perpetuity. Golden Gate Mechanical, Inc. also owns 100% of the current outstanding stock of Brigade Automation Corporation.

Please note Thomas Burns currently is the President and CFO of Brigade Automation Corporation, and the President of Brigade's majority owner, Golden Gate Mechanical, Inc. Mr. Burns currently splits his time 50/50 between both companies while he is developing the BaggerBot business. The current executive plan includes: as the company grows, Mr. Burns will hire a new CFO to take over the officer role of the company. He may stay on as President of the business to ensure the company is profitable and achieves its goals of leasing 5-10 BaggerBot machines in the future. At this time, Mr. Burns plans to continue in both roles until Brigade is profitable and plans to hire a sales manager, field operations supervisor, and field technician/driver who will set up and train BaggerBot customers.

Previous Offerings

Name: Common Stock

Type of security sold: Equity

Final amount sold: \$103,786.86

Number of Securities Sold: 4,542,134

Use of proceeds: Stock Issuance to Investors.

Date: October 01, 2021

Offering exemption relied upon: Section 4(a)(2)

REGULATORY INFORMATION

The company has not previously failed to comply with the requirements of Regulation Crowdfunding;

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATION

Operating Results - 2022 Compared to 2021

How long can the business operate without revenue:

Depending on the requested Crowdfunding raise we believe we can operate Brigade Automation Corporation for at least 1.3 years if we receive the requested crowdfunding.

Foreseeable major expenses based on projections:

We foresee the #1 expense is Building the first 1 - 5 "First Article Ready" Baggerbot machines.

We need to hire Key Personnel and in the field staffing personnel.

Find new office and pay rent with utilities.

Relocating Baggerbot to new customer locations. This includes all transportation costs.

Purchase hard to obtain Baggerbot Spare parts.

Hire CPA firm and legal firms, as needed.

Attend and Exhibit Baggerbot at Tradeshow. We will meet future customers to increase sales.

Marketing and Advertising

Future operational challenges:

Produce sufficient Baggerbot machines to handle Flooding situations around the United States.

Obtain Quarry access and large volumes of customer supplied sandbags during emergencies.

Transportation of the baggerbot equipment to meet and exceed customers requirements.

Future challenges related to capital resources:

Accounts Recievable Collection payments - We need customers who will pay for services when the filled Sand and Gravel bags are completed.

Acquisition and Sales Cost to be kept below 8% the Final Gross Sales Cost.

Relocation of Baggerbot Equipment, Generators and ongoing Transportation and personnel issues

Future milestones and events:

The #1 Goal is to have the Baggerbot machines generating positive cash flow within 2 years.

For the company - manufacture and supply 3 Baggerbot machines operating 70% of the time around the United States.

Our goal is for Brigade Automation Corporation to make a small profit in Year 1.

Brigade Automation Corporation has been in discussions with several recycling facilities and landfill facilities locally regarding obtaining a 'Letter of Intent' for future business agreements to use the Baggerbot at their facilities.

Liquidity and Capital Resources

At December 31, 2022, the Company had cash of \$9,162.00. [*The Company intends to raise additional funds through an equity financing.*]

Debt

Creditor: Golden Gate Mechanical Inc.

Amount Owed: \$29,647

Interest Rate: 7.0%

PRINCIPAL SECURITY HOLDERS

Set forth below is information regarding the beneficial ownership of our Common Stock, our only outstanding class of capital stock, as of December 31, 2022, by (i) each person whom we know owned, beneficially, more than 10% of the outstanding shares of our Common Stock, and (ii) all of the current officers and directors as a group. We believe that, except as noted below, each named beneficial owner has sole voting and investment power with respect to the shares listed. Unless otherwise indicated herein, beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and includes voting or investment power with respect to shares beneficially owned.

Title of class: Common Stock

Stockholder Name: Golden Gate Mechanical, Inc. (100% owned by Thomas and Virginia Burns)

Amount and nature of Beneficial ownership: 5,387,100

Percent of class: 100.0

RELATED PARTY TRANSACTIONS

Name of Entity: Golden Gate Mechanical, Inc.

Names of 20% owners: Golden Gate Mechanical, Inc. is a Chapter S Corporation operating in the State of California.

Relationship to Company: 20%+ Owner

Nature / amount of interest in the transaction: Supply all the IP technology for Brigade Automation Corporation.

Material Terms: \$ 28,000. promissory Note for initial startup funding.

OUR SECURITIES

The company has authorized equity stock. As part of the Regulation Crowdfunding raise, the Company will be offering up to 732,876 of Common Stock.

Common Stock

The amount of security authorized is 10,000,000 with a total of 5,387,100 outstanding.

Voting Rights

One vote per share. Please see voting rights of securities sold in this offering below.

Material Rights

Voting Rights of Securities Sold in this Offering

Voting Proxy. Each Subscriber shall appoint the Chief Executive Officer of the Company (the “CEO”), or his or her successor, as the Subscriber’s true and lawful proxy and attorney, with the power to act alone and with full power of substitution, to, consistent with this instrument and on behalf of the Subscriber, (i) vote all Securities, (ii) give and receive notices and communications, (iii) execute any instrument or document that the CEO determines is necessary or appropriate in the exercise of its authority under this instrument, and (iv) take all actions necessary or appropriate in the judgment of the CEO for the accomplishment of the foregoing. The proxy and power granted by the Subscriber pursuant to this Section are coupled with an interest. Such proxy and power will be irrevocable. The proxy and power, so long as the Subscriber is an individual, will survive the death, incompetency and disability of the Subscriber and, so long as the Subscriber is an entity, will survive the merger or reorganization of the Subscriber or any other entity holding the Securities. However, the Proxy will terminate upon the closing of a firm-commitment underwritten public offering pursuant to an effective registration statement under the Securities Act of 1933 covering the offer and sale of Common Stock or the effectiveness of a registration statement under the Securities Exchange Act of 1934 covering the Common Stock.

What it means to be a minority holder

As a minority holder of [Security Name] of the Company, you will have limited rights in regard to the corporate actions of the Company, including additional issuances of securities, company repurchases of securities, a sale of the Company or its significant assets, or company transactions with related parties. Further, investors in this offering may have rights less than those of other investors and will have limited influence on the corporate actions of the Company.

Dilution

Investors should understand the potential for dilution. The investor’s stake in a company could be diluted due to the Company issuing additional shares. In other words, when the Company issues more shares, the percentage of the Company that you own will go down, even though the value of the Company may go up. You will own a smaller piece of a larger company. This increase in the number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round, or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible bonds, preferred shares or warrants) into stock.

If the Company decides to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if the Company offers dividends, and most early-stage companies are unlikely to offer dividends, preferring to invest any earnings into the Company).

The type of dilution that hurts early-stage investors most occurs when the company sells more shares in a “down round,” meaning at a lower valuation than in earlier offerings.

If you are making an investment expecting to own a certain percentage of the company or expecting each share to hold a certain amount of value, it’s important to realize how the value of those shares can decrease by actions taken by the company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.

RISK FACTORS

Uncertain Risk An investment in the Company "Brigade Automation Corporation" a high degree of risk and should only be considered by those who can afford the loss of their entire investment. Furthermore, the purchase of any of the Common Stock should only be undertaken by persons whose financial resources are sufficient to enable them to indefinitely retain an illiquid investment. Each investor in the Company should consider all of the information provided to such potential investor regarding the Company as well as the following risk factors, in addition to the other information listed in the Company’s Form C. The following risk factors are not intended, and shall not be deemed to be, a complete description of the commercial and other risks inherent in the investment in the Company. Our business projections are only projections There can be no assurance that Brigade Automation Corporation will meet our

projections. There can be no assurance that Brigade Automation Corporation will be able to find sufficient demand for the Bagger Bot, that people think it's a better option than a competing product, or that we will be able to provide the service at a level that allows Brigade Automation Corporation to make a profit and still attract business. Any valuation at this stage is difficult to assess. The valuation for the offering was established by Brigade Automation Corporation. Unlike listed companies that are valued publicly through market-driven stock prices, the valuation of private companies, especially startups, is difficult to assess and you may risk overpaying for your investment. The transferability of the Securities you are buying is limited. Any Common Stock purchased through this crowdfunding campaign is subject to SEC limitations of transfer. This means that the stock/note that you purchase cannot be resold for a period of one year. The exception to this rule is if you are transferring the stock back to Brigade Automation Corporation, to an "accredited investor," as part of an offering registered with the Commission, to a member of your family, trust created for the benefit of your family, or in connection with your death or divorce. Your investment could be illiquid for a long time. You should be prepared to hold this investment for several years or longer. For the 12 months following your investment there will be restrictions on how you can resell the securities you receive. More importantly, there is no established market for these securities and there may never be one. As a result, if you decide to sell these securities in the future, you may not be able to find a buyer. Brigade Automation Corporation may be acquired by an existing player in the Emergency Response industry. However, that may never happen or it may happen at a price that results in you losing money on this investment. If the Company cannot raise sufficient funds it will not succeed. Brigade Automation Corporation is offering Common Stock in the amount of up to 5 Million Dollars in this offering, and may close on any investments that are made. Even if the maximum amount is raised, Brigade Automation Corporation is likely to need additional funds in the future in order to grow, and if it cannot raise those funds for whatever reason, including reasons relating to the Company itself or the broader economy, it may not survive. If Brigade Automation Corporation manages to raise only the minimum amount of funds, sought, it will have to find other sources of funding for some of the plans outlined in "Use of Proceeds." We may not have enough capital as needed and may be required to raise more capital. We anticipate needing access to credit in order to support our working capital requirements as we grow. Although interest rates are low, it is still a difficult environment for obtaining credit on favorable terms. If we cannot obtain credit when we need it, we could be forced to raise additional equity capital, modify our growth plans, or take some other action. Issuing more equity may require bringing on additional investors. Securing these additional investors could require pricing our equity below its current price. If so, your investment could lose value as a result of this additional dilution. In addition, even if the equity is not priced lower, your ownership percentage would be decreased with the addition of more investors. If we are unable to find additional investors willing to provide capital, then it is possible that we will choose to cease our sales activity. In that case, the only asset remaining to generate a return on your investment could be our intellectual property. Even if we are not forced to cease our sales activity, the unavailability of credit could result in Brigade Automation Corporation performing below expectations, which could adversely impact the value of your investment. Terms of subsequent financings may adversely impact your investment. We will likely need to engage in common equity, debt, or preferred stock financings in the future, which may reduce the value of your investment in the Common Stock. Interest on debt securities could increase costs and negatively impact operating results. Preferred stock could be issued in series from time to time with such designation, rights, preferences, and limitations as needed to raise capital. The terms of preferred stock could be more advantageous to those investors than to the holders of Common Stock. In addition, if we need to raise more equity capital from the sale of Common Stock, institutional or other investors may negotiate terms that are likely to be more favorable than the terms of your investment, and possibly a lower purchase price per share. Management Discretion as to Use of Proceeds Our success will be substantially dependent upon the discretion and judgment of our management team with respect to the application and allocation of the proceeds of this Offering. The use of proceeds described below is an estimate based on our current business plan. We, however, may find it necessary or advisable to re-allocate portions of the net proceeds reserved for one category to another, and we will have broad discretion in doing so. Projections: Forward Looking Information Any projections or forward looking statements regarding our anticipated financial or operational performance are hypothetical and are based on management's best estimate of the probable results of our operations and will not have been reviewed by our independent accountants. These projections will be based on assumptions which management believes are reasonable. Some assumptions invariably will not materialize due to unanticipated events and circumstances beyond management's control. Therefore, actual results of operations will vary from such projections, and such variances may be material. Any projected results cannot be guaranteed. We are reliant on one main type of service. The Bagger Bot by Brigade Automation Corporation is reliant on the demand for high-speed bagging services, with the majority of revenue generating from the demand for large quantities of prepared sandbags being needed in a rush during emergency flood situations. Our revenues are therefore dependent upon the market for natural disasters, floods, and emergency responsiveness. We may never have an operational product or service. It is possible that there may never be an operational Brigade Automation Corporation or that the product may never be used to engage in transactions. It is possible that the failure to release the product is the result of a change in business model upon Company's making a determination that the business model, or some other factor, will not be in the best interest of Company and its stockholders/members/creditors. Some of our products are still in prototype phase and might never be operational products. It is possible that there may never be a future operational product design of the Bagger Bot that is 100% fully autonomous or that the Bagger Bot may never be used to engage in transactions. It is possible that the failure to release the Bagger Bot is the result of a change in business model upon Brigade Automation Corporation's making a determination that the business model, or some other factor, will not be in the best interest of the Company and its stockholders. Developing new products and technologies entails significant risks and uncertainties. We are currently in the research and development stage and have only manufactured a prototype for our Bagger Bot. Delays or cost overruns in the development of our Bagger Bot and failure of the product to meet our performance estimates may be caused by, among other things, unanticipated technological hurdles, difficulties in manufacturing, changes to design and regulatory hurdles. Any of these events could materially and adversely affect our operating performance and results of operations. Minority Holder; Securities with Voting Rights The Common Stock that an investor is buying has voting rights attached to them. However, you will be part of the minority shareholders of Brigade Automation Corporation and have agreed to appoint the President and Chief Financial Officer of the Company (the "CFO"), or his or her successor, as your voting proxy. You are trusting in management discretion in making good business decisions that will grow your investments. Furthermore, in the event of a liquidation of our company, you will only be paid out if there is any cash remaining after all of the creditors of our company have been paid out. You are trusting that management will make the best decision for the company. You are trusting in management discretion. You are buying securities as a

minority holder, and therefore must trust the management of Brigade Automation Corporation to make good business decisions that grow your investment. Insufficient Funds Brigade Automation Corporation might not sell enough securities in this offering to meet its operating needs and fulfill its plans, in which case it will cease operating and you will get nothing. Even if we sell all the common stock we are offering now, the Company will (possibly) need to raise more funds in the future, and if it can't get them, we will fail. Even if we do make a successful offering in the future, the terms of that offering might result in your investment in Brigade Automation Corporation being worth less, because later investors might get better terms. The Convertible Promissory Notes have no rights to vote until the date of maturity. The Convertible Promissory Notes have no voting rights. This means you are trusting in management discretion. You will also hold these non-voting securities as a minority holder. Therefore, you will have no say in the day-to-day operation of Brigade Automation Corporation and must trust the management of Brigade Automation Corporation to make good business decisions that grow your investment. Holders of our outstanding Preferred Stock have liquidation preferences over holders of Common Stock, including the Common Stock being offered in this offering. This liquidation preference is paid if the amount a holder of Preferred Stock would receive under the liquidation preference is greater than the amount such holder would have received if such holder's shares of Preferred Stock had been converted to Common Stock immediately prior to the liquidation event. If a liquidation event, including a sale of our company, were to occur then first all creditors and Preferred Stockholder of the Company will be paid out. If there is any cash remaining, then the Common stockholders will be paid. This offering involves "rolling closings," which may mean that earlier investors may not have the benefit of information that later investors have. Once we meet our target amount for this offering, we may request that StartEngine instruct the escrow agent to disburse offering funds to us. At that point, investors whose subscription agreements have been accepted will become our investors. All early-stage companies are subject to a number of risks and uncertainties, and it is not uncommon for material changes to be made to the offering terms, or to companies' businesses, plans or prospects, sometimes on short notice. When such changes happen during the course of an offering, we must file an amended to our Form C with the SEC, and investors whose subscriptions have not yet been accepted will have the right to withdraw their subscriptions and get their money back. Investors whose subscriptions have already been accepted, however, will already be our investors and will have no such right. Our new product could fail to achieve the sales projections we expected. Our growth projections are based on an assumption that with an increased advertising and marketing budget the Bagger Bot will be able to gain traction in the marketplace at a faster rate than our working prototype has. It is possible that the Bagger Bot will fail to gain market acceptance for any number of reasons. If the Bagger Bot fails to achieve significant sales and acceptance in the marketplace, this could materially and adversely impact the value of your investment. We face significant market competition. We will compete with larger, established Sandbagging companies who currently have sandbag machine products on the market. They may have much better financial means and marketing/sales and human resources than us. They may succeed in developing and marketing competing equivalent bagging machines earlier than us, or superior sandbag machines than those developed by us. There can be no assurance that competitors will render our technology or products obsolete or that the products developed by us will be preferred to any existing or newly developed technologies. It should further be assumed that competition will intensify. We are an early stage company and have not yet generated any profits. Brigade Automation Corporation was formed on October 1, 2021. Accordingly, the Company has a limited history upon which an evaluation of its performance and future prospects can be made. Our current and proposed operations are subject to all business risks associated with new enterprises. These include likely fluctuations in operating results as the Company reacts to developments in its market, managing its growth and the entry of competitors into the market. We will only be able to pay dividends on any shares once our directors determine that we are financially able to do so. Brigade Automation Corporation has had no revenues generated since inception. There is no assurance that we will be profitable in the next 3 years or generate sufficient revenues to pay dividends to the holders of the shares. We are an early stage company and have limited revenue and operating history. Brigade Automation Corporation has a short history, no customers, and effectively no revenue. If you are investing in this company, it's because you think that the Bagger Bot is a good idea, that the team will be able to successfully market, and sell the product or service, that we can price them right and sell them to enough people so that the Company will succeed. Further, we have never turned a profit and there is no assurance that we will ever be profitable. We have existing patents that we might not be able to protect properly. One of Brigade Automation Corporation's most valuable assets is its intellectual property. The Company holds the license to 2 patents, issued in both the USA and China. We believe one of the most valuable components of the Company is our intellectual property portfolio. Due to the value, competitors may misappropriate or violate the rights owned by Brigade Automation Corporation. The Company intends to continue to protect its intellectual property portfolio from such violations. It is important to note that unforeseeable costs associated with such practices may invade the capital of the Company. We have pending patent approvals that might be vulnerable. One of Brigade Automation Corporation's most valuable assets is its intellectual property. The Company's intellectual property such as patents, trademarks, copyrights, Internet domain names, and trade secrets may not be registered with the proper authorities. We believe one of the most valuable components of the Company is our intellectual property portfolio. Due to the value, competitors may misappropriate or violate the rights owned by the Company. The Company intends to continue to protect its intellectual property portfolio from such violations. It is important to note that unforeseeable costs associated with such practices may invade the capital of the Company due to its unregistered intellectual property. Our trademarks, copyrights and other intellectual property could be unenforceable or ineffective. Intellectual property is a complex field of law in which few things are certain. It is possible that competitors will be able to design around our intellectual property, find prior art to invalidate it, or render the patents unenforceable through some other mechanism. If competitors are able to bypass our trademark and copyright protection without obtaining a sublicense, it is likely that the Company's value will be materially and adversely impacted. This could also impair Brigade Automation Corporation's ability to compete in the marketplace. Moreover, if our trademarks and copyrights are deemed unenforceable, the Company will almost certainly lose any potential revenue it might be able to raise by entering into sublicenses. This would cut off a significant potential revenue stream for the Company. The cost of enforcing our trademarks and copyrights could prevent us from enforcing them. Trademark and copyright litigation has become extremely expensive. Even if we believe that a competitor is infringing on one or more of our trademarks or copyrights, we might choose not to file suit because we lack the cash to successfully prosecute a multi-year litigation with an uncertain outcome; or because we believe that the cost of enforcing our trademark(s) or copyright(s) outweighs the value of winning the suit in light of the risks and consequences of losing it; or for some other reason. Choosing not to enforce our trademark(s) or copyright(s) could have adverse consequences for Brigade Automation Corporation, including undermining the credibility of our

intellectual property, reducing our ability to enter into sublicenses, and weakening our attempts to prevent competitors from entering the market. As a result, if we are unable to enforce our trademark(s) or copyright(s) because of the cost of enforcement, your investment in the Company could be significantly and adversely affected. The loss of one or more of our key personnel, or our failure to attract and retain other highly qualified personnel in the future, could harm our business. To be successful, Brigade Automation Corporation requires capable people to run its day to day operations. As the Company grows, it will need to attract and hire additional employees in sales, marketing, design, development, operations, finance, legal, human resources and other areas. Depending on the economic environment and the Company's performance, we may not be able to locate or attract qualified individuals for such positions when we need them. We may also make hiring mistakes, which can be costly in terms of resources spent in recruiting, hiring and investing in the incorrect individual and in the time delay in locating the right employee fit. If we are unable to attract, hire and retain the right talent or make too many hiring mistakes, it is likely our business will suffer from not having the right employees in the right positions at the right time. This would likely adversely impact the value of your investment. We rely on third parties to provide services essential to the success of our business. We rely on third parties to provide a variety of essential business functions for us, including manufacturing, shipping, accounting, legal work, public relations, advertising, retailing, and distribution. It is possible that some of these third parties will fail to perform their services or will perform them in an unacceptable manner. It is possible that we will experience delays, defects, errors, or other problems with their work that will materially impact our operations and we may have little or no recourse to recover damages for these losses. A disruption in these key or other suppliers' operations could materially and adversely affect our business. As a result, your investment could be adversely impacted by our reliance on third parties and their performance.

Market Competition and Operating History Any statements presented in the offering are not historical facts but forward looking statements. This offering is based on current expectations and involve certain risks and uncertainties that may cause actual results to differ significantly from such estimates. Brigade Automation Corporation does not assume any obligation to update or revise any such forward looking statements whether as a result of new developments or otherwise. The Company's CFO and President is also the President of the Company's majority shareholder and owner of the IP. Mr. Burns currently is the President and CFO of Brigade Automation Corporation, and the President of Brigade's majority owner, Golden Gate Mechanical, Inc. Mr. Burns currently splits his time 50/50 between both companies while he is developing the BaggerBot business. The current executive plan includes: as the company grows, Mr. Burns will hire a new CFO to take over the officer role of the company. He may stay on as President of the business to ensure the company is profitable and achieves its goals of leasing 5-10 BaggerBot machines in the future. At this time, Mr. Burns plans to continue in both roles until Brigade is profitable and plans to hire a sales manager, field operations supervisor, and field technician/driver who will set up and train BaggerBot customers.

RESTRICTIONS ON TRANSFER

The common stock sold in the Regulation CF offering, may not be transferred by any purchaser, for a period of one-year beginning when the securities were issued, unless such securities are transferred:

- (1) to the Company;
- (2) to an accredited investor;
- (3) as part of an offering registered with the SEC; or
- (4) to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance.

SIGNATURES

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100-503), the issuer certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form C and has duly caused this Form to be signed on its behalf by the duly authorized undersigned, on November 22, 2023.

NOTE 1: NATURE OF OPERATIONS

Brigade Automation Corporation dba BaggerBots (the “Company”) is a corporation organized September 24, 2021 under the laws of Delaware. The Company was formed to efficiently produce sand and gravel bags at the highest rate possible using robotic bag filling machines. Bagger Bots are easily transportable, and designed for large scale sustainable bag production to handle emergency and day-to-day demands for our future customers.

As of September 24, 2021 (inception), the Company has not yet commenced planned principal operations nor generated revenue. The Company’s activities since inception have consisted of formation activities and preparations to raise capital. Once the Company commences its planned principal operations, it will incur significant additional expenses. The Company is dependent upon additional capital resources for the commencement of its planned principal operations and is subject to significant risks and uncertainties; including failing to secure additional funding to operationalize the Company’s planned operations or failing to profitably operate the business.

NOTE 2: GOING CONCERN

The accompanying financial statement has been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has not yet commenced planned principal operations, plan to incur significant costs in pursuit of its capital financing plans, and has not generated revenues or profits since inception. The Company’s ability to continue as a going concern for the next twelve months following the date the financial statement was available to be issued is dependent upon its ability to obtain additional capital financing from investors sufficient to meet current and future obligations and deploy such capital to produce profitable operating results. No assurance can be given that the Company will be successful in these efforts.

These factors, among others, raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time. The financial statement does not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 3: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (GAAP).

The Company adopted the calendar year as its basis of reporting.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash Equivalents and Concentration of Cash Balance

The Company considers all highly liquid securities with an original maturity of less than three months to be cash equivalents. The Company's cash and cash equivalents in bank deposit accounts, at times, may exceed federally insured limits. As of September 24, 2021 (inception), the Company has not established a deposit account with a financial institution.

Fair Value of Financial Instruments

Financial Accounting Standards Board ("FASB") guidance specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect market assumptions. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 primarily consists of financial instruments whose value is based on quoted market prices such as exchange-traded instruments and listed equities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly (e.g., quoted prices of similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active).

Level 3 - Unobservable inputs for the asset or liability. Financial instruments are considered Level 3 when their fair values are determined using pricing models, discounted cash flows or similar techniques and at least one significant model assumption or input is unobservable.

The carrying amounts reported in the balance sheet approximate their fair value.

Organizational Costs

In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 720, organizational costs, including accounting fees, legal fees, and costs of incorporation, are expensed as incurred.

Revenue Recognition

The Company is currently pre-revenue and will follow the provisions and the disclosure requirements described in ASU 2014-09 also referred to as Topic 606.

Revenue recognition, according to Topic 606, is determined using the following steps:

Identification of the contract, or contracts, with the customer: the Company determines the existence of a contract with a customer when the contract is mutually approved; the rights of each party in relation to the services to be transferred can be identified, the payment terms for the services can be identified, the customer has the capacity and intention to pay and the contract has commercial substance.

Identification of performance obligations in the contract: Performance obligations consist of a promised in a contract (written or oral) with a customer to transfer to the customer either a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer.

Recognition of revenue when, or how, a performance obligation is met: Revenues are recognized when or as control of the promised goods or services is transferred to customers.

The Company will earn revenues from the sales of products via wholesale and retail channels.

Income Taxes

The Company uses the liability method of accounting for income taxes as set forth in ASC 740, *Income Taxes*. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is unlikely that the deferred tax assets will not be realized.

The Company assesses its income tax positions and record tax benefits for all years subject to examination based upon our evaluation of the facts, circumstances and information available at the reporting date. In accordance with ASC 740-10, for those tax positions where there is a greater than 50% likelihood that a tax benefit will be sustained, the Company's policy is to record the largest amount of tax benefit that is more likely than not to be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where there is less than 50% likelihood that a tax benefit will be sustained, no tax benefit will be recognized in the financial statement. The Company has evaluated its income tax positions and has determined that it does not have any uncertain tax positions. The Company will recognize interest and penalties related to any uncertain tax positions through its income tax expense.

The Company accounts for income taxes with the recognition of estimated income taxes payable or refundable on income tax returns for the current period and for the estimated future tax effect attributable to temporary differences and carryforwards. Measurement of deferred income items is based on enacted tax laws including tax rates, with the measurement of deferred income tax assets being reduced by available tax benefits not expected to be realized in the immediate future. The Company estimates it has net operating loss carryforwards of \$0 as of September 24, 2021 (inception). The Company pays taxes at an effective blended rate of 28% and has used this effective rate to derive a net deferred tax asset of \$0 as of September 24, 2021 (inception).

The Company files U.S. federal and state income tax returns. All tax periods since inception remain open to examination by the taxing jurisdictions to which the Company is subject.

NOTE 4: STOCKHOLDERS' EQUITY (DEFICIT)

The Company has authorized 10,000,000 shares of \$0.00001 par value Common Stock. As of September 24, 2021 (inception), no shares were issued or outstanding.

If and upon a liquidation of the Company, the holders of Common stock have rights to all available net assets available for distribution on a pro rata basis. Common Stock holders shall have voting rights.

NOTE 5: RECENT ACCOUNTING PRONOUNCEMENTS

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606). This ASU supersedes the previous revenue recognition requirements in ASC Topic 605—Revenue Recognition and most industry-specific guidance throughout the ASC. The core principle within this ASU is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration expected to be received for those goods or services. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers*, which deferred the effective

date for ASU 2014-09 by one year to fiscal years beginning after December 15, 2017, while providing the option to early adopt for fiscal years beginning after December 15, 2016. Transition methods under ASU 2014-09 must be through either (i) retrospective application to each prior reporting period presented, or (ii) retrospective application with a cumulative effect adjustment at the date of initial application. The Company adopted this new standard effective at its inception date.

In February 2016, the FASB issued ASU 2016-02, *Leases* (Topic 842). This ASU requires a lessee to recognize a right-of-use asset and a lease liability under most operating leases in its balance sheet. The ASU is effective for annual and interim periods beginning after December 15, 2021, including interim periods within those fiscal years. Early adoption is permitted. We are continuing to evaluate the impact of this new standard on our financial reporting and disclosures.

Management does not believe that any other recently issued, but not yet effective, accounting standards could have a material effect on the accompanying financial statements. As new accounting pronouncements are issued, we will adopt those that are applicable under the circumstances.

NOTE 6: SUBSEQUENT EVENTS

Management's Evaluation

Management has evaluated subsequent events through October 26, 2021, the date the financial statement was available to be issued. Based on this evaluation, no additional material events were identified which require adjustment or disclosure in this financial statement.

INDEPENDENT ACCOUNTANT'S REVIEW REPORT

To Management
Brigade Automation Corporation.

We have reviewed the accompanying financial statements of the Company which comprise the statement of financial position as of December 31, 2021 and the related statements of operations, statement of changes in shareholder equity, and statement of cash flows for the short year then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of Company management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

Accountant's Responsibility

Our responsibility is to conduct the review engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Accountant's Conclusion

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

Going Concern

As discussed in Note 8, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern. Management has evaluated these conditions and plans to generate revenues and raise capital as needed to satisfy its capital needs.

Brigade Automation Corporation
Notes to the Unaudited Financial Statements
December 31st, 2021
\$USD

NOTE 1 – ORGANIZATION AND NATURE OF ACTIVITIES

Brigade Automation Corporation (“the Company”) was formed in Delaware on September 24th, 2021. The Company plans to earn revenue using Robotic Technology in the Emergency Response Management Field. The Company’s headquarters will be located in Texas. The Company’s customers will be located in the United States.

The Company will continue a crowdfunding campaign under regulation CF in 2022 to raise operating capital.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Our financial statements are prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). Our fiscal year ends on December 31. The Company has no interest in variable interest entities and no predecessor entities.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all cash balances, and highly liquid investments with maturities of three months or less when purchased.

Fair Value of Financial Instruments

ASC 820 “*Fair Value Measurements and Disclosures*” establishes a three-tier fair value hierarchy, which prioritizes the inputs in measuring fair value. The hierarchy prioritizes the inputs into three levels based on the extent to which inputs used in measuring fair value are observable in the market.

These tiers include:

Level 1: defined as observable inputs such as quoted prices in active markets;

Level 2: defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and

Level 3: defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Concentrations of Credit Risks

The Company’s financial instruments that are exposed to concentrations of credit risk primarily consist of its cash and cash equivalents. The Company places its cash and cash equivalents with financial institutions of high credit worthiness. The Company’s management plans to assess the financial strength and credit worthiness of any parties to which it extends funds, and as such, it believes that any associated credit risk exposures are limited.

Revenue Recognition

The Company recognizes revenue from the sale of products and services in accordance with ASC 606, "Revenue Recognition" following the five steps procedure:

- Step 1: Identify the contract(s) with customers
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to performance obligations
- Step 5: Recognize Revenue When or As Performance Obligations Are Satisfied

The Company will identify and analyze its performance obligations with respect to customer contracts once the first contract is signed.

Advertising Costs

Advertising costs associated with marketing the Company's products and services are generally expensed as costs are incurred.

General and Administrative

General and administrative expenses consist of payroll and related expenses for employees and independent contractors involved in general corporate functions, including accounting, finance, tax, legal, business development, and other miscellaneous expenses.

Equity based compensation

The Company does not currently have an equity-based compensation plan.

Income Taxes

The Company is subject to Corporate income and state income taxes in the state it does business. A deferred tax asset as a result of net operating losses (NOL) has not been recognized due to the uncertainty of future positive taxable income to utilize the NOL. Due to the recently enacted Tax Cuts and Jobs Act, any NOLs will be limited to 80% of taxable income generated in future years.

Recent accounting pronouncements

The FASB issues ASUs to amend the authoritative literature in ASC. There have been a number of ASUs to date that amend the original text of ASC. Management believes that those issued to date either (i) provide supplemental guidance, (ii) are technical corrections, (iii) are not applicable to us or (iv) are not expected to have a significant impact on our financial statements.

NOTE 3 – RELATED PARTY TRANSACTIONS

The Company follows ASC 850, "Related Party Disclosures," for the identification of related parties and disclosure of related party transactions. The Company had outstanding \$28,000 in loans from a related party entity that is controlled by the CEO and founder of the Company. The loan represents startup costs incurred on the Company's behalf, does not accrue interest, and is due on demand.

The Company issued 5,387,100 shares of its common stock to an entity controlled by the CEO and founder.

NOTE 4 – COMMITMENTS, CONTINGENCIES, COMPLIANCE WITH LAWS AND REGULATIONS

We are currently not involved with or know of any pending or threatening litigation against the Company or any of its officers. Further, the Company is currently complying with all relevant laws and regulations. The Company does not have any long-term commitments or guarantees.

NOTE 5 – DEBT

See Note 3.

NOTE 6 – EQUITY

The Company has authorized 10,000,000 of common shares with no par value per share. 5,387,100 shares were issued and outstanding as of December 31st, 2021.

Common stockholders are entitled to one vote and can receive dividends at the discretion of the boards of directors.

NOTE 7 – SUBSEQUENT EVENTS

The Company has evaluated events subsequent to December 31, 2021 to assess the need for potential recognition or disclosure in this report. Such events were evaluated through March 14, 2022, the date these financial statements were available to be issued.

The Company has raised approximately \$70k through its ongoing crowdfunding campaign. The Company is offering a maximum of 732,876 shares of its common stock at a price of \$1.46 per share.

NOTE 8 – GOING CONCERN

The accompanying balance sheet has been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The entity has not commenced principal operations and will likely realize losses prior to generating positive working capital for an unknown period of time. During the next twelve months, the Company intends to finance its operations with funds from a crowdfunding campaign. No assurance can be given that the Company will be successful in these efforts. These factors, among others, raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities.

NOTE 9 – RISKS AND UNCERTAINTIES

COVID-19

The spread of COVID-19 has severely impacted many local economies around the globe. In many countries, businesses are being forced to cease or limit operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide, resulting in an economic slowdown. Global stock markets have also experienced great volatility and a significant weakening. Governments and central banks have responded with monetary and fiscal interventions to stabilize economic conditions.

The duration and impact of the COVID-19 pandemic, as well as the effectiveness of government and central bank responses remains unclear currently. It is not possible to reliably estimate the duration and severity of these consequences, as well as their impact on the financial position and results of the Company for future periods. Note: this disclosure assumes there is no significant doubt about the entity's ability to continue as a going concern.

CERTIFICATION

I, Thomas Burns, Principal Executive Officer of Brigade Automation Corporation, hereby certify that the financial statements of Brigade Automation Corporation included in this Report are true and complete in all material respects.

Thomas Burns

CEO
