
Dear friends,

I hope you are all well!

I have recently joined Corvidane as CEO and Board member. Corvidane is developing a treatment to prevent heart attacks, strokes, and liver transplants from NASH (Non-Alcoholic Steatohepatitis).

We are raising funds through a new Crowdfunding process called Reg CF. You can own equity in Corvidane through this new investing platform. Your Return on Investment comes from the sale or license of Corvida™ in 3 -5 years and we are already engaged with several interested companies. We are opening this up to family and friends first. More information can be found at the following site.

<https://wefunder.com/corvidane>

<https://help.wefunder.com/testing-the-waters-legal-disclosure>

Please feel free to pass this on to friends and colleagues in your network.

Paresh.

I am Damion Boyer, the Co-founder of Corvidane, a unique pharmaceutical company developing Corvida™, a drug to prevent heart attacks, stroke and the leading cause of liver transplants.

We have a world-class team and research partners in place to successfully advance Corvida™'s development. I am asking for your support with our SEC Regulated Crowdfunding campaign by investing or simply sharing this opportunity with others. To learn more, go to: www.wefunder.com/corvidane.

Please feel free to contact me with any questions and thank you. Damion.

Disclosure: *"We are 'testing the waters' to gauge investor interest in an offering under Regulation Crowdfunding. No money or other consideration is being solicited. If sent, it will not be accepted. No offer to buy securities will be accepted. No part of the purchase price will be received until a Form C is filed and only through Wefunder's platform. Any indication of interest involves no obligation or commitment of any kind."*

As you know, for the past several years I have been involved in the development of Corvida™ to prevent the two leading causes of death worldwide and the leading cause of liver transplants.

In a few weeks we will be launching our [Regulation Crowdfunding](#) (Reg CF) campaign with a goal of \$1M. We are actively seeking a [Lead Investor](#) to invest a minimum of \$50k. This could be a great opportunity for you or someone you know that wants to make an investment that can also make a serious impact on global health.

We have already been awarded \$700k in subsidies from the Dutch government for further research on human tissues and cells. This includes a study that will demonstrate Corvida™'s affects on genes associated with Atherosclerosis, with results due in January of 2022.

I invite you to preview our current Reg CF landing page: www.wefunder.com/corvidane.

On this page, you can read more about our world-class team of medical experts, our research partners, our patents and our exit strategy. The full video is being produced by [David Mathis](#), the website and pitch deck are being revised and all will be available before the launch.

Let me know if you have any questions or would like to discuss further. Please feel free to share this message with as many people as possible and thank you! Damion.

[Legal disclosure.](#)

I hope all is well.

I wanted to update you on an exciting development.

As you know, for the past several years I have been involved in the development of Corvida™ to prevent the two leading causes of death worldwide and the leading cause of liver transplants.

In a few weeks we will be launching our [Regulation Crowdfunding](#) (Reg CF) campaign with a goal of \$1M. We are actively seeking a [Lead Investor](#), but more importantly we want to share our story with as many people as possible.

We have already been awarded \$700k in subsidies from the Dutch government for further research on human tissues and cells. This includes a study that will demonstrate Corvida™'s affects on genes associated with Atherosclerosis, with results due in January of 2022.

I invite you to visit our current Reg CF landing page www.wefunder.com/corvidane to learn more about our world-class team, our research partners, our patents and our exit strategy. The full video is in production, the website and pitch deck are being revised and all will be available before the public launch.

If you are interested in being our Lead investor I would like to arrange a time for Paresh and I to speak with you. If this isn't a fit, please share this opportunity with anyone you think would be interested. Thank you. Damion.

The final version of our video is on the WeFunder site.

If you are able to invest, it is greatly appreciated. If you are unable, please share our story with anyone you think would be interested, especially if they have been affected by Heart Attack, Stroke or have Type 2 Diabetes. This is an investment that can have real impact.

[Legal Disclosure](#)

Thank you. Damion.

If you have interest in being our Lead Investor, we should talk over the weekend (the Lead has voting control over the entire \$1M). If not, please share our story with anyone you think would be interested, especially if they have been affected by Heart Attack, Stroke or have Type 2 Diabetes. This is an investment that can bring some real impact.

If this isn't a fit, please share this opportunity with anyone you think would be interested. Thank you. Damion.

We're doing it again tomorrow. I won't send any more invites after this, but I do want my family and friends to have an opportunity to take advantage of Reg CF.
