Howdy friends! My cofounder [Som Mohapatra](#) and I've been working full-time for the past several months on Quantbase - the first robo-advisor for high risk.

After adding 4,000+ to our waitlist, getting SEC-registered, and raising money from many wonderful angels and VC firms, we want to open the opportunity for all our supporters to invest in us! We've launched(!!) to a few hundred early adopters already and plan to do a broader marketing push this month.

"We are 'testing the waters' to gauge investor interest in an offering under Regulation Crowdfunding. No money or other consideration is being solicited. If sent, it will not be accepted. No offer to buy securities will be accepted. No part of the purchase price will be received until a Form C is filed and only through Wefunder's platform. Ok, officially making my first Facebook post about Quantbase!

My cofounder [Thomas Stewart](#) and I have been working full-time for the past several months on Quantbase (I'm on a gap year from school!), raised \$500,000, and gotten \$70,000,000 in pledged assets to build the Vanguard of the future, based on two ideas:

1. There ought to be a way to make high-risk investing as easy as investing in the S&P, for those that have the risk appetite but not the time.
2. The higher risk (alternative) investments of today will be part of a sound portfolio of tomorrow.

After adding 4,000+ to our waitlist and getting SEC-registered, I wanted to open the opportunity to some of my friends to invest in us! We've launched(!!) to a few hundred early adopters already and plan to do a broader marketing push this month.
