Summary

CALCULATED is film franchise based on a new top-rated novel series, released by one of Amazon's leading publishers. The franchise is headed by a team that has worked on 23 major studio-released movies and series earning over \$4 billion in revenue, and has relationships with major studios including Sony, Universal, Warner Media, Disney, Viacom/CBS/Paramount, and Lionsgate. Along with this, CALCULATED Development has committed to share 25% of their profits with the National Center on Sexual Exploitation, a top organization fighting human trafficking. Jason is Co-Founder and CEO at OneDoor Studios, a film production and consulting company managed by a commercial and creative team that has provided business, funding and distribution services for over twenty studio released motion pictures, television network series and specials, with combined production costs of over \$470 million and global rights earnings exceeding \$4 billion.

Jason's awareness of the power of great stories to inspire and enable us to grow in wisdom and virtue drove him to discover epic stories from his youth. The more he read and pondered the answers to life's most important questions (who are we? where did we come from? why are we here? and where are we going after we leave this life?), the clearer it became that these questions and answers were the core themes of the most powerfully stories throughout time. During his almost twenty years academically teaching philosophy and history on multiple continents, Jason's passion for Story grew along with a list of classic and contemporary literature he longed to produce into films.

Jason established Lady of the Lake Studios in 2018, a founding partner of OneDoor Studios, and is now producing motion pictures that are powerful in entertainment value as well as filling audiences

with hope and longing for all that is good, beautiful, and true. He has established deep industry relationships in China, where he resided for 6 years with his family, and oversees a lively network of over 60 producers and distributors. He continues to use his passion for China and film to advance OneDoor Studio's mission.
