FORM C-AR

UNDER THE SECURITIES ACT OF 1933

(Mark one.)

- ☐ Form C: Offering Statement
- ☐ Form C-U: Progress Update
- ☐ Form C/A: Amendment to Offering Statement
 - ☐ Check box if Amendment is material and investors must reconfirm within five business days.
- ☒ Form C-AR: Annual Report
- ☐ Form C-AR/A: Amendment to Annual Report
- ☐ Form C-TR: Termination of Reporting

Name of Issuer:

Avivid Water Technology, LLC

Legal status of Issuer:

Form:

Limited liability company

Jurisdiction of Incorporation/Organization:

Colorado

Date of Organization:

February 8, 2005

Physical Address of Issuer:

21 South Sunset Street, Longmont, CO, 80501 United States

Website of Issuer:

<https://www.avividwater.com>

Current Number of Employees:

1

	Most recent fiscal year-end (2022)	Prior fiscal year-end (2021)
Total Assets	\$1,218,488.42	\$1,196,852
Cash & Cash Equivalents	\$15,706.00	\$6,367
Accounts Receivable	\$310.27	\$0
Short-term Debt	\$223,125.22	\$586,386
Long-term Debt	\$816,570.54	\$184,500
Revenues/Sales	\$20,414.30	\$150,815
Cost of Goods Sold	\$778.68	(\$9,035)*
Taxes Paid	\$0	\$0
Net Income	(\$314,359.52)	(\$358,476)

*Cost of Revenues in the Company's financial statements

The jurisdictions in which the issuer intends to offer the securities:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District Of Columbia, Florida, Georgia, Guam, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virgin Islands, U.S., Virginia, Washington, West Virginia, Wisconsin, Wyoming, American Samoa, and Northern Mariana Islands

FORM C-AR
Avid Water Technology, LLC

This Form C-AR (including the cover page and all exhibits attached hereto, the "**Form C-AR**") is being furnished by **Avid Water Technology, LLC**, a Colorado limited liability company ("**Avid**" the "**Company**," as well as references to "**we**," "**us**," or "**our**") for the sole purpose of providing certain information about the Company as required by the Securities and Exchange Commission ("**SEC**").

No federal or state securities commission or regulatory authority has passed upon the accuracy or adequacy of this document. The U.S. Securities and Exchange Commission does not pass upon the accuracy or completeness of any disclosure document or literature. The Company is filing this Form C-AR pursuant to Regulation CF (§ 227.100 et seq.) which requires that it must file a report with the Commission annually and post the report on its website at <https://www.avidwater.com> no later than 120 days after the end of each fiscal year covered by the report. The Company may terminate its reporting obligations in the future in accordance with Rule 202(b) of Regulation CF (§ 227.202(b)) by 1) being required to file reports under Section 13(a) or Section 15(d) of the Exchange Act of 1934, as amended, 2) filing at least one annual report pursuant to Regulation CF and having fewer than 300 holders of record, 3) filing annual reports for three years pursuant to Regulation CF and having assets equal to or less than \$10,000,000, 4) the repurchase of all the Securities sold pursuant to Regulation CF by the Company or another party, or 5) the liquidation or dissolution of the Company.

The date of this Form C-AR is May 1, 2023.

THIS FORM C-AR DOES NOT CONSTITUTE AN OFFER TO PURCHASE OR SELL SECURITIES.

ABOUT THIS FORM C-AR

You should rely only on the information contained in this Form C-AR. We have not authorized anyone to provide you with information different from that contained in this Form C-AR. You should assume that the information contained in this Form C-AR is accurate only as of the date of this Form C-AR, regardless of the time of delivery of this Form C-AR. Our business, financial condition, results of operations, and prospects may have changed since that date. Statements contained herein as to the content of any agreements or other document are summaries and, therefore, are necessarily selective and incomplete and are qualified in their entirety by the actual agreements or other documents.

CAUTIONARY NOTE CONCERNING FORWARD-LOOKING STATEMENTS

This Form C-AR and any documents incorporated by reference herein or therein contain forward-looking statements and are subject to risks and uncertainties. All statements other than statements of historical fact or relating to present facts or current conditions included in this Form C-AR are forward-looking statements. Forward-looking statements give the Company's current reasonable expectations and projections relating to its financial condition, results of operations, plans, objectives, future performance and business. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "believe," "may," "should," "can have," "likely" and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events.

The forward-looking statements contained in this Form C-AR and any documents incorporated by reference herein or therein are based on reasonable assumptions the Company has made in light of its industry experience, perceptions of historical trends, current conditions, expected future developments and other factors it believes are appropriate under the circumstances. As you read and consider this Form C-AR, you should understand that these statements are not guarantees of performance or results. They involve risks, uncertainties (many of which are beyond the Company's control) and assumptions. Although the Company believes that these forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect its actual operating and financial performance and cause its performance to differ materially from the performance anticipated in the forward-looking statements. Should one or more of these risks or uncertainties materialize, or should any of these assumptions prove incorrect or change, the Company's actual operating and financial performance may vary in material respects from the performance projected in these forward-looking statements.

Any forward-looking statement made by the Company in this Form C-AR or any documents incorporated by reference herein or therein speaks only as of the date of this Form C-AR. Factors or events that could cause our actual operating and financial performance to differ may emerge from time to time, and it is not possible for the Company to predict all of them. The Company undertakes no obligation to update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

RISK FACTORS

Investing in the Securities involves a high degree of risk and may result in the loss of your entire investment. Before making an investment decision with respect to the Securities, we urge you to carefully consider the risks described in this section and other factors set forth in this Form C-AR. In addition to the risks specified below, the Company is subject to same risks that all companies in its business, and all companies in the economy, are exposed to. These include risks relating to economic downturns, political and economic events and technological developments (such as hacking and the ability to prevent hacking). Additionally, early-stage companies are inherently riskier than more developed companies. Prospective Investors should consult with their legal, tax and financial advisors prior to making an investment in the Securities. The Securities should only be purchased by persons who can afford to lose all of their investment.

Risks Related to the Company's Business and Industry

We have a limited operating history upon which you can evaluate our performance, and accordingly, our prospects must be considered in light of the risks that any new company encounters.

The Company is still in an early phase and we are just beginning to implement our business plan. There can be no assurance that we will ever operate profitably. The likelihood of our success should be considered in light of the problems, expenses, difficulties, complications and delays usually encountered by early stage companies. The Company may not be successful in attaining the objectives necessary for it to overcome these risks and uncertainties.

Global crises and geopolitical events, including without limitation, COVID-19 can have a significant effect on our business operations and revenue projections.

With shelter-in-place orders and non-essential business closings potentially happening intermittently throughout 2022 and into the future due to COVID-19, the Company's revenue may have been, and may continue to be, adversely affected.

The amount of capital the Company is attempting to raise in this Offering may not be enough to sustain the Company's current business plan.

In order to achieve the Company's near and long-term goals, the Company may need to procure funds in addition to the amount raised in the Offering. There is no guarantee the Company will be able to raise such funds on acceptable terms or at all. If we are not able to raise sufficient capital in the future, we may not be able to execute our business plan, our continued operations will be in jeopardy and we may be forced to cease operations and sell or otherwise transfer all or substantially all of our remaining assets, which could cause an Investor to lose all or a portion of their investment.

We may face potential difficulties in obtaining capital.

We may have difficulty raising needed capital in the future as a result of, among other factors, our lack of revenues from sales, as well as the inherent business risks associated with our Company and present and future market conditions. We will require additional funds to execute our business strategy and conduct our operations. If adequate funds are unavailable, we may be required to delay, reduce the scope of or eliminate one or more of our research, development or commercialization programs, product launches or marketing efforts, any of which may materially harm our business, financial condition and results of operations.

We may implement new lines of business or offer new products and services within existing lines of business.

As an early-stage company, we may implement new lines of business at any time. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, we may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved, and price and profitability targets may not prove feasible. We may not be successful in introducing new products and services in response to industry trends or developments in technology, or those new products may not achieve market acceptance. As a result, we could lose business, be forced to price products and services on less advantageous terms to retain or attract clients or be subject to cost increases. As a result, our business, financial condition or results of operations may be adversely affected.

We rely on other companies to provide components and services for our products.

We depend on suppliers and contractors to meet our contractual obligations to our customers and conduct our operations. Our ability to meet our obligations to our customers may be adversely affected if suppliers or contractors do not provide the agreed-upon supplies or perform the agreed-upon services in compliance with customer requirements and in a timely and cost-effective manner. Likewise, the quality of our products may be adversely impacted if companies to whom we delegate manufacture of major components or subsystems for our products, or from whom we acquire such items, do not provide components which meet required specifications and perform to our and our customers' expectations. Our suppliers may be unable to quickly recover from natural disasters and other events beyond their control and may be subject to additional risks such as financial problems that limit their ability to conduct their operations. The risk of these adverse effects may be greater in circumstances where we rely on only one or two contractors or suppliers for a particular component. Our products may utilize custom components available from only one source. Continued availability of those components at acceptable prices, or at all, may be affected for any number of reasons, including if those suppliers decide to concentrate on the production of common components instead of components customized to meet our requirements. The supply of components for a new or existing product could be delayed or constrained, or a key manufacturing vendor could delay shipments of completed products to us adversely affecting our business and results of operations.

We rely on various intellectual property rights, including trademarks, in order to operate our business.

The Company relies on certain intellectual property rights to operate its business. The Company's intellectual property rights may not be sufficiently broad or otherwise may not provide us a significant competitive advantage. In addition, the steps that we have taken to maintain and protect our intellectual property may not prevent it from being challenged, invalidated, circumvented or designed-around, particularly in countries where intellectual property rights are not highly developed or protected. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons, or countries may require compulsory licensing of our intellectual property. Our failure to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect our intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact our competitive position and results of operations. We also rely on nondisclosure and noncompetition agreements with employees, consultants and other parties to protect, in part, trade secrets and other proprietary rights. There can be no assurance that these agreements will adequately protect our trade secrets and other proprietary rights and will not be breached, that we will have adequate remedies for any breach, that others will not independently develop substantially equivalent proprietary information or that third parties will not otherwise gain access to our trade secrets or other proprietary rights. As we expand our business, protecting our intellectual property will become increasingly important. The protective steps we have taken may be inadequate to deter our competitors from using our proprietary information. In order to protect or enforce our patent rights, we may be required to initiate litigation against third parties, such as infringement lawsuits. Also, these third parties may assert claims against us with or without provocation. These lawsuits could be expensive, take significant time and could divert management's attention from other business concerns. The law relating to the scope and validity of claims in the technology field in which we operate is still evolving and, consequently, intellectual property positions in our industry are generally uncertain. We cannot assure you that we will prevail in any of these potential suits or that the damages or other remedies awarded, if any, would be commercially valuable.

The Company's success depends on the experience and skill of the board of managers, its executive officers and key employees.

We are dependent on our board of managers, executive officers and key employees. These persons may not devote their full time and attention to the matters of the Company. The loss of our board of managers, executive officers and key employees could harm the Company's business, financial condition, cash flow and results of operations.

Although dependent on certain key personnel, the Company does not have any key person life insurance policies on any such people.

We are dependent on certain key personnel in order to conduct our operations and execute our business plan, however, the Company has not purchased any insurance policies with respect to those individuals in the event of their death or disability. Therefore, if any of these personnel die or become disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person could negatively affect the Company and our operations. We have no way to guarantee key personnel will stay with the Company, as many states do not enforce non-

competition agreements, and therefore acquiring key man insurance will not ameliorate all of the risk of relying on key personnel.

Damage to our reputation could negatively impact our business, financial condition and results of operations.

Our reputation and the quality of our brand are critical to our business and success in existing markets, and will be critical to our success as we enter new markets. Any incident that erodes consumer loyalty for our brand could significantly reduce its value and damage our business. We may be adversely affected by any negative publicity, regardless of its accuracy. Also, there has been a marked increase in the use of social media platforms and similar devices, including blogs, social media websites and other forms of internet-based communications that provide individuals with access to a broad audience of consumers and other interested persons. The availability of information on social media platforms is virtually immediate as is its impact. Information posted may be adverse to our interests or may be inaccurate, each of which may harm our performance, prospects or business. The harm may be immediate and may disseminate rapidly and broadly, without affording us an opportunity for redress or correction.

Our business could be negatively impacted by cyber security threats, attacks and other disruptions.

We continue to face advanced and persistent attacks on our information infrastructure where we manage and store various proprietary information and sensitive/confidential data relating to our operations. These attacks may include sophisticated malware (viruses, worms, and other malicious software programs) and phishing emails that attack our products or otherwise exploit any security vulnerabilities. These intrusions sometimes may be zero-day malware that are difficult to identify because they are not included in the signature set of commercially available antivirus scanning programs. Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate or compromise our confidential information or that of our customers or other third-parties, create system disruptions, or cause shutdowns. Additionally, sophisticated software and applications that we produce or procure from third-parties may contain defects in design or manufacture, including “bugs” and other problems that could unexpectedly interfere with the operation of the information infrastructure. A disruption, infiltration or failure of our information infrastructure systems or any of our data centers as a result of software or hardware malfunctions, computer viruses, cyber-attacks, employee theft or misuse, power disruptions, natural disasters or accidents could cause breaches of data security, loss of critical data and performance delays, which in turn could adversely affect our business.

Security breaches of confidential customer information, in connection with our electronic processing of credit and debit card transactions, or confidential employee information may adversely affect our business.

Our business requires the collection, transmission and retention of personally identifiable information, in various information technology systems that we maintain and in those maintained by third parties with whom we contract to provide services. The integrity and protection of that data is critical to us. The information, security and privacy requirements imposed by governmental regulation are increasingly demanding. Our systems may not be able to satisfy these changing requirements and customer and employee expectations, or may require significant additional investments or time in order to do so. A breach in the security of our information technology systems or those of our service providers could lead to an interruption in the operation of our systems, resulting in operational inefficiencies and a loss of profits. Additionally, a significant theft, loss or misappropriation of, or access to, customers’ or other proprietary data or other breach of our information technology systems could result in fines, legal claims or proceedings.

The use of Individually identifiable data by our business, our business associates and third parties is regulated at the state, federal and international levels.

The regulation of individual data is changing rapidly, and in unpredictable ways. A change in regulation could adversely affect our business, including causing our business model to no longer be viable. Costs associated with information security – such as investment in technology, the costs of compliance with consumer protection laws and costs resulting from consumer fraud – could cause our business and results of operations to suffer materially. Additionally, the success of our online operations depends upon the secure transmission of confidential information over public networks, including the use of cashless payments. The intentional or negligent actions of employees, business associates or third parties may undermine our security measures. As a result, unauthorized parties may obtain access to our data systems and misappropriate confidential data. There can be no assurance that advances in computer capabilities, new discoveries in the field of cryptography or other developments will prevent the compromise of our customer transaction processing capabilities and personal data. If any such compromise of our security or the security of information residing with our business associates or third parties were to occur, it could have a material adverse

effect on our reputation, operating results and financial condition. Any compromise of our data security may materially increase the costs we incur to protect against such breaches and could subject us to additional legal risk.

The Company is not subject to Sarbanes-Oxley regulations and may lack the financial controls and procedures of public companies.

The Company may not have the internal control infrastructure that would meet the standards of a public company, including the requirements of the Sarbanes Oxley Act of 2002. As a privately-held (non-public) Company, the Company is currently not subject to the Sarbanes Oxley Act of 2002, and its financial and disclosure controls and procedures reflect its status as a development stage, non-public company. There can be no guarantee that there are no significant deficiencies or material weaknesses in the quality of the Company's financial and disclosure controls and procedures. If it were necessary to implement such financial and disclosure controls and procedures, the cost to the Company of such compliance could be substantial and could have a material adverse effect on the Company's results of operations.

We operate in a highly regulated environment, and if we are found to be in violation of any of the federal, state, or local laws or regulations applicable to us, our business could suffer.

We are also subject to a wide range of federal, state, and local laws and regulations, such as local licensing requirements, and retail financing, debt collection, consumer protection, environmental, health and safety, creditor, wage-hour, anti-discrimination, whistleblower and other employment practices laws and regulations and we expect these costs to increase going forward. The violation of these or future requirements or laws and regulations could result in administrative, civil, or criminal sanctions against us, which may include fines, a cease and desist order against the subject operations or even revocation or suspension of our license to operate the subject business. As a result, we have incurred and will continue to incur capital and operating expenditures and other costs to comply with these requirements and laws and regulations.

We face competition and technological advances by competitors, which could adversely affect the sales of our products.

The growth of our Company depends in part on maintaining and growing the sales of our current products in existing and new markets, but also in developing new products and technologies. There is significant competition among companies that provide water purification solutions. Several companies market products that compete directly with our products. Other companies offer products that potential customers may consider to be acceptable or superior alternatives to our products and services, including products that are verified by the Environmental Protection Agency or other environmental authorities. We face direct competition from companies with greater financial, technological, manufacturing and personnel resources. Newly developed products could be more effective and cost-efficient than our current or future products.

Product development is a long, expensive and uncertain process.

The development of new or the enhancement of existing water purification and heater products is a costly, complex and time-consuming process, and investments in product development often involve a long wait until a return, if any, can be achieved on such investment. We might face difficulties or delays in the development process that will result in our inability to timely offer products that satisfy the market, which might allow competing products to emerge during the development process.

Successful technical development of our products does not guarantee successful commercialization.

We may fail to achieve commercial success for a number of reasons, including, among others, the following:

- Prohibitive production costs;
- Contamination of, or other problems with the water that we process;
- Competing products;
- Lack of product innovation;
- Unsuccessful distribution and marketing;
- Insufficient cooperation from our suppliers and distributors; and
- product development that does not align with or meet customer needs.

Our success will depend largely on our ability to properly demonstrate our capabilities. Furthermore, even if we do successfully demonstrate commercial liability, potential customers may be more comfortable doing business with a competitor, or may not feel there is a significant need for the products and services we develop. As a result, significant revenue from our products and services may not be achieved for a number of years, if at all.

If our patent applications are not granted, we could lose our ability to compete in the marketplace.

We have developed certain intellectual property used in the design of our water purification. We believe this technology is essential to our ability to be competitive and successful in the development and distribution of water purification. Patent protection can be limited and not all intellectual property can be patented. Even if our patents are granted, our intellectual property rights may be challenged, invalidated or circumvented by third parties. We may not be able to prevent the unauthorized disclosure or use of technical information or other trade secrets by employees or competitors.

Furthermore, our competitors may independently develop technologies and products that are substantially equivalent or superior to the products manufactured or used by us, which could result in decreased revenues. Litigation may be necessary to enforce intellectual property rights, which could result in substantial costs to us and substantial diversion of management's attention. If our intellectual property is not adequately protected, our competitors could use it to enhance their products. Our inability to adequately protect these intellectual property rights could adversely affect our business and financial condition.

The nature of our business involves significant risks and uncertainties that may not be covered by insurance or indemnification.

We may sell products and services in circumstances where insurance or indemnification may not be available. We may not be able to maintain insurance to protect against all operational risks and uncertainties that we confront. Substantial claims resulting from an accident, product failure, or liability arising from our products in excess of any indemnity or insurance coverage (or for which indemnity or insurance coverage is not available or is not obtained) could harm our financial condition, cash flows and operating results. Any accident, even if fully covered or insured, could negatively affect our reputation among our customers and the public, and make it more difficult for us to compete effectively.

We face a significant risk of failure because we cannot accurately forecast our future revenues and operating results.

The nature of the markets in which we compete makes it difficult to accurately forecast our revenues and operating results. Furthermore, we continue to expect our revenues and operating results to fluctuate in the future due to a number of factors, including the following:

- the timing of sales of our products;
- unexpected delays in introducing new products; and
- increased expenses, whether related to sales and marketing, or administration.

We may experience delays in receiving shipments of component materials for our products, as well as delays in shipments of our finished products to distributors and customers due to circumstances beyond our control. Our revenues and operating results will be impacted by such events, which we are not able to predict or control.

Rapid technological changes may adversely affect the market acceptance of our products and could adversely affect our business, financial condition and results of operations.

The market in which we compete is subject to technological changes, introduction of new products, change in customer demands and evolving industry standards. Our future success will depend upon our ability to keep pace with technological developments and to timely address the increasingly sophisticated needs of our customers by supporting existing and new technologies and by developing and introducing enhancements to our current products and new products. We may not be successful in developing and marketing enhancements to our products that will respond to technological change, evolving industry standards or customer requirements. In addition, we may experience difficulties internally or in conjunction with our contract manufacturers that could delay or prevent the successful development, introduction and sale of such enhancements and such enhancements may not adequately meet the

requirements of the market and may not achieve any significant degree of market acceptance. If release dates of our new products or enhancements are delayed or, if when released, they fail to achieve market acceptance, our business, operating results and financial condition may be adversely affected.

The political, economic and social conditions impacting our geographic markets may adversely affect our business.

Various constituencies, including our competitors, existing suppliers, local investors, developers, environmental groups and conservation groups, means that decisions affecting our business are based on many factors other than economic and business considerations.

We cannot predict whether changes in political administrations will result in changes in governmental policy and whether such changes will affect our business. For example, our market development activities and operations can be adversely affected by lengthy government bidding, contracting, licensing, permitting, approval and procurement processes. In addition, we may need to spend significant time and resources to inform newly elected officials, local authorities and others about the benefits of other water and wastewater treatment infrastructure.

We expect to continue to be subject to risks associated with dealing with governments and governmental entities, and political concerns and governmental procedures and policies may hinder or delay our ability to enter into supply agreements or develop our plants. The political, economic and social conditions impacting our geographic markets may adversely affect our business.

Severe weather conditions or natural or man-made disasters may disrupt our operations and affect the demand for water purification, which could adversely affect our financial condition, results of operations and cash flows.

Our operating results and financial condition could be materially and adversely affected by severe weather, floods, natural disasters, hazards (such as fire, explosion, collapse or machinery failure), environmental factors, or be the target of terrorist or other deliberate attacks. Repercussions of these catastrophic events may include:

- fluctuations in short-term customer demand;
- the need to obtain necessary equipment or supplies, which may not be available to us in a timely manner or at a reasonable cost;
- evacuation of and/or injury to personnel;
- loss of productivity;
- the deterioration of the financial health of our customers; and
- interruption to any projects that we may have in process.

Large-scale or repetitive natural disasters, such as hurricanes, tropical storms, floods or earthquakes, can also lead to the damage or destruction of certain infrastructure on which we depend for the conduct of our business and can cause damage to the infrastructure for which we are responsible.

Any contamination resulting from a natural or man-made disaster may result in disruption in our services, additional costs and litigation, which could harm our business, financial condition, results of operations and cash flows.

We face possible risks associated with the physical effects of climate change.

The physical effects of climate change could have a material adverse effect on our properties, operations, and business. However, the impacts of climate change on our operations are highly uncertain and their significance will vary depending on type and geographic location of any physical impact. The impacts of climate change could include changing temperatures, flooding, water shortages, changes in weather and rainfall patterns, and changing storm patterns and intensities. Many climate change predictions, if true, present several potential challenges to water and wastewater utilities, such as increased precipitation and flooding, potential degradation of water quality, and changes in demand for water services. There can be no assurance that climate change will not have a material adverse effect on our properties, operations, or business.

IN ADDITION TO THE RISKS LISTED ABOVE, RISKS AND UNCERTAINTIES NOT PRESENTLY KNOWN, OR WHICH WE CONSIDER IMMATERIAL AS OF THE DATE OF THIS FORM C-AR, MAY ALSO HAVE AN ADVERSE EFFECT ON OUR BUSINESS AND RESULT IN THE TOTAL LOSS OF YOUR INVESTMENT.

BUSINESS

Description of the Business

Avivid Water Technology, LLC is an advanced water purifier formed in Colorado as a limited liability company on February 8, 2005 and operationalized into a going concern in August 2013.

The Company conducts business in Colorado and sells products and services through the internet throughout the United States.

The Company was a subsidiary of Avivid Technologies Group, LLC (“ATG”), a major equity holder in the Company. On December 31, 2020 the members of ATG converted from ownership in ATG to ownership in the Company, as ATG was dissolved.

Avivid Water Technology, LLC provides advanced water purification via its patented TurboCoag® technology to treat industrial water contaminated with emulsified oils, heavy metals, suspended solids, and microorganisms. Avivid targets industrial wastewaters resistant to traditional water treatment which have high treatment and/or disposal costs, treating these waters with its triple patented TurboCoag® electrochemical reactor which is modular, scalable, self-cleaning, and low maintenance. By providing purified water for reuse or release to its customers, Avivid protects increasingly scarce water resources while reducing industrial operational expenses.

Business Plan

The Company plans to significantly expand its business by investing in product marketing, infrastructure for self-funded pilot projects, research and development efforts for two new products, and adding new hires. Avivid aims to become profitable in the next 18 months. The Company will continue its focus on closing sales in its identified markets and expand its business. The first step in customer acquisition is to test a water sample followed by a field pilot which may be for a few days or many weeks. Lead times to close a contract and begin to generate revenue is a challenge since it often takes several months or longer to gain traction. However, once perfected the contracts are often for 2-5 years, generating hundreds of thousands of dollars in recurring annual revenue.

The Company’s Products and/or Services

Product / Service	Description	Current Market
TurboCoag® reactor	The TurboCoag® reactor purifies industrial wastewater using a proprietary electrochemical coagulation process for efficient, non-toxic water purification. TurboCoag® replaces chemical-based treatment processes to provide clean water for reuse or release from industrial process wastewater. This cost-effective treatment significantly reduces waste sludge production which provides cost savings to customers.	Business-to-Business market space. Landfill leachate, garment dye and fabric finishing, chemical plants, oil and gas operations, and active and abandoned mines annually produce billions of gallons of heavily contaminated water that must be disposed or cleaned. TurboCoag® is an effective treatment solution for these hard-to-treat industrial wastewaters.

Competition

The primary competition in the water treatment marketplace is the use of coagulation chemicals such as lime, ferric chloride, and aluminum salts which are often hazardous to employees and the environment and consume valuable floor space when stored at the treatment site. These chemicals are often expensive and produce 30-70% more volume

of residual waste solids than TurboCoag®, creating significant trucking, fuel, and disposal costs that the operator must bear throughout the life of the treatment program.

Few direct electrocoagulation (EC) competitors have been successful in the Business-to-Business marketplace due to the issues that have plagued legacy electrocoagulation since the late 1800s: anode passivation or corrosion and in-vessel sludge buildup which increases operator maintenance requirements, system downtime, and labor costs. Avivid's EC technology addresses these issues with its patented TurboCoag® reactor by creating a self-cleaning, non-passivating, easy to maintain system that provides effective, efficient, and non-toxic water treatment. The main EC competitors are OilTrap, GlobalSep Corporation, Genesis, Water Tectonics, Water Vision, Ecolotron, Selkea Systems, and Powell Water Recovery.

Customer Base

Customers for TurboCoag® include those with expensive-to-treat industrial wastewater that is not responsive to typical water treatment processes. Examples include garment and dye finishing operations, herbicide chemical production companies, and landfill operations. Wastewater from each of these markets are often toxic and are either incinerated, disposed of in Class I or II underground injection disposal wells, or sent to wastewater treatment plants that are not equipped with the technology to effectively purify heavily contaminated water.

Supply Chain

The Company's main vendors include Mertz Manufacturing, Rocky Mountain Waterjet, and McMaster-Carr. Each of these vendors supplies the Company with an essential part of its business. Although the Company is dependent upon certain third-party vendors, particularly manufacturers and component suppliers within the US and overseas, the Company has access to alternate service providers in the event its current vendors are unable to provide services, or any issues arise with its current third-party vendors where a change is required to be made. The Company does not believe the loss of a current third-party vendor or service provider would cause a major disruption to its business, although it could cause short-term limitations or disruptions.

In 2013 and 2015, Avidid received US patents on its innovative and unique rotating anode system. The company also holds international patents in several potential market countries. The unique configuration of the system is readily identifiable for the enforcement of patent rights. An additional patent that was filed in July of 2020 has moved to non-provisional status as of January 13, 2022 and is published for review on the USPTO website.

Governmental/Regulatory Approval and Compliance

The Company is subject to and affected by the laws and regulations of U.S. federal, state and local governmental authorities. These laws and regulations are subject to change.

Litigation

The Company is not subject to any current litigation or threatened litigation.

DIRECTORS, OFFICERS, MANAGERS, AND KEY PERSONS

Biographical Information

Lockett Wood: Lockett is the CEO, CTO, Co-Founder and Co-Inventor of the TurboCoag® reactor. Dr. Wood holds BS degrees in Physics and EE with General Honors from the University of New Mexico. At UNM he served as President of the Engineers Joint Council and was selected as the Outstanding Engineering Student in his senior year. He received his MS and PhD degrees in EE from the University of Colorado while working full time at NIST. Dr. Wood holds three patents on the TurboCoag® reactor as well as numerous patents on medical devices, optical distance measuring instruments, satellite communications, and remote sensing instruments and has authored over thirty

published scientific papers. He was awarded the Department of Commerce Silver Medal for outstanding contributions to missile tracking. He is directly involved in perfecting the design of the commercial and bench-scale models of the TurboCoag® reactor as well as developing complementary technology.

William Cross: Bill is the Executive Vice President Operations and Co-Founder of the Company. Mr. Cross is a serial entrepreneur with over 40 years of experience in construction, crew and project management and business development. He holds a Class B Contractors License Boulder County, CO. He was instrumental in the formation and development of Avivid from its inception. Mr. Cross managed the design and manufacturing of several prototypes and variations of Avivid's TurboCoag® system from bench-scale units to complete commercialized systems, directing both in-house engineers and sub-contracted personnel.

David Waldner: David has served as one of the Board Managers for Avivid Water Technology since 2018. He is a professional Licensed Land Surveyor and a lifelong self-employed entrepreneur, business owner, and real estate developer. He worked for 25 years acquiring mineral exploration properties for mining companies in every western state. He has worked on EPA mine cleanup sites in Boulder County and has firsthand knowledge of the extent and impact of acid mine water discharge. He advises the Company's executive management team on financial and operational decisions, policy making, legal matters, executive compensation, and long-term strategic planning recommendations.

Tracy Kessner: Tracy is the Vice President Business Operations of the Company. She joined Avivid after completing her MS in environmental policy in 2017. She coordinates Avivid's internal efforts to successfully enter the industrial wastewater treatment market. She puts her corporate background in leadership, project management, and business operations gleaned from IBM and Sun Microsystems to Avivid's advantage by blending business management with environmental education, presentation, networking, and fundraising skills developed as Board President of the non-profit Southern Plains Land Trust. She was recently named one of 2022's Notable Minority Leaders by BizWest Magazine.

Dr. Niles Utlaut: Dr. Utlaut has been practicing medicine for over 33 years. He is Board Certified in Internal Medicine and Ophthalmology, studied at the National Eye Institute, was a researcher at Moorfields Hospital, London, served on the faculty at Stanford University and acted as Attending Physician to the Royal Family of Saudi Arabia. Dr. Utlaut held prior posts as President of the Colorado Business Coalition for Health, Director of the Royal Hospital at Taif, Saudi Arabia; and, on the Board of Directors for Magpie Healthcare and Avivid Business Solutions. Dr. Utlaut was Valedictorian in Mathematics at the University of Colorado and holds a M.D. from Johns Hopkins School of Medicine.

John Reynolds: John is the retired CEO of Independent Mechanical Industries, Inc., a mechanical contracting company serving the needs of businesses, municipalities and energy companies. Independent Mechanical specializes in executing and completing unusual, difficult and complex projects that require the highest level of safety commitment with a skilled, performance driven workforce.

Mr. Reynolds is an innovative and results driven leader focused on exceptional results in highly competitive environment that demands continuous improvement. He has an extensive background in mechanical piping systems, emerging technologies, sales, marketing and strategic planning. He provides detailed advice on water treatment infrastructure and business development.

Hannah Cohen: Hannah is an experienced healthcare executive. She led operations and client success at a dental SaaS company developing people and processes, resulting in an increase in valuation of over 9X. She has experience as a healthcare operations executive, and almost a decade of combat and noncombat leadership as a Marine Corps communications officer. She provides advice on executive leadership, client engagement, and operational optimization.

Fernando Batista: Fernando holds a double major BA from USC and an MA in International Economics from the Johns Hopkins University School of Advanced International Studies. Mr. Batista's background includes a decade of experience working for the World Bank Group where among other work he managed environmental projects under the Montreal Protocol ozone layer protection program, retooling private companies in the automotive and white goods sectors throughout Latin America.

He has held CEO and other C Suite positions in technology and other industries that feature IP assets and attention to international markets.

Mr. Batista complements advisory work with a network of close contacts that serve as strategic partners and funders for the entities he engages as a business consultant.

Indemnification

Indemnification is authorized by the Company to managers, officers or controlling persons acting in their professional capacity pursuant to Colorado law. Indemnification includes expenses such as attorney's fees and, in certain circumstances, judgments, fines and settlement amounts actually paid or incurred in connection with actual or threatened actions, suits or proceedings involving such person, except in certain circumstances where a person is adjudged to be guilty of gross negligence or willful misconduct, unless a court of competent jurisdiction determines that such indemnification is fair and reasonable under the circumstances.

CAPITALIZATION, DEBT AND OWNERSHIP

Capitalization

The Company's authorized membership units consist of 75,000,000 Class A Units ("**Class A Units**") and 28,129,514 Profit Units ("**Profit Units**") together with the Class A Units, the "**Membership Units**").

Outstanding Membership Units

As of the date of this Form C-AR, the Company's outstanding membership units consists of:

Type	Class A Units
Amount Outstanding	21,886,909
Voting Rights	1 vote per Unit
Anti-Dilution Rights	None
How this security may limit, dilute or qualify the Security issued pursuant to Regulation CF	The Company may decide to issue more units which may dilute the Security.
Percentage ownership of the Company by the holders of such security (assuming conversion prior to the Offering if convertible securities).	42.39%

Outstanding Options, SAFEs, Convertible Notes, Warrants

As of the date of this Form C-AR, the Company has the following additional securities outstanding:

Type	Crowd SAFE

TRANSACTIONS WITH RELATED PERSONS AND CONFLICTS OF INTEREST

From time to time the Company may engage in transactions with related persons. Related persons are defined as any director or officer of the Company; any person who is the beneficial owner of twenty percent (20%) or more of the Company’s outstanding voting equity securities, calculated on the basis of voting power; any promoter of the Company; any immediate family member of any of the foregoing persons or an entity controlled by any such person or persons. Additionally, the Company will disclose here any transaction since the beginning of the issuer’s last fiscal year, or any currently proposed transaction, to which the issuer was or is to be a party and the amount involved exceeds five percent (5%) of the aggregate amount of capital raised by the issuer in reliance on section 4(a)(6), including the Target Offering Amount of this Offering, and the counter party is either (i) any director or officer of the issuer; (ii) any person who is, as of the most recent practicable date but no earlier than 120 days prior to the date the offering statement or report is filed, the beneficial owner of twenty percent (20%) or more of the issuer’s outstanding voting equity securities, calculated on the basis of voting power; (iii) if the issuer was incorporated or organized within the past three years, any promoter of the issuer; or (iv) any member of the family of any of the foregoing persons, which includes a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law, and shall include adoptive relationships. The term *spousal equivalent* means a cohabitant occupying a relationship generally equivalent to that of a spouse.

The Company has conducted the following transactions with related persons:

- On December 28, 2017, the Company entered into a Subscription Agreement with Lockett Wood for the subscription of 200 Units for a purchase price of \$100.
- On December 31, 2018, the Company entered into a Subscription Agreement with David Waldner for the subscription of 949,537 Units for a purchase price of \$474,768.62.
- On December 31, 2018, the Company entered into a Subscription Agreement with Lockett Wood for the subscription of 949,537 Units for a purchase price of \$474,768.62.
- On February 1, 2019, the Company entered into a Subscription Agreement with William Cross for the subscription of 200 Units for a purchase price of \$100.
- On February 1, 2019, the Company entered into a Subscription Agreement with David Waldner for the subscription of 200 Units for a purchase price of \$100.
- On February 1, 2019, the Company entered into a Subscription Agreement with Tracy Kessner for the subscription of 200 Units for a purchase price of \$100.
- On July 9, 2019, the Company entered into a Subscription Agreement with Mary Waldner for the subscription of 200,000 Units for a purchase price of \$100,000.
- On December 13, 2019, the Company entered into a Subscription Agreement with Tracy Kessner for the subscription of 40,000 Units for a purchase price of \$20,000.
- On February 4, 2020, the Company entered into a Subscription Agreement with Tracy Kessner for the subscription of 10,000 Units for a purchase price of \$5,000.
- On February 1, 2020, the Company entered into a Profit Unit Award Agreement with William Cross for the award of 1,300,000 Units for a purchase price of \$0.00.
