LEAD INVESTOR

Robert May

The dating app market is broken. Smile has the chance to revolutionize dating, taking it out of the superficial swiping age, and into the machine learning, humor based, better matching age. The company has gotten a large amount of press pre-launch, indicating people love the idea, and Melissa has proven an ability to attract top talent to her team, which is a rare skill. The early feedback on the product is strong, and the company's early events had really good ROI. I've been an investor for a while and have been happy with the company's performance.

Invested \$1,000 this round & \$150,000 previously

Highlights

- 1 💰 Successfully raised a \$400K angel round
 - 2 🧑‍💻 Female founded company with a physicist at the helm.
 - 3 📖 Backed by world-renowned expert on the intersection of love and humor.
 - 4 📱 Available now for download on the App Store.

Rana El Kaliouby Investor

• PhD in Computer Science from University of Cambridge, post-doc at MIT • Founder of Affectiva (acquired by Smart Eye) • Executive Fellow at Harvard Business School

SSC Ventures Investor

Boston College Alumni Syndicate

Sense of Humor

We are Smile: a dating app harnessing the power of artificial intelligence and humor to create meaningful connections that last.

Smile is an entertainment-based dating app backed by the world's leading experts on love and relationships. With funny videos pulled from TikTok, Smile is a social media that leverages your reactions to content in order to find you love.

That means instead of wasting hours sifting through thousands of profiles, our proprietary algorithm leverages machine learning technology to do the work for you.

WHY INVEST?

Together, We Can Make Dating Fun(ny)

In 5 years, we envision Smile to be the leading dating app around the world, building more long-term, successful, laughter-filled relationships than any other app on the market.

To do that, we plan to infiltrate college campuses, host incredible launch parties, and dominate social media. Our pre-seed round is focused on growth marketing – getting as many users as possible on the app to ensure the best possible user experience.

Smile is an incredibly PR-worthy concept – people want to talk about it. We received a ton of organic press even before we launched. **Drew Barrymore raved about the app on national television, and posted about it on Instagram to her 15M followers.**

Founded by a young, single female – Smile is led by a founder who has an intimate understanding of the customer problem. Melissa Mullen is a software engineer with a background in Physics and Computer Science. Her goal is to find the intersection of artificial intelligence and love – she believes the most direct route to this intersection is via humor.

THE PROBLEM

Customer Problem

Dating apps are popular – but they're not working.

270M

people have used a dating app

Less than half have been in a committed relationship
with someone they met on a dating app

Customer Problem

Incompatible Matches

I'm matching with the wrong type of person

Superficial Decisions

I'm making decisions based on looks

It's Boring!

Being on dating apps feels like a part-time job

THE MARKET

Smile targets anyone looking for a meaningful relationship. Our core target consumer is those who currently use dating apps (270+ million people). In particular, we target millennial in majors cities like Boston, Los Angeles, Chicago, and D.C. The online dating industry itself is worth over \$60B in market cap alone.

Market Opportunity

3.08B

Total dating app revenue in 2020

5.71B

Projected total dating app revenue in 2025

In addition, we develop extensive humor profiles for all users which will be valuable commodities in the big data market, currently valued at \$169 billion.

Target Market

By Age

Develop for late 20s-early 30s people ready for a serious relationship.

By Location

Focus energy on big cities with large millennial populations.

By Economic Segment

Target early-to-mid career professionals with average-to-high disposable income.

THE SOLUTION

"Humor compatibility is one of the best predictors of relationship success."

- Jeffrey A. Hall, PhD

Internationally Recognized Expert on Love and Humor

In our Smile survey, singles across the U.S. all agreed a sense of humor is the most important quality they look for in a partner.

Our Solution

Humor-based Matching

Humor-based matching is more likely to match you with the right person

Hide Images Initially

Hiding images initially makes connection less superficial

Infinite Scroll of Funny Content

Infinite scroll of funny content makes it a more enjoyable experience

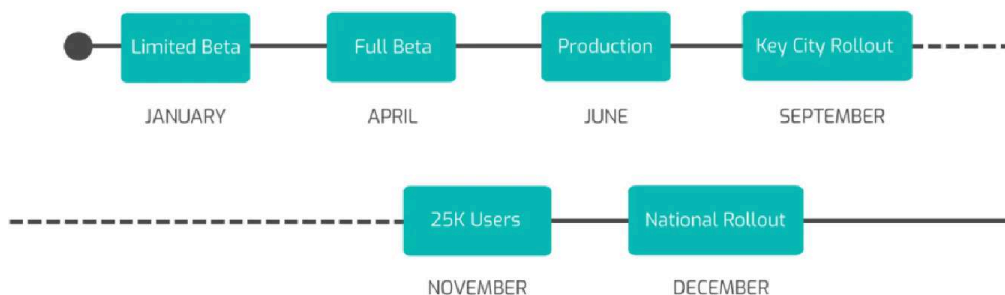

The Smile business model consists of the following go-to market, growth, and strategies.

User Acquisition

Go-to Market Strategy

The Smile Premium subscription offers users a suite of exclusive features not offered to freemium users, including:

- The ability to see all matches' photos sooner
- Access to a comprehensive humor compatibility report
- Advanced filtering preferences

Smile In-App Purchases allow users to see a matches photos immediately, and to see a batch of "comedians" – the most desirable users in the area.
