Summary of Risk Factors

Risks Related to Doing Business in China, page 19

15. In your summary of risk factors, disclose the risks that your corporate structure and being based in or having the majority of the company's operations in China poses to investors. In particular, describe the significant regulatory, liquidity, and enforcement risks with cross-references from each summary risk factor to the more detailed discussion of these risks in the prospectus. For example, specifically discuss risks arising from the legal system in China, including risks and uncertainties regarding the enforcement of laws and that rules and regulations in China can change quickly with little advance notice; and the risk that the Chinese government may intervene or influence your operations at any time, or may exert more control over offerings conducted overseas and/or foreign investment in China-based issuers, which could result in a material change in your operations and/or the value of the securities you are registering for sale. Acknowledge any risks that any actions by the Chinese government to exert more oversight and control over offerings that are conducted overseas and/or foreign investment in China-based issuers could significantly limit or completely hinder your ability to offer or continue to offer securities to investors and cause the value of such securities to significantly decline or be worthless.

Comparative Per Share Information, page 23

16. Please explain why GBRG has a positive book value per share as of March 31, 2022 when its balance sheet had negative shareholders' equity at this date. Please advise or revise as appropriate.

Please expand to identify the principal factors contributing to the inflationary pressures that you have experienced and clarify the resulting impact to the company, specifically with respect to your products and services. Additionally, please disclose whether recent inflationary pressures have materially impacted your operations. In this regard, identify the types of inflationary pressures you are facing and how your business has been affected.
18. Please update your risks characterized as potential if recent supply chain disruptions have impacted your operations.
19. We note your statements regarding the potential effects that the military conflict between Russia and Ukraine may have on supply chain, which may in turn negatively impact your

business. 20. We note your disclosure on page 52 about the Holding Foreign Companies Accountable Act. Please expand your risk factors to disclose that the United States Senate has passed the Accelerating Holding Foreign Companies Accountable Act, which, if enacted, would decrease the number of “non-inspection years” from three years to two years, and thus, would reduce the time before your securities may be prohibited from trading or delisted. "The Chinese government exerts substantial influence over the manner in which we must conduct our business activities...", page 41

23. We note your disclosure in this risk factor related to permissions requirements from the China Securities Regulatory Commission (CSRC) and Cyberspace Administration of China (CAC) is overly vague and inconclusive. Please revise to explicitly state whether you or your subsidiaries are covered by permissions requirements from the CSRC, CAC or any other governmental agency that is required to approve your operations, and state affirmatively whether you have received all requisite permissions or approvals and whether any permissions or approvals have been denied. To the extent you conclude no permissions or approvals are required or are applicable, please discuss the basis for these conclusions to include whether an opinion of counsel was obtained.

"We may become subject to a variety of laws and regulations in the PRC ...", page 45

24. We note your statement that "[o]ur PRC subsidiaries currently have obtained all material permissions and approvals required for our operations in compliance with the relevant

PRC laws and regulations in the PRC, including the business license. In the event that the applicable laws, regulations or interpretations change such that we are subject to any mandatory cybersecurity review and other specific actions required by the CAC, we cannot guarantee whether we can complete the registration process in a timely manner, or at all." The disclosure here should not be qualified by materiality. Please make appropriate revisions to your disclosure.

25. Please highlight the material risks to public warrant holders, including those arising from differences between private and public warrants. Clarify whether recent trading prices of ordinary shares exceed the threshold that would allow the company to redeem public warrants. Capitalization, page 72

26. Please revise to include Suncar's historical non-controlling interests as a component of its total capitalization as of March 31, 2022. Please disclose this material difference and add a question and answer to address this change and the resulting voting power the Class B holders will possess after the business combination.
29. We note that following the business combination PubCo will have a new Memorandum and Articles of Association which will differ from Goldenbridge's existing charter to include certain changes which appear to substantively affect Goldenbridge's shareholder rights, i.e. the adoption of a dual-class structure with super voting Class B Ordinary shares. Please include a separate proposal which gives Goldenbridge's shareholders an opportunity to express their views on PubCo's new Memorandum and Articles of Association and any material provisions which will establish their substantive rights as shareholders in PubCo. Alternatively, tell us why you do not believe you are required to give Goldenbridge's shareholders the opportunity to vote on these material

changes to the securities that they will be receiving in this transaction.

32. Please revise to address and express a conclusion for each material federal tax consequence. A description of the the law is not sufficient. Rather, the tax opinion must opine on the material tax issues. If there is a lack of authority directly addressing the tax consequences of the transaction, conflicting authority or significant doubt about the tax consequences of the transaction, counsel may issue a "should" or "more likely than not" opinion to make clear that the opinion is subject to a degree of uncertainty. In such cases, counsel should explain clearly why it cannot give a "will" opinion. Refer to Sections III.C.1, III.C.2 and III.C.4 of Staff Legal Bulletin No. 19. Additionally, please revise the proxy statement/prospectus throughout to include the applicable questions and answers and risk factors.
