### About

I am passionate about testable code and full-lifecycle solutions. I love the backend, I love the underlying systems and building well integrated systems.

I believe in TDD and I also believe in working in an environment where I don't hate my job.

## Recommendations

Received

Given

### Colleen Noonan (she/hers) · 3rd

Systems Reliability Engineering Manager at Cloudflare, Inc.

April 12, 2016, Colleen managed Edward directly

Edward is an incredible asset to any development team. I've seen him grow and take on new challenges. Whatever has come his way, from Angular.js to Kafka topics and Cassandra configurations, he rolls up his sleeves and gets to work. I can't recommend him enough. He has a passion for learning and he has the rare, but very important skill, of being an incredible communicator. ...see more

### Chris O'Meara · 2nd

Solutions Architecture Manager at AWS. I'm hiring!

January 21, 2014, Chris managed Edward directly

Edward is a tenacious problem solver with an adventuresome attitude and solid technical aptitude. I enjoyed watching him learn to balance technical purity with the needs of the business.

### Michael Kolakowski · 3rd

Associate System Engineer - DevOps at Union Pacific Railroad

May 27, 2011, Michael worked with Edward but on different teams

I've worked with Edward, though on different projects, both were legacy C++ on HP-UX. I am quite amazed at his ability to learn things quickly and be productive with them. As far as craftsmanship skills, Edward has them and has the drive to continue to improve them.
