

## JPMorgan Chase & Co.

### ***Principal Protected Notes Linked to the U.S. Dollar Index®***

#### General

- JPMorgan Chase & Co. may offer and sell principal protected notes linked to the U.S. Dollar Index® from time to time. This product supplement no. 13-I describes terms that will apply generally to the principal protected notes, and supplements the terms described in the accompanying prospectus supplement and prospectus. A separate term sheet or pricing supplement, as the case may be, will describe terms that apply specifically to the notes, including any changes to the terms specified below. We refer to such term sheets and pricing supplements generally as terms supplements. If the terms described in the relevant terms supplement are inconsistent with those described herein or in the accompanying prospectus supplement or prospectus, the terms described in the relevant terms supplement shall control.
- The notes are the senior unsecured obligations of JPMorgan Chase & Co.
- Payment is linked to the U.S. Dollar Index® as described below.
- Unless otherwise specified in the relevant terms supplement, full principal protection if the notes are held to maturity.
- Unless otherwise specified in the relevant terms supplement, cash payment at maturity of principal plus the Additional Amount.
- The Additional Amount will depend on the Index Return and the specific terms of the notes as set forth in the relevant terms supplement. Unless otherwise specified, the Additional Amount per \$1,000 principal amount note will equal (A) \$1,000 x the Index Return x the Participation Rate, but will not be less than zero (or the Minimum Return, if applicable) or greater than the Maximum Return, if applicable, or (B) an amount calculated according to the formula in clause A, unless the Index closing level exceeds a specified level (which we refer to as the Knock-Out Level) on one of the trading days specified in the relevant terms supplement, in which case the Additional Amount will equal \$1,000 x the Knock-Out Rate, or (C) if the Ending Index Level is greater than or equal to the Initial Index Level, a fixed amount specified in the relevant terms supplement (which amount we refer to as the Fixed Payment) and otherwise zero (or the Minimum Return, if applicable).
- In addition to a cash payment at maturity of the applicable principal amount plus the Additional Amount, if any, the notes may pay interest prior to maturity, as specified in the relevant terms supplement.
- For important information about tax consequences, see "Certain U.S. Federal Income Tax Consequences" beginning on page PS-18.
- Minimum denominations of \$1,000 and integral multiples thereof, unless otherwise specified in the relevant terms supplement.
- Investing in the notes is not equivalent to investing in the Index or any of the Index Currencies.
- The notes will not be listed on any securities exchange unless otherwise specified in the relevant terms supplement.

#### Key Terms

Index:	The U.S. Dollar Index® (the "Index" or "USDx")
Index Currencies:	The Eurozone euro, the Japanese yen, the British pound, the Canadian dollar, the Swedish krona and the Swiss franc or any successor currency included in the U.S. Dollar Index® or any successor index thereto (as described under "The U.S. Dollar Index® — Discontinuation or Suspension of the U.S. Dollar Index®; Alteration of Method of Calculation" ).

(continued on next page)

**Investing in the Principal Protected Notes involves a number of risks. See "Risk Factors" beginning on page PS-5.**

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this product supplement no. 13-I, the accompanying prospectus supplement and prospectus, or any related terms supplement. Any representation to the contrary is a criminal offense.

***The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.***

**JPMorgan**

March 7, 2006

**Key Terms (continued)**

Payment at Maturity:	Unless otherwise specified in the relevant terms supplement, at maturity you will receive a cash payment for each \$1,000 principal amount note of \$1,000 plus the Additional Amount, which may be zero (or may equal the Minimum Return, if applicable).
Additional Amount (Notes with neither a Knock-Out Level nor a Fixed Payment):	For notes with neither a Knock-Out Level nor a Fixed Payment, the Additional Amount per \$1,000 principal amount note paid at maturity will equal, unless otherwise specified in the relevant terms supplement, $\$1,000 \times \text{the Index Return} \times \text{the Participation Rate}$ ; <i>provided</i> that the Additional Amount will not be less than zero (or the Minimum Return, if applicable) or greater than the Maximum Return, if applicable.
Additional Amount (Notes with a Knock-Out Level):	<p>For notes with a Knock-Out Level, the Additional Amount per \$1,000 principal amount note paid at maturity will equal, unless otherwise specified in the relevant terms supplement:</p> <p>(1) If the Index closing level is less than the Knock-Out Level on each of the trading days specified in the relevant terms supplement, <math>\\$1,000 \times \text{the Index Return} \times \text{the Participation Rate}</math>; <i>provided</i> that the Additional Amount will not be less than zero (or the Minimum Return, if applicable) or greater than the Maximum Return, if applicable; or</p> <p>(2) If the Index closing level is greater than or equal to the Knock-Out Level on any of the trading days specified in the relevant terms supplement, which we refer to as a Knock-Out Event, <math>\\$1,000 \times \text{the Knock-Out Rate}</math>.</p>
Additional Amount (Notes with a Fixed Payment):	<p>For notes with a Fixed Payment, the Additional Amount per \$1,000 principal amount note paid at maturity will equal:</p> <p>(1) If the Ending Index Level is greater than or equal to the Initial Index Level, an amount specified in the relevant terms supplement; or</p> <p>(2) If the Ending Index Level is less than the Initial Index Level, zero (or the Minimum Return, if applicable).</p>
Minimum Return:	If applicable, then the Additional Amount will equal at least the amount specified as the Minimum Return in the relevant terms supplement.
Maximum Return:	If applicable, then the Additional Amount will equal no more than the amount specified as the Maximum Return in the relevant terms supplement.
Other Terms:	In each case if applicable, the Participation Rate, Knock-Out Level, Knock-Out Rate, Knock-Out Event, Fixed Payment, Interest Rate, Partial Principal Protection Percentage, Interest Period, Interest Determination Dates and/or Interest Payment Date(s) will be set forth in the relevant terms supplement.
Index Return:	<p>Unless otherwise specified in the relevant terms supplement:</p> $\frac{\text{Ending Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$
Initial Index Level:	The Index level at 11:00 a.m. New York time on the pricing date, or such other date or dates as specified in the applicable terms supplement.
Ending Index Level:	The Index level at 11:00 a.m. New York time on the Observation Date, or the arithmetic average of the Index closing levels on each of the Averaging Dates, or such other date or dates as specified in the relevant terms supplement.
Index Valuation Date(s):	The Index closing level will be calculated on a single date, which we refer to as the Observation Date, or on several dates, each of which we refer to as an Averaging Date, as specified in the relevant terms supplement. We refer to such dates generally as Index Valuation Dates in this product supplement. Any Index Valuation Date is subject to postponement in the event of certain circumstances described under "Description of Notes — Payment at Maturity" and "The U.S. Dollar Index® — Discontinuation or Suspension of the U.S. Dollar Index®; Alteration of Method of Calculation"
Knock-Out Event:	For notes with a Knock-Out Level, the relevant terms supplement may specify any trading day(s) during the term of the notes as the day(s) on which a Knock-Out Event can occur.
Maturity Date:	As specified in the relevant terms supplement. The maturity date of the notes is subject to postponement in the event of certain circumstances described under "Description of Notes — Payment at Maturity" and "The U.S. Dollar Index® — Discontinuation or Suspension of the U.S. Dollar Index®; Alteration of Method of Calculation"

We are offering to sell, and are seeking offers to buy, the notes only in jurisdictions where offers and sales are permitted. Neither this product supplement no. 13-I nor the accompanying prospectus supplement, prospectus or terms supplement constitutes an offer to sell, or a solicitation of an offer to buy, any notes by any person in any jurisdiction in which it is unlawful for such person to make such an offer or solicitation. Neither the delivery of this product supplement no. 13-I nor the accompanying prospectus supplement, prospectus or terms supplement nor any sale made hereunder implies that there has been no change in our affairs or that the information in this product supplement no. 13-I and accompanying prospectus supplement, prospectus and terms supplement is correct as of any date after the date hereof.

You must (i) comply with all applicable laws and regulations in force in any jurisdiction in connection with the possession or distribution of this product supplement no. 13-I and the accompanying prospectus supplement, prospectus and terms supplement and the purchase, offer or sale of the notes and (ii) obtain any consent, approval or permission required to be obtained by you for the purchase, offer or sale by you of the notes under the laws and regulations applicable to you in force in any jurisdiction to which you are subject or in which you make such purchases, offers or sales; neither we nor the agents shall have any responsibility therefor.

The notes are not and will not be authorized by the Comisión Nacional de Valores for public offer in Argentina and may thus not be offered or sold to the public at large or to sectors or specific groups thereof by any means, including but not limited to personal offerings, written materials, advertisements or the media, in circumstances which constitute a public offering of securities under Argentine Law No. 17,811, as amended.

The notes have not been and will not be registered with the “Comissão de Valores Mobiliários” — the Brazilian Securities and Exchange Commission (“CVM”) and accordingly, the notes may not be sold, promised to be sold, offered, solicited, advertised and/or marketed within the Federative Republic of Brazil in an offering that can be construed as a public offering under CVM Instruction nº 400, dated December 29, 2003, as amended from time to time.

The notes have not been registered with the Superintendencia de Valores y Seguros in Chile and may not be offered or sold publicly in Chile. No offer, sales or deliveries of the notes, or distribution of this product supplement no. 13-I or the accompanying prospectus supplement, prospectus or terms supplement may be made in or from Chile except in circumstances which will result in compliance with any applicable Chilean laws and regulations.

The notes have not been, and will not be, registered with the National Registry of Securities maintained by the Mexican National Banking and Securities Commission nor with the Mexican Stock Exchange and may not be offered or sold publicly in the United Mexican States. This product supplement no. 13-I and the accompanying prospectus supplement, prospectus and terms supplement may not be publicly distributed in the United Mexican States.

In making your investment decision, you should rely only on the information contained or incorporated by reference in the terms supplement relevant to your investment, this product supplement no. 13-I and the accompanying prospectus supplement and prospectus with respect to the notes offered by the relevant terms supplement and this product supplement no. 13-I and with respect to JPMorgan Chase & Co. We have not authorized anyone to give you any additional or different information. The information in the relevant terms supplement, this product supplement no. 13-I and the accompanying prospectus supplement and prospectus may only be accurate as of the dates of each of these documents, respectively.

The notes described in the relevant terms supplement and this product supplement no. 13-I are not appropriate for all investors, and involve important legal and tax consequences and investment risks, which should be discussed with your professional advisers. You should be aware that the regulations of the National Association of Securities Dealers, Inc. and the laws of certain jurisdictions (including regulations and laws that require brokers to ensure that investments are suitable for their customers) may limit the availability of the notes. The relevant terms supplement, this product supplement no. 13-I and the accompanying prospectus supplement and prospectus do not constitute an offer to sell or a solicitation of an offer to buy the notes in any circumstances in which such offer or solicitation is unlawful.

In this product supplement no. 13-I and the accompanying prospectus supplement and prospectus, "we," "us" and "our" refer to JPMorgan Chase & Co., unless the context requires otherwise.

## DESCRIPTION OF NOTES

*The following description of the terms of the notes supplements the description of the general terms of the debt securities set forth under the headings "Description of Notes" in the accompanying prospectus supplement and "Description of Debt Securities" in the accompanying prospectus. A separate terms supplement will describe the terms that apply specifically to the notes, including any changes to the terms specified below. Capitalized terms used but not defined in this product supplement no. 13-I have the meanings assigned in the accompanying prospectus supplement, prospectus and the relevant terms supplement. The term "note" refers to each \$1,000 principal amount of our Principal Protected Notes Linked to the U.S. Dollar Index®.*

### General

The Principal Protected Notes are senior unsecured obligations of JPMorgan Chase & Co. that are linked to the U.S. Dollar Index® (the "Index"). The notes are a series of securities referred to in the accompanying prospectus supplement, prospectus and the relevant terms supplement. The notes will be issued by JPMorgan Chase & Co. under an indenture dated May 25, 2001, as may be amended or supplemented from time to time, between us and Deutsche Bank Trust Company Americas (formerly Bankers Trust Company), as trustee.

Unless otherwise specified in the relevant terms supplement, the notes will not pay interest or a fixed amount at maturity. Instead, at maturity you will receive a payment in cash, the amount of which will vary depending on the performance of the Index over the term of the notes, calculated in accordance with the applicable formula as set out below. Unless otherwise specified in the relevant terms supplement, we will pay you at maturity at least the principal amount of \$1,000 for each \$1,000 principal amount note and, if specified in the relevant terms supplement, accrued and unpaid interest and/or a Minimum Return.

The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or by any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

The notes are our unsecured and unsubordinated obligations and will rank *pari passu* with all of our other unsecured and unsubordinated obligations.

The notes will be issued in denominations of \$1,000 and integral multiples thereof, unless otherwise specified in the relevant terms supplement. The principal amount and issue price of each note is \$1,000, unless otherwise specified in the relevant terms supplement. The notes will be represented by one or more permanent global notes registered in the name of DTC or its nominee, as described under "Description of Notes — Forms of Notes" in the prospectus supplement and "Forms of Securities — Global Securities" in the prospectus.

The specific terms of the notes will be described in the relevant terms supplement accompanying this product supplement no. 13-I. The terms described in that document supplement those described herein and in the accompanying prospectus and prospectus supplement. If the terms described in the relevant terms supplement are inconsistent with those described herein or in the accompanying prospectus or prospectus supplement, the terms described in the relevant terms supplement shall control.

### Payment at Maturity

The maturity date for the notes will be set forth in the relevant terms supplement and is subject to adjustment if such day is not a business day or if the final Index Valuation Date is postponed as described below. We will specify, in each case if applicable, the Participation Rate, Partial Principal Protection Percentage, Minimum Return, Maximum Return, Knock-Out Level, Knock-Out Rate, Knock-Out Event and Fixed Payment and the applicable terms of any such payment terms in the relevant terms supplement.

Your return on the notes will be linked to the performance of the U.S. Dollar Index® during the life of the notes.

Unless otherwise specified in the relevant terms supplement, at maturity you will receive a cash payment for each \$1,000 principal amount note of \$1,000 plus the Additional Amount as described below, which amount may be zero unless a Minimum Return applies. Unless otherwise specified in the relevant terms supplement, you will not receive less than \$1,000 for each \$1,000 principal amount note if you hold the notes to maturity.

For notes with neither a Knock-Out Level nor a Fixed Payment, the "Additional Amount" per \$1,000 principal amount note paid at maturity will equal, unless otherwise specified in the relevant terms supplement,  $\$1,000 \times \text{the Index Return} \times \text{the Participation Rate}$ ; *provided* that the Additional Amount will not be less than zero (or the Minimum Return, if applicable) or greater than the Maximum Return, if applicable.

The "Partial Principal Protection Percentage" will be a percentage less than 100%, as specified in the relevant terms supplement.

The "Participation Rate" will be a percentage, which may be more or less than 100%, as specified in the relevant terms supplement.

The "Minimum Return" will be a fixed dollar amount per \$1,000 principal amount note as specified in the relevant terms supplement.

The "Maximum Return" will be a fixed dollar amount per \$1,000 principal amount note as specified in the relevant terms supplement.

For notes with a Knock-Out Level, the "Additional Amount" per \$1,000 principal amount note paid at maturity will equal, unless otherwise specified in the relevant terms supplement:

- (1) if the Index closing level is less than the Knock-Out Level on each of the trading days specified in the relevant terms supplement,  $\$1,000 \times \text{the Index Return} \times \text{the Participation Rate}$ ; *provided* that the Additional Amount will not be less than zero (or the Minimum Return, if applicable) or greater than the Maximum Return, if applicable; or
- (2) if the Index closing level is greater than or equal to the Knock-Out Level on any of the trading days specified in the relevant terms supplement,  $\$1,000 \times \text{the Knock-Out Rate}$ .

The "Knock-Out Level" will be a percentage of the Initial Index Level or a fixed level of the Index as specified in the relevant terms supplement.

The "Knock-Out Rate" will be a percentage as specified in the relevant terms supplement.

A "Knock-Out Event" occurs when the Index closing level is greater than or equal to the Knock-Out Level on any of the trading days specified in the relevant terms supplement. For example, the terms supplement may specify a single trading day as the only day on which a Knock-Out Event can occur, or the terms supplement may specify that a Knock-Out Event can occur on any trading day during the term of the notes.

For notes with a Fixed Payment, the "Additional Amount" per \$1,000 principal amount note paid at maturity will equal:

- (1) if the Ending Index Level is greater than or equal to the Initial Index Level, the Fixed Payment; or
- (2) if the Ending Index Level is less than the Initial Index Level, zero (or the Minimum Return, if applicable).

The "Fixed Payment" is a fixed dollar amount per \$1,000 principal amount note as specified in the relevant terms supplement.

Unless otherwise specified in the applicable terms supplement, the “Index Return,” as calculated by the calculation agent, is the percentage change in the closing level of the Index calculated by comparing the Index closing level on the Observation Date, or the arithmetic average of the Index closing level on each of the Averaging Dates, or such other date or dates as specified in the applicable terms supplement (the “Ending Index Level”), to the Index closing level on the pricing date, or such other date or dates as specified in the applicable terms supplement, (the “Initial Index Level”). The relevant terms supplement will specify the Initial Index Level and the manner in which the Ending Index Level is determined. The Index Return, unless otherwise specified in the applicable terms supplement, is calculated as follows:

$$\text{Index Return} = \frac{\text{Ending Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$$

Unless otherwise specified in the relevant terms supplement, the “Index closing level” on any trading day will equal the latest spot value of the Index displayed on the applicable Reuters page at 11:00 a.m. New York time or alternative calculation of the Index described under “The U.S. Dollar Index® — Discontinuation or Suspension of the U.S. Dollar Index®; Alteration of Method of Calculation”.

A “trading day” is, unless otherwise specified in the applicable terms supplement, a business day, as determined by the calculation agent, on which trading is generally conducted in foreign exchange and foreign currency deposits and on the New York Board of Trade (the “NYBOT”).

The Index Valuation Date(s) will be a single date, which we refer to as the Observation Date or several dates, each of which we refer to as an Averaging Date.

The maturity date will be specified in the applicable terms supplement. If the scheduled maturity date (as specified in the applicable terms supplement) is not a business day, then the maturity date will be the next succeeding business day following such scheduled maturity date. If, due to a discontinuation or suspension of the Index or otherwise, the final Index Valuation Date is postponed so that it falls less than three business days prior to the scheduled maturity date, the maturity date will be the third business day following the final Index Valuation Date, as postponed, unless otherwise specified in the applicable terms supplement. We describe the procedures to be followed in the event of a discontinuation or suspension of the Index under “The U.S. Dollar Index® — Discontinuation or Suspension of the U.S. Dollar Index®; Alteration of Method of Calculation.”

We will irrevocably deposit with The Depository Trust Company (“DTC”) no later than the opening of business on the applicable date or dates funds sufficient to make payments of the amount payable at maturity and on the Interest Payment Dates, if any, with respect to the notes on such date. We will give DTC irrevocable instructions and authority to pay such amount to the holders of the notes entitled thereto.

A “business day” is, unless otherwise specified in the relevant terms supplement, any day other than a day on which banking institutions in The City of New York are authorized or required by law, regulation or executive order to close or a day on which transactions in dollars are not conducted.

Subject to the foregoing and to applicable law (including, without limitation, United States federal laws), we or our affiliates may, at any time and from time to time, purchase outstanding notes by tender, in open market or by private agreement.

#### **Notes with a maturity of more than one year**

The Index Valuation Date(s) will be specified in the applicable terms supplement and any such date is subject to adjustment as described below. If an Index Valuation Date is not a trading day or if there is an index discontinuation or suspension on such day, the applicable Index Valuation Date will be postponed to the immediately succeeding trading day during which no index discontinuation shall have occurred or is continuing; *provided* that the Index closing level will not be determined on a date later than the tenth scheduled trading day after the final Index Valuation Date, and if such day is not a

trading day, or if there is an index discontinuation on such date, the calculation agent will determine the Index closing level on such date in accordance with the formula for and method of calculating the Index closing level last in effect prior to commencement of the index discontinuation (or prior to the non-trading day), using the exchange rate (or, if trading in a currency included in the Index has been materially suspended or materially limited, the calculation agent's good faith estimate of the exchange rate for such currency that would have prevailed but for such suspension or limitation or non-trading day) at the time that was or would have otherwise been the close of the principal trading session of the NYBOT on such tenth scheduled trading day of each currency most recently used to calculate the value of the Index.

#### **Notes with a maturity of not more than one year**

If an index discontinuation occurs on any Index Valuation Date other than the final Index Valuation Date, or such date is not a trading day, the Index closing level will be determined on the immediately succeeding trading day on which no index discontinuation shall have occurred or is continuing. The final Index Valuation Date will be the third scheduled trading day prior to the maturity date, unless the calculation agent determines that an index discontinuation occurred or is continuing on that day. In that event, the final Index Valuation Date will be the first succeeding trading day on which the calculation agent determines that an index discontinuation has not occurred and is not continuing. In no event, however, shall the final Index Valuation Date be postponed more than ten business days, *provided* that such final Index Valuation Date, as postponed, shall not produce a maturity date (including the issue date but not the maturity date) more than one year after the issue date (any such date, the "Final Disrupted Valuation Date"). If the final Index Valuation Date has been postponed to the Final Disrupted Valuation Date, and such Final Disrupted Valuation Date is not a trading day, or if there is an index discontinuation on such Final Disrupted Valuation Date, the calculation agent will determine the Index closing level on such Final Disrupted Valuation Date in accordance with the formula for and method of calculating the Index last in effect prior to commencement of the index discontinuation, using the exchange rate (or, if trading in a currency used to calculate the value of the Index has been materially suspended or materially limited, its good faith estimate of the exchange rate that would have prevailed but for such suspension or limitation or non-trading day) at the time that was or would have otherwise been the close of the principal trading session of NYBOT on the business day immediately preceding such Final Disrupted Valuation Date of each currency included in the Index.

#### **Interest Payments**

If the relevant terms supplement specifies that the notes will bear interest, the notes will bear interest at the rate per annum, or such other rate or rates, as specified in such terms supplement. Under these circumstances, interest will accrue from the issuance date of the notes to but excluding the maturity date. Interest will be paid in arrears on each date specified in the relevant terms supplement (each such date an "Interest Payment Date") to and excluding the maturity date, to the holders of record at the close of business on the date 15 calendar days prior to that Interest Payment Date, whether or not such fifteenth calendar day is a business day, unless otherwise specified in the relevant terms supplement. Interest on the notes will be calculated based on a 360-day year of twelve 30-day months, unless otherwise specified in the relevant terms supplement. If any day on which a payment of interest or principal is due is not a business day, the payment will be made with the same force and effect on the next succeeding business day, but no additional interest will accrue as a result of the delayed payment, and the next interest payment period will commence as if the payment had not been delayed. If the maturity date is adjusted as the result of an index discontinuation, the payment of interest due on the maturity date will be made on the maturity date as adjusted, with the same force and effect as if the maturity date had not been adjusted, but no additional interest will accrue or be payable as a result of the delayed payment.

## RISK FACTORS

*Your investment in the notes will involve certain risks. The notes may not pay interest or guarantee any return of principal prior to maturity unless otherwise specified in the relevant terms supplement. Investing in the notes is not equivalent to investing directly in the Index or any of the component currencies of the Index. In addition, your investment in the notes entails other risks not associated with an investment in conventional debt securities. **You should consider carefully the following discussion of risks before you decide that an investment in the notes is suitable for you.***

### **The notes differ from conventional debt securities.**

The notes combine features of equity and debt. The terms of the notes differ from those of conventional debt securities in that we may not pay interest on the notes or, if we do pay interest, a significant portion of your total payment at maturity may be based on the performance of the Index rather than the interest rate we will pay you. Where the relevant terms supplement does not provide for interest payments, if the Ending Index Level does not exceed, or in certain cases, equal, the Initial Index Level, and if the Index closing level is less than the Knock-Out Level, if any, on each of the trading days specified in the relevant terms supplement, at maturity you will receive only \$1,000 (plus the Minimum Return, if any) for each \$1,000 principal amount note, unless otherwise specified in the relevant terms supplement. Therefore, the return on your investment in the notes may be less than the amount that would be paid on an ordinary debt security. The return at maturity of only the applicable principal amount of each note (plus the Minimum Return, if any) will not compensate you for any loss in value due to inflation and other factors relating to the value of money over time.

### **The notes may not pay more than the applicable principal amount, and accrued and unpaid interest, if applicable, at maturity.**

If the Ending Index Level is less than, or, in certain cases, equal to the Initial Index Level, and the Index closing level is less than the Knock-Out Level, if any, on all of the trading days specified in the relevant terms supplement, you will receive only the applicable interest payments, if any, set forth in the terms supplement and, unless otherwise specified in the relevant terms supplement, \$1,000 (plus the Minimum Return, if any) for each \$1,000 principal amount note you hold at maturity. This will be true even if the value of the Index was higher than the Initial Index Level at some time during the life of the notes but later falls below the Initial Index Level. Because the notes may accrue interest at an interest rate lower than that payable for other debt securities issued by us with a comparable maturity, the return on your investment in the notes may be less than the amount that would be paid on a conventional debt security of comparable maturity. This return may not fully compensate you for any loss in value due to inflation and other factors relating to the value of money over time.

### **The appreciation potential of the notes will be limited by the Knock-Out Level, if applicable.**

If the notes have a Knock-Out Level, the appreciation potential of the notes is limited by the Knock-Out Level and the corresponding Knock-Out Rate. For example, if the Knock-Out Level equals 125% of the Initial Index Level, the appreciation potential of the notes is limited to 24.99%. Once the Index closing level equals or exceeds the Knock-Out Level, the appreciation potential of the notes is limited to the Knock-Out Rate, even if the Index Return is greater than the Knock-Out Rate. For notes with a Knock-Out Level, if the Index closing level is greater than or equal to the Knock-Out Level on any trading day specified in the relevant terms supplement, the return on the notes will equal the Knock-Out Rate multiplied by the applicable principal amount of the notes and will not be determined by reference to the Index Return. This return may not compensate you for any loss in value due to inflation and other factors relating to the value of money over time. Therefore your return may be less than the return you would have otherwise received if you had invested directly in the Index, the component currencies of the Index or contracts relating to the Index for which there is an active secondary market. Under these circumstances, your return will not reflect any potential increase in the Ending Index Level, as compared to the Initial Index Level, of greater than the Knock-Out Rate.

**The Ending Index Level may be less than the Index level at other times during the term of the notes.**

Because the Ending Index Level is calculated based on the Index closing level on one or more Index Valuation Dates during the term of the notes, the level of the Index at various other times during the term of the notes could be higher than the Ending Index Level. This difference could be particularly large if there is a significant increase in the level of the Index before and/or after the Index Valuation Date(s) or if there is a significant decrease in the level of the Index around the time of the Index Valuation Date(s) or if there is significant volatility in the Index level during the term of the notes (especially on dates near the Index Valuation Date(s)). For example, when the Index Valuation Date of the notes is near the end of the term of the notes, then if the Index levels increase or remain relatively constant during the initial term of the notes and then decrease below the Initial Index Level, the Ending Index Level may be significantly less than if it were calculated on a date earlier than the Index Valuation Date. Under these circumstances, you may receive a lower payment at maturity than you would have received if you had invested in the Index, the Index Currencies or contracts relating to the Index for which there is an active secondary market.

**The appreciation potential of the notes will be limited by the Fixed Payment, if applicable.**

If the notes have a Fixed Payment, the appreciation potential of the notes is limited to the appreciation represented by such Fixed Payment, even if the appreciation in the Index would, but for the Fixed Payment, result in the payment of a greater Additional Amount at maturity. If the Ending Index Level is greater than or equal to the Initial Index Level, the return on the notes will equal the Fixed Payment and will not be determined by reference to the Index Return. This return will be limited regardless of the appreciation of the Index, which may be significant. Therefore, under certain circumstances, your return may be less than the return you would have otherwise received if you had invested directly in the Index, the Index Currencies or contracts relating to the Index for which there is an active secondary market.

**The appreciation potential of the notes will be limited by the Maximum Return, if applicable.**

If the notes have a Maximum Return, the appreciation potential of the notes is limited to the fixed dollar amount per \$1,000 principal amount note specified in the applicable terms supplement as the Maximum Return. The Additional Amount will equal no more than the Maximum Return. Accordingly, the appreciation potential of the notes will be limited to the Maximum Return even if the Additional Amount calculated with reference to the Index Return and Participation Rate would be greater than the Maximum Return.

**If the Participation Rate is less than 100%, the Additional Amount will be limited by the Participation Rate.**

If the Participation Rate is less than 100% and the Ending Index Level exceeds the Initial Index Level, the Additional Amount you receive at maturity will equal only a percentage, as specified in the relevant terms supplement, of the Index performance above the Initial Index Level. Under these circumstances, the Additional Amount you receive at maturity will not fully reflect the performance of the Index.

**The notes are designed to be held to maturity.**

The notes are not designed to be short-term trading instruments. The price at which you will be able to sell your notes prior to maturity, if at all, may be at a substantial discount from the principal amount of the notes, even in cases where the Index has appreciated since the date of the issuance of the notes. The potential returns described in any terms supplement assume that your notes are held to maturity.

**Secondary trading may be limited.**

Unless otherwise specified in the relevant terms supplement, the notes will not be listed on a securities exchange. There may be little or no secondary market for the notes. Even if there is a secondary market for the notes, it may not provide enough liquidity to allow you to trade or sell the notes easily.

J.P. Morgan Securities Inc. may act as a market maker for the notes, but is not required to do so. Because we do not expect that other market makers will participate significantly in the secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which J.P. Morgan Securities Inc. is willing to buy the notes. If at any time J.P. Morgan Securities Inc. or another Agent does not act as a market maker, it is likely that there would be little or no secondary market for the notes.

**Changes in the value of the Index Currencies may offset each other.**

The notes are linked to the U.S. Dollar Index®, whose value is calculated based on the performance of the euro, Japanese yen, British pound, Canadian dollar, Swedish Krona and Swiss Franc (or any successor currency to any of the aforementioned currencies, each an “Index Currency” and together the “Index Currencies”) relative to the U.S. dollar during the term of the notes. Movements in the exchange rates of the Index Currencies may not correlate with each other. At a time when the exchange rates of some of the Index Currencies increase relative to the U.S. dollar, the exchange rates of other Index Currencies may not increase as much or may decline relative to the U.S. dollar. Therefore, in calculating the Ending Index Level, increases in the exchange rate of some of the Index Currencies may be moderated, or more than offset, by lesser increases or decreases in the exchange rate of the other Index Currencies. Because the Index Currencies are not equally weighted, changes in the exchange rates of two Index Currencies need not be of equal magnitude in order to offset each other.

**The Value of the Index is Related to Changes in the Value of the Index Currencies Relative to the U.S. Dollar**

The value of any currency, including the Index Currencies and the U.S. Dollar, may be affected by complex political and economic factors. The value of each Index Currency relative to the U.S. Dollar is at any moment a result of the supply and demand for the two currencies, and changes in the relative value of the currencies will result over time from the interaction of many factors directly or indirectly affecting economic and political conditions in the originating country (or countries) of each Index Currency and in the United States, including economic and political developments in other countries. Of particular importance are the relative rates of inflation, interest rate levels, the balance of payments and the extent of governmental surpluses or deficits in such countries and in the United States, all of which are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of such countries, the United States and other countries important to international trade and finance.

**Intervention in the Currency Markets by the Countries Issuing the Index Currencies Can Affect the Exchange Rates of Their Respective Currencies.**

Foreign exchange rates can either be fixed by sovereign governments or floating. Exchange rates of most economically developed nations, including those issuing the Index Currencies, are permitted to fluctuate in value relative to the U.S. Dollar. However, governments do not always allow their currencies to float freely in response to economic forces. Governments, including those issuing the Index Currencies, use a variety of techniques, such as intervention by their central bank or imposition of regulatory controls or taxes, to affect the trading value of their respective currencies. They may also issue a new currency to replace an existing currency or alter the exchange rate or relative exchange characteristics by devaluation or revaluation of a currency. Thus, a special risk in purchasing the notes is that their liquidity, trading value and amounts payable could be affected by the actions of sovereign

governments which could change or interfere with theretofore freely determined currency valuation, fluctuations in response to other market forces and the movement of currencies across borders. There will be no adjustment or change in the terms of the notes in the event that exchange rates should become fixed, or in the event of any devaluation or revaluation or imposition of exchange or other regulatory controls or taxes, or in the event of the issuance of a replacement currency or in the event of other developments affecting the Index Currencies, the U.S. Dollar or any other currency.

#### **Even Though Currency Trades Around-The-Clock, The Notes Will Not**

The interbank market in foreign currencies is a global, around-the-clock market and the Index level is quoted 24 hours a day. Therefore, the hours of trading for the notes, if any, will not conform to the hours during which the Index Currencies and the U.S. dollar are traded. Significant price and rate movements may take place in the underlying foreign exchange markets, and thus in the Index level, that will not be reflected immediately in the market price, if any, of the notes. The possibility of these movements should be taken into account in relating the value of the notes to those in the underlying foreign exchange markets.

#### **Changes in Interest Rate Levels Are Expected to Affect the Trading Value of the Notes**

We expect that changes in interest rates will affect the trading value of the notes. In general, if U.S. interest rates increase, we expect that the trading value of the notes will decrease and, conversely, if U.S. interest rates decrease, we expect that the trading value of the notes will increase. If interest rates increase or decrease in markets based on any Index Currency, the trading value of the notes may be adversely affected. Interest rates may also affect the economies of the countries issuing the Index Currencies or the United States, and, in turn, the exchange rates and therefore the value of the Index relative to the U.S. dollar. Prior to maturity, the impact of U.S. interest rates and the interest rates of the countries issuing the Index Currencies may either offset or magnify each other.

#### **Prior to maturity, the value of the notes will be influenced by many unpredictable factors.**

Many economic and market factors will influence the value of the notes. We expect that, generally, the level of the Index will affect the value of the notes more than any other single factor. However, you should not expect the value of the notes in the secondary market to vary in proportion to changes in the level of the Index. The value of the notes will be affected by a number of other factors that may either offset or magnify each other, including:

- the expected volatility in the Index;
- the time to maturity of the notes;
- interest and yield rates in the market generally as well as in the markets of the countries whose currencies are used to calculate the Index;
- economic, financial, political, regulatory or judicial events that affect the Index Currencies or economic markets generally and which may affect the Index closing level on any Index Valuation Date;
- the exchange rate and the volatility of the exchange rate among each of the Index Currencies and the U.S. dollar; and
- our creditworthiness.

You cannot predict the future performance of the Index based on its historical performance. In addition, there can be no assurance that the Ending Index Level will be higher than the Initial Index Level. The Ending Index Level may be flat or negative as compared to the Initial Index Level, in which event you will only receive the applicable principal amount of your notes at maturity unless the relevant terms supplement provides for interest payments, a Minimum Return or includes a Knock-Out feature.

**The inclusion in the original issue price of each agent's commission and the cost of hedging our obligations under the notes through one or more of our affiliates is likely to adversely affect the value of the notes prior to maturity.**

While the payment at maturity will be based on the applicable principal amount of your notes as described in the applicable terms supplement, the original issue price of the notes includes each agent's commission and the cost of hedging our obligations under the notes through one or more of our affiliates. Such cost includes our affiliates' expected cost of providing such hedge, as well as the profit our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge. As a result, assuming no change in market conditions or any other relevant factors, the price, if any, at which J.P. Morgan Securities Inc. will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price. In addition, any such prices may differ from values determined by pricing models used by J.P. Morgan Securities Inc., as a result of such compensation or other transaction costs.

**NYBOT may adjust the U.S. Dollar Index® in a way that affects its level or may discontinue or suspend publication of the U.S. Dollar Index®, and NYBOT has no obligation to consider your interests.**

NYBOT is responsible for calculating and maintaining the Index. NYBOT can add, delete or substitute the Index Currencies or make other methodological changes that could change the level of the Index. You should realize that the changing of any Index Currency may affect the Index, as the value of the U.S. dollar against a newly added currency may differ significantly from the value of the U.S. dollar against the currency or currencies it replaces. Additionally, NYBOT may alter, discontinue or suspend calculation or dissemination of the Index. Any of these actions could adversely affect the value of the notes. NYBOT has no obligation to consider your interests in calculating or revising the Index. See "The U.S. Dollar Index®."

NYBOT may discontinue or suspend calculation or publication of the Index at any time. In these circumstances, and if no successor index is available, the Additional Amount payable at maturity of the notes will be an amount based on the spot exchange rates at maturity of the currencies underlying the Index at the time of such discontinuance, without rebalancing or substitution, computed by the calculation agent in accordance with the formula for calculating the Index last in effect prior to the discontinuance or unavailability of the Index.

In addition, in the event of certain material modifications to the composition, weightings or method of calculating the Index, JPMSI, as calculation agent, may determine a value of the Index for the purposes of valuing the notes and determining the Additional Amount payable at maturity of the notes as if such material modifications had not occurred. In such case, the index-linked nature of the notes would be affected.

**We or our affiliates may have adverse economic interests to the holders of the notes.**

J.P. Morgan Securities Inc. and other affiliates of ours trade the Index Currencies and other financial instruments related to the Index and the Index Currencies on a regular basis, for their accounts and for other accounts under their management. J.P. Morgan Securities Inc. and these affiliates may also issue or underwrite or assist unaffiliated entities in the issuance or underwriting of other securities or financial instruments with returns linked to an Index Currency. To the extent that we or one of our affiliates serves as issuer, agent or underwriter for such securities or financial instruments, our or their interests with respect to such products may be adverse to those of the holders of the notes. Any of these trading activities could potentially affect the exchange rate with respect to an Index Currency and, accordingly, could affect the value of the notes and any Additional Amount payable to you at maturity.

We or one of our affiliates may presently or from time to time engage in trading activities related to the Index Currencies. In the course of such business, we or our affiliates may acquire material nonpublic information with respect to such currency investments and, in addition, one or more of our affiliates may produce and/or publish research reports, or otherwise express views, with respect to such currency investments or regarding expected movements in foreign currency exchange rates. We do not make any representation or warranty to any purchaser of a note with respect to any matters whatsoever relating to such activities or future exchange rate movements.

Additionally, we or one of our affiliates may serve as issuer, agent or underwriter for additional issuances of notes with returns linked or related to changes in the level of the Index or the Index Currencies. By introducing competing products into the marketplace in this manner, we or one or more of our affiliates could adversely affect the value of the notes.

We may have hedged our obligations under the notes through certain affiliates, who would expect to make a profit on such hedge. Because hedging our obligations entails risk and may be influenced by market forces beyond our or our affiliates' control, such hedging may result in a profit that is more or less than expected, or it may result in a loss.

J.P. Morgan Securities Inc., one of our affiliates, will act as the calculation agent. The calculation agent will determine, among other things, the Initial Index Level, the Ending Index Level, the Index Return and the Additional Amount, if any, that we will pay you at maturity as well as whether the Index closing level is greater than or equal to the Knock-Out Level (for notes with a Knock-Out Level) whether the Ending Index Level is equal to or greater than the Initial Index Level and the amount of interest payable, if any, on any Interest Payment Date. The calculation agent will also be responsible for determining whether the Index has been discontinued, whether there has been a material change in the method of calculation of the Index and, if the notes bear interest, whether a day is an Interest Payment Date. In performing these duties, J.P. Morgan Securities Inc. may have interests adverse to the interests of the holders of the notes, which may affect your return on the notes, particularly where J.P. Morgan Securities Inc., as the calculation agent, is entitled to exercise discretion.

**Generally, if the term of the notes is not more than one year, the notes will be treated as short-term debt instruments for U.S. federal income tax purposes.**

Generally, if the term of the notes is not more than one year (including the last possible date that the notes could be outstanding), the notes will be treated as "short-term" debt instruments for U.S. federal income tax purposes. No statutory, judicial or administrative authority directly addresses the treatment of notes or instruments similar to the notes for U.S. federal income tax purposes, and no ruling is being requested from the Internal Revenue Service with respect to the notes. As a result, certain aspects of the tax treatment of an investment in the notes are uncertain. You are urged to review carefully the section entitled "Certain U.S. Federal Income Tax Consequences" in this product supplement no. 13-I and consult your tax adviser regarding your particular circumstances.

**Generally, if the term of the notes is more than one year, the notes will be contingent payment debt instruments for U.S. federal income tax purposes.**

Generally, if the term of the notes is more than one year, the notes will be treated as "contingent payment debt instruments" for U.S. federal income tax purposes. As a result, you will generally be required to recognize interest income in each year at a "comparable yield," even though we may not make any payments with respect to the notes until maturity. Interest included in income will increase your basis in the notes and the projected amount of stated interest, if any, will reduce your basis in the notes. Generally, amounts received at maturity in excess of your basis will be treated as additional interest income while any loss will be treated as an ordinary loss, which will be deductible against other income (e.g., employment and interest income). You are urged to review carefully the section entitled "Certain U.S. Federal Income Tax Consequences" in this product supplement no. 13-I and consult your tax adviser regarding your particular circumstances.

**JPMorgan Chase & Co. employees holding the notes must comply with policies that limit their ability to trade the notes and may affect the value of their notes.**

If you are an employee of JPMorgan Chase & Co. or one of its affiliates, you may only acquire the notes for investment purposes and you must comply with all of our internal policies and procedures. Because these policies and procedures limit the dates and times that you may transact in the notes, you may not be able to purchase any notes described in the relevant terms supplement from us and your ability to trade or sell any such notes in the secondary market may be limited.

## USE OF PROCEEDS

Unless otherwise specified in the relevant terms supplement, the net proceeds we receive from the sale of the notes will be used for general corporate purposes and, in part, by us or by one or more of our affiliates in connection with hedging our obligations under the notes. The original issue price of the notes includes each agent's commissions (as shown on the cover page of the relevant terms supplement) paid with respect to the notes which commissions include the reimbursement of certain issuance costs and the cost of hedging our obligations under the notes. The cost of hedging includes the projected profit that our affiliates expect to realize in consideration for assuming the risks inherent in hedging our obligations under the notes. Because hedging our obligations entails risk and may be influenced by market forces beyond our or our affiliates' control, such hedging may result in a profit that is more or less than expected, or could result in a loss. See also "Use of Proceeds" in the accompanying prospectus.

On or prior to the pricing date set forth in the relevant terms supplement, we, through our affiliates or others, may hedge some or all of our anticipated exposure in connection with the notes by taking positions in the Index, the Index Currencies, or instruments whose value is derived from the Index or the Index Currencies. While we cannot predict an outcome, such hedging activity coupled with other hedging and investment activity of ours, could potentially increase the level of the Index as well as the Initial Index Level, and, therefore, effectively establish a higher level that the Index must achieve for you to receive at maturity of the notes more than the applicable principal amount of your notes (other than, if applicable, any interest payment or payment of the Minimum Return). From time to time, prior to maturity of the notes, we may pursue a dynamic hedging strategy which may involve taking long or short positions in the Index, the Index Currencies, or instruments whose value is derived from the Index or the Index Currencies. Although we have no reason to believe that any of these activities will have a material impact on the level of the Index, the spot rate of any of the Index Currencies or the value of the notes, we cannot assure you that these activities will not have such an effect.

We have no obligation to engage in any manner of hedging activity and will do so solely at our discretion and for our own account. No note holder shall have any rights or interest in our hedging activity or any positions we may take in connection with our hedging activity.

## THE U.S. DOLLAR INDEX®

We have derived all information contained in this product supplement regarding the Index, including, without limitation, its make-up, method of calculation and changes in its components, from publicly available information. Such information reflects the policies of, and is subject to change by, the New York Board of Trade® (the "NYBOT®"). NYBOT determines and weights the components of the Index and causes the Index to be calculated and published. We make no representation or warranty as to the accuracy or completeness of such information.

The Index geometrically averages the exchange rates between the U.S. dollar and six major world currencies to provide a general indication of the international value of the U.S. dollar. Each currency is weighted in the Index based on a general representation of foreign trade between the United States and the countries whose currencies are represented in the Index. As of the date of this product supplement, the 17 countries (the 12 countries of the Eurozone, Japan, the United Kingdom, Canada, Sweden and Switzerland) whose currencies are used to calculate the value of the Index are the markets for the bulk of the United States' international trade and have well-developed foreign exchange markets with exchange rates freely determined by market participants. The Index is computed 24 hours a day, seven days a week based on exchange rates supplied to Reuters by approximately 500 banks worldwide.

The Index measures the change in the following six currency exchange rates, weighted as indicated, against the U.S. dollar relative to a base period of March 1973 and a base value of 100.00:

<u>Index Currency</u>	<u>Weight</u>
Eurozone Euro .....	0.576
Japanese Yen .....	0.136
British Pound .....	0.119
Canadian Dollar .....	0.091
Swedish Krona .....	0.042
Swiss Franc .....	0.036

Currencies and weights used in the calculation of the Index are based on those used in the original Federal Reserve Board's trade-weighted U.S. Dollar Index.

The level of the Index reflects the average value of the U.S. dollar relative to the 1973 base period. For example, an Index level of 105.50 means that the U.S. dollar's value has risen 5.50% against the other currencies in the Index relative to the value of the U.S. dollar against those currencies, or their predecessor currencies in the Index, in March 1973. March 1973 was chosen as the base period because the world's major trading nations replaced the previous fixed-rate Bretton Woods regime and allowed their currencies to float freely against each other in March 1973. Since 1973 the Index has ranged in value from the mid-160s to the high-70s. Please see the section entitled "Historical Information" in the relevant terms supplement for more information on the past values of the Index.

### License Agreement with NYBOT

NYBOT and one of our affiliates have entered into a non-exclusive license agreement granting us, and certain of our affiliated or subsidiary companies, the right to use the Index trademarks "USD<sup>®</sup>X" and "U.S. Dollar Index" in connection with certain securities, including the notes.

NEITHER THE PUBLICATION OF THE U.S. DOLLAR INDEX® ("USD<sup>®</sup>X") NOR THE LICENSING OF THE U.S. DOLLAR INDEX® TRADEMARKS BY NYBOT OR ITS AFFILIATES FOR USE IN CONNECTION WITH SECURITIES OR OTHER FINANCIAL PRODUCTS DERIVED FROM SUCH INDEX IN ANY WAY SUGGEST OR IMPLIES A REPRESENTATION OR OPINION BY NYBOT OR ANY SUCH AFFILIATES AS TO THE ATTRACTIVENESS OF INVESTMENT IN ANY SECURITIES OR OTHER FINANCIAL PRODUCTS BASED UPON OR DERIVED FROM SUCH INDEX. NYBOT IS NOT THE ISSUER OF ANY SUCH SECURITIES OR OTHER FINANCIAL PRODUCTS AND MAKES NO EXPRESS OR IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE WITH RESPECT TO RESULTS LINKED TO SUCH INDEX OR ANY

DATA INCLUDED OR REFLECTED THEREIN, NOR AS TO RESULTS TO BE OBTAINED BY ANY PERSON OR ANY ENTITY FROM THE USE OF THE INDEX OR ANY DATA INCLUDED OR REFLECTED THEREIN.

No purchaser, seller or holder of the notes, or any other person or entity, should use or refer to any NYBOT trade name, trademark or service mark in any manner of endorsement without first contacting NYBOT to determine whether NYBOT's permission is required. Under no circumstances may any person or entity claim any affiliation with NYBOT without the prior written permission of NYBOT.

"U.S. Dollar Index®" and USDX® are trademarks and service marks of the New York Board of Trade®, used under license. The notes are not issued, sponsored, endorsed, sold or promoted by NYBOT and NYBOT makes no representation regarding the advisability of investing in the notes.

#### **Discontinuation or Suspension of the U.S. Dollar Index®; Alteration of Method of Calculation**

NYBOT may, at any time, discontinue or suspend publication of the U.S. Dollar Index®. We refer to such an event individually as an "index discontinuation" and to such discontinued or suspended index as the "discontinued index."

If NYBOT discontinues or suspends publication of the U.S. Dollar Index® and NYBOT or another entity publishes a successor or substitute index that the calculation agent determines, in its sole discretion, to be comparable to the discontinued Index (such index being referred to herein as a "successor index"), then any Index closing level will be determined by reference to the level of such successor index at the close of trading on the relevant exchange or market for the successor index on each relevant Index Valuation Date or other relevant date or dates as set forth in the applicable terms supplement.

Upon any selection by the calculation agent of a successor index, the calculation agent will cause written notice thereof to be promptly furnished to the trustee, to us and to the holders of the notes.

If NYBOT discontinues or suspends publication of the Index prior to, and such discontinuation or suspension is continuing on, an Index Valuation Date or other relevant date as set forth in the applicable terms supplement, and the calculation agent determines, in its sole discretion, that no successor index is available at such time, or the calculation agent has previously selected a successor index and publication of such successor index is discontinued or suspended prior to, and such discontinuation or suspension is continuing on, such Index Valuation Date or other relevant date, then the calculation agent will determine the Index closing level for such date in the manner set forth below. The Index closing level will be computed by the calculation agent in accordance with the formula for and method of calculating the Index or successor index, as applicable, last in effect prior to such discontinuation or suspension, using the spot foreign exchange rates (the "Spot Rates") for each currency most recently included in the Index, without any rebalancing or substitution of such currencies following such discontinuance, suspension or other unavailability, as announced in New York on the applicable Index Valuation Date by the Federal Reserve Bank of New York for customs purposes as the noon buying rate (the "Noon Buying Rate") for cable transfers in foreign currencies; provided that if no such Noon Buying Rate is announced by the Federal Reserve Bank of New York on such trading day for any currency then constituting the Index, the Spot Rate for any such currency will equal the arithmetic mean, as determined by the calculation agent, of the firm quotes of exchange rates for conversion of such currency into U.S. dollars determined by at least three independent leading dealers, selected by the calculation agent (the "Reference Dealers"), in the underlying market for such currency taking into consideration the latest available rate for such currency and any other information deemed relevant by such Reference Dealers and received by the calculation agent at approximately 10:00 a.m., New York City time, on the trading day following the relevant Index Valuation Date; *provided* further that if (i) the difference between the highest and lowest exchange rates for conversion of any such currency into U.S. dollars determined by the Reference Dealers on such trading day pursuant to the previous clause of this sentence is greater than 1% or (ii) the calculation agent is unable to obtain three such quotes from the Reference Dealers on such date for any reason, the Spot Rate for such currency shall be the exchange rate that the calculation agent, in its sole discretion, determines to be fair and commercially reasonable

under the circumstances at approximately 10:00 a.m., New York City time, on the trading day following the relevant Index Valuation Date. Notwithstanding these alternative arrangements, the unavailability or discontinuance or suspension of the publication of the Index may adversely affect the value of the notes.

If at any time the method of calculating the Index or a successor index, or the level thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index or such successor index does not, in the opinion of the calculation agent, fairly represent the level of the Index or such successor index had such changes or modifications not been made, then the calculation agent will, at 11:00 a.m. New York City time, unless otherwise specified in the relevant terms supplement, on each date on which the Index closing level is to be determined, make such calculations and adjustments as, in the good faith judgment of the calculation agent, may be necessary in order to arrive at a level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the calculation agent will calculate the Index closing level with reference to the Index or such successor index, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification, then the calculation agent will adjust its calculation of the Index or such successor index in order to arrive at a level of the Index or such successor index as if there had been no such modification.

## GENERAL TERMS OF NOTES

### Calculation Agent

J.P. Morgan Securities Inc. will act as the calculation agent. The calculation agent will determine, among other things, the Initial Index Level, the Ending Index Level, the Index Return, the amount we will pay you at maturity and the Index closing level on any Index Valuation Date, including, if applicable, whether a Knock-Out Event has occurred (for notes with a Knock-Out Level), whether the Ending Index Level is equal to or greater than the Initial Index Level and, if the notes bear interest, the amount of interest payable, if any, on any Interest Payment Date. In addition, the calculation agent will determine whether there has been a discontinuation or suspension of the Index, whether there has been a material change in the method of calculation of the Index and, if the notes bear interest, whether a day is an Interest Payment Date. All determinations made by the calculation agent will be at the sole discretion of the calculation agent and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different calculation agent from time to time after the date of the relevant terms supplement without your consent and without notifying you.

The calculation agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity and each Interest Payment Date, if applicable, on or prior to 11:00 a.m. on the business day preceding the maturity date and each Interest Payment Date, if applicable.

All calculations with respect to the Initial Index Level, the Ending Index Level, the Index Return or any Index closing level will be rounded to the nearest one hundred-thousandth, with five one-millionths rounded upward (e.g., .876545 would be rounded to .87655); all dollar amounts related to determination of the Additional Amount payable at maturity, if any, per \$1,000 principal amount note will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate principal amount of notes per holder will be rounded to the nearest cent, with one-half cent rounded upward.

### Events of Default

Under the heading “Description of Debt Securities — Events of Default, Waiver, Debt Securities in Foreign Currencies” in the accompanying prospectus is a description of events of default relating to debt securities including the notes.

### Alternate Additional Amount Calculation in Case of an Event of Default

Unless otherwise specified in the relevant terms supplement, in case an event of default with respect to the notes shall have occurred and be continuing, the amount declared due and payable per \$1,000 principal amount note upon any acceleration of the notes will be equal to \$1,000 (or a portion of \$1,000 if there is a Partial Principal Protection Percentage set forth in the relevant terms supplement), plus the Additional Amount, which will be calculated as if the date of acceleration were the final Index Valuation Date, plus, if applicable, any accrued and unpaid interest on the notes. If the notes have more than one Index Valuation Date, then for each Index Valuation Date scheduled to occur after the date of acceleration, the trading days immediately preceding the date of acceleration (in such number equal to the number of Index Valuation Dates in excess of one) shall be the corresponding Index Valuation Dates unless otherwise specified in the relevant terms supplement. Upon any acceleration of the notes, any interest will be calculated on the basis of a 360-day year of twelve 30-day months and the actual number of days elapsed from and including the previous Interest Payment Date for which interest was paid.

If the maturity of the notes is accelerated because of an event of default as described above, we shall, or shall cause the calculation agent to, provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, and to DTC of the cash amount due with respect to the notes as promptly as possible and in no event later than two business days after the date of acceleration.

**Modification**

Under the heading “Description of Debt Securities — Modification of the Indenture; Waiver of Compliance” in the accompanying prospectus is a description of when the consent of each affected holder of debt securities is required to modify the indenture.

**Defeasance**

The provisions described in the accompanying prospectus under the heading “Description of Debt Securities — Discharge, Defeasance and Covenant Defeasance” are not applicable to the notes, unless otherwise specified in the relevant terms supplement.

**Listing**

The notes will not be listed on any securities exchange, unless otherwise specified in the relevant terms supplement.

**Book-Entry Only Issuance — The Depository Trust Company**

The Depository Trust Company, or DTC, will act as securities depository for the notes. The notes will be issued only as fully-registered securities registered in the name of Cede & Co. (DTC’s nominee). One or more fully-registered global notes certificates, representing the total aggregate principal amount of the notes, will be issued and will be deposited with DTC. See the descriptions contained in the accompanying prospectus supplement under the headings “Description of Notes — Forms of Notes” and “The Depository.”

**Registrar, Transfer Agent and Paying Agent**

Payment of amounts due at maturity on the notes will be payable and the transfer of the notes will be registrable at the principal corporate trust office of JPMorgan Chase Bank, National Association (“JPMorgan Chase Bank”) in The City of New York.

JPMorgan Chase Bank or one of its affiliates will act as registrar and transfer agent for the notes. JPMorgan Chase Bank will also act as paying agent and may designate additional paying agents.

Registration of transfers of the notes will be effected without charge by or on behalf of JPMorgan Chase Bank, but upon payment (with the giving of such indemnity as JPMorgan Chase Bank may require) in respect of any tax or other governmental charges that may be imposed in relation to it.

**Governing Law**

The notes will be governed by and interpreted in accordance with the laws of the State of New York.

## **CERTAIN U.S. FEDERAL INCOME TAX CONSEQUENCES**

The following is a general discussion of the principal U.S. federal income tax consequences of the acquisition, ownership and disposition of notes. This discussion applies to you if you are an initial holder of notes purchasing the notes at their issue price for cash and if you hold the notes as capital assets within the meaning of Section 1221 of the Internal Revenue Code of 1986, as amended (the "Code").

This summary is based on the Code, existing and proposed Treasury regulations, revenue rulings, administrative interpretations and judicial decisions, in each case as currently in effect, all of which are subject to change, possibly with retroactive effect. This summary does not address all aspects of the U.S. federal income taxation of the notes that may be relevant to you in light of your particular circumstances or if you are a holder of notes who is subject to special treatment under the U.S. federal income tax laws, such as:

- a financial institution;
- an insurance company;
- a "regulated investment company" as defined in Code Section 851;
- a "real estate investment trust" as defined in Code Section 856;
- a tax-exempt entity, including an "individual retirement account" or "Roth IRA" as defined in Code Section 408 or 408A, respectively;
- a dealer in securities or foreign currencies;
- a person holding the notes as part of a hedging transaction, "straddle," synthetic security, conversion transaction, or other integrated transaction, or who has entered into a "constructive sale" with respect to the notes;
- a U.S. Holder (as defined below) whose functional currency is not the U.S. dollar;
- a trader in securities who elects to apply a mark-to-market method of tax accounting; or
- a partnership or other entity classified as a partnership for U.S. federal income tax purposes.

As the law applicable to the U.S. federal income taxation of instruments such as the notes is technical and complex, the discussion below necessarily represents only a general summary. Moreover, the effects of any applicable state, local or foreign tax laws are not discussed. You are urged to consult your tax adviser concerning the U.S. federal income tax consequences of owning and disposing of the notes, as well as any consequences under the laws of any state, local or foreign taxing jurisdiction.

The following discussion does not apply to notes with a Fixed Payment. Prospective holders of such notes will be provided with a supplemental disclosure statement in the applicable term sheet, describing the tax consequences relating to such notes.

### **Tax Treatment of the Notes**

We expect to seek an opinion from Davis Polk & Wardwell, our special tax counsel, regarding the treatment of the notes as debt for U.S. federal income tax purposes. The applicable terms supplement will describe Davis Polk & Wardwell's level of comfort on this issue, which will depend on the facts of the particular offering, its receipt of certain factual representations from us at the time of the relevant offering and any additional considerations that may be relevant to the particular offering. The following discussion describes the treatment of the notes assuming that Davis Polk & Wardwell has provided us an opinion that the notes will be treated as debt for U.S. federal income tax purposes.

## **Tax Consequences to U.S. Holders**

The following discussion applies to you only if you are a "U.S. Holder" of notes. You are a "U.S. Holder" if you are a beneficial owner of a note for U.S. federal income tax purposes that is:

- a citizen or resident of the United States;
- a corporation or other entity taxable as a corporation created or organized under the laws of the United States or any political subdivision thereof; or
- an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

## **Notes with a Term of Not More Than One Year**

If the term of the notes (including the issue date but not the maturity date) from issuance to maturity (including the last possible date that the notes could be outstanding) is not more than one year, the following discussion applies. No statutory, judicial or administrative authority directly addresses the treatment of such notes or instruments similar thereto for U.S. federal income tax purposes, and no ruling will be requested from the Internal Revenue Service with respect to the notes. As a result, certain aspects of the U.S. federal income tax consequences of an investment in such notes are uncertain.

### ***Tax Treatment Prior to Maturity***

Because the term of these notes is one year or less, they will be treated as short-term obligations. Cash method holders will not be required to recognize income with respect to the notes prior to maturity, other than pursuant to a sale or exchange, as described below. Although accrual method holders and certain other holders are generally required to accrue interest on short-term notes on a straight line basis, because the amount of interest that will be received with respect to the notes is uncertain, it is not clear how such accruals should be determined. If the amount of interest that will be received has become fixed (or likelihood of interest not being a fixed amount has become "remote") prior to the maturity date, it is likely that the amount of interest to be accrued will be determined based on the fixed amount. You should consult your tax adviser regarding the determination of the amount of any interest accruals on the notes.

### ***Sale, Exchange or Redemption of the Notes***

Upon a sale or exchange of a short-term note (including redemption of the notes at maturity), you should recognize gain or loss in an amount equal to the difference between the amount you receive and your adjusted basis in the note. Your adjusted basis in the note should equal the sum of the amount you paid to acquire the note and previously accrued interest income, if any.

The amount of any resulting loss should be treated as a capital loss, and may be subject to special reporting requirements if the loss exceeds certain thresholds. In the case of a gain resulting from redemption at maturity, the gain should be treated as ordinary income, although it is unclear whether and to what extent such ordinary income should be treated as interest income or foreign currency gain. Additionally, it is not clear whether or to what extent gain from a sale or exchange prior to maturity should be treated as capital gain or ordinary income. If the amount of interest to be received at maturity has become fixed (or the likelihood of such amount not being fixed has become "remote") prior to a sale or exchange, it is likely that the portion of gain on such sale or exchange that should be treated as accrued interest (and, therefore, taxed as interest income) will be determined based on the fixed amount. You should consult your tax adviser regarding the proper treatment of any gain or loss recognized upon a sale or exchange (including redemption at maturity) of a short-term note.

### ***Interest on Indebtedness Incurred to Purchase the Notes***

To the extent you have not previously included interest income on the short-term notes, you may be required to defer deductions for interest paid on indebtedness incurred to purchase or carry the

notes until the maturity of the notes or until you dispose of your notes in a taxable transaction. You should consult with your tax adviser regarding the possibility of such deferral.

#### **Notes with a Term of More Than One Year**

If the term of the notes (including the issue date but not the maturity date) from issuance to maturity (including the last possible date that the notes could be outstanding) is more than one year, the notes will be treated as “contingent payment debt instruments” for U.S. federal income tax purposes, with the consequences described below. The notes will generally be subject to the original issue discount (“OID”) provisions of the Code and the Treasury regulations issued thereunder, and you will be required to accrue as interest income the OID on the notes as described below.

We are required to determine a “comparable yield” for the notes. The “comparable yield” is the yield at which we could issue a fixed rate debt instrument with terms similar to those of the notes, including the level of subordination, term, timing of payments and general market conditions, but excluding any adjustments for the riskiness of the contingencies or the liquidity of the notes. Solely for purposes of determining the amount of interest income that you will be required to accrue, we are also required to construct a “projected payment schedule” in respect of the notes representing a series of payments the amount and timing of which would produce a yield to maturity on the notes equal to the comparable yield.

Unless otherwise provided in the applicable terms supplement, we will provide, and you may obtain, the comparable yield for a particular offering of notes, and the related projected payment schedule, in the final terms supplement for such notes, which we will file with the SEC.

**Neither the comparable yield nor the projected payment schedule constitutes a representation by us regarding the actual amount, if any, that we will pay on the notes.**

For United States federal income tax purposes, you are required to use our determination of the comparable yield and projected payment schedule in determining interest accruals and adjustments in respect of a note, unless you timely disclose and justify the use of other estimates to the Internal Revenue Service (the “IRS”). Regardless of your accounting method, you will be required to accrue as interest income OID on the notes at the comparable yield, adjusted upward or downward to reflect the difference, if any, between the actual and the projected amount of the contingent payment(s) on the notes (as described below).

In addition to interest accrued based upon the comparable yield as described above, you will be required to recognize interest income equal to the amount of any net positive adjustment, *i.e.*, the excess of actual payments over projected payments, in respect of a note for a taxable year. A net negative adjustment, *i.e.*, the excess of projected payments over actual payments, in respect of a note for a taxable year:

- will first reduce the amount of interest in respect of the note that you would otherwise be required to include in income in the taxable year; and
- any excess will give rise to an ordinary loss, but only to the extent that the amount of all previous interest inclusions under the note exceeds the total amount of your net negative adjustments treated as ordinary loss on the note in prior taxable years.

A net negative adjustment is not subject to the two percent floor limitation imposed on miscellaneous itemized deductions. Any net negative adjustment in excess of the amounts described above will be carried forward to offset future interest income in respect of the note or to reduce the amount realized on a sale, exchange or retirement of the note.

Upon a sale, exchange or retirement of a note (including at its maturity), you generally will recognize taxable gain or loss equal to the difference between the amount received from the sale, exchange or retirement and your adjusted tax basis in the note. Your adjusted tax basis in a note will equal the cost thereof, increased by the amount of interest income previously accrued by you in

respect of the note (determined without regard to any of the positive or negative adjustments to interest accruals, described above) and decreased by the amount of any prior projected payments in respect of the note. You generally must treat any gain as interest income and any loss as ordinary loss to the extent of previous interest inclusions (reduced by the total amount of net negative adjustments previously taken into account as ordinary losses), and the balance as capital loss. Such losses are not subject to the limitation imposed on miscellaneous itemized deductions under Section 67 of the Code. The deductibility of capital losses, however, is subject to limitations. Additionally, if you recognize a loss above certain thresholds, you may be required to file a disclosure statement with the IRS. You are urged to consult your tax adviser regarding these limitations and reporting obligations.

Special rules will apply if any contingent payment on the note becomes fixed more than six months prior to its scheduled date of payment. For purposes of the preceding sentence, a payment (including the Additional Amount) will be treated as fixed if (and when) all remaining contingencies with respect to it are remote or incidental within the meaning of the applicable Treasury regulations. Generally, in this case you would be required to make adjustments to account for the difference between the amount so treated as fixed and the projected payment in a reasonable manner over the remaining term of the note. Your tax basis in the note and the character of any gain or loss on the sale of the note could also be affected. You are urged to consult your tax adviser concerning the application of these special rules.

### **Tax Consequences to Non-U.S. Holders**

The following discussion applies to you only if you are a “Non-U.S. Holder” of notes. You are a “Non-U.S. Holder” if you are a beneficial owner of a note for U.S. federal income tax purposes that is:

- a nonresident alien individual;
- a foreign corporation; or
- a nonresident alien fiduciary of a foreign estate or trust.

You are not a “Non-U.S. Holder” if you are an individual present in the United States for 183 days or more in the taxable year of disposition. In this case, you should consult your own tax adviser regarding the U.S. federal income tax consequences of the sale, exchange or other disposition of a note.

Payments to you on the notes, and any gain realized on a sale or exchange of the notes, will be exempt from U.S. federal income tax (including withholding tax) provided generally that you have fulfilled the certification requirement described below and such amounts are not effectively connected with your conduct of a U.S. trade or business.

The certification requirement referred to in the preceding paragraph will be fulfilled if you certify on IRS Form W-8BEN, under penalties of perjury, that you are not a United States person and provide your name and address or otherwise satisfy applicable documentation requirements.

If you are engaged in a trade or business in the United States and if the income or gain on the note, if any, is effectively connected with your conduct of such trade or business, although exempt from the withholding tax discussed above, you will generally be subject to regular U.S. income tax on such income or gain in the same manner as if you were a U.S. Holder, except that in lieu of the certificate described in the preceding paragraph, you will be required to provide a properly executed IRS Form W-8ECI in order to claim an exemption from withholding tax. If this paragraph applies to you, you are urged to consult your tax adviser with respect to other U.S. tax consequences of the ownership and disposition of the notes, including the possible imposition of a 30% branch profits tax.

If you are an individual, your notes will not be included in your estate for U.S. federal estate tax purposes, provided that interest on the notes is not then effectively connected with your conduct of a United States trade or business.

## **Backup Withholding and Information Reporting**

The proceeds received from a sale, exchange or other disposition (including the payment at maturity) of notes will be subject to information reporting if you are not an “exempt recipient” (such as a domestic corporation) and may also be subject to backup withholding at the rates specified in the Code if you fail to provide certain identifying information (such as an accurate taxpayer identification number, if you are a U.S. Holder) or meet certain other conditions. If you are a Non-U.S. Holder and you comply with the identification procedures described in the preceding section, you will generally establish an exemption from backup withholding; however, we expect that the additional amount paid to you at maturity (and possibly on a sale or exchange of a note) will be reported to you (and to the IRS).

Amounts withheld under the backup withholding rules are not additional taxes and may be refunded or credited against your United States federal income tax liability, provided the required information is furnished to the IRS.

## UNDERWRITING

Under the terms and subject to the conditions contained in the Master Agency Agreement entered into between JPMorgan Chase & Co. and J.P. Morgan Securities Inc. as agent (an "Agent" or "JPMSI"), and certain other agents that may be party to the Master Agency Agreement from time to time (each an "Agent" and collectively with JPMSI, the "Agents"), each Agent participating in an offering of notes, acting as principal for its own account, has agreed to purchase, and we have agreed to sell, the principal amount of notes set forth on the cover page of the relevant terms supplement. Each such Agent proposes initially to offer the notes directly to the public at the public offering price set forth on the cover page of the relevant terms supplement. JPMSI will allow a concession to other dealers, or we may pay other fees, in the amount set forth on the cover page of the relevant terms supplement. After the initial offering of the notes, the Agents may vary the offering price and other selling terms from time to time.

We own, directly or indirectly, all of the outstanding equity securities of JPMSI. The underwriting arrangements for this offering comply with the requirements of Rule 2720 of the Conduct Rules of the NASD regarding an NASD member firm's underwriting of securities of an affiliate. In accordance with Rule 2720, no underwriter may make sales in this offering to any discretionary account without the prior approval of the customer.

JPMSI or another Agent may act as principal or agent in connection with offers and sales of the notes in the secondary market. Secondary market offers and sales will be made at prices related to market prices at the time of such offer or sale; accordingly, the Agents or a dealer may change the public offering price, concession and discount after the offering has been completed.

In order to facilitate the offering of the notes, JPMSI may engage in transactions that stabilize, maintain or otherwise affect the price of the notes. Specifically, JPMSI may sell more notes than it is obligated to purchase in connection with the offering, creating a naked short position in the notes for its own account. JPMSI must close out any naked short position by purchasing the notes in the open market. A naked short position is more likely to be created if JPMSI is concerned that there may be downward pressure on the price of the notes in the open market after pricing that could adversely affect investors who purchase in the offering. As an additional means of facilitating the offering, JPMSI may bid for, and purchase, notes in the open market to stabilize the price of the notes. Any of these activities may raise or maintain the market price of the notes above independent market levels or prevent or retard a decline in the market price of the notes. JPMSI is not required to engage in these activities, and may end any of these activities at any time.

No action has been or will be taken by us, JPMSI or any dealer that would permit a public offering of the notes or possession or distribution of this product supplement no. 13-I or the accompanying prospectus supplement, prospectus or terms supplement, other than in the United States, where action for that purpose is required. No offers, sales or deliveries of the notes, or distribution of this product supplement no. 13-I or the accompanying prospectus supplement, prospectus or terms supplement or any other offering material relating to the notes, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and will not impose any obligations on us, the Agents or any dealer.

Each Agent has represented and agreed, and each dealer through which we may offer the notes has represented and agreed, that it (i) will comply with all applicable laws and regulations in force in each non-U.S. jurisdiction in which it purchases, offers, sells or delivers the notes or possesses or distributes this product supplement no. 13-I and the accompanying prospectus supplement, prospectus and terms supplement and (ii) will obtain any consent, approval or permission required by it for the purchase, offer or sale by it of the notes under the laws and regulations in force in each non-U.S. jurisdiction to which it is subject or in which it makes purchases, offers or sales of the notes. We shall not have responsibility for any Agent's or any dealer's compliance with the applicable laws and regulations or obtaining any required consent, approval or permission.

The notes are not and will not be authorized by the Comisión Nacional de Valores for public offer in Argentina and may thus not be offered or sold to the public at large or to sectors or specific groups thereof by any means, including but not limited to personal offerings, written materials, advertisements or the media, in circumstances which constitute a public offering of securities under Argentine Law No. 17,811, as amended.

The notes have not been and will not be registered with the “Comissão de Valores Mobiliários” — the Brazilian Securities and Exchange Commission (“CVM”) and accordingly, the notes may not be sold, promised to be sold, offered, solicited, advertised and/or marketed within the Federative Republic of Brazil in an offering that can be construed as a public offering under CVM Instruction nº 400, dated December 29, 2003, as amended from time to time.

The notes have not been registered with the Superintendencia de Valores y Seguros in Chile and may not be offered or sold publicly in Chile. No offer, sales or deliveries of the notes, or distribution of this product supplement no. 13-I or the accompanying prospectus supplement, prospectus or terms supplement, may be made in or from Chile except in circumstances which will result in compliance with any applicable Chilean laws and regulations.

The notes have not been, and will not be, registered with the National Registry of Securities maintained by the Mexican National Banking and Securities Commission nor with the Mexican Stock Exchange and may not be offered or sold publicly in the United Mexican States. This product supplement no. 13-I and the accompanying prospectus supplement, prospectus and terms supplement may not be publicly distributed in the United Mexican States.

Unless otherwise specified in the applicable terms supplement, the settlement date for the notes will be the third business day following the pricing date (which is referred to as a “T+3” settlement cycle).

## **BENEFIT PLAN INVESTOR CONSIDERATIONS**

A fiduciary of a pension, profit-sharing or other employee benefit plan subject to the Employment Retirement Income Security Act of 1974, as amended ("ERISA"), including entities such as collective investment funds, partnerships and separate accounts whose underlying assets include the assets of such plans (collectively, "ERISA Plans") should consider the fiduciary standards of ERISA in the context of the ERISA Plans' particular circumstances before authorizing an investment in the notes. Among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the ERISA Plan.

Section 406 of ERISA and Section 4975 of the Code prohibit ERISA Plans, as well as individual retirement accounts and Keogh plans subject to Section 4975 of the Code (together with ERISA Plans, "Plans"), from engaging in certain transactions involving the "plan assets" with persons who are "parties in interest" under ERISA or "disqualified persons" under the Code ("Parties in Interest") with respect to such Plans. As a result of our business, we are a Party in Interest with respect to many Plans. Where we are a Party in Interest with respect to a Plan (either directly or by reason of ownership of our subsidiaries), the purchase and holding of the notes by or on behalf of the Plan would be a prohibited transaction under Section 406(a)(1) of ERISA and Section 4975(c)(1) of the Code, unless exemptive relief were available under an applicable administrative exemption (as described below) or there was some other basis on which the transaction was not prohibited.

Accordingly, the notes may not be purchased or held by any Plan, any entity whose underlying assets include "plan assets" by reason of any Plan's investment in the entity (a "Plan Asset Entity") or any person investing "plan assets" of any Plan, unless such purchaser or holder is eligible for the exemptive relief available under Prohibited Transaction Class Exemption ("PTCE") 96-23, 95-60, 91-38, 90-1 or 84-14 issued by the U.S. Department of Labor or there was some other basis on which the purchase and holding of the notes is not prohibited. Each purchaser or holder of the notes or any interest therein will be deemed to have represented by its purchase of the notes that (a) its purchase and holding of the notes is not made on behalf of or with "plan assets" of any Plan or (b) its purchase and holding of the notes will not result in a prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or there is some other basis on which such purchase and holding is not prohibited.

Employee benefit plans that are governmental plans (as defined in Section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA) and non-U.S. plans (as described in Section 4(b)(4) of ERISA) are not subject to these "prohibited transaction" rules of ERISA or Section 4975 of the Code, but may be subject to similar rules under other applicable laws or documents ("Similar Laws"). Accordingly, each purchaser or holder of the notes shall be required to represent (and deemed to constitute a representation) that such purchase and holding is not prohibited under applicable Similar Laws or rules.

Due to the complexity of the applicable rules, it is particularly important that fiduciaries or other persons considering purchasing the notes on behalf of or with "plan assets" of any Plan consult with their counsel regarding the relevant provisions of ERISA, the Code or any Similar Laws and the availability of exemptive relief under PTCE 96-23, 95-60, 91-38, 90-1 or 84-14 or some other basis on which the acquisition and holding is not prohibited.

Each purchaser and holder of the notes has exclusive responsibility for ensuring that its purchase and holding of the notes does not violate the fiduciary or prohibited transaction rules of ERISA, the Code or any Similar Laws. The sale of any notes to any Plan is in no respect a representation by us or any of our affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such an investment is appropriate for Plans generally or any particular Plan.
