JPMorgan Chase & Co.

\$3,532,000

Buffered Return Enhanced Notes Linked to a Basket Consisting of the AMEX Hong Kong 30 Index, the FTSE/Xinhua China 25 Index, the Korea Stock Price Index 200, the MSCI Taiwan Index and the MSCI Singapore Index due July 18, 2007

General

- The notes are designed for investors who seek a return of twice the appreciation of a diversified basket of Asian indices up to a maximum total return on the notes of 18.60% at maturity. Investors should be willing to forego interest and dividend payments and, if the Basket declines by more than 10%, be willing to lose some or all of their principal.
- Senior unsecured obligations of JPMorgan Chase & Co. maturing July 18, 2007[†].
- Minimum denominations of \$50,000 and integral multiples of \$1,000 in excess thereof.
- The notes priced on June 30, 2006 and are expected to settle on or about July 6, 2006.

Key Terms

Basket:	The notes are linked to a basket consisting of the AMEX Hong Kong 30 Index ("HKX"), the FTSE/Xinhua China 25 Index ("XINOI"), the Korea Stock Price Index 200 ("KOSPI2"), the MSCI Taiwan Index ("TWY") and the MSCI Singapore Index ("SGY") (each a "Basket Index" and together the "Basket Indices").
Index Weightings:	The AMEX Hong Kong Weighting is 18.0%, the FTSE/Xinhua Weighting is 16.5%, the KOSPI Weighting is 31.7%, the MSCI Taiwan Weighting is 24.9% and the MSCI Singapore Weighting is 8.9% (each an "Index Weighting" and, collectively, the "Index Weightings").
Upside Leverage Factor:	2
Payment at Maturity:	If the Ending Basket Level is greater than the Starting Basket Level, you will receive a cash payment that provides you with a return per \$1,000 principal amount note equal to the Basket Return multiplied by two, subject to a Maximum Total Return on the notes of 18.60%. For example, if the Basket Return is more than 9.30%, you will receive the Maximum Total Return on the notes of 18.60%, which entitles you to the maximum payment of \$1,186 at maturity for every \$1,000 principal amount note that you hold. Accordingly, if the Basket Return is positive, your payment per \$1,000 principal amount note will be calculated as follows, subject to the Maximum Total Return: $\$1,000 + [\$1,000 \times (\text{Basket Return} \times 2)]$ Your principal is protected against up to a 10% decline in the Basket at maturity. If the Ending Basket Level declines from the Starting Basket Level by up to 10%, you will receive the principal amount of your notes at maturity. If the Ending Basket Level declines from the Starting Basket Level by more than 10%, you will lose 1.1111% of the principal amount of your notes for every 1% that the Basket declines beyond 10% and your final payment per \$1,000 principal amount note will be calculated as follows: $\$1,000 + [\$1,000 \times (\text{Basket Return} + 10\%) \times 1.1111]$ <i>You will lose some or all of your investment at maturity if the Ending Basket Level declines from the Starting Basket Level by more than 10%.</i>
Buffer Amount:	10%
Downside Leverage Factor:	1.1111
Basket Return:	The performance of the Basket from the Starting Basket Level to the Ending Basket Level, calculated as follows: $\frac{\text{Ending Basket Level} - \text{Starting Basket Level}}{\text{Starting Basket Level}}$
Starting Basket Level:	Set equal to 100 on the pricing date.
Ending Basket Level:	The arithmetic average of the Basket Closing Levels on the five Averaging Dates.
Basket Closing Level:	For each of the Averaging Dates, the Basket Closing Level will be calculated as follows: $100 \times [1 + (\text{AMEX Hong Kong Return} \times \text{AMEX Hong Kong Weighting}) + (\text{FTSE/Xinhua Return} \times \text{FTSE/Xinhua Weighting}) + (\text{KOSPI Return} \times \text{KOSPI Weighting}) + (\text{MSCI Taiwan Return} \times \text{MSCI Taiwan Weighting}) + (\text{MSCI Singapore Return} \times \text{MSCI Singapore Weighting})]$ The returns set forth in the formula above reflect the performance of each Basket Index, expressed as a percentage, from the closing level on the pricing date to the closing level on the relevant Averaging Date.
Averaging Dates [†] :	July 9, 2007, July 10, 2007, July 11, 2007, July 12, 2007 and July 13, 2007
Maturity Date [†] :	July 18, 2007
CUSIP:	48123JBB4

[†] Subject to postponement in the event of a market disruption event and as described under "Description of Notes – Payment at Maturity" in the accompanying product supplement no. 31-II.

Investing in the Buffered Return Enhanced Notes involves a number of risks. See "Risk Factors" beginning on page PS-7 of the accompanying product supplement no. 31-II and "Selected Risk Considerations" beginning on page PS-3 of this pricing supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this pricing supplement or the accompanying prospectus supplements and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public	Fees and Commissions (1)	Proceeds to Us
Per note	\$1,000	\$13	\$987
Total	\$3,532,000	\$45,916	\$3,486,084

(1) J.P. Morgan Securities Inc., whom we refer to as JPMSI, acting as agent for JPMorgan Chase & Co., will receive a commission of \$13 per \$1,000 principal amount note and will use a portion of that commission to pay selling concessions to other affiliated dealers of \$6.50 per \$1,000 principal amount note. See "Underwriting" beginning on page PS-45 of the accompanying product supplement no. 31-II.

For a different portion of the notes to be sold in this offering, an affiliated bank will receive a fee and another affiliate of ours will receive a structuring and development fee. The aggregate amount of these fees will be \$13 per \$1,000 principal amount note.

The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

JPMorgan

June 30, 2006

ADDITIONAL TERMS SPECIFIC TO THE NOTES

You should read this pricing supplement together with the prospectus dated December 1, 2005, as supplemented by the prospectus supplement dated December 1, 2005 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 31-II dated May 5, 2006. This pricing supplement, together with the documents listed below, contains the terms of the notes, supplements the term sheet related hereto dated June 23, 2006 and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary pricing terms, correspondence, trade ideas, structures for implementation, sample structures brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Risk Factors” in the accompanying product supplement no. 31-II, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC Web site at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC Web site):

- Product supplement no. 31-II dated May 5, 2006:
<http://www.sec.gov/Archives/edgar/data/19617/000089109206001186/e23997-424b2.pdf>
- Prospectus supplement dated December 1, 2005:
http://www.sec.gov/Archives/edgar/data/19617/000089109205002390/e22885_424b2.txt
- Prospectus dated December 1, 2005:
http://www.sec.gov/Archives/edgar/data/19617/000089109205002389/e22923_base.txt

Our Central Index Key, or CIK, on the SEC Web site is 19617. As used in this pricing supplement, the “Company,” “we,” “us,” or “our” refers to JPMorgan Chase & Co.

What is the Total Return on the Notes at Maturity Assuming a Range of Performance for the Basket?

The following table and graph illustrate the hypothetical total return at maturity on the notes. The “total return” as used in this pricing supplement is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount note to \$1,000. The hypothetical total returns set forth below reflect the Maximum Total Return on the notes of 18.60%. The hypothetical total returns set forth below are for illustrative purposes only and may not be the actual total returns applicable to a purchaser of the notes. The numbers appearing in the following table, graph and examples have been rounded for ease of analysis.

Ending Basket Level	Basket Return	Total Return
180.00	80.00%	16.80%
165.00	65.00%	16.80%
150.00	50.00%	16.80%
140.00	40.00%	16.80%
125.00	25.00%	16.80%
110.00	10.00%	16.80%
109.30	9.30%	16.80%
105.00	5.00%	10.00%
102.50	2.50%	5.00%
101.00	1.00%	2.00%
100.00	0.00%	0.00%
90.00	-10.00%	0.00%
80.00	-20.00%	-11.11%
70.00	-30.00%	-22.22%
60.00	-40.00%	-33.33%
50.00	-50.00%	-44.44%
40.00	-60.00%	-55.56%
30.00	-70.00%	-66.67%
20.00	-80.00%	-77.78%
10.00	-90.00%	-88.89%
0	-100.00%	-100.00%

Buffered Return Enhanced Note Linked to a Basket of Asian Indices
Total Return at Maturity

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table and graph above are calculated.

Example 1: The level of the Basket increases from a Starting Basket Level of 100 to an Ending Basket Level of 105. Because the Ending Basket Level of 105 is greater than the Starting Basket Level of 100 and the Basket Return of 5% multiplied by 2 does not exceed the Maximum Total Return of 18.60%, the investor receives a payment at maturity of \$1,100 per \$1,000 principal amount note calculated as follows:

$$\$1,000 + [\$1,000 \times (5\% \times 2)] = \$1,100$$

Example 2: The level of the Basket decreases from a Starting Basket Level of 100 to an Ending Basket Level of 90. Because the Ending Basket Level of 90 is less than the Starting Basket Level of 100 by not more than the Buffer Amount of 10%, the investor will receive a payment at maturity of \$1,000 per \$1,000 principal amount note.

Example 3: The level of the Basket increases from a Starting Basket Level of 100 to an Ending Basket Level of 110. Because the Basket Return of 10% multiplied by 2 exceeds the Maximum Total Return of 18.60%, the investor receives a payment at maturity of \$1,186 per \$1,000 principal amount note, the maximum payment on the notes.

Example 4: The level of the Basket decreases from a Starting Basket Level of 100 to an Ending Basket Level of 80. Because the Ending Basket Level of 80 is less than the Starting Basket Level of 100 by more than the Buffer Amount of 10%, the Basket Return is negative and the investor will receive a payment at maturity of \$889 per \$1,000 principal amount note calculated as follows:

$$\$1,000 + [\$1,000 \times (-20\% + 10\%) \times 1.1111] = \$889$$

Selected Purchase Considerations

- **APPRECIATION POTENTIAL** – The notes provide the opportunity to enhance equity returns by multiplying a positive Basket Return by two, up to the Maximum Total Return on the notes of 18.60%, or \$1,186 for every \$1,000 principal amount note. Because the notes are our senior obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **LIMITED PROTECTION AGAINST LOSS** – Payment at maturity of the principal amount of the notes is protected against a decline in the Ending Basket Level, as compared to the Starting Basket Level, of up to 10%. If the Ending Basket Level declines by more than 10%, for every 1% decline of the Basket beyond 10%, you will lose an amount equal to 1.1111% of the principal amount of your notes.
- **DIVERSIFICATION AMONG THE BASKET INDICES** – The return on the notes is linked to a basket consisting of the AMEX Hong Kong 30 Index the FTSE/Xinhua China 25 Index, the Korea Stock Price 200 Index, the MSCI Taiwan Index and the MSCI Singapore Index. The AMEX Hong Kong 30 Index is based on the capitalization of 30 stocks actively traded on The Stock Exchange of Hong Kong Ltd. and is designed to represent a substantial segment of the Hong Kong stock market. The FTSE/Xinhua China 25 Index is a stock index calculated and published by FTSE/Xinhua Index Limited, and is designed to represent the performance of the mainland Chinese market that is available to international investors. It is currently based on the largest and the most liquid Chinese stocks listed and trading on the Stock Exchange of Hong Kong Ltd. The Korea Stock Price Index 200 is a capitalization-weighted index of 200 Korean blue-chip stocks which make up a large majority of the total market value of the Korea Stock Exchange (“KSE”). The MSCI Taiwan Index, which is calculated by Morgan Stanley Capital International Inc. (“MSCI”), is a free float-adjusted market capitalization index of securities listed on the Taiwan Stock Exchange. The MSCI Singapore Index is a free float-adjusted market capitalization index that is calculated by MSCI and designed to measure equity market performance in Singapore. For additional information about each Basket Index, see the information set forth under “The AMEX Hong Kong 30 Index,” “The FTSE/Xinhua China 25 Index,” “The Korea Stock Price Index 200,” “The MSCI Taiwan Index” and “The MSCI Singapore Index” in the accompanying product supplement no. 31-II.

- **CAPITAL GAINS TAX TREATMENT** – You should review carefully the section entitled "Certain U.S. Federal Income Tax Consequences" in the accompanying product supplement no. 31-II. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special tax counsel, Davis Polk & Wardwell, it is reasonable to treat your purchase and ownership of the notes as an "open transaction" for U.S. federal income tax purposes. Assuming this characterization is respected, your gain or loss on the notes should be treated as long-term capital gain or loss if you hold the notes for more than a year, whether or not you are an initial purchaser of notes at the issue price. However, the Internal Revenue Service or a court may not respect this characterization of the notes, in which case the timing and character of any income or loss on the notes could be significantly and adversely affected. You should consult your tax adviser regarding the treatment of the notes, including possible alternative characterizations.

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Basket, the Basket Indices or any of the component stocks of the Basket Indices. These risks are explained in more detail in the "Risk Factors" section of the accompanying product supplement no. 31-II dated May 5, 2006.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** – The notes do not guarantee any return of principal. The return on the notes at maturity is linked to the performance of the Basket and will depend on whether, and the extent to which, the Basket Return is positive or negative. Your investment will be exposed on a leveraged basis to any decline in the Ending Basket Level beyond the 10% buffer as compared to the Starting Basket Level.
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM TOTAL RETURN** – If the Ending Basket Level is greater than the Starting Basket Level, for each \$1,000 principal amount note, you will receive at maturity \$1,000 plus an additional amount that will not exceed the Maximum Total Return of 18.60%, regardless of the appreciation in the Basket, which may be significant.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** – While the payment at maturity described in this pricing supplement is based on the full principal amount of your notes, the original issue price of the notes includes the agent's commission and the cost of hedging our obligations under the notes through one or more of our affiliates. As a result, the price, if any, at which JPMSI will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price, and any sale prior to the maturity date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be willing to hold your notes to maturity.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** – As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of securities composing any of the Basket Indices would have.
- **NO DIRECT EXPOSURE TO FLUCTUATIONS IN FOREIGN EXCHANGE RATES** – The value of your notes will not be adjusted for exchange rate fluctuations between the U.S. dollar and the currencies upon which the stocks underlying each Basket Index are based. Therefore, if the applicable currencies appreciate or depreciate relative to the U.S. dollar over the term of the notes, you will not receive any additional payment or incur any reduction in your payment at maturity.
- **LACK OF LIQUIDITY** – The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- **POTENTIAL CONFLICTS** – We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** – In addition to the level of the Basket on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
 - the expected volatility of the Basket Indices;
 - the time to maturity of the notes;
 - the dividend rate on the common stocks underlying the Basket Indices;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory or judicial events;
 - the exchange rate and volatility of the exchange rate between the dollar, the Hong Kong dollar, the Chinese yuan, the Korean won, the new Taiwan dollar and the Singapore dollar; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

Historical Information

The following graphs show the weekly performance of each Basket Index as well as the Basket as a whole from March 16, 2001 through June 30, 2006. The graph of the historical Basket performance assumes the Basket level on March 16, 2001 was 100 and the Index Weightings specified on the cover of this pricing supplement on that date. The closing level of the AMEX Hong Kong 30 Index on June 30, 2006 was 812.44. The closing level of the FTSE/Xinhua China 25 Index on June 30, 2006 was 11314.83. The closing level of the Korea Stock Price Index 200 on June 30, 2006 was 167.45. The closing level of the MSCI Taiwan Index on June 30, 2006 was 279.49. The closing level of the MSCI Singapore Index on June 30, 2006 was 290.78. We obtained the various

Basket Index closing levels below from Bloomberg Financial Markets. We make no representation or warranty as to the accuracy or completeness of information obtained from Bloomberg Financial Markets.

The historical levels of each Basket Index and of the Basket should not be taken as an indication of future performance, and no assurance can be given as to the closing level of any Basket Index on any of the Averaging Dates. We cannot give you assurance that the performance of the Basket Indices will result in the return of any of your initial investment.
