JPMorgan Chase & Co.
\$

Principal Protected Notes Linked to the MSCI EAFE® Index due June 29, 2012

General

- Senior unsecured obligations of JPMorgan Chase & Co. maturing June 29, 2012*.
- Cash payment at maturity of principal plus the Additional Amount, as described below.
- The notes are designed for investors who seek exposure to any appreciation of the level of the MSCI EAFE® Index and to the currencies in which the stocks that compose the MSCI EAFE® Index are denominated over the term of the notes. Investors should be willing to forgo interest and dividend payments while seeking full principal protection at maturity.
- Minimum denominations of \$1,000 and integral multiples thereof.
- The notes are expected to price on or about June 26, 2007 and are expected to settle on or about June 29, 2007.

Key Terms

Index:	The MSCI EAFE® Index (“MXEA”) (the “Index”)
Payment at Maturity:	At maturity, you will receive a cash payment, for each \$1,000 principal amount note, of \$1,000 plus the Additional Amount, which may be zero.
Additional Amount:	The Additional Amount per \$1,000 principal amount note paid at maturity will equal \$1,000 x the Index Return x the Participation Rate; <i>provided</i> that the Additional Amount will not be less than zero.
Participation Rate:	At least 112%. The actual Participation Rate will be determined on the pricing date and will not be less than 112%.
Index Return:	$\frac{\text{Ending Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$
Initial Index Level:	The Index closing level on the pricing date, which is expected to be on or about June 26, 2007.
Ending Index Level:	The arithmetic average of the Index closing levels on each of the twelve Ending Averaging Dates.
Ending Averaging Dates*:	July 26, 2011, August 26, 2011, September 26, 2011, October 26, 2011, November 28, 2011, December 27, 2011, January 26, 2012, February 27, 2012, March 26, 2012, April 26, 2012, May 29, 2012 and June 26, 2012
Maturity Date*:	June 29, 2012
CUSIP:	

* Subject to postponement in the event of a market disruption event and as described under “Description of Notes — Payment at Maturity” in the accompanying product supplement no. 84-I.

Investing in the Principal Protected Notes involves a number of risks. See “Risk Factors” beginning on page PS-6 of the accompanying product supplement no. 84-I and “Selected Risk Considerations” beginning on page TS-2 of this term sheet.

JPMorgan Chase & Co. has filed a registration statement (including a prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement, each prospectus supplement, product supplement no. 84-I and any other documents relating to this offering that JPMorgan Chase & Co. has filed with the SEC for more complete information about JPMorgan Chase & Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, JPMorgan Chase & Co., any agent or any dealer participating in this offering will arrange to send you the prospectus, each prospectus supplement, product supplement no. 84-I and this term sheet if you so request by calling toll-free 866-535-9248.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase the notes prior to their issuance. In the event of any changes to the terms of the notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this term sheet or the accompanying prospectus supplements and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public	Fees and Commissions (1)	Proceeds to Us
Per note	\$	\$	\$
Total	\$	\$	\$

(1) If the notes priced today, J.P. Morgan Securities Inc., whom we refer to as JPMSI, acting as agent for JPMorgan Chase & Co., would receive a commission of approximately \$50.00 per \$1,000 principal amount note and would use a portion of that commission to pay selling concessions to other dealers of approximately \$25.00 per \$1,000 principal amount note. The actual commission received by JPMSI may be more or less than \$50.00 and will depend on market conditions on the pricing date. In no event will the commission received by JPMSI, which includes concessions to be paid to other dealers, exceed \$52.50 per \$1,000 principal amount note. See “Underwriting” beginning on page PS-29 of the accompanying product supplement no. 84-I.

For a different portion of the notes to be sold in this offering, a non-affiliated bank will receive a fee and an affiliate of ours will receive a structuring and development fee. If the notes priced today, the aggregate amount of these fees would be expected to be approximately \$50.00 per \$1,000 principal amount note. The actual amount of these fees may be more or less than \$50.00 per \$1,000 principal amount note and will depend on market conditions on the pricing date. In no event will the total amount of these fees exceed \$52.50 per \$1,000 principal amount note.

The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

JPMorgan

June 22, 2007

ADDITIONAL TERMS SPECIFIC TO THE NOTES

You should read this term sheet together with the prospectus dated December 1, 2005, as supplemented by the prospectus supplement dated October 12, 2006 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 84-I dated June 22, 2007. **This term sheet, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the matters set forth in “Risk Factors” in the accompanying product supplement no. 84-I, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement no. 84-I dated June 22, 2007:
<http://www.sec.gov/Archives/edgar/data/19617/000089109207002539/e27684-424b2.pdf>
- Prospectus supplement dated October 12, 2006:
http://www.sec.gov/Archives/edgar/data/19617/000089109206003117/e25276_424b2.pdf
- Prospectus dated December 1, 2005:
http://www.sec.gov/Archives/edgar/data/19617/000089109205002389/e22923_base.txt

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this term sheet, the “Company,” “we,” “us,” or “our” refers to JPMorgan Chase & Co.

Selected Purchase Considerations

- **PRESERVATION OF CAPITAL AT MATURITY** — You will receive at least 100% of the principal amount of your notes if you hold the notes to maturity, regardless of the performance of the Index. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **APPRECIATION POTENTIAL** — At maturity, in addition to your principal, for each \$1,000 principal amount note you will receive a payment equal to \$1,000 x the Index Return x the Participation Rate[†], *provided* that this payment (the Additional Amount) will not be less than zero.
[†] The actual Participation Rate will be determined on the pricing date and will not be less than 112%.
- **DIVERSIFICATION OF THE MSCI EAFE® INDEX** — The return on the notes is linked to the MSCI EAFE® Index. The MSCI EAFE® Index is designed to measure developed market equity performance in Europe, Asia, Australia and the Far East, but excluding the United States and Canada. See “The MSCI EAFE® Index” in the accompanying product supplement no. 84-I for additional information about the Index.
- **TAXED AS CONTINGENT PAYMENT DEBT INSTRUMENTS** — You should review carefully the section entitled “Certain U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 84-I. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special tax counsel, Davis Polk & Wardwell, the notes will be treated for U.S. federal income tax purposes as “contingent payment debt instruments.” You will generally be required to recognize interest income in each year at the “comparable yield,” as determined by us, although we may not make any payments with respect to the notes until maturity. Interest included in income will increase your basis in the notes. Generally, amounts received at maturity or earlier sale or disposition in excess of your basis will be treated as additional interest income, while any loss will be treated as an ordinary loss to the extent of all previous inclusions with respect to the notes, which will be deductible against other income (e.g., employment and interest income), with the balance treated as capital loss, which may be subject to limitations. Purchasers who are not initial purchasers of notes at the issue price should consult their tax advisers with respect to the tax consequences of an investment in the notes, including the treatment of the difference, if any, between such purchasers’ basis in the notes and the notes’ adjusted issue price.
- **COMPARABLE YIELD AND PROJECTED PAYMENT SCHEDULE** — We will determine the comparable yield for the notes and will provide such comparable yield, and the related projected payment schedule, in the final term sheet or pricing supplement for the notes, which we will file with the SEC. If the notes had priced on June 21, 2007 and we had determined the comparable yield on that date, it would have been an annual rate of 5.71%, compounded semi-annually. The actual comparable yield that we will determine for the notes may be more or less than 5.71%, and will depend upon a variety of factors, including actual market conditions and our borrowing costs for debt instruments of comparable maturities. **Neither the comparable yield nor the projected payment schedule constitutes a representation by us regarding the actual amount, if any, that we will pay on the notes.**

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Index or any of the component stocks of the Index. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 84-I dated June 22, 2007.

- **MARKET RISK** — The return on the notes at maturity is linked to the performance of the Index, and will depend on whether, and the extent to which, the Index Return is positive. YOU WILL RECEIVE NO MORE THAN THE FULL PRINCIPAL AMOUNT OF YOUR NOTES AT MATURITY IF THE INDEX RETURN IS ZERO OR NEGATIVE.
- **THE NOTES MIGHT NOT PAY MORE THAN THE PRINCIPAL AMOUNT** — You may receive a lower payment at maturity than you would have received if you had invested in the Index, the stocks composing the Index or contracts related to the Index. If the Ending Index Level does not exceed the Initial Index Level, the Additional Amount will be zero. This will be true even if the value of the Index was higher than the Initial Index Level at some time during the term of the notes but later falls below the Initial Index Level during the latter portion of the term of the notes.
- **THE CALCULATION OF THE INDEX RETURN USING MONTHLY AVERAGING DURING THE LAST YEAR COULD LIMIT RETURNS** — Your ability to participate in the appreciation of the Index may be limited by reference to the monthly averaging during the last year used to calculate the Index Return, especially if there is a significant decrease in the level of the Index during the latter portion of the term of the notes or if there is significant volatility in the Index closing levels during the term of the notes. Accordingly, you may not receive the benefit of full appreciation of the Index between each of the Ending Averaging Dates or between the pricing date and the final Ending Averaging Date.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of securities composing the Index would have.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity described in this term sheet is based on the full principal amount of your notes, the original issue price of the notes includes the agent’s commission and the cost of hedging our obligations under the notes through one or more of our affiliates. As a result, the price, if any, at which JPMSI will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the maturity date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.
- **THE NOTES ARE SUBJECT TO SOME CURRENCY EXCHANGE RISK** — Because the prices of the component stocks of the country indices that compose the Index are converted into U.S. dollars for purposes of calculating the value of the component country indices and the Index, your notes will be exposed to currency exchange rate risk with respect to each of the currencies in which the component stocks trade. Your net exposure will depend on the extent to which these currencies strengthen or weaken against the U.S. dollar and the relative weight of the component stocks denominated in these currencies. If, taking into account such weighting, the U.S. dollar strengthens against these currencies, the value of the Index will be adversely affected and the payment at maturity of the notes may be reduced.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the level of the Index on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
 - the expected volatility in the Index;
 - the time to maturity of the notes;
 - the dividend rate on the common stocks underlying the Index;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory or judicial events;
 - the exchange rate and the volatility of the exchange rate between the U.S. dollar and the currencies in which securities composing the Index are traded; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

Sensitivity Analysis — Hypothetical Payment at Maturity for Each \$1,000 Principal Amount Note

The following table illustrates the payment at maturity (including, where relevant, the payment of the Additional Amount) for a \$1,000 principal amount note for a hypothetical range of performance for the Index Return from -80% to +80% and assumes a Participation Rate of 112% and an Initial Index Level of 2200. The following results are based solely on the hypothetical example cited. You should consider carefully whether the notes are suitable to your investment goals. The numbers appearing in the following table have been rounded for ease of analysis.

Ending Index Level	Index Return	Index Return x Participation Rate (112%)	Additional Amount		Principal	Payment at Maturity
3960	80.00%	89.60%	\$896.00	+	\$1,000	= \$1,896.00
3740	70.00%	78.40%	\$784.00	+	\$1,000	= \$1,784.00
3520	60.00%	67.20%	\$672.00	+	\$1,000	= \$1,672.00
2860	30.00%	33.60%	\$336.00	+	\$1,000	= \$1,336.00
2640	20.00%	22.40%	\$224.00	+	\$1,000	= \$1,224.00
2420	10.00%	11.20%	\$112.00	+	\$1,000	= \$1,112.00
2365	7.50%	8.40%	\$84.00	+	\$1,000	= \$1,084.00
2310	5.00%	5.60%	\$56.00	+	\$1,000	= \$1,056.00
2255	2.50%	2.80%	\$28.00	+	\$1,000	= \$1,028.00
2200	0.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
1980	-10.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
1760	-20.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
1540	-30.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
1320	-40.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
1100	-50.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
880	-60.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
660	-70.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00
440	-80.00%	0.00%	\$0.00	+	\$1,000	= \$1,000.00

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table above are calculated.

Example 1: The level of the Index increases from the Initial Index Level of 2200 to an Ending Index Level of 2310.

Because the Ending Index Level of 2310 is greater than the Initial Index Level of 2200, the Additional Amount is equal to \$56.00 and the final payment at maturity is equal to \$1,056 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times [(2310 - 2200) / 2200] \times 112\%) = \$1,056$$

Example 2: The level of the Index decreases from the Initial Index Level of 2200 to an Ending Index Level of 1980.

Because the Ending Index Level of 1980 is lower than the Initial Index Level of 2200, the final payment per \$1,000 principal amount note at maturity is the principal amount of \$1,000.

Example 3: The level of the Index increases from the Initial Index Level of 2200 to an Ending Index Level of 2420.

Because the Ending Index Level of 2420 is greater than the Initial Index Level of 2200, the Additional Amount is equal to \$112 and the final payment at maturity is equal to \$1,112 per \$1,000 principal amount note.

$$\$1,000 + (\$1,000 \times [(2420 - 2200) / 2200] \times 112\%) = \$1,112$$

Historical Information

The following graph shows the historical weekly performance of the Index from January 4, 2002 through June 15, 2007. The MSCI EAFE® Index closing level on June 21, 2007 was 2273.12. We obtained the various Index closing levels below from Bloomberg Financial Markets, and accordingly, make no representation or warranty as to their accuracy or completeness.

The historical levels of the Index should not be taken as an indication of future performance, and no assurance can be given as to the Index closing level on any Ending Averaging Date. We cannot give you assurance that the performance of the Index will result in a payment at maturity of more than the principal amount of your notes.
