Investments****JPMorgan Chase & Co.****\$****Lesser Index Principal Protected Notes Linked to the Nikkei 225 Index and
the S&P 500® Index due April 9, 2008****General**

- The notes are designed for investors who believe that both the Nikkei 225 Index and the S&P 500® Index will appreciate over the term of the notes. Investors should be willing to forgo interest and dividend payments and any additional appreciation related to the outperformance of one Index as compared to the other Index as well as any appreciation in excess of the Maximum Return of 5.25%, while seeking full principal protection at maturity.
- Senior unsecured obligations of JPMorgan Chase & Co. maturing April 9, 2008[†].
- Minimum denominations of \$50,000 and integral multiples of \$1,000 in excess thereof.
- The notes are expected to price on or about October 4, 2007^{††} and are expected to settle on or about October 10, 2007.

Key Terms

Indices:	The Nikkei 225 Index and the S&P 500® Index (each an "Index," and together, the "Indices").
Payment at Maturity:	At maturity, you will receive a cash payment, for each \$1,000 principal amount note, of \$1,000 plus the Additional Amount, which may be zero but will not be more than the Maximum Return.
Additional Amount:	The Additional Amount per \$1,000 principal amount note paid at maturity will equal \$1,000 x the Lesser Index Return x the Participation Rate; <i>provided</i> that the Additional Amount will not be less than zero or greater than the Maximum Return. For example, if the Lesser Index Return is more than 1.75%, you will receive the Maximum Return on the notes of 5.25%, which entitles you to a payment at maturity of \$1,052.50 for every \$1,000 principal amount note.
Maximum Return:	The Maximum Return will be set on the pricing date and will not be less than \$52.50 (or 5.25% x \$1,000).
Participation Rate:	300%
Index Return:	$\frac{\text{Ending Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$
Initial Index Level:	For each Index, the Index closing level on the pricing date.
Ending Index Level:	For each Index, the arithmetic average of the Index closing levels on each of the five Ending Averaging Dates.
Lesser Index Return:	The lesser of the Index Return of the Nikkei 225 Index and the Index Return of the S&P 500® Index.
Lesser Performing Index:	The Index with the Lesser Index Return.
Ending Averaging Dates [†] :	March 31, 2008, April 1, 2008, April 2, 2008, April 3, 2008 and April 4, 2008 (the "final Ending Averaging Date")
Maturity Date [†] :	April 9, 2008
CUSIP:	

[†] Subject to postponement in the event of a market disruption event and as described under "Description of Notes — Payment at Maturity" in the accompanying product supplement no. 16-III.

^{††} The pricing of the notes is subject to our special tax counsel delivering to us their opinion as described under "Selected Purchase Considerations — Taxed as Short-Term Debt Instruments."

Investing in the Lesser Index Principal Protected Notes involves a number of risks. See "Risk Factors" beginning on page PS-6 of the accompanying product supplement no. 16-III and "Selected Risk Considerations" beginning on page TS-3 of this term sheet.

Sensitivity Analysis — Hypothetical Payment at Maturity for Each \$1,000 Principal Amount Note

The table and graph below illustrate the payment at maturity (including, where relevant, the payment of the Additional Amount) for a \$1,000 principal amount note for a hypothetical range of performance for the Lesser Index Return from -100% to +80%. **The following table assumes that the Lesser Performing Index used to calculate the Ending Index Level will be the S&P 500® Index. We make no representation or warranty as to which of the Indices will be the Lesser Performing Index for the purposes of calculating your return on the notes at maturity.** The following table and graph also assume a hypothetical Initial Index Level of 1550 for the Lesser Performing Index and a Maximum Return of 5.25%, or \$52.50 per \$1,000 principal amount note, and reflect the Participation Rate of 300%. The following results are based solely on the hypothetical example cited. You should consider carefully whether the notes are suitable to your investment goals. The numbers appearing in the table and graph below have been rounded for ease of analysis.

Lesser Performing Index Ending Index Level	Lesser Index Return	Lesser Index Return x Participation Rate (300%)	Additional Amount		Principal		Payment at Maturity

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table on the previous page are calculated.

Example 1: The level of the Lesser Performing Index increases from its Initial Index Level of 1550 to an Ending Index Level of 1573.25. Because the Lesser Performing Index's Ending Index Level of 1573.25 is greater than its Initial Index Level and the Lesser Index Return of 1.50% multiplied by 300% does not exceed the hypothetical Maximum Return of 5.25%, the Additional Amount is equal to \$45 and the investor receives a payment at maturity of \$1,045 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times [(1573.25 - 1550) / 1550] \times 300\%) = \$1,045$$

Example 2: The level of the Lesser Performing Index decreases from its Initial Index Level of 1550 to an Ending Index Level of 1395. Because the Lesser Performing Index's Ending Index Level of 1395 is lower than its Initial Index Level, the final payment per \$1,000 principal amount note at maturity is the principal amount of \$1,000.

Example 3: The level of the Lesser Performing Index increases from its Initial Index Level of 1550 to an Ending Index Level of 1627.50. Because the Lesser Performing Index's Ending Index Level of 1627.50 is greater than its Initial Index Level and the Lesser Index Return of 5% multiplied by 300% is greater than the hypothetical Maximum Return of 5.25%, the Additional Amount is equal to the hypothetical Maximum Return of \$52.50 and the investor receives a payment at maturity of \$1,052.50 per \$1,000 principal amount note.

Selected Purchase Considerations

- **PRESERVATION OF CAPITAL AT MATURITY** — You will receive at least 100% of the principal amount of your notes if you hold your notes to maturity regardless of the performance of the Indices. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **APPRECIATION POTENTIAL** — At maturity, in addition to your principal, for each \$1,000 principal amount note you will receive a payment equal to \$1,000 x the Lesser Index Return x 300% (the Participation Rate), but this additional payment will not be less than zero or greater than \$52.50* per \$1,000 principal amount note, which reflects the Maximum Return of 5.25%* on the notes.
* The actual Maximum Return will be determined on the pricing date and will not be less than 5.25%.
- **DIVERSIFICATION OF THE INDICES** — The return on the notes is linked to the Lesser Performing Index which will be either the Nikkei 225 Index or the S&P 500® Index. The Nikkei 225 Index consists of 225 stocks listed on the First Section of the Tokyo Stock Exchange, and therefore, are among the most actively traded on that exchange. The S&P 500® Index consists of 500 component stocks selected to provide a performance benchmark for the U.S. equity markets. For additional information on each Index, see “The Nikkei 225 Index” and “The S&P 500® Index” in the accompanying product supplement no. 16-III.
- **TAXED AS SHORT-TERM DEBT INSTRUMENTS** — You should review carefully the section entitled “Certain U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 16-III. The pricing of the notes is subject to delivery of an opinion of our special tax counsel, Davis Polk & Wardwell, that the notes will be treated as “short-term” debt instruments. The opinion will be subject to the limitations described in the section entitled “Certain U.S. Federal Income Tax Consequences” in product supplement no. 16-III. No statutory, judicial or administrative authority directly addresses the treatment of the notes or instruments similar to the notes for U.S. federal income tax purposes, and no ruling is being requested from the Internal Revenue Service with respect to the notes. As a result, certain aspects of the tax treatment of an investment in the notes are uncertain. Purchasers who are not initial purchasers of notes at the issue price should consult their tax advisers with respect to the tax consequences of an investment in the notes.

Selected Risk Considerations

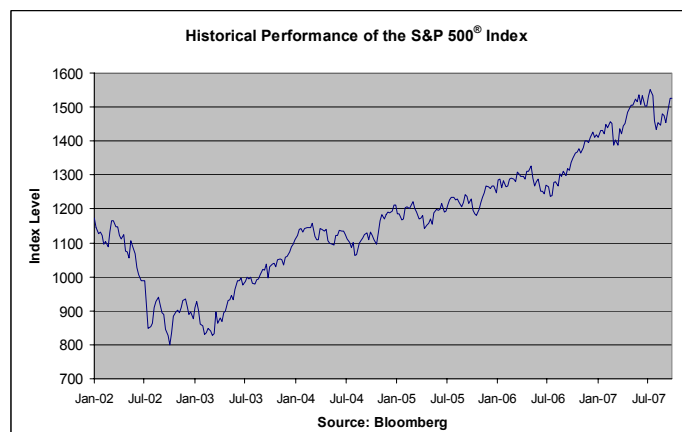

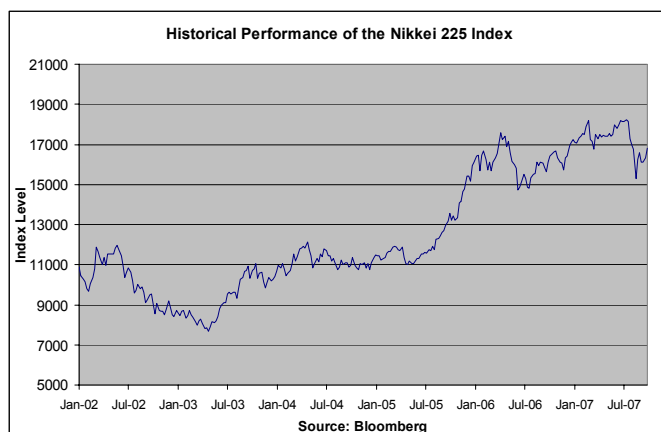

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Indices or any of the component stocks of the Indices. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 16-III dated February 9, 2007.

- **MARKET RISK** — The return on the notes at maturity is linked to the performance of the Lesser Performing Index, and will depend on whether, and the extent to which, the Lesser Index Return is positive. The two Indices’ respective performances may not be correlated and, as a result, your investment in the notes may only produce a positive return if there is a broad-based rise in the performance of equities across diverse markets over the term of the notes. **You will receive no more than the full principal amount of your notes if the Lesser Index Return is zero or negative.**
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM RETURN** — If the Ending Index Level of the Lesser Performing Index is greater than its Initial Index Level for each \$1,000 principal amount note, you will receive at maturity \$1,000 plus an additional amount that will not exceed a predetermined percentage of the principal amount, regardless of the appreciation in the Lesser Performing Index, which may be significant. We refer to this percentage as the Maximum Return, which will be set on the pricing date and will not be less than 5.25%.
- **THE NOTES MIGHT NOT PAY MORE THAN THE PRINCIPAL AMOUNT** — You may receive a lower payment at maturity than you would have received if you had invested in each Index individually, the stocks composing the Indices or contracts related to the Indices. If the Lesser Index Return is not positive, the Additional Amount will be zero. This will be true even if the Index Return for only one Index is positive, or if the Lesser Performing Index’s closing level was higher than its Initial Index Level at some time during the life of the notes but later falls below its Initial Index Level.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the securities composing either the Nikkei 225 Index or the S&P 500® Index would have.
- **YOUR RETURN ON THE NOTES IS LINKED TO THE LESSER PERFORMING INDEX** — Your return on the notes will be determined by the Lesser Performing Index, and therefore, the notes may not return more than the applicable principal amount of your investment even if the Ending Index Level of one of the two Indices is above its respective Initial Index Level.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity described in this term sheet is based on the full principal amount of your notes, the original issue price of the notes includes the agent’s commission and the cost of hedging our obligations under the notes through one or more of our affiliates. As a result, the price, if any, at which J.P. Morgan Securities Inc., which we refer to as JPMSI, will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the maturity date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.
- **NO DIRECT EXPOSURE TO FLUCTUATIONS IN FOREIGN EXCHANGE RATES** — The value of your notes will not be adjusted for exchange rate fluctuations between the U.S. dollar and the currencies in which the stocks composing the Nikkei 225 Index are denominated, although any currency fluctuations could affect the performance of the Nikkei 225 Index. Therefore, if the applicable currencies appreciate or depreciate relative to the U.S. dollar over the term of the notes, you will not receive any additional payment or incur any reduction in your payment at maturity.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. In addition, we are currently one of the companies that make up the S&P 500® Index. We will not have any obligation to consider your interests as a holder of the notes in taking any corporate action that might affect the value of the S&P 500® Index and the notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the level of the Indices on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
 - the expected volatility in each Index;
 - the time to maturity of the notes;
 - the dividend rate on the common stocks underlying each Index;
 - the expected positive or negative correlation between the Nikkei 225 Index and the S&P 500® Index, or the expected absence of any such correlation;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory or judicial events;
 - the exchange rate and volatility of the exchange rate between the U.S. dollar and the Japanese yen; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.
- **THE OFFERING OF THE NOTES MAY BE TERMINATED BEFORE PRICING** — This term sheet has not been reviewed by our special tax counsel, Davis Polk & Wardwell, and the pricing of the offering of the notes is subject to delivery by them of an opinion regarding the tax treatment of the notes as described under “Selected Purchase Considerations — Taxed as Short-Term Debt Instruments” above. If our special tax counsel does not deliver this opinion prior to pricing, the offering of the notes will be terminated.

Historical Information

The following graphs set forth the historical weekly performance of the Nikkei 225 Index from January 4, 2002 through September 28, 2007 and the historical weekly performance of the S&P 500® Index from January 4, 2002 through September 28, 2007. The Index closing level of the Nikkei 225 Index on October 1, 2007 was 16845.96. The Index closing level of the S&P 500® Index on October 1, 2007 was 1547.04.

We obtained the Index closing levels below from Bloomberg Financial Markets. We make no representation or warranty as to the accuracy or completeness of information obtained from Bloomberg Financial Markets. The historical levels of each Index should not be taken as an indication of future performance, and no assurance can be given as to the closing level of either Index on any Ending Averaging Date. We cannot give you assurance that the performance of the Indices will result in a payment at maturity of more than the principal amount of your notes.

Supplemental Underwriting Information

JPMI, acting as agent for JPMorgan Chase & Co., will receive a commission that will depend on market conditions on the pricing date. In no event will that commission, which includes structuring and development fees, exceed \$7.50 per \$1,000 principal amount note. See “Underwriting” beginning on page PS-31 of the accompanying product supplement no. 16-III.

For a different portion of the notes to be sold in this offering, an affiliated bank will receive a fee and another affiliate will receive a structuring and development fee. In no event will the total amount of these fees exceed \$7.50 per \$1,000 principal amount note.
