JPMorgan Chase & Co.

\$2,000,000

Return Enhanced Notes Linked to an Equally Weighted Basket of 18 Common Stocks
due October 30, 2009

General

- The notes are designed for investors who seek a return of four times the appreciation of an equally weighted diversified basket of 18 common stocks up to a maximum total return on the notes of 21.81% at maturity. Investors should be willing to forgo interest and dividend payments and, if the Basket declines, be willing to lose some or all of their principal.
- Senior unsecured obligations of JPMorgan Chase & Co. maturing October 30, 2009[†].
- Minimum denominations of \$1,000 and integral multiples thereof.
- The notes priced on April 25, 2008 and are expected to settle on or about April 30, 2008.

Key Terms

Basket: The Basket consists of 18 common stocks (each, a "Basket Stock" and collectively, the "Basket Stocks"). The Basket Stocks and the Bloomberg ticker symbol, the Stock Weighting and the Initial Share Price of each Basket Stock are set forth under "The Basket" on page PS-1 of this pricing supplement.

Upside Leverage Factor: 4

Payment at Maturity: If the Ending Basket Level is greater than the Starting Basket Level, you will receive a cash payment that provides you with a return per \$1,000 principal amount note equal to the Basket Return multiplied by four, subject to the Maximum Total Return on the notes of 21.81%. For example, if the Basket Return is more than 5.4525%, you will receive the Maximum Total Return on the notes of 21.81%, which entitles you to a maximum payment at maturity of \$1,218.10 for every \$1,000 principal amount note that you hold. Accordingly, if the Basket Return is positive, your payment at maturity per \$1,000 principal amount note will be calculated as follows, subject to the Maximum Total Return:

$$\$1,000 + (\$1,000 \times \text{Basket Return} \times 4)$$

Your investment will be fully exposed to any decline in the Basket. If the Ending Basket Level declines from the Starting Basket Level, you will lose 1% of the principal amount of your notes for every 1% that the Basket declines beyond the Starting Basket Level. Accordingly, if the Basket Return is negative, your payment at maturity per \$1,000 principal amount note will be calculated as follows:

$$\$1,000 + (\$1,000 \times \text{Basket Return})$$

You will lose some or all of your investment at maturity if the Ending Basket Level declines from the Starting Basket Level.

Basket Return:
$$\frac{\text{Ending Basket Level} - \text{Starting Basket Level}}{\text{Starting Basket Level}}$$

Starting Basket Level: Set equal to 100 on the pricing date, which was April 25, 2008.

Ending Basket Level: The Basket Closing Level on the Observation Date.

Basket Closing Level: The Basket Closing Level on the Observation Date will be calculated as follows:
$$100 \times [1 + \text{the sum of the Stock Returns of each Basket Stock on the Observation Date} \times (1/18)]$$

Stock Return: With respect to each Basket Stock, on the Observation Date:
$$\frac{\text{Final Share Price} - \text{Initial Share Price}}{\text{Initial Share Price}}$$

Initial Share Price: With respect to each Basket Stock, the closing price of one share of such Basket Stock on the Pricing Date as set forth under "The Basket" in this pricing supplement.

Final Share Price: With respect to each Basket Stock, the closing price of one share of such Basket Stock on the Observation Date times the Stock Adjustment Factor for such Basket Stock on such day.

Stock Adjustment Factor: With respect to each Basket Stock, 1.0 on the pricing date and subject to adjustment under certain circumstances. See "Description of Notes — Payment at Maturity" and "General Terms of Notes — Anti-Dilution Adjustments" in the accompanying product supplement no. 133-I for further information.

Observation Date: October 26, 2009[†]

Maturity Date: October 30, 2009[†]

CUSIP: 48123MV41

[†] Subject to postponement in the event of a market disruption event and as described under "Description of Notes — Payment at Maturity" in the accompanying product supplement no. 133-I.

Investing in the Return Enhanced Notes involves a number of risks. See "Risk Factors" beginning on page PS-8 of the accompanying product supplement no. 133-I and "Selected Risk Considerations" beginning on page PS-2 of this pricing supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this pricing supplement or the accompanying prospectus supplements and prospectus. Any representation to the contrary is a criminal offense.

| | Price to Public | Fees and Commissions (1) | Proceeds to Us |
|-----------------|-----------------|--------------------------|----------------|
| Per note | \$1,000 | \$4.50 | \$995.50 |
| Total | \$2,000,000 | \$9,000 | \$1,991,000 |

(1) J.P. Morgan Securities Inc., which we refer to as JPMSI, acting as agent for JPMorgan Chase & Co., will receive a commission of \$4.50 per \$1,000 principal amount note and will use a portion of that commission to pay selling concessions to other dealers of \$1.00 per \$1,000 principal amount note. See "Underwriting" beginning on page PS-34 of the accompanying product supplement no. 133-I.

The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Selected Purchase Considerations

- **APPRECIATION POTENTIAL** — The notes provide the opportunity to enhance equity returns by multiplying a positive Basket Return by four (4), up to the Maximum Total Return on the notes of 21.81%, or \$1,218.10 for every \$1,000 principal amount note. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **RETURN LINKED TO AN EQUALLY WEIGHTED BASKET OF 18 BASKET STOCKS** — The return on the notes is linked to the performance of an equally weighted Basket, which consists of 18 Basket Stocks. These Basket Stocks are the common stocks of American Express Company, Berkshire Hathaway Inc. (Class B common stock), Cardinal Health, Inc., Colgate-Palmolive Company, Express Scripts, Inc., FedEx Corporation, General Electric Company, The Goldman Sachs Group, Inc., The Home Depot, Inc., Johnson & Johnson's, Moody's Corporation, 3M Company, PepsiCo., Inc., The Procter & Gamble Company, United Technologies Corporation, Walgreen Co., Wal-Mart Stores, Inc. and The Western Union Company.
- **CAPITAL GAINS TAX TREATMENT** — You should review carefully the section entitled “Certain U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 133 -I. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special tax counsel, Davis Polk & Wardwell, it is reasonable to treat your purchase and ownership of the notes as an “open transaction” for U.S. federal income tax purposes. Assuming this characterization is respected, your gain or loss on the notes should be treated as long-term capital gain or loss if you hold the notes for more than a year, whether or not you are an initial purchaser of notes at the issue price. However, the Internal Revenue Service (the “IRS”) or a court may not respect this characterization or treatment of the notes, in which case the timing and character of any income or loss on the notes could be significantly and adversely affected. In addition, on December 7, 2007, Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments, such as the notes. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment.

It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by Non-U.S. Holders should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income that is subject to an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the notes, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the notes, including possible alternative treatments and the issues presented by this notice.

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Basket Stocks. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 133-I dated April 25, 2008.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The notes do not guarantee any return of principal. The return on the notes at maturity is linked to the performance of the Basket and will depend on whether, and the extent to which, the Basket Return is positive or negative. Your investment will be fully exposed to any decline in the Ending Basket Level, as compared to the Starting Basket Level.
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM TOTAL RETURN** — If the Ending Basket Level is greater than the Starting Basket Level, for each \$1,000 principal amount note, you will receive at maturity \$1,000 plus an additional amount that will not exceed the Maximum Total Return of 21.81%, regardless of the appreciation in the Basket, which may be significant.
- **CHANGES IN THE VALUE OF THE BASKET STOCKS MAY OFFSET EACH OTHER** — The notes are linked to a weighted Basket consisting of 18 Basket Stocks. Price movements in the Basket Stocks may not correlate with each other. At a time when the value of some of the Basket Stocks increase, the value of other Basket Stocks may not increase as much or may even decline in value. Therefore, in calculating the Ending Basket Level, increases in the value of some of the Basket Stocks may be moderated, or more than offset, by lesser increases or declines in the value of the other Basket Stocks.
- **NO OWNERSHIP RIGHTS IN THE BASKET STOCKS** — As a holder of the notes, you will not have any ownership interest or rights in any of the Basket Stocks, such as voting rights or dividend payments. In addition, the issuers of the Basket Stocks will not have any obligation to consider your interests as a holder of the notes in taking any corporate action that might affect the value of the relevant Basket Stocks and the notes.
- **NO AFFILIATION WITH THE BASKET STOCK ISSUERS** — We are not affiliated with the issuers of the Basket Stocks. We assume no responsibility for the adequacy of the information about the Basket Stock issuers contained in this pricing supplement. You should make your own investigation into the Basket Stocks and their issuers. We are not responsible for the Basket Stock issuers’ public disclosure of information, whether contained in SEC filings or otherwise.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity, if any, described in this pricing supplement is based on the full principal amount of your notes, the original issue price of the notes includes the agent’s commission and the estimated cost of hedging our obligations under the notes through one or more of our affiliates. As a result, and as a general matter, the price, if any, at which JPMSI will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the maturity date could result in a substantial loss to you. This secondary market price will also be affected by a number of factors aside from the agent’s commission and hedging costs, including those set forth under “Many Economic and Market Factors Will Impact the Value of the Notes” below.
The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. We and/or our affiliates may also currently or from time to time engage in business with the Basket Stock issuers, including extending loans to, or making equity investments in, such Basket Stock issuer(s) or providing advisory services to such Basket Stock issuer(s). In addition, one or more of our affiliates may publish research reports or otherwise express opinions with respect to the Basket Stock issuers and these reports may or may not recommend that investors buy or hold the Basket Stock(s). As a prospective purchaser of the notes, you should undertake an independent investigation of the applicable Basket Stock issuer that in your judgment is appropriate to make an informed decision with respect to an investment in the notes.
- **HEDGING AND TRADING IN THE BASKET STOCKS** — While the notes are outstanding, we or any of our affiliates may carry out hedging activities related to the notes, including in the Basket Stocks or instruments related to one or more of the Basket Stocks. We or our affiliates may also trade in the Basket Stocks or instruments related to either or both of the Basket Stocks from time to time. Any of these hedging or trading activities as of the Pricing Date and during the term of the notes could adversely affect our payment to you at maturity.

- **ANTI-DILUTION PROTECTION IS LIMITED** — The calculation agent will make adjustments to the Stock Adjustment Factor for each Basket Stock to reflect certain events affecting such Basket Stock. However, the calculation agent will not make an adjustment in response to all events that could affect the Basket Stocks. If an event occurs that does not require the calculation agent to make an adjustment, the value of the notes may be materially and adversely affected. See “General Terms of Notes — Anti-Dilution Adjustments” in the accompanying product supplement no. 133-I for further information.
- **MANY ECONOMIC AND MARKET FACTORS WILL INFLUENCE THE VALUE OF THE NOTES** — In addition to the closing price of the Basket Stock on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
 - the expected volatility in the Basket Stocks;
 - the time to maturity of the notes;
 - the dividend rates paid on the Basket Stocks;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory or judicial events;
 - the occurrence of certain events affecting the issuer(s) of the Basket Stock(s) that may or may not require an adjustment to the Stock Adjustment Factor, including a merger or acquisition; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

What Is the Total Return on the Notes at Maturity Assuming a Range of Performance for the Basket?

The following table illustrates the hypothetical total return at maturity on the notes. The “total return” as used in this pricing supplement is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount note to \$1,000. The hypothetical total returns set forth below reflect the Maximum Total Return on the notes of 21.81%. The hypothetical total returns set forth below are for illustrative purposes only and may not be the actual total returns applicable to a purchaser of the notes. The numbers appearing in the following table and examples have been rounded for ease of analysis.

| Ending Basket Level | Basket Return | Total Return |
|---------------------|----------------|--------------|
| 180.0000 | 80.0000% | 21.81% |
| 165.0000 | 65.0000% | 21.81% |
| 150.0000 | 50.0000% | 21.81% |
| 140.0000 | 40.0000% | 21.81% |
| 130.0000 | 30.0000% | 21.81% |

| 102.5000 | 2.5000% | 10.00% |
| 101.0000 | 1.0000% | 4.00% |
| 100.0000 | 0.0000% | 0.00% |
| 95.0000 | -5.0000% | -5.00% |
| 90.0000 | -10.0000% | -10.00% |
| 85.0000 | -15.0000% | -15.00% |
| 80.0000 | -20.0000% | -20.00% |
| 70.0000 | -30.0000% | -30.00% |

| 20.0000 | -80.0000% | -80.00% |
| 10.0000 | -90.0000% | -90.00% |
| 0.0000 | -100.0000% | -100.00% |

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table above are calculated.

Example 1: The level of the Basket increases from a Starting Basket Level of 100 to an Ending Basket Level of 102.50.

Because the Ending Basket Level of 102.50 is greater than the Starting Basket Level of 100 and the Basket Return of 2.5% multiplied by 4 does not exceed the Maximum Total Return of 21.81%, the investor receives a payment at maturity of \$1,100 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + [\$1,000 \times (2.5\% \times 4)] = \$1,100$$

Example 2: The level of the Basket increases from the Starting Basket Level of 100 to an Ending Basket Level of 120.

Because the Ending Basket Level of 120 is greater than the Starting Basket Level of 100 and the Basket Return of 20% multiplied by 4 exceeds the Maximum Total Return of 21.81%, the investor receives a payment at maturity of \$1,218.10 per \$1,000 principal amount note, the maximum payment on the notes.

Example 3: The level of the Basket decreases from a Starting Basket Level of 100 to an Ending Basket Level of 80.

Because the Ending Basket Level of 80 is less than the Starting Basket Level of 100, the Basket Return is negative and the investor receives a payment at maturity of \$800 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times -20\%) = \$800$$
