To prospectus dated December 1, 2005, prospectus supplement dated October 12, 2006 and product supplement no. 39-X dated April 18, 2008

Term Sheet to Product Supplement No. 39-X Registration Statement No. 333-130051 Dated May 30, 2008; Rule 433

JPMorganChase 🛄

Structured **Investments**

JPMorgan Chase & Co.

Buffered Return Enhanced Notes Linked to the MSCI EAFE® Index due December 31.

General

The notes are designed for investors who seek a return of twice the appreciation of the MSCI EAFE® Index up to a maximum total return on the notes of 18.00%* at maturity. Investors should be willing to forgo interest and dividend payments and, if the Index declines by more than 10%, be willing to lose up to 90% of their principal.

Senior unsecured obligations of JPMorgan Chase & Co. maturing December 31, 2009.

Minimum denominations of \$1,000 and integral multiples thereof.

The notes are expected to price on or about June 25, 2008 and are expected to settle on or about June 30, 2008.

Key Terms

The MSCI EAFE® Index ("MXEA") (the "Index") Index:

Upside Leverage Factor:

Payment at Maturity:

If the MSCI EAFE Closing Level is greater than the MSCI EAFE Starting Level, you will receive a cash payment that provides you with a return per \$1,000 principal amount note equal to the MSCI EAFE Return multiplied by two, subject to a Maximum Total Return on the notes of 18.00%*. For example, if the MSCI EAFE Return is greater than 9.00%, you will receive the Maximum Total Return on the notes of 18.00%*, which entitles you to a maximum payment at maturity of \$1,180 for every \$1,000 principal amount note that you hold. Accordingly, if the MSCI EAFE Return is positive, your payment per \$1,000 principal amount note will be calculated as follows, subject to the Maximum Total Return:

\$1,000 +[\$1,000 x (MSCI EAFE Return x 2.0)]

 * The actual Maximum Total Return on the notes will be set on the pricing date and will not be less than 18.00%.

Your principal is protected against up to a 10% decline of the Index at maturity. If the MSCI EAFE Closing Level declines from the MSCI EAFE Starting Level by up to 10%, you will receive the principal amount of your notes at maturity. If the MSCI EAFE Closing Level declines from the MSCI EAFE Starting Level by more than 10%, you will lose 1% of the principal amount of your notes for every 1% that the Index declines beyond 10% and your final payment per \$1,000 principal amount note will be calculated as follows:

\$1,000 + [\$1,000 x (MSCI EAFE Return + 10%)]

If the MSCI EAFE Closing Level declines from the MSCI EAFE Starting Level by more than 10%, you could lose up to \$900 per \$1,000 principal amount note.

Buffer Amount: 10%, which results in a minimum payment of \$100 per \$1,000 principal amount note.

MSCI EAFE Return: MSCI EAFE Closing Level - MSCI EAFE Starting Level

MSCI EAFE Starting Level

MSCI EAFE Starting Level: The Index closing level on the pricing date, which is expected to be on or about June 25, 2008.

MSCI EAFE Closing Level: The Index closing level on the Observation Date.

Observation Date: December 28, 2009 Maturity Date: December 31, 2009

CUSIP: 48123M5X6

Subject to postponement in the event of a market disruption event and as described under "Description of Notes — Payment at Maturity" in the

accompanying product supplement no. 39-X.

Investing in the Buffered Return Enhanced Notes involves a number of risks. See "Risk Factors" beginning on page PS-16 of the accompanying product supplement no. 39-X and "Selected Risk Considerations" beginning on page TS-2 of this term sheet.

PMorgan Chase & Co. has filed a registration statement (including a prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement and the other documents relating to this offering that JPMorgan Chase & Co. has filed with the SEC for more complete information about JPMorgan Chase & Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, JPMorgan Chase & Co., any agent or any dealer participating in this offering will arrange to send you the prospectus, each prospectus supplement, product supplement no. 39-X and this term sheet if you so request by calling toll-free 866-535-9248.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase the notes prior to their issuance. In the event of any changes to the terms of the notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this term sheet or the accompanying prospectus supplements and prospectus. Any representation to the contrary is a criminal offense.

To the extent the information contained in footnotes (1) and (2) below differs from or conflicts with the disclosure set forth under "Use of Proceeds" in product supplement no. 39-X, the information in the footnotes (1) and (2) below controls.

	Price to Public (1)	Fees and Commissions (2)	Proceeds to Us
Per note	\$	\$	\$
Total	\$	\$	\$

(1) The price to the public includes the estimated cost of hedging our obligations under the notes through one or more of our affiliates.

(2) If the notes priced today, J.P. Morgan Securities Inc., which we refer to as JPMSI, acting as agent for JPMorgan Chase & Co., would receive a commission of approximately \$19.20 per \$1,000 principal amount note. This commission includes the projected profits that our affiliates expect to realize in consideration for assuming risks inherent in hedging our obligations under the notes. JPMSI may use a portion of that commission to pay selling concessions to other dealers of approximately \$2.00 per \$1,000 principal amount note. The other dealers may forgo, in their sole discretion, some or all of their selling concessions. The actual commission received by JPMSI may be more or less than \$19.20 and will depend on market conditions on the pricing date. In no event will the commission received by JPMSI, which includes concessions that may be allowed to other dealers, exceed \$25.00 per \$1,000 principal amount note. See "Underwriting" beginning on page PS-139 of the accompanying product supplement no. 39-X.

The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

JPMorgan

Additional Terms Specific to the Notes

You should read this term sheet together with the prospectus dated December 1, 2005, as supplemented by the prospectus supplement dated October 12, 2006 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 39-X dated April 18, 2008. This term sheet, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in "Risk Factors" in the accompanying product supplement no. 39-X, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.
You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Product supplement no. 39-X dated April 18, 2008: http://www.sec.gov/Archives/edgar/data/19617/000114420408023242/v111123_424b2.pdf

Prospectus supplement dated October 12, 2006: http://www.sec.gov/Archives/edgar/data/19617/000089109206003117/e25276_424b2.pdf Prospectus dated December 1, 2005:

http://www.sec.gov/Archives/edgar/data/19617/000089109205002389/e22923_base.txt

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this term sheet, the "Company," "we," "us" or "our" refers to JPMorgan Chase & Co.

Supplemental Information

The information set forth below supplements and supersedes (as described below) the information contained in the accompanying product supplement no. 39-X.

MSCI, Inc. has replaced Morgan Stanley Capital International Inc. as the sponsor to the MSCI EAFE® Index following its completed initial public offering on November 20, 2007. According to MSCI, Inc.'s public filings, Morgan Stanley is its principal shareholder. All references to "Morgan Stanley Capital International Inc." in product supplement No. 39-X shall be deemed to refer to MSCI, Inc.

Selected Purchase Considerations

elected Purchase Considerations

APPRECIATION POTENTAL—The notes provide the opportunity to enhance equity returns by multiplying a positive MSCI EAFE Return by two, up to the Maximum Total Return on the notes of 18.0%, or \$1.180 for every \$1,000 principal amount note. The actual Maximum Total Return on the notes will be set on the pricing date and will not be less than 18.00%. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.

LIMITED PROTECTION AGAINST LOSS—Payment at maturity of the principal amount of the notes is protected against a decline in the MSCI EAFE Closing Level, as compared to the MSCI EAFE Starting Level, of up to 10.0%. If the principal amount of the MSCI EAFE Starting Level, of up to 10.0% of the principal amount of your notes. Accordingly, at maturity you will receive a payment equal to at least \$500 for geth \$1,000 principal amount note.

DIVERSIFICATION OF THE MSCI EAFE INDEX**—The return on the notes is linked to the MSCI EAFE** Index. The MSCI EAFE** Index is designed to measure developed market equity performance in Europe, Asia, Australia and the Far East, but excluding the United States and Canada. MSCI, Inc., the sponsor of the MSCI EAFE** Index. The MSCI EAFE** Index is designed to measure developed market equity performance in Europe, Asia, Australia and the Far East, but excluding the MSCI EAFE** in the accompanying product supplement no. 39-X, as supplemented by the information set forth under "The MSCI EAFE** in the accompanying product supplement no. 39-X, as supplemented by the information set forth under "The MSCI EAFE** in the accompanying product supplement no. 39-X, as supplemented by the information set forth under "The MSCI EAFE** in the accompanying product supplement no. 39-X, as a New Mede Methodology, see the information and the MSCI EAFE** in the accompanying product supplement no. 39-X. In the product supplement no. 39-X is not the product supplem

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Index or any of the component stocks of the Index. These risks are explained in more detail in the "Risk Factors" section of the accompanying product supplement no. 39-X dated April 18, 2008.

• YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS — The notes do not guarantee any return of principal in excess of \$100 per \$1,000 principal amount note. The return on the notes at maturity is linked to the performance of the Index and will depend on whether, and the extent to which, the MSCI EAFE Return is positive or negative. Your investment will be exposed to any decline in the MSCI EAFE Closing Level, as compared to the MSCI EAFE Starting Level, beyond the 10% buffer. Accordingly, you could lose up to \$900 for each \$1,000 principal amount note that you invest in.

• YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM TOTAL RETURN — If the MSCI EAFE Closing Level is greater than the MSCI EAFE Starting Level, for each \$1,000 principal amount note, you will receive at maturity \$1,000 plus an additional amount that will not exceed a predetermined percentage of the principal amount, regardless of the appreciation in the Index, which may be significant. We refer to this percentage as the Maximum Total Return, which will be set on the pricing date and will not be less than 18.00%.

• CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY — While the payment at maturity described in this term sheet is based on the full principal amount of your notes, the original issue price of the notes includes the agent's commission and the cost of hedging our obligations under the notes through one or more of our affiliates. As a result, and as a general matter, the price, if any, at which JPMSI will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the Maturity D

NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS — As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of securities composing the index would have.

THE NOTES ARE SUBJECT TO CURRENCY EXCHANGE RISK — Because the prices of the component securities of the country indices that compose the Index are converted into U.S. dollars for purposes of calculating the value of the component country indices and the Index, your notes will be exposed to currency exchange rate risk with respect to each of the currencies in which the component securities of the Index trade. Your net exposure will depend on the extent to which such currencies strengthen or weaken against the U.S. dollar and the relative weight of the component securities in the Index denominated in each such currency. If, taking into account such weighting, the U.S. dollar strengthens against such currencies, the value of the Index will be adversely affected and the payment at maturity, if any may be reduced.

LACK OF LIQUIDITY — The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.

POTENTIAL CONFLICTS — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes.

investor in the notes.

MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES — In addition to the level of the Index on any day, the value of the notes will be affected by a number of economic and market factors that may either

offset or magnify each other, including:

the expected volatility of the Index; the time to maturity of the notes;

the dividend rate on the common stocks underlying the Index;

interest and yield rates in the market generally as well as in the markets of the component securities composing

the index, a variety of economic, financial, political, regulatory or judicial events; the exchange rate and the volatility of the exchange rate between the U.S. dollar and the currencies in which securities composing the Index are traded and the correlation between that rate and the level of the Index; and our creditworthiness, including actual or anticipated downgrades in our credit ratings.

What is the Total Return on the Notes at Maturity Assuming a Range of Performance for the Index?

The following table illustrates the hypothetical total return at maturity on the notes. The "total return" as used in this term sheet is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount note to \$1,000. The hypothetical total returns set forth below assume an MSCI EAFE Starting Level of 2100 and a Maximum Total Return on the notes of 18.00%. The hypothetical total returns set forth below are for illustrative purposes only and may not be the actual total returns applicable to a purchaser of the notes. The numbers appearing in the following table and examples have been rounded for ease of analysis.

Enaing index		
Level	Index Return	Total Return
3150.00	50.00%	18.00%
2940.00	40.00%	18.00%
2730.00	30.00%	18.00%
2520.00	20.00%	18.00%
2310.00	10.00%	18.00%
2289.00	9.00%	18.00%
2205.00	5.00%	10.00%
2152.50	2.50%	5.00%
2121.00	1.00%	2.00%
2100.00	0.00%	0.00%
1995.00	-5.00%	0.00%
1890.00	-10.00%	0.00%
1785.00	-15.00%	-5.00%
1680.00	-20.00%	-10.00%
1470.00	-30.00%	-20.00%
1260.00	-40.00%	-30.00%
1050.00	-50.00%	-40.00%
840.00	-60.00%	-50.00%
630.00	-70.00%	-60.00%
420.00	-80.00%	-70.00%
210.00	-90.00%	-80.00%
0.00	-100.00%	-90.00%

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table on the previous page are calculated.

Example 1: The level of the Index increases from the MSCI EAFE Starting Level of 2100 to an MSCI EAFE Closing Level of 2205. Because the MSCI EAFE Closing Level of 2205 is greater than the MSCI EAFE Starting Level of 2100 and the MSCI EAFE Return of 5% multiplied by 2 does not exceed the hypothetical Maximum Total Return of 18.00%, the investor receives a payment at maturity of \$1,100 per \$1,000 principal amount note, calculated as follows:

$$1,000 + [1,000 \times (5\% \times 2)] = 1,100$$

Example 2: The level of the Index decreases from the MSCI EAFE Starting Level of 2100 to an MSCI EAFE Closing Level of 1890. Because the MSCI EAFE Closing Level of 1890 is less than the MSCI EAFE Starting Level of 2100 by not more than the Buffer Amount of 10%, the investor receives a payment at maturity of \$1,000 per \$1,000 principal amount note.

Example 3: The level of the Index increases from the MSCI EAFE Starting Level of 2100 to an MSCI EAFE Closing Level of 2310. Because the MSCI EAFE Closing Level of 2310 is greater than the MSCI EAFE Starting Level of 2100 and the MSCI EAFE Return of 10% multiplied by 2 exceeds the hypothetical Maximum Total Return of 18.00%, the investor receives a payment at maturity of \$1,180 per \$1,000 principal amount note, the maximum payment on the notes.

Example 4: The level of the Index decreases from the MSCI EAFE Starting Level of 2100 to an MSCI EAFE Closing Level of 1470. Because the MSCI EAFE Closing Level of 1470 is less than the MSCI EAFE Starting Level of 2100 by more than the Buffer Amount of 10%, the MSCI EAFE Return is negative and the investor receives a payment at maturity of \$800 per \$1,000 principal amount note, calculated as follows:

$$1,000 + [1,000 \times (-30\% + 10\%)] = 800$$

Example 5: The level of the Index decreases from the MSCI EAFE Starting Level of 2100 to an MSCI EAFE Closing Level of o. Because the MSCI EAFE Closing Level of o is less than the MSCI EAFE Starting Level of 2100 by more than the Buffer Amount of 10%, the MSCI EAFE Return is negative and the investor receives a payment at maturity of \$100 per \$1,000 principal amount note, which reflects the principal protection provided by the Buffer Amount of 10%, calculated as follows:

$$1,000 + [1,000 \times (-100\% + 10\%)] = 100$$

Historical Information

The following graph sets forth the historical performance of the MSCI EAFE® Index based on the weekly Index closing level from January 3, 2003 through May 23, 2008. The Index closing level on May 29, 2008 was 2133.91. We obtained the Index closing levels below from Bloomberg Financial Markets. We make no representation or warranty as to the accuracy or completeness of the information obtained from Bloomberg Financial Markets.

The historical levels of the Index should not be taken as an indication of future performance, and no assurance can be given as to the Index closing level on the Observation Date. We cannot give you assurance that the performance of the Index will result in the return of any of your initial investment in excess of \$100 per \$1,000 principal amount note.
