**JPMorgan Chase & Co.
\$
Knock-Out Buffered Return Enhanced Notes Linked to the S&P 500® Index
due June 10, 2010**

General

- The notes are designed for investors who seek a return of 1.95 times the appreciation of the S&P 500® Index up to a maximum total return on the notes of 31.20%*. Investors should be willing to forgo interest and dividend payments, and if the Index declines, as compared to the Initial Index Level, by more than 30% on any trading day during the Monitoring Period, be willing to lose some or all of their principal.
- Senior unsecured obligations of JPMorgan Chase & Co. maturing June 10, 2010^{††}.
- Minimum denominations of \$20,000 and integral multiples of \$1,000 in excess thereof.
- The notes are expected to price on June 5, 2008 and are expected to settle on or about June 10, 2008.

Key Terms

Index:	The S&P 500® Index (the “Index”)
Upside Leverage Factor:	1.95
Payment at Maturity:	If the Ending Index Level is greater than the Initial Index Level, you will receive a cash payment that provides you with a return per \$1,000 principal amount note equal to the Index Return multiplied by 1.95, subject to a Maximum Total Return on the notes of 31.20%*. For example, if the Index Return is more than 16.00%, you will receive the Maximum Total Return on the notes of 31.20%*, which entitles you to a maximum payment at maturity of \$1,312 for every \$1,000 principal amount note that you hold. Accordingly, if the Index Return is positive, your payment at maturity per \$1,000 principal amount note will be calculated as follows, subject to the Maximum Total Return: $\$1,000 + [\$1,000 \times (\text{Index Return} \times 1.95)]$ <p>*The actual Maximum Total Return on the notes will be set on the pricing date and will not be less than 31.20%.</p> <p>Your principal is protected against up to a 30% decline in the Index at maturity if a Knock-Out Event has not occurred. If the Ending Index Level declines from the Initial Index Level and a Knock-Out Event has not occurred, you will receive the principal amount of your notes at maturity.</p> <p>If the Ending Index Level is less than the Initial Index Level and a Knock-Out Event has occurred, you will lose 1% of the principal amount of your notes for every 1% that the Index declines below the Initial Index Level. Under these circumstances, your payment at maturity per \$1,000 principal amount note will be calculated as follows: $\\$1,000 + [\\$1,000 \times \text{Index Return}]$ <p><i>If the Ending Index Level declines from the Initial Index Level and a Knock-Out Event has occurred, the protection provided by the 30% Knock-Out Buffer Amount will terminate and you will lose some or all of your investment at maturity.</i></p></p>
Knock-Out Event:	A Knock-Out Event occurs if, on any trading day during the Monitoring Period, the Index closing level has declined, as compared to the Initial Index Level, by more than the 30% Knock-Out Buffer Amount.
Monitoring Period:	The period from the pricing date to and including the Observation Date.
Knock-Out Buffer Amount:	30%
Index Return:	The performance of the Index from the Initial Index Level to the Ending Index Level, calculated as follows: $\frac{\text{Ending Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$
Initial Index Level:	The Index closing level on the pricing date.
Ending Index Level:	The Index closing level on the Observation Date.
Observation Date:	June 7, 2010 ^{††}
Maturity Date:	June 10, 2010 ^{††}

CUSIP:

[†] This amended and restated term sheet amends and restates and supersedes the term sheet related hereto dated June 3, 2008 to product supplement 18-II (the term sheet is available on the SEC website at <http://www.sec.gov/Archives/edgar/data/19617/000089109208002937/e31842fw.pdf>).

^{††} Subject to postponement in the event of a market disruption event and as described under “Description of Notes — Payment at Maturity” in the accompanying product supplement no. 18-II.

Investing in the Knock-Out Buffered Return Enhanced Notes involves a number of risks. See “Risk Factors” beginning on page PS-7 of the accompanying product supplement no. 18-II and “Selected Risk Considerations” beginning on page TS-3 of this amended and restated term sheet.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this amended and restated term sheet or the accompanying prospectus supplements and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public	Fees and Commissions (1)	Proceeds to Us
Per note	\$	\$	\$
Total	\$	\$	\$

(1) Please see “Supplemental Underwriting Information” in this amended and restated term sheet for information about fees and commissions. The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Additional Terms Specific to the Notes

JPMorgan Chase & Co. has filed a registration statement (including a prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this amended and restated term sheet relates. Before you invest, you should read the prospectus in that registration statement and the other documents relating to this offering that JPMorgan Chase & Co. has filed with the SEC for more complete information about JPMorgan Chase & Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, JPMorgan Chase & Co., any agent or any dealer participating in this offering will arrange to send you the prospectus, each prospectus supplement, product supplement no. 18-II and this amended and restated term sheet if you so request by calling toll-free 866-535-9248.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase the notes prior to their issuance. In the event of any changes to the terms of the notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.

You should read this amended and restated term sheet together with the prospectus dated December 1, 2005, as supplemented by the prospectus supplement dated October 12, 2006 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 18-II dated June 2, 2008. **This amended and restated term sheet, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours. This amended and restated term sheet amends and restates and supersedes the term sheet related hereto dated June 3, 2008 to product supplement no. 18-II in its entirety. You should rely only on the information contained in this amended and restated term sheet and in the documents listed below in making your decision to invest in the notes.** You should carefully consider, among other things, the matters set forth in “Risk Factors” in the accompanying product supplement no. 18-II, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement no. 18-II dated June 2, 2008:
http://www.sec.gov/Archives/edgar/data/19617/000089109208002920/e31821_424b2.pdf
- Prospectus supplement dated October 12, 2006:
http://www.sec.gov/Archives/edgar/data/19617/000089109206003117/e25276_424b2.pdf
- Prospectus dated October 12, 2006:
http://www.sec.gov/Archives/edgar/data/19617/000089109205002389/e22923_base.txt

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this amended and restated term sheet, the “Company,” “we,” “us,” or “our” refers to JPMorgan Chase & Co.

What is the Total Return on the Notes at Maturity Assuming a Range of Performance for the Index?

The following table and graph illustrate the hypothetical total return at maturity on the notes. The “total return” as used in this amended and restated term sheet is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount note to \$1,000. The hypothetical total returns set forth below assume an Initial Index Level of 1400 and a Maximum Total Return on the notes of 31.20%. The hypothetical total returns set forth below are for illustrative purposes only and may not be the actual total returns applicable to a purchaser of the notes. The numbers appearing in the following table, graph and examples have been rounded for ease of analysis.

Ending Index Level	Index Return	Note Total Return if Knock-Out Event Has Not Occurred (1)	Note Total Return if Knock-Out Event Has Occurred (2)
2520.00	80.00%	31.20%	31.20%
2310.00	65.00%	31.20%	31.20%
2100.00	50.00%	31.20%	31.20%
1960.00	40.00%	31.20%	31.20%
1820.00	30.00%	31.20%	31.20%
1680.00	20.00%	31.20%	31.20%
1624.00	16.00%	31.20%	31.20%
1540.00	10.00%	19.50%	19.50%
1470.00	5.00%	9.75%	9.75%
1414.00	1.00%	1.95%	1.95%
1400.00	0.00%	0.00%	0.00%
1330.00	-5.00%	0.00%	-5.00%
1260.00	-10.00%	0.00%	-10.00%
1120.00	-20.00%	0.00%	-20.00%
980.00	-30.00%	0.00%	-30.00%
840.00	-40.00%	N/A	-40.00%
700.00	-50.00%	N/A	-50.00%
560.00	-60.00%	N/A	-60.00%
420.00	-70.00%	N/A	-70.00%
280.00	-80.00%	N/A	-80.00%
140.00	-90.00%	N/A	-90.00%
0.00	-100.00%	N/A	-100.00%

(1) The Index closing level is greater than or equal to 980 on each trading day during the Monitoring Period.

(2) The Index closing level is less than 980 on at least one trading day during the Monitoring Period.

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table and graph above are calculated.

Example 1: The level of the Index increases from the Initial Index Level of 1400 to an Ending Index Level of 1470. Because the Ending Index Level of 1470 is greater than the Initial Index Level of 1400, regardless of whether a Knock-Out Event has occurred, the investor receives a payment at maturity of \$1,097.50 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + [\$1,000 \times (5\% \times 1.95)] = \$1,097.50$$

Example 2: The level of the Index decreases from the Initial Index Level of 1400 to an Ending Index Level of 980 and a Knock-Out Event has not occurred. Because the Ending Index Level of 980 is less than the Initial Index Level of 1400 and the Index has not closed below 980 on any trading day during the Monitoring Period, a Knock-Out Event has not occurred and the investor receives a payment at maturity of \$1,000 per \$1,000 principal amount note.

Example 3: The level of the Index increases from the Initial Index Level of 1400 to an Ending Index Level of 1680. Because the Ending Index Level of 1680 is greater than the Initial Index Level of 1400 and the Index Return of 20% multiplied by 1.95 exceeds the hypothetical Maximum Total Return of 31.20%, regardless of whether a Knock-Out Event has occurred, the investor receives a payment at maturity of \$1,312 per \$1,000 principal amount note, the maximum payment on the notes.

Example 4: The level of the Index decreases from the Initial Index Level of 1400 to an Ending Index Level of 840. Because the Ending Index Level of 840 is less than the Initial Index Level of 1400 by more than the Knock-Out Buffer Amount of 30%, a Knock-Out Event has occurred and the investor receives a payment at maturity of \$600 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times -40\%) = \$600$$

Example 5: The level of the Index decreases from the Initial Index Level of 1400 to an Ending Index Level of 1120 and a Knock-Out Event has occurred. Because the Ending Index Level of 1120 is less than the Initial Index Level of 1400 and because the Index has closed below 980 on at least one trading day during the Monitoring Period, a Knock-Out Event has occurred and the investor receives a payment at maturity of \$800 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times -20\%) = \$800$$

Selected Purchase Considerations

- **APPRECIATION POTENTIAL** — The notes provide the opportunity to enhance equity returns by multiplying a positive Index Return by 1.95, up to the Maximum Total Return on the notes of 31.20%, or \$1,312 for every \$1,000 principal amount note. The actual Maximum Total Return on the notes will be set on the pricing date and will not be less than 31.20%. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **LIMITED PROTECTION AGAINST LOSS** — Payment at maturity of the principal amount of the notes is protected against a decline in the Ending Index Level, as compared to the Initial Index Level, of up to 30%, if a Knock-Out Event has not occurred. If, on any trading day during the Monitoring Period, the Index closing level has declined, as compared to the Initial Index Level, by more than 30%, the protection provided by the 30% Knock-Out Buffer Amount will terminate and for every 1% decline of the Index below the Initial Index Level, you will lose an amount equal to 1% of the principal amount of your notes.
- **DIVERSIFICATION OF THE S&P 500® INDEX** — The return on the notes is linked to the S&P 500® Index. The S&P 500® Index consists of 500 component stocks selected to provide a performance benchmark for the U.S. equity markets. For additional information about the Index, see the information set forth under “The S&P 500® Index” in the accompanying product supplement no. 18-II.
- **CAPITAL GAINS TAX TREATMENT** — You should review carefully the section entitled “Certain U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 18-II. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special tax counsel, Davis Polk & Wardwell, it is reasonable to treat your purchase and ownership of the notes as an “open transaction” for U.S. federal income tax purposes. Assuming this characterization is respected, your gain or loss on the notes should be treated as long-term capital gain or loss if you hold the notes for more than a year, whether or not you are an initial purchaser of notes at the issue price. However, the Internal Revenue Service (the “IRS”) or a court may not respect this characterization or treatment of the notes, in which case the timing and character of any income or loss on the notes could be significantly and adversely affected. In addition, on December 7, 2007, Treasury and the IRS released a notice requesting comments on the U.S. federal income tax

treatment of “prepaid forward contracts” and similar instruments, such as the notes. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by Non-U.S. Holders should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income that is subject to an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the notes, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the notes, including possible alternative treatments and the issues presented by this notice.

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Index or any of the component securities of the Index. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 18-11 dated June 2, 2008.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The notes do not guarantee any return of principal. The return on the notes at maturity is linked to the performance of the Index and will depend on whether a Knock-Out Event has occurred and whether, and the extent to which, the Index Return is positive or negative. If the Ending Index Level is less than the Initial Index Level and a Knock-Out Event has occurred, the protection provided by the 30% Knock-Out Buffer Amount will terminate and for every 1% decline of the Index below the Initial Index Level, you will lose an amount equal to 1% of the principal amount of your notes. Under these circumstances, you could lose some or all of your principal.
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM TOTAL RETURN** — If the Ending Index Level is greater than the Initial Index Level, for each \$1,000 principal amount note, you will receive at maturity \$1,000 plus an additional amount that will not exceed a predetermined percentage of the principal amount, regardless of the appreciation in the Index, which may be significant. We refer to this percentage as the Maximum Total Return, which will be set on the pricing date and will not be less than 31.20%.
- **YOUR PROTECTION MAY TERMINATE ON ANY DAY DURING THE TERM OF THE NOTES** — If the Index closing level on any trading day during the Monitoring Period has declined from the Initial Index Level by more than the 30% Knock-Out Buffer Amount, you will at maturity be fully exposed to any depreciation in the Index. We refer to this feature as a contingent buffer. Under these circumstances, if the Ending Index Level is less than the Initial Index Level, you will lose 1% of the principal amount of your investment for every 1% decline in the Ending Index Level as compared to the Initial Index Level. You will be subject to this potential loss of principal even if the Index subsequently increases such that the Ending Index Level has declined from the Initial Index Level by less than the 30% Knock-Out Buffer Amount. If these notes had a non-contingent buffer feature, under the same scenario, you would have received the full principal amount of your notes at maturity. As a result, your investment in the notes may not perform as well as an investment in a security with a return that includes a non-contingent buffer.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity described in this amended and restated term sheet is based on the full principal amount of your notes, the original issue price of the notes includes the agent’s commission and the estimated cost of hedging our obligations under the notes through one or more of our affiliates. As a result, the price, if any, at which J.P. Morgan Securities Inc., which we refer to as JPMSI, will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price, and any sale prior to the maturity date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of securities composing the Index would have.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. In addition, we are currently one of the companies that make up the Index. We will not have any obligation to consider your interests as a holder of the notes in taking any corporate action that might affect the value of the Index and the notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the level of the Index on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
 - the expected volatility of the Index;
 - the time to maturity of the notes;
 - whether a Knock-Out Event has occurred;
 - the dividend rate on the equity securities underlying the Index;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory or judicial events; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

Historical Information

The following graph sets forth the historical performance of the S&P 500® Index based on the weekly historical Index closing level from January 3, 2003 through May 30, 2008. The Index closing level on June 2, 2008 was 1385.67. We obtained the Index closing levels below from Bloomberg Financial Markets. We make no representation or warranty as to the accuracy or completeness of the information obtained from Bloomberg Financial Markets.

The historical levels of the Index should not be taken as an indication of future performance, and no assurance can be given as to the Index closing level on the Observation Date or on any trading day during the Monitoring Period. We cannot give you assurance that the performance of the Index will result in the return of any of your initial investment.

Supplemental Underwriting Information

JPMSI, acting as agent for JPMorgan Chase & Co., will receive a commission that will depend on market conditions on the pricing date. In no event will that commission, which includes structuring and development fees, exceed \$25.00 per \$1,000 principal amount note. See “Underwriting” beginning on page PS-28 of the accompanying product supplement no. 18-II.

For a different portion of the notes to be sold in this offering, an affiliated bank will receive a fee and another affiliate of ours will receive a structuring and development fee. In no event will the total amount of these fees exceed \$25.00 per \$1,000 principal amount note.
