

# JPMORGAN CHASE & CO.

## Structured Investments

\$1,000,000

11.00% per annum Auto Callable Yield Notes due February 13, 2014 Linked to the Lesser Performing of the United States Natural Gas Fund, LP and the Russell 2000® Index

### General

- The notes are designed for investors who seek a higher interest rate than the current yield on a conventional debt security with the same maturity issued by us. Investors should be willing to forgo the potential to participate in the appreciation of either the United States Natural Gas Fund, LP or the Russell 2000® Index and to forgo dividend payments. Investors should be willing to assume the risk that they will receive less interest if the notes are automatically called and the risk that, if the notes are not automatically called, they may lose some or all of their principal at maturity.
- The notes will pay 11.00% per annum interest over the term of the notes, assuming no automatic call, payable at a rate of 0.91667% per month. **However, the notes do not guarantee any return of principal at maturity. Instead, if the notes are not automatically called, the payment at maturity will be based on the performance of the Lesser Performing Underlying and whether the closing level or closing price, as applicable, of either Underlying is less than its Starting Underlying Level by more than the applicable Buffer Amount on any day during the Monitoring Period, as described below. Any payment on the notes is subject to the credit risk of JPMorgan Chase & Co.**
- The notes will be automatically called if the closing level or closing price, as applicable, of each Underlying on the relevant Call Date is greater than or equal to the applicable Starting Underlying Level. If the notes are automatically called, payment on the applicable Call Settlement Date for each \$1,000 principal amount note will be a cash payment of \$1,000, plus any accrued and unpaid interest, as described below.
- Unsecured and unsubordinated obligations of JPMorgan Chase & Co. maturing February 13, 2014\*
- The payment at maturity is **not** linked to a basket composed of the Underlyings. The payment at maturity is linked to the performance of each of the Underlyings individually, as described below.
- Minimum denominations of \$1,000 and integral multiples thereof
- The Pricing Date, for purposes of these notes, is the day that the terms of the notes become final. With respect to each Underlying, the Starting Underlying Level has been determined by reference to the Index closing level of that Index on February 8, 2013 and not by reference to the closing level or closing price, as applicable, of that Underlying on the Pricing Date.
- The terms of the notes as set forth in "Key Terms" below, to the extent they differ from or conflict with those set forth in the accompanying product supplement no. 8-I, supersede the terms set forth in product supplement no. 8-I. In particular, notwithstanding anything to the contrary in product supplement no. 8-I, the notes will be automatically called if the closing level or closing price, as applicable, of each Underlying is greater than or equal to the applicable Starting Underlying Level. See "Key Terms — Automatic Call" below.**

### Key Terms

Underlyings:	The United States Natural Gas Fund, LP (the "Fund") and the Russell 2000® Index (the "Index") (each an "Underlying," and collectively, the "Underlyings")
Interest Rate:	11.00% per annum over the term of the notes, assuming no automatic call, payable at a rate of 0.91667% per month
Automatic Call:	If on any Call Date, the closing level or closing price, as applicable, of each Underlying is greater than or equal to the applicable Starting Underlying Level, the notes will be automatically called on that Call Date.
Payment if Called:	If the notes are automatically called, on the relevant Call Settlement Date, for each \$1,000 principal amount note, you will receive \$1,000 plus any accrued and unpaid interest to but excluding that Call Settlement Date.
Buffer Amount:	<b>With respect to the United States Natural Gas Fund, LP, \$5.508, which is equal to 30.00% of its Starting Underlying Level, subject to adjustments. With respect to the Russell 2000® Index, 274.101, which is equal to 30.00% of its Starting Underlying Level.</b>
Pricing Date:	February 11, 2013
Settlement Date:	On or about February 14, 2013
Observation Date*:	February 10, 2014
Maturity Date*:	February 13, 2014
CUSIP:	48126DWT2
Monitoring Period:	The period from but excluding the Pricing Date to and including the Observation Date
Interest Payment Dates*:	Interest on the notes will be payable monthly in arrears on the 14th calendar day of each month except for the final monthly interest payment, which will be payable on the Maturity Date or the relevant Call Settlement Date, as applicable (each such day, an "Interest Payment Date"), commencing March 14, 2013. See "Selected Purchase Considerations — Monthly Interest Payments" in this pricing supplement for more information.
Payment at Maturity:	If the notes are not automatically called, the payment at maturity, in excess of any accrued and unpaid interest, will be based on whether a Trigger Event has occurred and the performance of the Lesser Performing Underlying. If the notes are not automatically called, for each \$1,000 principal amount note, you will receive \$1,000 plus any accrued and unpaid interest at maturity, <i>unless</i> : (a) the Ending Underlying Level of either Underlying is less than its Starting Underlying Level; and (b) a Trigger Event has occurred. If the notes are not automatically called and the conditions described in (a) and (b) are satisfied, at maturity you will lose 1% of the principal amount of your notes for every 1% that the Ending Underlying Level of the Lesser Performing Underlying is less than its Starting Underlying Level. Under these circumstances, your payment at maturity per \$1,000 principal amount note, in addition to any accrued and unpaid interest, will be calculated as follows: $\$1,000 + (\$1,000 \times \text{Lesser Performing Underlying Return})$ <i>You will lose some or all of your principal at maturity if the notes are not automatically called and the conditions described in (a) and (b) are both satisfied.</i>
Trigger Event:	A Trigger Event occurs if, on any day during the Monitoring Period, the closing level or closing price, as applicable, of either Underlying is less than its Starting Underlying Level by more than the applicable Buffer Amount.
Underlying Return:	With respect to each Underlying, the Underlying Return is calculated as follows: $\frac{\text{Ending Underlying Level} - \text{Starting Underlying Level}}{\text{Starting Underlying Level}}$
Call Dates*:	May 9, 2013 (first Call Date), June 11, 2013 (second Call Date), July 10, 2013 (third Call Date), August 9, 2013 (fourth Call Date), September 11, 2013 (fifth Call Date), October 9, 2013 (sixth Call Date), November 8, 2013 (seventh Call Date), December 11, 2013 (eighth Call Date) and January 9, 2014 (final Call Date)
Call Settlement Dates*:	With respect to each Call Date, the first Interest Payment Date occurring after that Call Date
Other Key Terms:	See "Additional Key Terms" on the next page.

\* Subject to postponement as described under "Description of Notes — Payment at Maturity," "Description of Notes — Interest Payments" and "Description of Notes — Postponement of a Determination Date" in the accompanying product supplement no. 8-I.

**Investing in the Auto Callable Yield Notes involves a number of risks. See "Risk Factors" beginning on page PS-10 of the accompanying product supplement no. 8-I, "Risk Factors" beginning on page US-1 of the accompanying underlying supplement 1-I, "Risk Factors" beginning on page PS-3 of this term sheet.**

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this pricing supplement or the accompanying product supplement, underlying supplement, prospectus supplement and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public (1)	Fees and Commissions (2)	Proceeds to Us
Per note	\$1,000	\$34	\$966
Total	\$1,000,000	\$34,000	\$966,000

- (1) The price to the public includes the estimated cost of hedging our obligations under the notes through one or more of our affiliates.
- (2) J.P. Morgan Securities LLC, which we refer to as JPMS, acting as agent for JPMorgan Chase & Co., will receive a commission of \$34.00 per \$1,000 principal amount note and will use a portion of that commission to allow selling concessions to other affiliated or unaffiliated dealers of \$22.50 per \$1,000 principal amount note. This commission includes the projected profits that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the notes. See "Plan of Distribution (Conflicts of Interest)" beginning on page PS-48 of the accompanying product supplement no. 8-I.

*The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.*

J.P.Morgan

## Additional Terms Specific to the Notes

You should read this pricing supplement together with the prospectus dated November 14, 2011, as supplemented by the prospectus supplement dated November 14, 2011 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 8-I dated November 14, 2011, underlying supplement no. 1-I dated November 14, 2011 and underlying supplement no. 12-II dated February 11, 2013. **This pricing supplement, together with the documents listed below, contains the terms of the notes, supplements the term sheet related hereto dated February 8, 2013 and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the matters set forth in “Risk Factors” in the accompanying product supplement no. 8-I, “Risk Factors” in the accompanying underlying supplement no. 1-I and “Risk Factors” in the accompanying underlying supplement no. 12-II, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at [www.sec.gov](http://www.sec.gov) as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this pricing supplement, the “Company,” “we,” “us” and “our” refer to JPMorgan Chase & Co.

## Additional Key Terms

Starting Underlying Level:	With respect to the Fund, the closing price of one share of the Fund on February 8, 2013, which was \$18.36 divided by the Share Adjustment Factor for the Fund (the “Initial Share Price”). With respect to the Index, the closing level of the Index on February 8, 2013 (the “Initial Index Level”), which was 913.67. We refer to each of the Initial Index Level for the Index and the Initial Share Price for the Fund as a “Starting Underlying Level.” <b>The Starting Underlying Level of each Underlying is not determined by reference to the Index closing level or closing price, as applicable, of that Underlying on the Pricing Date.</b>
Ending Underlying Level:	With respect to the Fund, the closing price of one share of the Fund on the Observation Date (the “Final Share Price”). With respect to the Index, the closing level of the Index on the Observation Date (the “Ending Index Level”). We refer to each of the Ending Index Level for the Index and the Final Share Price for the Fund as an “Ending Underlying Level.”
Share Adjustment Factor:	With respect to the Fund, set equal to 1.0 on February 8, 2013 and subject to adjustment under certain circumstances. See “General Terms of Notes — Anti-Dilution Adjustments” in the accompanying product supplement no. 8-I.
Lesser Performing Underlying:	The Underlying with the Lesser Performing Underlying Return
Lesser Performing Underlying Return:	The lower of the Underlying Return of the United States Natural Gas Fund, LP and the Underlying Return of the Russell 2000® Index

## Selected Purchase Considerations

- **THE NOTES OFFER A HIGHER INTEREST RATE THAN THE YIELD ON DEBT SECURITIES OF COMPARABLE MATURITY ISSUED BY US** — The notes will pay interest at the Interest Rate specified on the cover of this pricing supplement, assuming no automatic call, which is higher than the yield currently available on debt securities of comparable maturity issued by us. **Because the notes are our unsecured and unsubordinated obligations, payment of any amount on the notes is subject to our ability to pay our obligations as they become due.**
- **MONTHLY INTEREST PAYMENTS** — The notes offer monthly interest payments as specified on the cover of this pricing supplement, assuming no automatic call. Interest will be payable monthly in arrears on the 14th calendar day of each month, except for the final monthly interest payment, which will be payable on the Maturity Date or the relevant Call Settlement Date, as applicable (each such day, an “Interest Payment Date”), commencing March 14, 2013. Interest will be payable to the holders of record at the close of business on the business day immediately preceding the applicable Interest Payment Date (which may be a Call Settlement Date). If an Interest Payment Date is not a business day, payment will be made on the next business day immediately following such day, but no additional interest will accrue as a result of the delayed payment. For example, the monthly Interest Payment Date for April 2013 is April 14, 2013, but because that day is not a business day, payment of interest with respect to that Interest Payment Date will be made on April 15, 2013, the next succeeding business day.
- **POTENTIAL EARLY EXIT AS A RESULT OF THE AUTOMATIC CALL FEATURE** — If the closing level or closing price, as applicable, of each Underlying is greater than or equal to the applicable Starting Underlying Level on any Call Date, your notes will be automatically called prior to the maturity date. Under these circumstances, on the relevant Call Settlement Date, for each \$1,000 principal amount note, you will receive \$1,000 *plus* accrued and unpaid interest to but excluding that Call Settlement Date.
- **THE NOTES DO NOT GUARANTEE THE RETURN OF YOUR PRINCIPAL IF THE NOTES ARE NOT AUTOMATICALLY CALLED** — If the notes are not automatically called, we will pay you your principal back at maturity only if a Trigger Event has not occurred or the Ending Underlying Level of each Underlying is not less than its Starting Underlying Level. A Trigger Event occurs if, on any day during the Monitoring Period, the closing level or closing price, as applicable, of either Underlying is less than its Starting Underlying Level by more than the applicable Buffer Amount. **However, if the notes are not automatically called, a Trigger Event has occurred and the Ending Underlying Level of either Underlying is less than its Starting Underlying Level, you could lose the entire principal amount of your notes.**

- **EXPOSURE TO EACH OF THE UNDERLYINGS** — The return on the notes is linked to the Lesser Performing Underlying, which will be either the United States Natural Gas Fund, LP or the Russell 2000<sup>®</sup> Index.

The United States Natural Gas Fund, LP, a Delaware limited partnership, is a commodity pool that issues units (which we refer to as “shares” for purposes of this pricing supplement and the accompanying product supplement) that may be purchased and sold on NYSE Arca, Inc. (the “NYSE Arca”) under the ticker symbol “UNG.” The investment objective of the United States Natural Gas Fund, LP is for daily changes in percentage terms of the net asset value of the units of the Fund to reflect the changes in percentage terms of the spot prices of natural gas delivered at the Henry Hub, Louisiana as measured by the changes in the price of the futures contract on natural gas traded on the New York Mercantile Exchange, that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire, less the Fund’s expenses. For additional information on the United States Natural Gas Fund, LP, see the information set forth under “The United States Natural Gas Fund, LP” in the accompanying underlying supplement no. 12-I.

The Russell 2000<sup>®</sup> Index consists of the middle 2,000 companies included in the Russell 3000<sup>™</sup> Index and, as a result of the index calculation methodology, consists of the smallest 2,000 companies included in the Russell 3000<sup>®</sup> Index. The Russell 2000<sup>®</sup> Index is designed to track the performance of the small capitalization segment of the U.S. equity market. For additional information on the Russell 2000<sup>®</sup> Index, see the information set forth under “Equity Index Descriptions — The Russell 2000<sup>®</sup> Index” in the accompanying underlying supplement no. 1-I.

- **TAX TREATMENT AS A UNIT COMPRISING A PUT OPTION AND A DEPOSIT** — You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 8-I. Based on the advice of Davis Polk & Wardwell LLP, our special tax counsel, and on current market conditions, in determining our reporting responsibilities we intend to treat the notes for U.S. federal income tax purposes as units each comprising: (x) a Put Option written by you that is terminated if an Automatic Call occurs and that, if not terminated, in circumstances where the payment due at maturity is less than \$1,000 (excluding accrued and unpaid interest) requires you to pay us an amount equal to \$1,000 multiplied by the absolute value of the Lesser Performing Underlying Return and (y) a Deposit of \$1,000 per \$1,000 principal amount note to secure your potential obligation under the Put Option. By purchasing the notes, you agree (in the absence of an administrative determination or judicial ruling to the contrary) to follow this treatment and the allocation described in the following paragraph. However, there are other reasonable treatments that the Internal Revenue Service (the “IRS”) or a court may adopt, in which case the timing and character of any income or loss on the notes could be materially and adversely affected. In addition, in 2007 Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses on a number of issues, the most relevant of which for investors in the notes are the character of income or loss (including whether the Put Premium might be currently included as ordinary income) and the degree, if any, to which income realized by non-U.S. investors should be subject to withholding tax. While it is not clear whether the notes would be viewed as similar to the

typical prepaid forward contract described in the notice, it is possible that any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the notes, possibly with retroactive effect.

In determining our reporting responsibilities, we intend to treat approximately 5.18% of each interest payment as interest on the Deposit and the remainder as Put Premium. Assuming that the treatment of the notes as units each comprising a Put Option and a Deposit is respected, amounts treated as interest on the Deposit will be taxed as ordinary income, while the Put Premium will not be taken into account prior to sale or settlement, including a settlement following an Automatic Call.

You should consult your tax adviser regarding all aspects of the U.S. federal income tax consequences of an investment in the notes, including possible alternative treatments and the issues presented by the 2007 notice. Purchasers who are not initial purchasers of notes at the issue price should also consult their tax advisers with respect to the tax consequences of an investment in the notes, including possible alternative treatments, as well as the allocation of the purchase price of the notes between the Deposit and the Put Option.

### Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in either or both of the Underlyings or any of the equity securities included in the Index or any commodity futures contracts held by the Fund. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 8-I dated November 14, 2011, the “Risk Factors” section of the accompanying underlying supplement no. 1-I dated November 14, 2011 and the “Risk Factors” section of the accompanying underlying supplement no. 12-II dated February 11, 2013.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The notes do not guarantee any return of principal. If the notes are not automatically called, we will pay you your principal back at maturity only if a Trigger Event has not occurred or the Ending Underlying Level of each Underlying is greater than or equal to its Starting Underlying Level. If the notes are not automatically called, a Trigger Event has occurred and the Ending Underlying Level of either Underlying is less than its Starting Underlying Level, you will lose 1% of your principal amount at maturity for every 1% that the Ending Underlying Level of the Lesser Performing Underlying is less than its Starting Underlying Level. **Accordingly, you could lose up to the entire principal amount of your notes.**
- **CREDIT RISK OF JPMORGAN CHASE & CO.** — The notes are subject to the credit risk of JPMorgan Chase & Co., and our credit ratings and credit spreads may adversely affect the market value of the notes. Investors are dependent on JPMorgan Chase & Co.’s ability to pay all amounts due on the notes, and therefore investors are subject to our credit risk and to changes in the market’s view of our creditworthiness. Any decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the notes. If we were to default on our payment obligations, you may not receive any amounts owed to you under the notes and you could lose your entire investment. Recent events affecting us have led to heightened regulatory scrutiny, may lead to additional regulatory or legal proceedings against us and may adversely affect our credit ratings and credit spreads and, as a result, the market value of the notes. See “Executive Overview — CIO Synthetic Credit Portfolio Update,” “Liquidity Risk Management — Credit Ratings” and “Item 4. Controls and Procedures” in our Quarterly Report on Form 10-Q for the quarter ended September 30, 2012 and “Part II. Other Information — Item 1A. Risk Factors” in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2012.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, our economic interests and the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. In addition, our business activities, including hedging and trading activities, could cause our economic interests to be adverse to yours and could adversely affect any payment on the notes and the value of the notes. It is possible that hedging or trading activities of ours or our affiliates could result in substantial returns for us or our affiliates while the value of the notes declines. Please refer to “Risk Factors — Risks Relating to the Notes Generally” in the accompanying product supplement no. 8-I for additional information about these risks.
- **YOUR RETURN ON THE NOTES IS LIMITED TO THE PRINCIPAL AMOUNT PLUS ACCRUED INTEREST REGARDLESS OF ANY APPRECIATION IN THE VALUE OF EITHER UNDERLYING** — If the notes are not automatically called and a Trigger Event has not occurred or the Ending Underlying Level of each Underlying is greater than or equal to its Starting Underlying Level, for each \$1,000 principal amount note, you will receive \$1,000 at maturity *plus* any accrued and unpaid interest, regardless of any appreciation in the value of either Underlying, which may be significant. If the notes are automatically called, for each \$1,000 principal amount note, you will receive \$1,000 on the relevant Call Settlement Date *plus* any accrued and unpaid interest, regardless of the appreciation in the value of either Underlying, which may be significant. Accordingly, the return on the notes may be significantly less than the return on a direct investment in either Underlying during the term of the notes.
- **YOU ARE EXPOSED TO THE RISK OF DECLINE IN THE CLOSING LEVEL OR CLOSING PRICE, AS APPLICABLE, OF EACH UNDERLYING** — Your return on the notes and your payment at maturity, if any, is not linked to a basket consisting of the Underlyings. If the notes are not automatically called, your payment at maturity is contingent upon the performance of each individual Underlying such that you will be equally exposed to the risks related to *both* of the Underlyings. Poor performance by either of the Underlyings over the term of the notes may negatively affect your payment at maturity and will not be offset or mitigated by positive performance by the other Underlying. Accordingly, your investment is subject to the risk of decline in the closing level or closing price, as applicable, of

each Underlying.

- **THE BENEFIT PROVIDED BY THE BUFFER AMOUNT MAY TERMINATE ON ANY DAY DURING THE TERM OF THE NOTES** — If, on any day during the Monitoring Period, the closing level or closing price, as applicable, of either Underlying is less than its Starting Underlying Level by more than the applicable Buffer Amount, a Trigger Event will occur, and you will be fully exposed to any depreciation in the Lesser Performing Underlying. We refer to this feature as a contingent buffer. Under these circumstances, and if the Ending Underlying Level of either Underlying is less than its Starting Underlying Level, you will lose 1% of the principal amount of your investment for every 1% that the Ending Underlying Level of the Lesser Performing Underlying is less than its Starting Underlying Level. You will be subject to this potential loss of principal even if the relevant Underlying subsequently recovers such that the closing level or closing price, as applicable, of that Underlying is less than its Starting Underlying Level by less than the applicable Buffer Amount. If these notes had a non-contingent buffer feature, under the same scenario, you would have received the full principal amount of your notes *plus* accrued and unpaid interest at maturity. As a result, your investment in the notes may not perform as well as an investment in a security with a return that includes a non-contingent buffer.
- **YOUR PAYMENT AT MATURITY MAY BE DETERMINED BY THE LESSER PERFORMING UNDERLYING** — If the notes are not automatically called and a Trigger Event occurs, you will lose some or all of your investment in the notes if the Ending Underlying Level of either Underlying is below its Starting Underlying Level. This will be true even if the Ending Underlying Level of the other Underlying is greater than or equal to its Starting Underlying Level. The two Underlyings' respective performances may not be correlated and, as a result, if the notes are not automatically called and a Trigger Event occurs, you may receive the principal amount of your notes at maturity only if there is a broad-based rise in the performance of U.S. equities across diverse markets during the term of the notes.
- **THE AUTOMATIC CALL FEATURE MAY FORCE A POTENTIAL EARLY EXIT** — If the notes are automatically called, the amount of interest payable on the notes will be less than the full amount of interest that would have been payable if the notes were held to maturity, and, for each \$1,000 principal amount note, you will receive \$1,000 *plus* accrued and unpaid interest to but excluding the relevant Call Settlement Date.
- **REINVESTMENT RISK** — If your notes are automatically called, the term of the notes may be reduced to as short as three months and you will not receive interest payments after the relevant Call Settlement Date. There is no guarantee that you would be able to reinvest the proceeds from an investment in the notes at a comparable return and/or with a comparable interest rate for a similar level of risk in the event the notes are automatically called prior to the Maturity Date.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO AFFECT ADVERSELY THE VALUE OF THE NOTES PRIOR TO MATURITY** — While any payment on the notes described in this pricing supplement is based on the full principal amount of your notes, the original issue price of the notes includes the agent's commission and the estimated cost of hedging our obligations under the notes. As a result, and as a general matter, the price, if any, at which JPMS will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the maturity date could result in a substantial loss to you. This secondary market price will also be affected by a number of factors aside from the agent's commission and hedging costs, including those referred to under "Many Economic and Market Factors Will Impact the Value of the Notes" below. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.
- **BUFFER AMOUNT APPLIES ONLY IF YOU HOLD THE NOTES TO MATURITY** — Assuming the notes are not automatically called, we will pay you your principal back at maturity only if the closing level or closing price, as applicable, of each Underlying is not less than its Starting Underlying Level by more than the applicable Buffer Amount on any day during the Monitoring Period or the Ending Underlying Level of each Underlying is greater than or equal to its Starting Underlying Level. If the notes are not automatically called and a Trigger Event has occurred, you will be fully exposed at maturity to any decline in the value of the Lesser Performing Underlying.
- **VOLATILITY RISK** — Greater expected volatility with respect to an Underlying indicates a greater likelihood as of the Pricing Date that the closing level or closing price, as applicable, of that Underlying could be less than its Starting Underlying Level by more than the applicable Buffer Amount on any day during the Monitoring Period. An Underlying's volatility, however, can change significantly over the term of the notes. The closing level or closing price, as applicable, of an Underlying could fall sharply on any day during the Monitoring Period, which could result in a significant loss of principal.
- **PRICES OF COMMODITY FUTURES CONTRACTS ARE CHARACTERIZED BY HIGH AND UNPREDICTABLE VOLATILITY, WHICH COULD LEAD TO HIGH AND UNPREDICTABLE VOLATILITY IN THE FUND** — Market prices of the commodity futures contracts held by the Fund tend to be highly volatile and may fluctuate rapidly based on numerous factors, including the factors that affect the price of the commodity underlying each of those commodity futures contracts. See "The Price of Natural Gas May Change Unpredictably and Affect the Price of the Fund and the Value of the Notes in Unforeseen Ways" below. The prices of those commodity futures contracts are subject to variables that may be less significant to the values of traditional securities, such as stocks and bonds. These additional variables may create additional investment risks that cause the value of the notes to be more volatile than the values of traditional securities. As a general matter, the risk of low liquidity or volatile pricing around the maturity date of a commodity futures contract is greater than in the case of other futures contracts because (among other factors) a number of market participants take physical delivery of the underlying commodities. Many commodities are also highly cyclical. The high volatility and cyclical nature of commodity markets may render such an investment inappropriate as the focus of an investment portfolio.
- **OWNING THE NOTES IS NOT THE SAME AS OWNING ANY COMMODITY FUTURES CONTRACTS OR THE RELATED COMMODITIES** — The return on your notes will not reflect the return you would realize if you actually held the

commodity contracts held by the Fund or owned the related commodities. As a result, a holder of the notes will not have any direct or indirect rights to any commodity futures contracts or the related commodities.

- **THE NOTES DO NOT OFFER DIRECT EXPOSURE TO COMMODITY SPOT PRICES** — Your payment at maturity may reflect the performance of the Fund, which holds commodity futures contracts, not physical commodities (or their spot prices). The price of a futures contract reflects the expected value of the commodity upon delivery in the future, whereas the spot price of a commodity reflects the immediate delivery value of the commodity. A variety of factors can lead to a disparity between the expected future price of a commodity and the spot price at a given point in time, such as the cost of storing the commodity for the term of the futures contract, interest charges incurred to finance the purchase of the commodity and expectations concerning supply and demand for the commodity. The price movements of a futures contract are typically correlated with the movements of the spot price of the referenced commodity, but the correlation is generally imperfect and price moves in the spot market may not be reflected in the futures market (and vice versa). Accordingly, the notes may underperform a similar investment that is linked to commodity spot prices.
- **THE PERFORMANCE OF THE UNITED STATES NATURAL GAS FUND, LP MAY NOT FULLY REPLICATE THE PERFORMANCE OF THE PRICE OF NATURAL GAS** — United States Commodity Funds LLC, the general partner of the Fund, is responsible for investing the assets of the Fund in accordance with the objectives and policies of the Fund. There is no assurance that the general partner of the Fund will successfully implement its investment strategy and there is a risk that changes in the price of Fund units will not closely track changes in the spot prices of natural gas. The performance of the Fund may not exactly replicate the performance of the natural gas and other petroleum-based interests underlying the Fund because the Fund will reflect transaction costs and fees. It is also possible that the Fund may not fully replicate or may in certain circumstances diverge significantly from the performance of the natural gas and other petroleum-based interests underlying the Fund due to the temporary unavailability of certain securities in the secondary market or the performance of any derivative instruments contained in the Fund. This could also happen if the price of the units does not correlate closely with the Fund's net asset value; changes in the Fund's net asset value do not closely correlate with changes in the price of the benchmark futures contract; or changes in the price of the benchmark futures contract do not closely correlate with changes in the cash or spot price of natural gas. Natural gas has also demonstrated a lack of correlation with world natural gas prices due to structural differences between the U.S. market for natural gas and the international market for natural gas. The prices of natural gas may be more volatile than world natural gas prices generally.
- **THE PRICE OF NATURAL GAS MAY CHANGE UNPREDICTABLY AND AFFECT THE PRICE OF THE FUND AND THE VALUE OF THE NOTES IN UNFORESEEN WAYS** — The price of the Fund is linked closely to the price of natural gas. The level of global industrial activity influences the demand for natural gas. The demand for natural gas has also traditionally been cyclical. In general, the supply of natural gas is based on competitive market forces: inadequate supply at any one time leads to price increases, which signal to production companies the need to increase the supply of natural gas to the market. Supplying natural gas in order to meet this demand, however, is dependent on a number of factors. These factors may be broken down into two segments: those factors that affect the short term supply and general barriers to increasing supply. In turn, factors that affect the short term supply are as follows: the availability of skilled workers and equipment, permitting and well development and weather and delivery disruptions (e.g., hurricanes, labor strikes and wars). Similarly, the other more general barriers to the increase in supply of natural gas are: access to land, the expansion of pipelines and the financial environment. These factors, which are not exhaustive, are interrelated and can have complex and unpredictable effects on the supply for, and the price of, natural gas.
- **AN INVESTMENT IN THE NOTES IS SUBJECT TO RISKS ASSOCIATED WITH SMALL CAPITALIZATION STOCKS** — The stocks that constitute the Russell 2000<sup>®</sup> Index are issued by companies with relatively small market capitalization. The stock prices of smaller companies may be more volatile than stock prices of large capitalization companies. Small capitalization companies may be less able to withstand adverse economic, market, trade and competitive conditions relative to larger companies. Small capitalization companies are less likely to pay dividends on their stocks, and the presence of a dividend payment could be a factor that limits downward stock price pressure under adverse market conditions.
- **THERE ARE RISKS ASSOCIATED WITH THE FUND** — Although the Fund's shares are listed for trading on NYSE Arca and a number of similar products have been traded on NYSE Arca and other securities exchanges for varying periods of time, there is no assurance that an active trading market will continue for the shares of the Fund or that there will be liquidity in the trading market. The Fund is subject to management risk, which is the risk that the investment strategies of the Fund's general partner, the implementation of which is subject to a number of constraints, may not produce the intended results. These constraints could adversely affect the market price of the shares of the Fund, and consequently, the value of the notes.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMS intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMS is willing to buy the notes.
- **NO DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the notes, you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of shares of the Fund or the securities included in the Index or the commodity futures contracts held by the Fund would have.
- **HEDGING AND TRADING IN THE UNDERLYINGS** — While the notes are outstanding, we or any of our affiliates may carry out hedging activities related to the notes, including instruments related to the Fund or the equity securities included in the Index or the commodity futures contracts held by the Fund. We or our affiliates may also trade in

the Fund or instruments related to the Fund or the equity securities included in the Index or the commodity futures contracts held by the Fund from time to time. Any of these hedging or trading activities as of the Pricing Date and during the term of the notes could adversely affect the likelihood of an automatic call or our payment to you at maturity. It is possible that these hedging or trading activities could result in substantial returns for us or our affiliates while the value of the notes declines.

- **THE ANTI-DILUTION PROTECTION FOR THE FUND IS LIMITED** — The calculation agent will make adjustments to the Share Adjustment Factor for certain events affecting the shares of the Fund. However, the calculation agent will not make an adjustment in response to all events that could affect the shares of the Fund. If an event occurs that does not require the calculation agent to make an adjustment, the value of the notes may be materially and adversely affected.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the level and price of the Underlyings on any day, the value of the notes will be impacted by a number of economic and market factors that may either offset or magnify each other, including:
  - whether a Trigger Event has occurred or is expected to occur;
  - the interest rate on the notes;
  - the actual and expected volatility of the Underlyings and the futures contracts held by the Fund;
  - the time to maturity of the notes;
  - the likelihood of an automatic call being triggered;
  - the market prices of the physical commodities upon which the futures contracts held by the Fund are based and of such futures contracts;
  - the dividend rates on the Fund and the equity securities included in the Index;
  - the expected positive or negative correlation between the Index and the Fund, or the expected absence of any such correlation;
  - interest and yield rates in the market generally;
  - a variety of economic, financial, political, regulatory, geopolitical, agricultural, meteorological and judicial events;
  - the occurrence of certain events to the Fund that may or may not require an adjustment to the Share Adjustment Factor; and
  - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

## What Is the Total Return on the Notes at Maturity or Upon Automatic Call, Assuming a Range of Performances for the Lesser Performing Underlying?

The following tables and examples illustrate the hypothetical total return on the notes at maturity or upon automatic call. The “note total return” as used in this pricing supplement is the number, expressed as a percentage, that results from comparing the payment at maturity or upon automatic call *plus* the interest payments received to and including the maturity date or the relevant Call Settlement Date, as applicable, per \$1,000 principal amount note to \$1,000. **The tables and examples below assume that the Lesser Performing Underlying is the Russell 2000® Index and that the closing price of the United States Natural Gas Fund, LP on each Call Date is greater than or equal to its Starting Underlying Level. We make no representation or warranty as to which of the Underlyings will be the Lesser Performing Underlying for purposes of calculating your actual payment at maturity, if applicable, or as to what the closing level or closing price, as applicable, of either Underlying will be on any Call Date.** In addition, the following tables and examples assume a Starting Underlying Level for the Lesser Performing Underlying of 900 and reflect the Interest Rate of 11.00% per annum over the term of the notes (assuming no automatic call) and the Buffer Amount of 30.00% of the Starting Underlying Level of the Lesser Performing Underlying. Each hypothetical total return and total payment set forth below is for illustrative purposes only and may not be the actual total return or total payment applicable to a purchaser of the notes. The numbers appearing in the following tables and examples have been rounded for ease of analysis.

### What Is the Total Return on the Notes at Maturity if the Notes Are Not Automatically Called?

The following table and examples illustrate the hypothetical total return on the notes at maturity if the notes are not automatically called.

Closing Level of the Lesser Performing Underlying	Lesser Performing Underlying Closing Level Appreciation / Depreciation at Relevant Call Date	Note Total Return at Maturity Date if a Trigger Event Has Not Occurred (1)	Note Total Return at Maturity Date if a Trigger Event Has Occurred (1)
1,620.00	80.00%	11.00%	11.00%
1,485.00	65.00%	11.00%	11.00%
1,350.00	50.00%	11.00%	11.00%
1,260.00	40.00%	11.00%	11.00%
1,170.00	30.00%	11.00%	11.00%
1,080.00	20.00%	11.00%	11.00%
990.00	10.00%	11.00%	11.00%
945.00	5.00%	11.00%	11.00%
909.00	1.00%	11.00%	11.00%
<b>900.00</b>	<b>0.00%</b>	<b>11.00%</b>	<b>11.00%</b>
855.00	-5.00%	<b>11.00%</b>	6.00%
810.00	-10.00%	<b>11.00%</b>	1.00%
805.50	-10.50%	<b>11.00%</b>	0.50%
720.00	-20.00%	<b>11.00%</b>	-9.00%
630.00	-30.00%	<b>11.00%</b>	-19.00%
629.91	-30.01%	N/A	-19.01%
540.00	-40.00%	N/A	-29.00%
450.00	-50.00%	N/A	-39.00%
360.00	-60.00%	N/A	-49.00%
270.00	-70.00%	N/A	-59.00%
180.00	-80.00%	N/A	-69.00%
90.00	-90.00%	N/A	-79.00%
0.00	-100.00%	N/A	-89.00%

- (1) A Trigger Event occurs if the closing level or closing price, as applicable, of either Underlying is less than its Starting Underlying Level by more than 30.00% on any day during the Monitoring Period.

The following examples illustrate how a total payment set forth in the table above is calculated.

**Example 1: The notes have not been automatically called prior to maturity and the level of the Lesser Performing Underlying increases from the Starting Underlying Level of 900 to an Ending Underlying Level of 945.** Because the notes have not been automatically called prior to maturity and the Ending Underlying Level of the Lesser Performing Underlying of 945 is greater than its Starting Underlying Level of 900, regardless of whether a Trigger Event has occurred, the investor receives total payments of \$1,110 per \$1,000 principal amount note over the term of the notes, consisting of interest payments of \$110 per \$1,000 principal amount note over the term of the notes and a payment at maturity of \$1,000 per \$1,000 principal amount note. ***This represents the maximum total payment an investor may receive over the term of the notes.***

**Example 2: The notes have not been automatically called prior to maturity, a Trigger Event has not occurred and the level of the Lesser Performing Underlying decreases from the Starting Underlying Level of 900 to an Ending Underlying Level of 720.** Even though the Ending Underlying Level of the Lesser Performing Underlying of 720 is less than its Starting Underlying Level of 900, because the notes have not been automatically called prior to maturity and a Trigger Event has not occurred, the investor receives total payments of \$1,110 per \$1,000 principal amount note over the term of the notes, consisting of interest payments of \$110 per \$1,000 principal amount note over the term of the notes and a payment at maturity of \$1,000 per \$1,000 principal amount note. *This represents the maximum total payment an investor may receive over the term of the notes.*

**Example 3: The notes have not been automatically called prior to maturity, a Trigger Event has occurred and the level of the Lesser Performing Underlying decreases from the Starting Underlying Level of 900 to an Ending Underlying Level of 450.** Because the notes have not been automatically called prior to maturity, a Trigger Event has occurred and the Ending Underlying Level of the Lesser Performing Underlying of 450 is less than its Starting Underlying Level of 900, the investor receives total payments of \$610 per \$1,000 principal amount note over the term of the notes, consisting of interest payments of \$110 per \$1,000 principal amount note over the term of the notes and a payment at maturity of \$500 per \$1,000 principal amount note. The total payments over the term of the notes, for each \$1,000 principal amount note, are calculated as follows:

$$[\$1,000 + (\$1,000 \times -50\%)] + \$110 = \$610$$

**Example 4: The notes have not been automatically called prior to maturity, a Trigger Event has occurred and the level of the Lesser Performing Underlying decreases from the Starting Underlying Level of 900 to an Ending Underlying Level of 0.** Because the notes have not been automatically called prior to maturity, a Trigger Event has occurred and the Ending Underlying Level of the Lesser Performing Underlying of 0 is less than its Starting Underlying Level of 900, the investor receives total payments of \$110 per \$1,000 principal amount note over the term of the notes, consisting solely of interest payments of \$110 per \$1,000 principal amount note over the term of the notes. The total payments over the term of the notes, for each \$1,000 principal amount note, are calculated as follows:

$$[\$1,000 + (\$1,000 \times -100\%)] + \$110 = \$110$$

#### *What Is the Total Return on the Notes upon Automatic Call if the Notes Are Automatically Called?*

The following table and examples illustrate the hypothetical total return on the notes if the notes are automatically called on a Call Date.

Call Settlement Date	Note Total Return (1)
First	2.75000%
Second	3.66667%
Third	4.58333%
Fourth	5.50000%
Fifth	6.41667%
Sixth	7.33333%
Seventh	8.25000%
Eighth	9.16667%
Final	10.08333%

- (1) If on any Call Date, the closing level or closing price, as applicable, of each Underlying is greater than or equal to its Starting Underlying Level, the notes will be automatically called on that Call Date. If the notes are automatically called, on the relevant Call Settlement Date, for each \$1,000 principal amount note, you will receive \$1,000 *plus* any accrued and unpaid interest to but excluding that Call Settlement Date.

The following examples illustrate how a total payment set forth in the table above is calculated.

**Example 1: The level of the Lesser Performing Underlying increases from the Starting Underlying Level of 900 to a closing level of 909 on the first Call Date.** Because the closing level of each Underlying on the first Call Date is greater than its Starting Underlying Level, the notes are automatically called, and the investor receives total payments of \$1,027.50 per \$1,000 principal amount note, consisting of an interest payment of \$27.50 per \$1,000 principal amount note and a payment upon automatic call of \$1,000 per \$1,000 principal amount note.

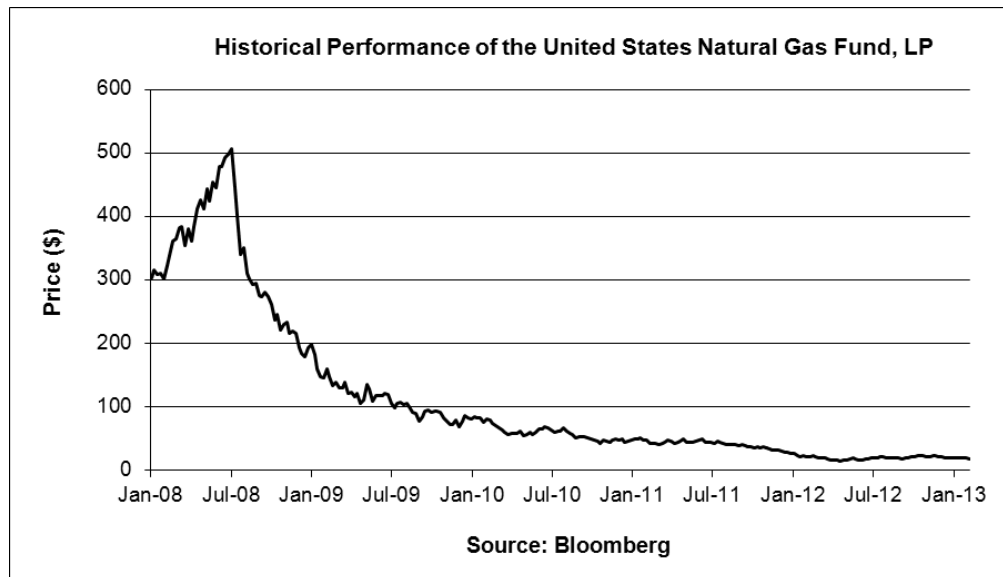

**Example 2: The level of the Lesser Performing Underlying on each Call Date prior to the final Call Date is less than of the Starting Underlying Level of 900, and level of the Lesser Performing Underlying increases from the Starting Underlying Level of 900 to a closing level of 945 on the final Call Date.** Although the level of the Lesser Performing Underlying on each of the Call Dates prior to the Final Call Date is less than the Starting Underlying Level of 900, because the closing level of each Underlying on the final Call Date is greater than its Starting Underlying Level, the notes are automatically called, and the investor receives total payments of \$1,100.8333 per \$1,000 principal amount note, consisting of interest payments of \$100.8333 per \$1,000 principal amount note and a payment upon automatic call of \$1,000 per \$1,000 principal amount note.

The hypothetical returns and hypothetical payments on the notes shown above do not reflect fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical returns and hypothetical payments shown above would likely be lower.

## Historical Information

The following graphs show the historical weekly performance of the United States Natural Gas Fund, LP and the Russell 2000® Index from January 4, 2008 through February 8, 2013. The closing price of the United States Natural Gas Fund, LP on February 11, 2013 was \$18.45. The closing level of the Russell 2000® Index on February 11, 2013 was 913.03.

We obtained the various closing levels and closing prices of the Underlyings below from Bloomberg Financial Markets, without independent verification. The historical levels and prices of each Underlying should not be taken as an indication of future performance, and no assurance can be given as to the closing level or closing price, as applicable, of either Underlying on any Call Date, the Observation Date or any day during the Monitoring Period. We cannot give you assurance that the performance of the Underlyings will result in the return of any of your initial investment. We make no representation as to the amount of dividends, if any, that the Fund will pay in the future. In any event, as an investor in the notes, you will not be entitled to receive dividends, if any, that may be payable on the Fund.

## Validity of the Notes

In the opinion of Davis Polk & Wardwell LLP, as our special products counsel, when the notes offered by this pricing supplement have been executed and issued by us and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such notes will be our valid and binding obligations, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), *provided* that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the federal laws of the United States of America, the laws of the State of New York and the General Corporation Law of the State of Delaware. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and its authentication of the notes and the validity, binding nature and enforceability of the indenture with respect to the trustee, all as stated in the letter of such counsel dated March 29, 2012, which was filed as an exhibit to a Current Report on Form 8-K by us on March 29, 2012.
