

JPMORGAN CHASE & CO.

Structured Investments

\$2,095,000

Capped Single Observation Knock-Out Notes Linked to the iShares® MSCI EAFE Index Fund due December 31, 2013

General

- The notes are designed for investors who seek to participate in the appreciation of the closing price of one share of the iShares® MSCI EAFE Index Fund, up to the Maximum Return of 20.00% at maturity, and who anticipate that the Final Share Price will not be less than the Initial Share Price by more than 25.00%. Investors should be willing to forgo interest and dividend payments and, if the Final Share Price is less than the Initial Share Price by more than 25.00%, be willing to lose some or all of their principal at maturity. If the Final Share Price is not less than the Initial Share Price by more than 25.00%, investors have the opportunity to receive the greater of (a) the Contingent Minimum Return of 8.85% and (b) the Fund Return at maturity, subject to the Maximum Return of 20.00%. **Any payment on the notes is subject to the credit risk of JPMorgan Chase & Co.**
- Unsecured and unsubordinated obligations of JPMorgan Chase & Co. maturing December 31, 2013[†]
- Minimum denominations of \$10,000 and integral multiples of \$1,000 in excess thereof
- The notes priced on June 21, 2012 and are expected to settle on or about June 26, 2012.

Key Terms

Fund:	The iShares® MSCI EAFE Index Fund (the “Fund”)
Knock-Out Event:	A Knock-Out Event occurs if the Final Share Price is less than the Initial Share Price by more than the Knock-Out Buffer Amount.
Knock-Out Buffer Amount:	25.00%
Payment at Maturity:	<i>If a Knock-Out Event has occurred</i> , you will receive a cash payment at maturity that will reflect the performance of the Fund. Under these circumstances, your payment at maturity per \$1,000 principal amount note will be calculated as follows: $\$1,000 + (\$1,000 \times \text{Fund Return})$ <i>If a Knock-Out Event has not occurred</i> , you will receive a cash payment at maturity that will reflect the performance of the Fund, subject to the Contingent Minimum Return and the Maximum Return. If a Knock-Out Event has not occurred, your payment at maturity per \$1,000 principal amount note will equal \$1,000 <i>plus</i> the product of (a) \$1,000 and (b) the greater of (i) the Contingent Minimum Return and (ii) the Fund Return, subject to the Maximum Return. For additional clarification, please see “What Is the Total Return on the Notes at Maturity, Assuming a Range of Performances for the Fund?” in this pricing supplement.
Maximum Return:	20.00%, which results in a maximum payment at maturity of \$1,200 per \$1,000 principal amount note
Contingent Minimum Return:	8.85%
Fund Return:	$\frac{\text{Final Share Price} - \text{Initial Share Price}}{\text{Initial Share Price}}$
Initial Share Price:	The closing price of one share of the Fund on the pricing date, which was \$48.04, <i>divided</i> by the Share Adjustment Factor
Final Share Price:	The closing price of one share of the Fund on the Observation Date
Share Adjustment Factor:	Set initially at 1.0 on the pricing date and subject to adjustment upon the occurrence of certain events affecting the Fund. See “General Terms of Notes — Additional Fund Provisions — A. Anti-Dilution Adjustments” in the accompanying product supplement no. 4-I for further information.
Observation Date [†] :	December 26, 2013
Maturity Date [†] :	December 31, 2013
CUSIP:	48125VM64

[†] Subject to postponement in the event of a market disruption event and as described under “Description of Notes — Payment at Maturity” and “Description of Notes — Postponement of a Determination Date — A. Notes Linked to a Single Component” in the accompanying product supplement no. 4-I

Investing in the Capped Single Observation Knock-Out Notes involves a number of risks. See “Risk Factors” beginning on page PS-21 of the accompanying product supplement no. 4-I, “Risk Factors” beginning on page US-1 of the accompanying underlying supplement 1-I and “Selected Risk Considerations” beginning on page PS-4 of this pricing supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this pricing supplement or the accompanying product supplement, underlying supplement, prospectus supplement and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public (1)	Fees and Commissions (2)	Proceeds to Us
Per note	\$1,000	\$12.50	\$987.50
Total	\$2,095,000	\$26,187.50	\$2,068,812.50

- The price to the public includes the estimated cost of hedging our obligations under the notes through one or more of our affiliates, which includes our affiliates’ expected cost of providing such hedge as well as the profit our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge. For additional related information, please see “Use of Proceeds and Hedging” beginning on page PS-48 of the accompanying product supplement no. 4-I.
- (2) J.P. Morgan Securities LLC, which we refer to as JPMS, acting as agent for JPMorgan Chase & Co., will receive a commission of \$12.50 per \$1,000 principal amount note. See “Plan of Distribution (Conflicts of Interest)” beginning on page PS-77 of the accompanying product supplement no. 4-I.

The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

J.P.Morgan

Recent Developments

On June 21, 2012, Moody's Investors Services downgraded our long-term senior debt rating to "A2" from "Aa3" as part of its review of 15 banks and securities firms with global capital markets operations. Moody's also maintained its "negative" outlook on us, indicating the possibility of a further downgrade. In addition, on May 11, 2012, Fitch Ratings downgraded our long-term senior debt rating to "A+" from "AA-" and placed us on negative rating watch for a possible further downgrade, and Standard & Poor's Ratings Services changed its outlook on us to "negative" from "stable," indicating the possibility of a future downgrade. These downgrades may adversely affect our credit spreads and the market value of the notes. See "Risk Factors" in our annual report on Form 10-K for the year ended December 31, 2011 and "Selected Risk Considerations — Credit Risk of JPMorgan Chase & Co." in this pricing supplement for further discussion.

These actions followed our disclosure on May 10, 2012, that our Chief Investment Office (which is part of our Corporate segment) has had, since the end of the first quarter of 2012, significant mark-to-market losses in our synthetic credit portfolio, partially offset by securities gains. We disclosed that the Chief Investment Office's synthetic credit portfolio has proven to be riskier, more volatile and less effective as an economic hedge than we had previously believed. We are currently repositioning the portfolio in conjunction with our assessment of our overall credit exposure; as this repositioning is being effected in a manner designed to maximize economic value, we may hold certain of our current synthetic credit positions for the longer term and, accordingly, the net income in our Corporate segment will likely be more volatile in future periods than it has been in the past. These and any future losses may lead to heightened regulatory scrutiny and additional regulatory or legal proceedings against us, and may continue to adversely affect our credit ratings and credit spreads and, as a result, the market value of the notes. See our quarterly report on Form 10-Q for the quarter ended March 31, 2012; "Risk Factors — Risk Management — JPMorgan Chase's framework for managing risks may not be effective in mitigating risk and loss to the Firm" in our annual report on Form 10-K for the year ended December 31, 2011; and "Selected Risk Considerations — Credit Risk of JPMorgan Chase & Co." in this pricing supplement for further discussion.

Additional Terms Specific to the Notes

You should read this pricing supplement together with the prospectus dated November 14, 2011, as supplemented by the prospectus supplement dated November 14, 2011 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 4-I dated November 14, 2011 and underlying supplement no. 1-I dated November 14, 2011. **This pricing supplement, together with the documents listed below, contains the terms of the notes, supplements the term sheet related hereto dated June 21, 2012 and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the matters set forth in "Risk Factors" in the accompanying product supplement no. 4-I and "Risk Factors" in the accompanying underlying supplement no. 1-I, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement no. 4-I dated November 14, 2011:
http://www.sec.gov/Archives/edgar/data/19617/000089109211007593/e46160_424b2.pdf
- Underlying supplement no. 1-I dated November 14, 2011:
http://www.sec.gov/Archives/edgar/data/19617/000089109211007615/e46154_424b2.pdf
- Prospectus supplement dated November 14, 2011:
http://www.sec.gov/Archives/edgar/data/19617/000089109211007578/e46180_424b2.pdf
- Prospectus dated November 14, 2011:
http://www.sec.gov/Archives/edgar/data/19617/000089109211007568/e46179_424b2.pdf

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this pricing supplement, the "Company," "we," "us" and "our" refer to JPMorgan Chase & Co.

What Is the Total Return on the Notes at Maturity, Assuming a Range of Performances for the Fund?

The following table illustrates the hypothetical total return at maturity on the notes. The “total return” as used in this pricing supplement is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount note to \$1,000. Each hypothetical total return or hypothetical payment at maturity set forth below assumes an Initial Share Price of \$50.00 and reflects the Contingent Minimum Return of 8.85%, the Maximum Return of 20.00% and the Knock-Out Buffer Amount of 25.00%. Each hypothetical total return or hypothetical payment at maturity set forth below is for illustrative purposes only and may not be the actual total return or payment applicable to a purchaser of the notes. The numbers appearing in the following table and examples have been rounded for ease of analysis.

Final Share Price	Fund Return	Total Return	
		Knock-Out Event Has Not Occurred (1)	Knock-Out Event Has Occurred (2)
\$90.000	80.00%	20.00%	N/A
\$85.000	70.00%	20.00%	N/A
\$80.000	60.00%	20.00%	N/A
\$75.000	50.00%	20.00%	N/A
\$70.000	40.00%	20.00%	N/A
\$65.000	30.00%	20.00%	N/A
\$60.000	20.00%	20.00%	N/A
\$57.500	15.00%	15.00%	N/A
\$55.000	10.00%	10.00%	N/A
\$54.425	8.85%	8.85%	N/A
\$51.250	2.50%	8.85%	N/A
\$50.000	0.00%	8.85%	N/A
\$47.500	-5.00%	8.85%	N/A
\$45.000	-10.00%	8.85%	N/A
\$42.500	-15.00%	8.85%	N/A
\$40.000	-20.00%	8.85%	N/A
\$37.500	-25.00%	8.85%	N/A
\$37.495	-25.01%	N/A	-25.01%
\$35.000	-30.00%	N/A	-30.00%
\$30.000	-40.00%	N/A	-40.00%
\$25.000	-50.00%	N/A	-50.00%
\$20.000	-60.00%	N/A	-60.00%
\$15.000	-70.00%	N/A	-70.00%
\$10.000	-80.00%	N/A	-80.00%
\$5.000	-90.00%	N/A	-90.00%
\$0.000	-100.00%	N/A	-100.00%

(1) The Final Share Price is greater than or equal to \$37.50 (75.00% of the hypothetical Initial Share Price).

(2) The Final Share Price is less than \$37.50 (75.00% of the hypothetical Initial Share Price).

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how a total payment set forth in the table above is calculated.

Example 1: The closing price of one share of the Fund increases from the Initial Share Price of \$50.00 to a Final Share Price of \$51.25 — a Knock-Out Event has not occurred. Because the Fund Return of 2.50% is less than the Contingent Minimum Return of 8.85%, the investor receives a payment at maturity of \$1,088.50 per \$1,000 principal amount note.

Example 2: The closing price of one share of the Fund decreases from the Initial Share Price of \$50.00 to a Final Share Price of \$47.50 — a Knock-Out Event has not occurred. Because the Fund Return of -5% is less than the Contingent Minimum Return of 8.85%, the investor receives a payment at maturity of \$1,088.50 per \$1,000 principal amount note.

Example 3: The closing price of one share of the Fund increases from the Initial Share Price of \$50.00 to a Final Share Price of \$57.50 — a Knock-Out Event has not occurred. Because the Fund Return of 15% is greater than the Contingent Minimum Return of 8.85%, but less than the Maximum Return of 20.00%, the investor receives a payment at maturity of \$1,150 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times 15\%) = \$1,150$$

Example 4: The closing price of one share of the Fund decreases from the Initial Share Price of \$50.00 to a Final Share Price of \$30.00 — a Knock-Out Event has occurred. Because the Final Share Price of \$30.00 is less than the Initial Share Price of \$50.00 by more than the Knock-Out Buffer Amount of 25.00%, a Knock-Out Event has occurred and because the Fund Return is -40%, the investor receives a payment at maturity of \$600 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times -40\%) = \$600$$

Example 5: The closing price of one share of the Fund increases from the Initial Share Price of \$50.00 to a Final Share Price of \$75.00 — a Knock-Out Event has not occurred. Because the Fund Return of 50% is greater than the Maximum Return of 20.00%, the investor receives a payment at maturity of \$1,200 per \$1,000 principal amount note, the maximum payment on the notes.

The hypothetical returns and hypothetical payments on the notes shown above do not reflect fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical returns and hypothetical payments shown above would likely be lower.

Selected Purchase Considerations

- **CAPPED APPRECIATION POTENTIAL** — The notes provide the opportunity to participate in the appreciation of the Fund, up to the Maximum Return of 20.00% at maturity. If a Knock-Out Event has not occurred, in addition to the principal amount, you will receive at maturity at least the Contingent Minimum Return of 8.85%, for a minimum payment at maturity of \$1,088.50 for every \$1,000 principal amount note, subject to the Maximum Return of 20.00%. ***The maximum payment at maturity is \$1,200 per \$1,000 principal amount note.*** Because the notes are our unsecured and unsubordinated obligations, payment of any amount on the notes is subject to our ability to pay our obligations as they become due.
- **RETURNS LINKED TO THE iSHARES® MSCI EAFE INDEX FUND** — The return on the notes is linked to the iShares® MSCI EAFE Index Fund. The iShares® MSCI EAFE Index Fund is an exchange-traded fund that trades on the NYSE Arca under the ticker symbol “EFA.” The iShares® MSCI EAFE Index Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in developed European, Australasian and Far Eastern markets, as measured by the MSCI EAFE® Index, which we refer to as the Underlying Index with respect to the iShares® MSCI EAFE Index Fund. The MSCI EAFE® Index is a stock index calculated, published and disseminated daily by MSCI Inc. and is intended to provide performance benchmarks for the developed equity markets in Australia and New Zealand and those in Europe and Asia. For additional information on the iShares® MSCI EAFE Index Fund, see the information set forth under “Fund Descriptions — The iShares® MSCI EAFE Index Fund” in the accompanying underlying supplement no. 1-I.
- **TAX TREATMENT** — You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 4-I. The following discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel, Davis Polk & Wardwell LLP, regarding the material U.S. federal income tax consequences of owning and disposing of notes.

Based on current market conditions, in the opinion of our special tax counsel it is reasonable to treat the notes as “open transactions” that are not debt instruments for U.S. federal income tax purposes. Assuming this treatment is respected, subject to the possible application of the “constructive ownership” rules, the gain or loss on your notes should be treated as long-term capital gain or loss if you hold your notes for more than a year, whether or not you are an initial purchaser of notes at the issue price. The notes could be treated as “constructive ownership transactions” within the meaning of Section 1260 of the Internal Revenue Code of 1986, as amended (the “Code”), in which case any gain recognized in respect of the notes that would otherwise be long-term capital gain and that was in excess of the “net underlying long-term capital gain” (as defined in Section 1260) would be treated as ordinary income, and an interest charge would apply as if that income had accrued for tax purposes at a constant yield over the notes’ term. Our special tax counsel has not expressed an opinion with respect to whether the constructive ownership rules apply to the notes. Accordingly, U.S. Holders should consult their tax advisers regarding the potential application of the constructive ownership rules.

The Internal Revenue Service (the “IRS”) or a court may not respect the treatment of the notes described above, in which case the timing and character of any income or loss on your notes could be materially and adversely affected. In addition, in 2007, Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments, such as the notes. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by Non-U.S. Holders should be subject to withholding tax; and whether these instruments are or should be subject to the constructive ownership regime described above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the notes, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the notes, including the potential application of the constructive ownership rules, possible alternative treatments and the issues presented by this notice.

Non-U.S. Holders - Additional Tax Consideration

Non-U.S. Holders should note that recently proposed Treasury regulations, if finalized in their current form, could impose a withholding tax at a rate of 30% (subject to reduction under an applicable income tax treaty) on amounts attributable to U.S.-source dividends (including, potentially, adjustments to account for extraordinary dividends) that are paid or “deemed paid” after December 31, 2012 under certain financial instruments, if certain other conditions are met. While significant aspects of the application of these proposed regulations to the notes are uncertain, if these proposed regulations were finalized in their current form, we (or other withholding agents) might determine that withholding is required with respect to notes held by a Non-U.S. Holder or that the Non-U.S. Holder must provide information to establish that withholding is not required. Non-U.S. Holders should consult their tax advisers regarding the potential application of these proposed regulations. If withholding is so required, we will not be required to pay any additional amounts with respect to amounts so withheld.

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Fund, the Underlying Index or any of the component securities of the Fund or the Underlying Index. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 4-I dated November 14, 2011 and the accompanying underlying supplement no. 1-I dated November 14, 2011.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The notes do not guarantee any return of principal. The return on the notes at maturity is linked to the performance of the Fund and will depend on whether a Knock-Out Event has occurred and whether, and the extent to which, the Fund Return is positive or negative. If the Final Share Price is less than the Initial Share Price by more than the Knock-Out Buffer Amount of 25.00%, a Knock-Out Event has occurred, and the benefit provided by the Knock-Out Buffer Amount of 25.00% will terminate. If a Knock-Out Event has occurred, for every 1% that the Final Share Price is less than the Initial Share Price, you will lose an amount equal to 1% of the principal amount of your notes. Under these circumstances, you will lose more than 25.00% of your initial investment and may lose all of your initial investment at maturity.
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM RETURN** — If the Final Share Price is greater than the Initial Share Price, for each \$1,000 principal amount note, you will receive at maturity \$1,000 *plus* an additional return that will not exceed the Maximum Return of 20.00%, regardless of the appreciation in the Fund, which may be significant.
- **CREDIT RISK OF JPMORGAN CHASE & CO.** — The notes are subject to the credit risk of JPMorgan Chase & Co. and our credit ratings and credit spreads may adversely affect the market value of the notes. Investors are dependent on JPMorgan Chase & Co.’s ability to pay all amounts due on the notes, and therefore investors are subject to our credit risk and to changes in the market’s view of our creditworthiness. Any decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to affect adversely the value of the notes. If we were to default on our payment obligations, you may not receive any amounts owed to you under the notes and you could lose your entire investment.

In particular, on June 21, 2012, Moody’s Investors Services downgraded our long-term senior debt rating to “A2” from “A3” as part of its review of 15 banks and securities firms with global capital markets operations. Moody’s also maintained its “negative” outlook on us, indicating the possibility of a further downgrade. In addition, on May 11, 2012, Fitch Ratings downgraded our long-term senior debt rating to “A+” from “AA-” and placed us on negative rating watch for a possible further downgrade, and Standard & Poor’s Ratings Services changed its outlook on us to “negative” from “stable,” indicating the possibility of a future downgrade. These downgrades may adversely affect our credit spreads and the market value of the notes. See “Risk Factors” in our annual report on Form 10-K for the year ended December 31, 2011.

These actions followed our disclosure on May 10, 2012, that our Chief Investment Office (which is part of our Corporate segment) has had, since the end of the first quarter of 2012, significant mark-to-market losses in our synthetic credit portfolio, partially offset by securities gains. These and any future losses may lead to heightened regulatory scrutiny and additional regulatory or legal proceedings against us, and may continue to adversely affect our credit ratings and credit spreads and, as a result, the market value of the notes. See “Recent Developments” in this pricing supplement; our quarterly report on Form 10-Q for the quarter ended March 31, 2012; and “Risk Factors — Risk Management — JPMorgan Chase’s framework for managing risks may not be effective in mitigating risk and loss to the Firm” in our annual report on Form 10-K for the year ended December 31, 2011 for further discussion.

- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, our economic interests and the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. In addition, our business activities, including hedging and trading activities, could cause our economic interests to be adverse to yours and could adversely affect any payment on the notes and the value of the notes. It is possible that these hedging or trading activities of ours or our affiliates could result in substantial returns for us or our affiliates while the value of the notes declines. Please refer to “Risk Factors — Risks Relating to the Notes Generally” in the accompanying product supplement no. 4-I for additional information about these risks.
- **THE BENEFIT PROVIDED BY THE KNOCK-OUT BUFFER AMOUNT MAY TERMINATE ON THE OBSERVATION DATE** — If the Final Share Price is less than the Initial Share Price by more than the Knock-Out Buffer Amount of 25.00%, the benefit provided by the Knock-Out Buffer Amount will terminate and you will be fully exposed to any depreciation in the Fund. Because the Final Share Price will be determined based on the closing price on a single day near the end of the term of the notes, the closing price of one share of the Fund at the maturity date or at other times during the term of the notes could be less than the Initial Share Price by not more than the Knock-Out Buffer Amount, or could be equal to or greater than the Initial Share Price. This difference could be particularly large if there is a significant decrease in the price of the Fund during the later portion of the term of the notes or if there is significant volatility in the price of the Fund during the term of the notes, especially on dates near the Observation Date.
- **YOUR ABILITY TO RECEIVE THE CONTINGENT MINIMUM RETURN OF 8.85% MAY TERMINATE ON THE OBSERVATION DATE** — If the Final Share Price is less than the Initial Share Price by more than the Knock-Out Buffer Amount of 25.00%, you will not be entitled to receive the Contingent Minimum Return of 8.85% on the notes. Under these circumstances, you will lose some or all of your initial investment at maturity and will be fully exposed to any depreciation in the Fund.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO AFFECT ADVERSELY THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity, if any, described in this pricing supplement is based on the full principal amount of your notes, the original issue price of the notes includes the agent’s commission and the estimated cost of hedging our obligations under the notes. As a result, the price, if any, at which JPMS will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the maturity date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of shares of the Fund or the equity securities held by the Fund or included in the Underlying Index would have.

- **THERE ARE RISKS ASSOCIATED WITH THE FUND** — Although the Fund's shares are listed for trading on NYSE Arca and a number of similar products have been traded on NYSE Arca and other securities exchanges for varying periods of time, there is no assurance that an active trading market will continue for the shares of the Fund or that there will be liquidity in the trading market. The Fund is subject to management risk, which is the risk that the investment strategies of the Fund's investment adviser, the implementation of which is subject to a number of constraints, may not produce the intended results. These constraints could adversely affect the market price of the shares of the Fund, and consequently, the value of the notes.
- **DIFFERENCES BETWEEN THE FUND AND THE UNDERLYING INDEX** — The Fund does not fully replicate the Underlying Index and may hold securities not included in the Underlying Index. In addition, its performance will reflect additional transaction costs and fees that are not included in the calculation of the Underlying Index. All of these factors may lead to a lack of correlation between the Fund and the Underlying Index. In addition, corporate actions with respect to the sample of equity securities (such as mergers and spin-offs) may impact the variance between the Fund and the Underlying Index. Finally, because the shares of the Fund are traded on NYSE Arca and are subject to market supply and investor demand, the market value of one share of the Fund may differ from the net asset value per share of the Fund. For all of the foregoing reasons, the performance of the Fund may not correlate with the performance of the Underlying Index.
- **NON-U.S. SECURITIES RISK** — The equity securities underlying the Fund have been issued by non-U.S. companies. Investments in securities linked to the value of such non-U.S. equity securities involve risks associated with the securities markets in those countries, including risks of volatility in those markets, government intervention in those markets and cross shareholdings in companies in certain countries. Also, there is generally less publicly available information about companies in some of these jurisdictions than there is about U.S. companies that are subject to the reporting requirements of the SEC, and generally non-U.S. companies are subject to accounting, auditing and financial reporting standards and requirements and securities trading rules different from those applicable to U.S. reporting companies. The prices of securities in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws.
- **THE NOTES ARE SUBJECT TO CURRENCY EXCHANGE RISK** — Because the prices of the equity securities held by the Fund are converted into U.S. dollars for the purposes of calculating the net asset value of the Fund, holders of the notes will be exposed to currency exchange rate risk with respect to each of the currencies in which the equity securities held by the Fund trade. Your net exposure will depend on the extent to which those currencies strengthen or weaken against the U.S. dollar and the relative weight of equity securities denominated in those currencies in the Fund. If, taking into account the relevant weighting, the U.S. dollar strengthens against those currencies, the net asset value of the Fund will be adversely affected and the payment at maturity, if any, may be reduced. Of particular importance to potential currency exchange risk are:
 - existing and expected rates of inflation;
 - existing and expected interest rate levels;
 - the balance of payments; and
 - the extent of government surpluses or deficits in issuing countries of those currencies and the United States.

All of these factors are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of issuing countries of those currencies and the United States and other countries important to international trade and finance.
- **RISK OF A KNOCK-OUT EVENT OCCURRING IS GREATER IF THE FUND IS VOLATILE** — The likelihood that the Final Share Price will be less than the Initial Share Price by more than the Knock-Out Buffer Amount, thereby triggering a Knock-Out Event, will depend in large part on the volatility of the closing price of one share of the Fund — the frequency and magnitude of changes in the closing price of one share of the Fund.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMS intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMS is willing to buy the notes.
- **THE ANTI-DILUTION PROTECTION FOR THE FUND IS LIMITED** — The calculation agent will make adjustments to the Share Adjustment Factor for certain events affecting the shares of the Fund. However, the calculation agent will not make an adjustment in response to all events that could affect the shares of the Fund. If an event occurs that does not require the calculation agent to make an adjustment, the value of the notes may be materially and adversely affected.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the closing price of one share of the Fund on any day, the value of the notes will be impacted by a number of economic and market factors that may either offset or magnify each other, including:
 - the actual and expected volatility of the Fund;
 - the time to maturity of the notes;
 - whether a Knock-Out Event is expected to occur;
 - the dividend rates on the Fund and the equity securities underlying the Fund;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory and judicial events;
 - the exchange rate and volatility of the exchange rate between the U.S. dollar and the currencies in which the equity securities held by the Fund trade and correlation between those rates and the prices of shares of the Fund;
 - the occurrence of certain events to the Fund that may or may not require an adjustment to the Share Adjustment Factor; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

Historical Information

The following graph sets forth the historical performance of the iShares® MSCI EAFE Index Fund based on the weekly historical closing price of one share of the Fund from January 5, 2007 through June 15, 2012. The closing price of one share of the Fund on June 21, 2012 was \$48.04. We obtained the closing prices of one share of the Fund below from Bloomberg Financial Markets, without independent verification.

The historical prices of one share of the Fund should not be taken as an indication of future performance, and no assurance can be given as to the closing price of one share of the Fund on the Observation Date. We cannot give you assurance that the performance of the Fund will result in the return of any of your initial investment. We make no representation as to the amount of dividends, if any, that the Fund or the equity securities held by the Fund will pay in the future. In any event, as an investor in the notes, you will not be entitled to receive dividends, if any, that may be payable on the Fund or the equity securities held by the Fund.

Validity of the Notes

In the opinion of Davis Polk & Wardwell LLP, as our special products counsel, when the notes offered by this pricing supplement have been executed and issued by us and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such notes will be our valid and binding obligations, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), *provided* that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date hereof and is limited to the federal laws of the United States of America, the laws of the State of New York and the General Corporation Law of the State of Delaware. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and its authentication of the notes and the validity, binding nature and enforceability of the indenture with respect to the trustee, all as stated in the letter of such counsel dated March 29, 2012, which was filed as an exhibit to a Current Report on Form 8-K by us on March 29, 2012.
