Please see key risks on the next page for additional information. Source: J.P. Morgan. Past performance is not a guide to future performance. "EFPLUS5E Index" refers to the performance of J.P. Morgan Efficiente Plus 5 Index (Net ER) (Bloomberg: EFPLUS5E Index)(the "Index"). The levels of the Index incorporate a fee of 0.85% per annum.

Hypothetical, historical performance measures: Represents the monthly and full calendar year performance of the Index based on, as applicable to the relevant measurement period, the hypothetical back tested daily closing levels from December 31, 2007 through December 31, 2014, and the actual historical performance of the Index based on daily closing levels from January 1, 2015 through August 31, 2015. YTD reflects the year to date performance of the Index from the last business day of the previous calendar year through, and including August 31, 2015. The hypothetical historical values above have not been verified by an independent third party. The back-tested, hypothetical historical results above have inherent limitations. These back-tested results are achieved by means of a retroactive application of a back-tested model designed with the benefit of hindsight. No representation is made that an investment linked to the Index will or is likely to achieve returns similar to those shown. Alternative modelling techniques or assumptions would produce different hypothetical historical information that might prove to be more appropriate and that might differ significantly from the hypothetical historical information set forth above. Hypothetical back-tested results are neither an indicator nor a guarantee of future returns. Actual results will vary, perhaps materially, from the analysis implied in the hypothetical historical information that forms part of the information contained in the table above.

Key Risks

- Our affiliate, J.P. Morgan Securities plc, or JPMS plc, is the index calculation agent and may adjust the Index in a way that affects its level. The policies and judgments for which JPMS plc is responsible could have an impact, positive or negative, on the level of the Index and the value of your investment. .
- JPMS is under no obligation to consider your interest as an investor with returns linked to the Index.
- The level of the Index will include the deduction of a fee of 0.85% per annum.
- The Index was established on December 31, 2014 and therefore has a limited operating history.
- There are risks associated with a momentum -based investment strategy. If market conditions do not represent a continuation of prior observed trends, the level of the Index, which is rebalanced based on prior trends, may decline.
- The Index comprises notional assets and liabilities. There is no actual portfolio of assets to which any person is entitled or in which any person has any ownership interest.
- The Index may not be successful, may not outperform any alternative strategy and may not achieve its target volatility of 5%.
- The Index may be partially uninvested if the cash index is included in the Monthly Reference Portfolio.
- The investment strategy used to construct the index involves monthly rebalancing and weighting constraints that are applied to the Basket Constituents.
- Changes in the values of the Basket Constituents may offset each other.
- Each Basket Constituent composing the Index may be replaced by a substitute constituent.
- The commodity futures contracts underlying the PowerShares DB Commodity Index Tracking Fund are subject to uncertain legal and regulatory regimes.
- Investments linked to the Index may be subject to the credit risk of J.P.Morgan.
- Investments linked to the Index may also be subject to the credit risk of UBS AG, the issuer of the exchange-traded note that is one of the Basket Constituents, since any return on an investment linked to the Index that reflects the performance of the Index is subject to the credit risk of us, as well as UBS AG.
- The Index should not be compared to any other index or strategy sponsored by any of our affiliates and cannot necessarily be considered a revised, enhanced or modified version of any other J.P. Morgan index.
- An investment linked to the Index is subject to risks associated with non-U.S. securities markets (including emerging markets, and currency exchange risk), small capitalization stocks, preferred stocks, fixed income securities and loans (including interest-rate related risks and credit risk), risks associated with the real estate industry and MLPs, and risks associated with investments in commodity futures contracts and gold.

The risks identified above are not exhaustive. You should also review carefully the related “Risk Factors” section in any relevant product supplement, underlying supplement, term sheet or pricing supplement.
