Invested \$75,000 

"I am proud to support Zero Cheating as a lead investor. Having previously invested in their vision, I am even more confident in their ability to revolutionize education with their innovative, patented technology. Their commitment to ensuring academic integrity and genuine learning is unparalleled. The team's dedication and progress have only strengthened my belief in their potential for success. It's exciting to continue this journey with them and contribute to their transformative impact on education."

Our Team

Neil Parsont Chief Visionary Officer

15+ years in education and business tutoring with deep campus experience, 100+ hours of business consulting, FAU 2021 Business Plan Competition winner, and extensive leadership managing a team of 25+ tutors.

I chose this idea because I am passionate about education. I found out over 50% of students in some classes were cheating by sharing exam photos despite proctoring.

Haider Ali CTO

Tech entrepreneur with 10+ years in AI/ML, AR/VR, and MVP development. Co-founded startups like LogicBulb and TheHexaTown, delivering innovative solutions across 10+ industries with a focus on digital transformation.

Protecting Academic Integrity from AI

AI and the Fraud Triangle Perfect Storm

The shift to online exams and rise of AI have created unprecedented **OPPORTUNITIES** for cheating. It's time for.

0% Cheating, 100% Learning.

 www.ZeroCheating.com

 Neil@ZeroCheating.com

Cheating has always existed, but with AI, it's exploded into an unprecedented crisis. The Fraud Triangle, a concept by Don Cressey from the 1950s, explains this phenomenon: opportunity, pressure, and rationalization. AI makes cheating effortless, creating a perfect storm—and the urgent need for Zero Cheating.

Cheating Today
Lives at Risk Tomorrow

ZERO
CHEATING

Cheating undermines education and professional integrity. Students are cheating at unprecedented rates, and even trusted professionals—like doctors and financial advisors—are succumbing to temptation. This puts companies at risk of hiring unqualified individuals and endangers public safety when professionals fail to meet basic standards.

Solution

Foolproof Patented AI System to Prevent Cheating Everywhere

Protects the value of degrees and licenses by preventing cheating across assessments.

For **Academic** Integrity

For **Professional** Credentials

ZERO
CHEATING

Our patented solution creates an environment where undetected cheating is virtually impossible. By proactively preventing academic dishonesty and

protecting professional credentials, we safeguard the trust placed in graduates, licensed professionals, and the institutions behind them.

Product

Patented Comprehensive **Monitoring System**

Computer Monitoring

Tracks on-screen activity to prevent cheating.

+

Environment Monitoring

External camera provides a full view of the testing environment.

+

Identity Verification

Biometric ID via mobile app using fingerprint or face recognition.

Combined = 100% Cheating Prevention

Our system is unmatched. It monitors both the computer and the physical environment, ensuring no external help is used. Biometric verification, far superior to standard government ID matches, guarantees that the right person is completing the work, leaving no room for doubt.

Target **Markets**

Zero Cheating is positioned to dominate both Academic and Professional sectors

4,000
Colleges

24,000
High Schools

3,000,000
Licensing Exams

We’re focused on two critical markets: academic institutions and professional licensing exams. From high schools to medical boards, these markets demand the highest levels of integrity—and Zero Cheating delivers.

Zero Cheating

Patented to Prevent All Cheating

	ZERO CHEATING	Competitors
Synchronized system	✓ Patented verification of on and off-screen activities	✗ Not available
ID Verification	✓ Patented mobile app with bio metrics	✗ Fallible government ID
Positioning	✓ Proactive Preventions	✗ Reactive Detection
Evidence	✓ Actionable, conclusive photos	✗ Ambiguous data points

Our competitors rely on built-in webcams and AI, which only infer cheating. In contrast, our patented system monitors both on-screen and off-screen activity with an external camera, capturing indisputable photographic evidence. Like a speed trap, we share our methodology with test-takers to deter cheating before it happens.

Momentum Across Schools and Educators

Zero Cheating is gaining traction with early adoption from leading institutions

Two Issued Patents

Protecting our market position with innovative technology.

First Paying Customer

Kansas Christian College – **\$2,500** sale.

12 Active Pilots

Schools testing the platform across multiple regions.

Ongoing Conversations with Decision Makers

Driving adoption through strategic discussions.

Our software is in use at institutions like Kansas Christian College, and 12 schools are actively piloting it. With two issued patents and one pending, we're already in conversations with decision-makers to secure multi-year contracts.
