Fungi are the frontier.

Traverse City, Michigan, United States

Summary

I am the founder and grower at Midnight Harvest.

We specialize in morel research and growing morels indoors.

Soon we will be producing morels all year long and opening up the multi-billion industry that once was only left up to nature.

Midnight Harvest was born out of a love for growing food. Living in northern Michigan and wanting to own and operate my own farm mushrooms seemed a great fit for their ability to be grown indoors, year round, and a vertical setting.

We've grown maitake, shiitake, lionsmane, reishi and the last 4 years we've specifically grown shiitake for retail and restaurants.

Now we are pivoting the full morel research to being morel to scale in 2023. Much more to come!

Experience

Midnight Harvest

Owner/Grower

March 2014 - Present (9 years)

Traverse City, MI

Walt Disney World
