Pricing tiers are assessed quarterly and are calculated based on the prior quarter's average hashrate to determine the following quarter's pricing tier. The average quarterly hashrate is calculated by summing the daily hashrate (as recorded by Foundry USA Pool in Daily Statistics)

for the given quarter (excluding the lowest 30 days^{***}) and dividing it by the number of remaining days in the quarter. Hashrate is calculated at the Group level, meaning all subaccounts within a group are considered in the calculation. It may take up to 10 business days into a quarter for a fee to be adjusted. ^{***}Exclusion of the lowest 30 days does not apply within the first quarter of a Group joining the Foundry USA Pool.
