OVERVIEW TEAM FAQ MARKET INVEST

“Pain shouldn’t be chronic, and people shouldn’t have to live with it”

Highlights

Things that differentiate Healables as a tech company

Market

- ✓ This market impacts 100M people in the US alone. [\[1\]\[2\]](#)
- ✓ Potential to disrupt the \$80B global chronic pain market

People

- ✓ Expert team of medical and business professionals. Founder’s prior biotech company was acquired by biopharma giant GSK (GlaxoSmithKline) for a successful exit.

TECH

- ✓ Healables medical device is currently undergoing trials on patients with knee osteoarthritis, and trials are planned for fibromyalgia and diabetic neuropathy (nerve damage).
- ✓ Healables technology has obtained a CE mark, making it available for licensing.
- ✓ Healables has already licensed its tech for manufacturing and its product is available for commercial sales.
- ✓ Our supplier, Healables Ltd., has been granted patents and has more patents pending.

- ☒ Pain medication
- ☐ Meditation and breath techniques
- ☐ Not much else

Pain medication can have downsides such as addiction or other physical side-effects, which leaves a gap in treatment options.

The Center for Disease Control (CDC) recommends maximizing use of non-opioid therapies ^(6A)

The 2022 CDC Clinical Practice Guideline^(6B) which is intended for clinicians prescribing opioids for adult outpatients with pain.

- ☒ Given new findings from systematic reviews that non-opioid therapies are at least as effective as opioids for many common types of acute pain (including headaches, low back pain, neck pain, and pain related to common musculoskeletal conditions, minor surgeries, dental procedures, or kidney stones), the guideline includes a new recommendation that clinicians maximize the use of non-opioid therapies.
- ☒ Clinicians should maximize use of non-opioid therapies and consider initiating opioid therapy only if the expected benefits for pain and function are anticipated to outweigh the risks and that when opioids are needed, clinicians should initiate therapy at the lowest effective dosage, carefully evaluate individual benefits and risks when considering increasing dosages, and avoid increasing the dosage above levels likely to yield diminishing returns in benefits relative to risks.

The US Congress expands access to non-opioids

The NOPAIN Act ^(6C) was passed in an end-of-year legislative package in the 117th Congress in 2022. As a result of the law, patients and providers will have expanded access to non-opioids starting in 2025.

The Non-Opioids Prevent Addiction in the Nation Act ("NOPAIN Act") is a policy that will prevent opioid addiction before it starts by increasing the use of non-opioid pain management approaches as a Medicare reimbursement

117th Congress in 2022. As a result of the law, patients and providers will have

OVERVIEW TEAM FAQ MARKET INVEST

The Non-Opioids Prevent Addiction in the Nation Act ("NOPAIN Act") is a policy that will prevent opioid addiction before it starts by increasing the use of non-opioid pain management approaches as a Medicare reimbursement policy in outpatient surgical settings.^{[10],[11]}

The NOPAIN Act will increase the use of non-opioid pain management approaches by changing outdated federal Medicare reimbursement policies.^{[6C],[12]} The policy will:

- 🔴 Expand patient and provider access to FDA approved non-opioid pain management approaches in all outpatient surgical settings.
- 🔴 Require a report to Congress on limitations, gaps, barriers to access, or deficits in Medicare coverage or reimbursement for therapeutic services.

This NOPAIN Act will ensure that safe, non-addictive therapies are widely available to the tens of millions^[6D] of Americans who undergo an outpatient surgical procedure every year. Drug-related overdoses and deaths were measurably accelerated^[6E] during the COVID-19 pandemic resulting in the highest rates ever recorded. This policy change aims to reduce unnecessary exposure to opioids and the likelihood of opioid abuse or addiction following an acute pain incident.

3. Healables' Solution

"Wearables that Heal"

Healables has developed novel wearables that are designed to dock with smart textiles and connect with AI to personalize protocols so that every user can get exactly what they need.

- ✓ "More than 175 published studies show the beneficial effects of microcurrent technology — the exact kind of microcurrent medtech that Healables is bringing to market," Dr. Andrew David Shiller, a Harvard-trained pain rehabilitation specialist and Healables Chief Medical Officer shares.
- ✓ "Throughout my medical career, I have treated over 20,000 patients with various kinds of pain and diseases of the brain, nerves, bones, joints, and muscles. The speed with which microcurrent reduces inflammation of joints, bursa, and tendons is remarkable. I have seen chronic intractable joint pain and bone bruising resolve with very few treatments."
- ✓ Our platform enhances cell function rather than masking the pain. Microcurrent therapy involves the use of low-level electrical currents to stimulate mitochondria in the body, which can increase ATP production, promote protein synthesis, and enhance cell membrane permeability. These effects can lead to improved cellular function and tissue repair.
- ✓ The Healables solution is a holistic personalized integrated medicine treatment that is made up of personalized behavioral health coaching and personalized electrotherapy.
- ✓ Healables is designed to be the next generation of electrotherapy because we have found a way to make it personalized and easy to use.

SPORTS/ WELLNESS (CE) – ELECTROGEAR PRODUCT LINE

We provide physiotherapists and personal trainers with microcurrent devices, smart compression conductive garments (body sleeves, socks & shirts) and an app with an AI health coach to improve the function, the recovery & the performance of their sports & fitness clients. Note: Our wellness device is not intended to treat or prevent any injuries. In our opinion it does not require FDA certification and it would therefore not fall under the auspices of the FDA.

NEXT PRODUCTS IN THE PIPELINE: MEDICAL – HEALABLES PRODUCT LINE

In Years 1-2: Treat arm, leg & back muscles, tendons, and joints to ameliorate chronic pain, accelerate healing, reduce inflammation, increase function and diminish NSAID/opioid pain med dependencies.

In addition, our medical product with specifically designed custom conductive textiles is designed to treat Diabetic neuropathy, Osteoarthritis, Fibromyalgia and Chronic lower back pain.

Note: Our first medical device will be submitted to the FDA for regulation.

OVERVIEW TEAM FAQ MARKET INVEST

data sets from users with AI.

Why is the tech a good reason to invest?

Our patented tech may disrupt a broad range of verticals in multiple sectors, (ie: cosmetics, food tech, medical, veterinary, sports and wellness / fitness ^(7B) and automotive).

- ✓ Healables' technology delivers digital health via an App that runs an easy-to-use microcurrent technology (electron stream device) and a digital health coach to transmit microcurrent protocols via wearable e-textile garments.
- ✓ Our platform may enhance cell function rather than masking the pain. Microcurrent therapy involves the use of low-level electrical currents to stimulate cells in the body, which can increase ATP production, promote protein synthesis, and enhance cell membrane permeability. These effects can lead to improved cellular function and tissue repair.
- ✓ Our wearable device, docked with unique conductive compression sleeves, socks, or shirts, is designed to deliver personalized treatment that empowers physiotherapists and personal trainers to provide both in-clinic as well as home-based self-treatment that health professionals can remotely monitor in a digital portal. Healables has the potential to revolutionize pain relief.

7. Market Size & Investment Opportunity

We're striving to build the future of pain relief. Our cutting-edge wearable microcurrent technology has an opportunity to benefit from the \$6.91 Billion pain management device market.^{(8),(8A)}

\$1B (EVG): Serviceable Obtainable Market (SOM) & Longvangelists: The

OVERVIEW TEAM FAQ MARKET INVEST

The \$1B SOM & EVG represents a realistic forecast of the share of the initial available markets we plan to capture namely: **0.67%** of the \$150B SAM cited above and **0.18%** of the \$536B 2023 medical device market cited below. We believe our products will be well positioned to address the growing medical device market that is projected to grow from \$536B in 2023 to \$799.67B by 2029.⁽¹⁹⁾ Related to our Wellness ElectroGear product, MarketWatch and Forbes indicate the global market size in Sports & Fitness – Wellness & Rehabilitation segment – represents \$36B. This consists respectively of \$30B for the health fitness market^(7B) and \$5.4B for the sports rehabilitation market. Sports rehabilitation is part of the larger health and fitness market. According to the IHRSA (International Health, Racquet & Sportsclub Association), the \$30 billion health and fitness industry in the U.S. has been growing by at least 3 – 4% annually for the last ten years and shows no signs of slowing down anytime soon. The global pain management therapeutics market was \$72.4B in 2021, and is projected to be \$105.8B⁽²¹⁾ in 2030. The global sports medicine market was valued at \$5.81B in 2021 and is expected to reach \$9.48B in 2030.^(12B)

With aging, increasing sports and outdoor activity, and increased prevalence of multiple chronic conditions, we expect these potential markets for our solutions will only increase. In addition, our medical product with specifically designed custom conductive textiles is well suited to treat:

- Diabetic neuropathy whose 2022 global market size was \$3.9B and is projected to be \$6.6B in 2030⁽²³⁾
- Osteoarthritis whose global 2022 therapy market was \$7.9 B, and is projected to be \$15.8B in 2030⁽²⁴⁾ ;
- Fibromyalgia whose 2022 treatment market was \$3.15B,⁽²⁶⁾ and is projected to be \$3.8B in 2028⁽²⁵⁾
- Chronic lower back pain whose 2022 global treatment market was \$7.9B, projected at \$12.4B in 2031.⁽²⁶⁾

Statistically, a company that captures one tenth of one percent of a Trillion Dollar market will be a billion dollar company.

be a billion dollar company.

Competition

While there are several companies that may be considered competitors of Healables in some form, we believe none of them on the market today delivers Healables' combination of microcurrent, e-textiles, wearables, digital health coaching, AI and digital health telecommunications at an attractive price.

These competitors include:

- ✓ H-Wave, whose products range from \$1,875 to \$6,300, has no Health Coach feature, has no app, has no AI, does not offer any data capture, is non-wearable and has no remote treatment capability.
- ✓ Avazzia, which offers its products ranging in price from \$330 to \$4,780, has no Health Coach feature, has no app, has no AI, has no data capture, is not wearable, and has no remote treatment capability.
- ✓ Quell, which is priced between \$99 and \$250, has no Health Coach feature, though it does have an app, has no AI, although it does capture data for AI, is partly wearable, yet has no remote treatment capability.

remote treatment capability.

- ✓ Alpha Stim, which costs \$1,200, has no Health Coach feature, no app, no AI, no data capture, is not wearable and has no remote treatment capability.
- ✓ Compex, whose products cost anywhere from \$800 to \$1,500, has no AI, is not a wearable textile, and has no remote capability.
- ✓ By comparison, Healables products cost \$1,799 + SaaS fee, has a Health Coach feature, has an app, has AI (expected to be released in 2023), Captures data for AI, includes fully wearable, scientifically advanced, precision engineered textile, and has remote treatment capabilities.

8. Timing

The conditions are good for electrotherapy

- ✓ The US Congress recently legislated the NOPAIN Act, which is a policy designed to prevent opioid addiction before it starts by increasing the use of non-opioid pain management approaches as a Medicare reimbursement policy in outpatient surgical settings^[10,11]. The NOPAIN Act will increase the use of non-opioid pain management approaches by changing outdated federal Medicare reimbursement policies.^[6,12]
- ✓ The awareness of the opioid crisis has made it such that people want non pharmaceutical solutions.

Healables is a movement on a mission to restore humanity to a healthier state.

Healables is performing an open label trial designed to demonstrate safety and usability.

9. Validation & Partnerships

- ✓ Healables has teamed up with Israel's premiere olympic organization, The Wingate National Institute for Excellence in Sports.
- ✓ Because we have established a way to validate this with an Olympic trial, this is the time to be involved during early trials and partnerships.
- ✓ We are working with sports medicine expert and a baseball pitcher Dr. Michael April, who is enrolling Healables treatments to competitive baseball players.

OVERVIEW TEAM FAQ MARKET INVEST

We are working with sports medicine expert and a baseball pitcher Dr. Michael April, who is applying Healables treatments to competitive baseball players.

In collaboration with Dr. Michael April, Chief Medical Officer at WelMetrix, together with the Head of Strategic Planning and Innovation at the Elite Sports Department at Wingate, olympic gymnasts and swimmers will be further pilot-testing ElectroGear wearable devices.

10. Current Product

We introduced our sports product called ElectroGear at CES '23. We are launching it in Q2 of 2023.

As a wellness product, ElectroGear already has the CE mark, which is a mark of compliance with EU health, safety, and environmental standards. ElectroGear is dedicated towards enhancing sports performance and accelerating recovery in professional and amateur athletes.

Our flagship medical product is moving through the regulatory process to demonstrate that we can reduce inflammation, relieve pain and accelerate healing without medication.

[INVEST](#)

that we can reduce inflammation, relieve pain and accelerate healing without medication.

As part of the Healables solution, wearable sensors will measure physiological signals that correlate with recovery, and improvement in mobility, agility, plus speed, powering and serving as the Key Performance Indicators (KPIs) that further validate ElectroGear as a premiere performance product.

Our smart textiles are comfortable. They can be worn at home or on the go without hanging wires. They include knee sleeves, arm sleeves, smart socks, caps, shoulder textiles, and smart shirts.

In our Sports & Wellness ElectroGear™ Product Line, we offer the first ready-to-use digital health remote treatment platform. It can be used within and outside the clinic or studio of the physical therapists and personal trainers improving function, recovery & performance of their sports and fitness clients.

Coupled with a digital health coach to transmit microcurrent protocols via wearable textile garments, this unique approach in the form of digital health protocols via an AI driven App runs a proprietary easy-to-use small electron stream device that docks with any of our smart textiles.

11. Business Model

Healables' initial product line, ElectroGear sports performance and athletic recovery products, intended to provide an early revenue stream.

At present, Healables utilizes a hybrid B2B device/SaaS business model focusing on B2B practitioners such as physical therapists, physios, personal trainers, athletic trainers, massage therapists and other body workers.

Healables expects to generate revenue in two different ways:

Sales of product

Licensing

Currently, the ElectroGear device is available for pre-sale. Check out www.electrogear.com to learn more.

OVERVIEW TEAM FAQ MARKET INVEST

The sports performance and wellness market has enormous potential on its own^(12B), yet it is less than the size of the MedTech opportunity.

The total addressable market in the MedTech space is projected to grow to **\$571 Billion by 2023**⁽¹³⁾

In the MedTech category, Healables' intended applications include treatments for:

- ☒ Knee arthritis
- ☒ Peripheral neuropathy
- ☒ Inflammation
- ☒ Pain management and pain relief
- ☒ Fibromyalgia
- ☒ Musculoskeletal injuries

Musculoskeletal injuries

Healables platform technology is incredibly versatile. It can be deployed across multiple verticals along a number of product lines.

Initially, we're addressing the wellness vertical through sports performance and we're already offering sales of ElectroGear in multiple countries.

In parallel, we're working on fast-tracking the medical product line through the regulatory and reimbursement routes in the US, UK, and EU and are particularly interested in the DiGA legislation in Germany and Europe that reimburses digital health products that consumers can take home.

In addition to sports and medical verticals, our core technology can also be integrated into the cosmetic, veterinary and automotive verticals in the future.

12. Achieved & Upcoming Milestones

Soft-Launch, User Testing, Sports Pilot, Beta Testing, Clinical Trial

Clinical Trial: Current: Knee Osteoarthritis for safety & usability

Raised \$1.2 Million to date

FAQ

Why invest in startups?

Crowdfunding is designed to allow investors to support startups and early-growth companies that they are passionate about. This is different from helping a company raise money on Kickstarter. With Regulation CF Offerings, you aren't buying products or merch. You are buying a piece of a company and helping it grow.

What types of securities can I buy on Healables?

How much can I invest?

How do I calculate my net worth?

What are the tax implications of an equity crowdfunding investment?

Who can invest in a Regulation CF Offering?

What do I need to know about early-stage investing? Are these investments risky?

When will I get my investment back?

How much can I invest? -

Investors other than accredited investors are limited in the amounts they are allowed to invest in all Regulation Crowdfunding offerings (on this site and elsewhere) over the course of a 12-month period: If either of an investor's annual income or net worth is less than \$124,000, then the investor's investment limit \$2,500, or 5 percent of the greater of the investor's annual income or net worth, whichever is greater. If both an investor's annual income and net worth are \$124,000 or higher, then the investor's limit is 10 percent of the greater of their annual income or net worth, or \$124,000 whichever is greater. Accredited investors are not limited in the amount they can invest.

TOTAL RAISED Pre-CrowdFunding:
\$1.2 Million

OVERVIEW TEAM FAQ MARKET INVEST

FAQ

Why invest in startups?

What types of securities can I buy on Healables?

How much can I invest?

How do I calculate my net worth?

Calculating net worth involves adding up all your assets and subtracting all your liabilities. The resulting sum is your net worth.

What are the tax implications of an equity crowdfunding investment?

Who can invest in a Regulation CF Offering?

What do I need to know about early-stage investing? Are these investments risky?

When will I get my investment back?

Can I sell my shares?

What information does Healables collect from issuers related to their offering?

What happens if a company does not reach their funding goal?

How can I learn more about a company's offering?

🎯 FIRST GOAL: \$25,000 LEFT

OVERVIEW TEAM FAQ MARKET INVEST

FAQ

Why invest in startups?

What types of securities can I buy on Healables?

How much can I invest?

How do I calculate my net worth?

What are the tax implications of an equity crowdfunding investment?

Who can invest in a Regulation CF Offering?

What do I need to know about early-stage investing? Are these investments risky?

Ref CF Offerings are high risk opportunities and may not retain their value. Investing in startups and small businesses is inherently risky and standard company risk factors such as execution and strategy risk are often magnified at the early stages of a company. In the event that a company goes out of business, your ownership interest could lose all value. Furthermore, private investments in startup companies are illiquid instruments that typically take up to five and seven years (if ever) before an exit via acquisition, IPO, etc.

When will I get my investment back?

Can I sell my shares?

What information does Healables collect from issuers related to their offering?

OVERVIEW TEAM FAQ MARKET INVEST

What are the tax implications of an equity crowdfunding investment? +

Who can invest in a Regulation CF Offering? +

What do I need to know about early-stage investing? Are these investments risky? +

When will I get my investment back? -

Companies conducting a Reg CF are privately held companies, and their shares are not traded on a public stock exchange. As a result, the shares cannot be easily traded or sold. As an investor in a private company, you typically receive a return on your investment under the following two scenarios: The company gets acquired by another company. The company goes public (makes an initial public offering on the NASDAQ, NYSE, or another exchange). In those instances, you receive your pro-rata share of the distributions that occur, in the case of acquisition, or you can sell your shares on the exchange. It can take 5-7 years (or longer) to see a distribution or trading, as it takes years to build companies. In many cases, there will not be any return as a result of business failure. Dalmore Group, LLC does not make investment recommendations, and no communication, through this website or in any other medium should be construed as a recommendation for any security offered on or off this investment platform. Investments in private placements and start-up investments in particular are speculative and involve a high degree of risk, and those investors who cannot afford to lose their entire investment should not invest in start-ups. Companies seeking startup investments tend to be in earlier stages of development, and their business model, products and services may not yet be fully developed, operational or tested in the public marketplace. There is no guarantee that the stated valuation and other terms are accurate or in agreement with the market or industry valuations. Additionally, investors on Regulation CF offerings will receive securities that are subject to holding period requirements. The most sensible investment strategy for start-up investing may include a balanced portfolio of different start-ups. Start-ups should only be part of your overall investment portfolio. Investments in startups are highly illiquid and those investors who cannot hold an investment for the long term (at least 5-7 years) should not invest.

Can I sell my shares? +

Who can invest in a Regulation CF Offering? +

What do I need to know about early-stage investing? Are these investments risky? +

When will I get my investment back? +

Can I sell my shares? -

Shares sold via Regulation Crowdfunding offerings have a one-year lock up period before those shares can be sold freely. Exceptions to limitations on selling shares during the one-year lock up are transfers:

- -to the company that issued the securities;
- -to an accredited investor;
- -to a family member (defined as a child, stepchild, grandchild, parent, -stepparent, grandparent, spouse or spousal equivalent, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law, including adoptive relationships.);
- -in connection with your death or divorce or other similar circumstance;

OVERVIEW TEAM FAQ MARKET INVEST

What information does Healables collect from issuers related to their offering?

The organization of the company Dalmore Group, LLC requires information that shows the issuer company has taken steps necessary to organize as a corporation or LLC in its state of organization, is in good standing, and that the securities being issued will be duly authorized and validly issued. The corporate structure and ownership Dalmore Group, LLC works with the issuer company to disclose its organizational structure, affiliated entities, and current capitalization. The people behind the company Dalmore Group, LLC helps the issuer company disclose who is behind the operations and strategy of the company, along with their previous related experience, and Bad Actor Reports to provide evidence that the company is not disqualified from proceeding with its offering. Information provided to investors Dalmore Group, LLC checks that the issuer company is providing clear disclosure of its financial situation, business origins, and operations, and legal authority to engage in its business activities. Investor information and terms of the offering Dalmore Group, LLC reviews for consistency each instance where the issuer company describes the offering terms, and identifies to investors how the issuer company reached its current valuation and will track and keep in touch with its security holders. Review of transaction documents Dalmore Group, LLC performs an independent review of transaction documents to check for red flags & conformance with stated terms. Business due diligence Dalmore Group, LLC conducts research and due diligence on each company before it is able to accept investments on the platform. Dalmore Group, LLC will typically conduct over 30-40 hours of due diligence per opportunity, which requires the satisfactory completion of a detailed set of individual questions and data requests. Particular focus is paid to the following issues throughout the due diligence process: Problem or inefficiency being addressed Product / service overview, stage of development and anticipated milestones Demonstrated traction (e.g. revenue, pre-sales, purchase orders, signed contracts, media coverage, awards, etc.) Data to support claims made in marketing materials (e.g. user / customer metrics, signed contracts and agreements, product demonstrations, etc.) Growth strategy Employees and advisors (including ownership structure) Addressable market (e.g. size, growth, penetration, etc.) Competitive landscape and industry dynamics Exit opportunities Intellectual property Historical financials Financial projections (including error-checking, evaluation of key assumptions and reconciliation to stated growth plan) Reference checks (e.g. previous investors, advisors, etc.) Investment overview (including determination of key terms, uses of funds, and current and previous investors) The findings of the foregoing review are presented to Dalmore Group, LLC, which may approve, reject, or require additional information for the offering. Upon approval and following the onboarding process, an offering can begin accepting investments online. General considerations Notwithstanding the foregoing, these investments are illiquid, risky and speculative and you may lose your entire investment. The foregoing summarizes our standard process. However, each diligence review is tailored to the nature of the company, so the aforementioned process is not the same for every issuer.

accepting investments online. General considerations Notwithstanding the foregoing, these investments are illiquid, risky and speculative and you may lose your entire investment. The foregoing summarizes our standard process. However, each diligence review is tailored to the nature of the company, so the aforementioned process is not the same for every issuer. Completing the vetting process does NOT guarantee that the company has no outstanding issues or that problems will not arise in the future. While the foregoing process is designed to identify material issues, there is no guarantee that there will not be errors, omissions, or oversights in the due diligence process or in the work of third-party vendors utilized by Dalmore Group, LLC. Each investor must conduct their own independent review of documentation and perform their own independent due diligence and should ask for any further information required to make an investment decision.

pain shouldn't be chronic and people shouldn't have to live with it

[Music]

[Laughter]

healables is driving a revolution in digital Health with a new class of wearable Therapeutics

we have taken on a vital mission to achieve faster healing and safer pain relief for people suffering and chronic pain

pain is the body's way of telling us that our cells need repair and repair requires energy inside the power plant of the cell known as the mitochondria electrons move down the electron transport chain to form the main energy molecule ATP

when our mitochondria are sick our cells don't get the energy they need for repair

healables provides a microcurrent stream of electrons and gentle vibration to kick-start our mitochondria and increase ATP this is how microcurrent repair cells and relieves pain

more than 175 published studies show beneficial effects of microcurrent technology throughout my medical career I've treated over 20 000 patients with various kinds of pain and diseases of the brain nerves bones joints and muscles the speed with which microcurrent reduces inflammation of joints Bursa and tendons is remarkable I've seen chronic intractable joint pain and Bone bruising resolve with very few treatments

Jan suffered from severe chronic arthritis she came to me in a wheelchair and used two canes just to make limited movements she was really suffering couldn't do her job she had had two fusions of a right ankle over the past two years and was still in severe pain

Janet seen top Foot and Ankle Specialist orthopedic surgeons who had no solutions for her

One treatment with a healables device and her pain was 50 percent better

After the second treatment she walked up the hill to my office without assisted devices or pain

So why isn't everyone using microcurrent

Well because until now it's just been too hard

Other machines are just too complicated too time consuming and too old-fashioned and they use gooey electrodes entangled wires

Ron was a high performance athlete and Special Forces soldier in his 20s he was put on desk Duty because of severe pain in his knees he had Bone bruises on MRI scans his orthopedic surgeons didn't have anything to offer him except for a non-steroidal anti-inflammatories and Percocet which contains the opioid oxycodone he was depending on these pain medications for every day Ron had an initial good response to treatment with the healables device so he took a loaner device home and after several weeks he was pain-free without any need for pain medications

that's why healables invented the wearable therapeutic
our patented electron stream device is simple quick and smart
the healables wearable is designed to be worn on our smart textiles

you can wear it at a clinic or bring it home for remote treatment and monitoring and because it's a smart
device artificial intelligence will personalize treatment just for you

88 percent of people in our user testing program reported significant pain relief and physical therapists
love that our product is easy to use
we are encouraged and excited by these responses
now it's time for us to scale and disrupt the annual 79 billion dollar Global pain Market

Here's what you can do
We've launched the healables investment campaign so that you can join us **on our mission** to end
chronic pain

it's a great feeling to know your product helps people

the opportunity to invest starts now and starts here

Join me today and become a healables investor so that together we can build a future without pain

Click invest and let the journey begin
