Samantha Patil

Founder & CEO, Well Traveled
Los Angeles, California, United States

Summary

Sam is the founder and CEO of Well Traveled, a home for a new generation of travelers, foodies and adventure seekers.

In her free time (lol), she loves traveling (no surprise there), listening to a good audio book (current favorites: Believe It, Presence, Grit), running and attempting to stand on her head in a yoga class (a 2022 goal, no injuries yet).

Experience

Well Traveled

San Francisco Bay Area

Night Rider
Business and Marketing Analyst
February 2010 - July 2010 (6 months)

Senior Student Engineering Project: The purpose of project Night Rider is to develop an adaptive motorcycle headlight system that will improve overall nighttime visibility, thereby lowering the dangers associated with riding at night. The headlight will automatically reposition itself in order to maintain an optimal beam angle for maximum road visibility. Successful implementation of this system will reduce the number of darkness-induced blind spots, dramatically increasing overall rider safety.

Honors: First place at Santa Clara's senior design conference and national finalists in the 2010 ASME ISHOW competition
