LEAD INVESTOR

Gale Wilkinson

I am investing in Logoi because the team is comprised of strong operators + experienced advisors, the MVP product has been built and launched to an initial group of pilot customers, and the market timing for a knowledge transfer tool such as Logoi is ideal given the recent wave of tech layoffs. Logoi has strong conversational AI models through its use of GPT-3; the company's platform helps reduce more manual work from end users compared to other competitive platforms in this space. With the recent popularity of GPT-3 based tools, Logoi's IP strategy will help protect its specific use of the technology.

Invested \$1,000 this round

Highlights

- 1 Novel approach to solving a long-standing problem almost every business faces

Our Team

Sara Sieteski

Built the Haas Digital team and all its educational products from the ground up (grossing \$10M+ in revenue over 4 years), supported remote instruction during COVID and won team of the year (2020-21), and launched the edtech version of Logoi the same year.

Allen Romano Chief Product Officer

Founded and ran the Digital Humanities graduate program and DH Lab at Florida state University, serving as an interdisciplinary hub for research, teaching and technical training.

Matt O'Day Head of Marketing

Led early growth for Square (IPO), eero (Amazon), Rylo (VSCO) & Oura (current \$1B+ valuation). If you've heard of any of these brands, I likely had a hand in it. Also 21x rec hockey champion & retired University of Michigan hockey TV analyst (Go Blue!).

Pitch

Logoi

THE KNOWLEDGE EXTRACTION & VALIDATION ENGINE

DON'T INVEST IN A GPT-HYPE COMPANY

Invest in a company addressing a massive, costly, and chronically unsolved problem that plagues almost every business.
Invest in a leading team that has backgrounds in linguistics, learning science, and building successful, scalable, data-centered companies.
Invest in a future where the robots help support humans, not replace knowledge workers.
Invest in the evolution of the new knowledge worker.

COMPANIES LOSE BILLIONS OF DOLLARS ANNUALLY DUE TO EMPLOYEE CHURN AND KNOWLEDGE LOSS.

EMPLOYEE EXITS

Almost 50% of knowledge is lost.
Cost to companies: \$11 billion in aggregate per year.

INEFFICIENCIES

19 hours/week wasted per employee (avg) waiting on, searching for, or recreating knowledge (often in correctly).
\$2.4M lost annually per 1,000 employees.

NEW HIRES

Up to 2.5% total annual revenue loss due to new hire learning curves.
