

Boosting Trucking Businesses: AI-Driven Time & Cost Savings for Enhanced Compliance & Growth

LEAD INVESTOR

Yordanos Alemu

As a leading investor, I champion the evolution and modernization of traditional sectors. ZTrucking embodies this spirit of change in the trucking industry, utilizing cutting-edge AI-driven automation. ZTrucking has successfully created an all-encompassing carrier management software solution, integrating critical factors such as FMCSA safety monitoring, digital document management, cost-efficiency, and a user-friendly interface. This software allows even individual operators to manage and optimize their trucking operations effectively, making it an indispensable tool for small businesses. One of the key factors in my investment decision is the commendable execution by the founder. From bootstrapping the software to serving recurring customers, the founder has demonstrated consistency and deliverability, offering a pivotal solution for small businesses that rely on this platform. Having successfully passed all stages of software development, ZTrucking is now at a pivotal stage of growth, showcasing its scalability and future potential. In summary, ZTrucking is more than just a concept; it is a market-validated solution currently in its growth phase. This venture represents a transformative approach within the trucking industry and offers an enticing investment opportunity for general investors looking to support a burgeoning, growth-stage startup.

Invested \$10,000 this round

Highlights

- 1 Founder with MSc in Computer Science, ex-Google former small carrier owner (5 trucks)
- 2 The software is already in production, generating revenue.
- 3 Revolutionize the trucking industry with AI-based FMCSA audits for FMCSA compliance.
- 4 Strong potential for growth and scalability, Superb market fit with SAM over 470K , TAM Over 2M
- 5 Due to its low-cost software production, investors' funds will go to business growth.
- 6 Ztrucking empowers small trucking businesses for efficient & safe operations, benefiting our economy
- 7 Ztrucking holds a potential customer database of over 2 million contacts, without guarantee.

Our Team

Estifanos G

Founder / CTO

The development and implementation of an AI-powered software solution currently enhancing operations for paying customers in the freight industry.

Satish Chitupolu

Security Specialist

An engineer with comprehensive skills and specialization in cloud security.

Jay "JT" Santana

Product Marketing Manager

Marketing expert with a Master's in Marketing. Co-Founder of Administrative Greatness & My AG Social, empowering organizations with business solutions and social media management. Worked on Obama's social media during US Senate and Presidential campaigns.

Pitch

ZTRUCKING

ALL-IN-ONE FMCSA SAFETY INTEGRATED
CARRIER MANAGEMENT SOFTWARE

Problem

(Small carriers struggle)

-  **High Safety Score/risk of closure.** Over 85% of small trucking companies face closure, merger, or company restart, under a different name, perpetuating a cycle of closures.
-  **High management expenses.** Typically a 3-person job, these positions warrant an average net income of **7K/month**
-  **Complexity.** On average **20+** systems or services, are utilized to run a carrier business and sort **thousands** of records

Our Mission

We strive to support small carriers in a highly-regulated, competitive market by providing a safety-centric carrier management system, ultimately breaking the cycle of high safety scores followed by company restarts and repetition that hinders growth.

Our Solution

Integrated FMCSA
safety monitoring

Turn into AI-driven
single-person
operation

Streamlined &
centralized digital
record keeping

Demo Available - Software is live with recurring customers

The Product

Carrier dashboard / Driver App
