# Eren Canarslan

Co-Founder & CEO at Olympian Motors (We're Hiring)  
United States

## Experience

### Olympian Motors

Co-Founder, CEO & Chief Architect

August 2021 - Present (2 years 2 months)

New York, United States

Olympian Motors is manufacturing electric vehicles in New York.

We engineered a disruptive modular vehicle & drivetrain system (MVDS) to reinvent outdated automotive manufacturing in the United States.

We are bringing agility, speed and cost-efficiency back to the car industry.

- + Modular vehicle & drivetrain (MVDS) to produce electric vehicles rapidly and cost-efficiently
- + Targeting 80% reduction in tooling & labor expenses and ~50% faster production lead time
- + Game-changing battery efficiency rates in urban areas, powered by t-prismatic LFP.
- + Simplified in-vehicle media/navigation system. Removing dependency to display screens.
- + Inspired by nature: Steel, wood, recycled and carbon-sequestered components
- + Pending traffic approval from NHTSA (For test-drives, please contact us on our website)

Aesthetic. Minimalistic. Electric. Modular.

### Qualcomm

Strategy & New Ventures

2019 - 2021 (2 years)

California, United States

Primary Focus Areas:

- + Autonomous Driving
- + Electric Vehicles
- + Car-to-Cloud and Digital Chassis

- + Augmented/Virtual Reality
- + 5G & Satellite Connectivity

#### Tekfen Ventures

##### Venture Capital
