LEAD INVESTOR

Michael B. Abrahams

I totally align with the mission of Tribel as a social media platform for the good of all. This will bring healthy competition between Tribel and other existing social media platforms like Facebook, X Former Twitter, Instagram, and the new one, Thread. The more the merrier especially for the user community and the healthier the competition. I invested in Tribel to be able to provide alternative platform to X (formerly Twitter) that has become a handle for Hate, extremism, and falsehood.

Valuation:

It's worth mentioning that we've been told we could raise at a valuation at least double the listed price for this round given that social media companies with big communities consistently raise at 15-50X their value, but we chose to price this round conservatively.

We chose to do this because the retail investor community is near and dear to us and we hope you see how important this mission is to the Tribel team.

Of course, nothing is guaranteed - but by pricing conservatively, we aim to create meaningful upside for each investor.

We can't wait to have you along for the Tribel journey!
