

INVEST IN MIKASHBOKS

App for community savings groups

LEAD INVESTOR

Jez Etherington

I love investment opportunities that genuinely make a difference to poor and marginalised communities. Not only that, but I get excited about great tech and passionate, talented leadership. This is why I'm delighted to be a lead investor for MikashBoks. MikashBoks has developed a game-changing, pro-poor fintech solution to address the challenges of informal community savings groups and create pathways to financial services. Informal savings groups are one of the biggest financial markets in the world yet to benefit from mass digitisation, and there is a unique win-win investment opportunity with MikashBoks. They have an award-winning app - winning second place at the MIT Fintech Startup Challenge and were a finalist in the Harvard President's Innovation Challenge. Last, but not least, the founder has deep experience of solving challenges for the financially excluded through technology, and there is high calibre global investment management leadership on the board too.

Invested \$33,500 this round

Highlights

- 1 Huge target market of 500m unbanked around the world who save in groups - all offline today
 - 2 We make saving and borrowing easy and safe & our users get access to better financial services
 - 3 Over 1,000 users after first 3 weeks of launch in Sierra Leone; 14,000 users in Nigeria
 - 4 Founder won Queen's award for a payments solution to help end ebola crisis in Sierra Leone
-

Pitch

Executive Summary

Transforming the financial experience of the last billion

The Opportunity

With an estimated **\$500B USD**¹ in annual transactions, peer-based saving & lending groups represent perhaps the largest financial market yet to benefit from digitisation.

Our Solution

A platform that provides a **safe and connected way** for groups to save and borrow, **digitize** their billion+ transactions, and **access formal financial linkages**

Team & Rollout

With a successful launch in Sierra Leone and live NGO deployments in Sierra Leone, Nigeria and Ethiopia, closing the **remaining \$260k** of our seed funding round will enable us to start scaling up.

Money Circles, ROSCA, Tandas in North America

Gam'eya in the MENAs

Hui (會), Chit Funds In Asia

SUSU, VSLA, Stokvel in Africa

Tandas, Cundina, Polla in Latin America

The Problem

Current processes make saving and lending groups difficult for members and sponsors – this limits their

impact and scalability

Onerous

Coordinating, bookkeeping, safeguarding records & assets is taxing and hard.

Error-prone

Calculations are difficult and a source of dispute.

Unsafe

Cash stored insecurely and offline records are prone to loss and fraud.

Group members remain...

...locked out of formal finance

Our Solution

Our Solution

An app that brings saving and lending groups online.

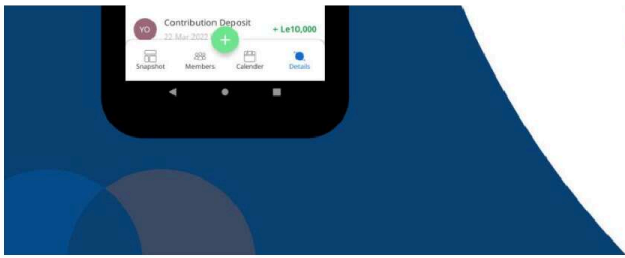

Makes saving & lending easier and safer for users & sponsors.

Users manage and transact with their saving groups, replacing offline recordkeeping.

Gives the excluded access to a full range of financial services.

Users build reputation & financial profiles, and are connected to a marketplace of financial institutions providing fair opportunities

homesplice of financial institutions providing fair opportunities like loans and insurance.

How it Works

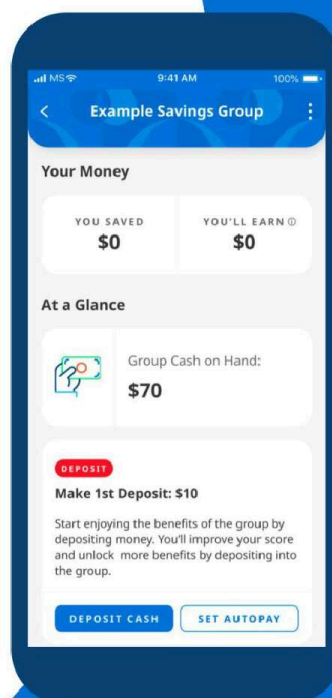

Providing a bridge from informal to formal financial services

User Journey

Create a group; specify how members deposit, withdraw, and optionally borrow.

- Create Group
- Invite Peers
- Transact
- Borrow
- Achieve

User Story

Jane and friends start a "Business Fund". Each saves \$100 weekly and can borrow to buy supplies.

Mary's friends start a fund, each contributing \$100 during the week and on Saturdays take turns at cashing it all out.

Benefits and Impact

Reliability

"All the calculations took a long time. I made mistakes and people got angry. **Now, MiKashBoks does it all for me.**" -Mohamed, SUSU Admin

Trust

"I don't trust what someone else writes in a book, but when I get a message on my phone telling me what I have, **I trust that.**" -Mahmoud, Member

Empowerment

"In my digital SUSU group, we can save and borrow **on our own terms.**" -Kodice, Member

Access

"We don't have visibility into these SUSU groups. With a transaction history, it'll make it much **easier for us to open accounts and give loans.**" - Nelson, Director at Apex Bank

Better access → Save more → Increased resilience

Business and distribution model

Business Model

Fees

Distribution model: two customer segments

	Rural communities	Urban groups
Product	Digital ledger (initially)	Digital wallet
Access	Through NGOs	Direct marketing
Pros	<ul style="list-style-type: none"> Rapid scale potential Efficient distribution (ToT model) 	Engaged users
Cons	Less engaged users	<ul style="list-style-type: none"> Incremental user acquisition Overhead (country registration, integrations)

The Team

Leadership Team

Simon Levell
CEO

- 25+ years business development @ Capital Group
- Board of Truestone, impact investment firm in W. Africa
- MBA, London Business School
- Located in London, UK

Salton Massally
CTO

- Queen's Young Leader recipient
- Creator of OpenG2P, an open-source digital cash transfer for govt.
- Mobilized payments to health workers during the Ebola crisis in Sierra Leone
- Located in New Delhi, India

Nki Nafisa Jones
Comms and marketing

- Background in digital campaigning and sexual and reproductive rights (SRHR) advocacy
- Pursuing Masters in Public Relations at University of the Arts, London
- Located in Freetown, SL

Bruce Martinez
Head of Deployment

- Former Implementation Lead @ Kiva Protocol
- 10+ years with NGOs and community orgs for impactful interventions
- Amazon last-mile Logistics Manager
- Located in Freetown, SL

Salton's journey

Solving challenges for the unbanked through technology

- **2014:** Launched iDT Labs, a West African focused ICT 4 Development start-up.
- **2015:** Developed mobile based hazard payment solution for 30,000 frontline healthcare workers that was integral to helping end Sierra Leone Ebola crisis.
- **2016:** Won the International Disaster Relief Award at the Prince's Trust Business in the Community's Responsible Business Gala.
- **2017:** Awarded by HM Queen Elizabeth II as a Queen's Young Leader.
- **2018:** Joined Kiva as Global Deployment Lead & helped launch Africa's first blockchain based Nation Digital Identity Platform.
- **2019:** Secured a UNCDF grant to prototype MiKashBoks (MKB).
- **2020-21:** 1st MKB pilot with CARE Int. and raised seed funding.

theguardian

How software developers helped end the Ebola epidemic in Sierra Leone

Milestones and priorities

Traction so far

Direct

- Launched in Sierra Leone in August 2023
- Acquired 1,200 users in first 3 weeks of campaign
- >5,000 new followers on Facebook after 3 days

NGO partnerships

- **Live deployments:**
 - 16,500 users with 3 NGO partners in Nigeria, Sierra Leone and Ethiopia (combined revenue of \$35,000)
- **Pipeline:**
 - 6 contracts pending funding approval totalling 300,000 users and over \$500,000 of revenue

21

Milestones to Date

2019-2020

- Built core platform and prototype app
- Initial user testing
- UNCDF grant

2021

- Built Minimum Viable Product (MVP)
- Ran 8 month pilots with CARE International in Sierra Leone, NGOs in Nigeria

2022

- App went live on Playstore
- Integrated with mobile money platform in Sierra Leone and initiated Early Access campaign
- Won MIT Fintech Startup Competition

2023 YTD

- Full launch in Sierra Leone
- NGO deployments in Sierra Leone, Nigeria, Ethiopia
- Completed USSD access via mobile money partners

- Incorporated MiKashBoks, Inc and raised pre-seed funding

- Hired CEO and deployment lead

Competition silver place, award from Harvard Social Impact Fund Fellowship

- Hired sales and marketing leads
- First revenues

- Built customer support approaches

- Designed customer incentive programs

Closing out the seed round

Completing the remainder of the seed round will enable us to capitalise on that momentum and start scaling up

- Full launch / scale-up in Sierra Leone, Nigeria
- Target 2-3 big and well-funded INGO deployments to build scale and revenue
- Launch in 1-2 additional countries with good digital infrastructure, leveraging distribution infrastructure of INGOs, payment aggregators & digital banks
- Partner with at least 1 financial institution to prove the credit scoring / lending model
- Increase capacity in engineering, go-to-market, local deployment, customer support and infrastructure / financial management to give us a robust platform for success.

Summary

Transforming the financial experience of the last billion

- **This is a big market - \$500bn of transactions per year globally**
- **MiKashBoks harnesses the financial power of community savings groups**
- **We are gaining momentum and are ready to scale**
