Business Description

Smart Kitchens provides restaurateurs private ghost kitchen rentals for a fraction of the cost of brick and mortar. Smart Kitchens is a great starting point for new food operators or national brands that would like to increase their market reach.

Smart Kitchens **covers the buildout costs for restaurateurs**, enabling them to start operations with minimal capital. Smart Kitchens (Irvine) opened their first location in Orange County on March 21, 2020 just one week after the pandemic began and has showed tremendous growth since the start. Smart Kitchens first location was the 1st Ghost Kitchen concept to open in Orange County. Smart Kitchens 1.0 generated over \$1 million dollars in annual sales revenue in 2022 and continues to grow. Our 3-year run rate has been at a 100% occupancy level.

Smart Kitchens is opening a new location in Lake Forest, California called Smart Kitchens 2.0. They are beginning the process of renovating a new building into the same ghost kitchens they built at their first location.

Kitchen rental sizes vary between 160-800 sq ft and range in price between \$3,000-\$8,000 a month. Smart Kitchen allows restaurants a more rapid, cost-effective geographic expansion. Traditional restaurants cost upwards of \$250,000 to open, and such openings take several months. Smart Kitchens cost as little as \$10,000 in start-up costs and allow for a health department approved kitchen in as little as 3 weeks.

Smart Kitchens is opening a new location in Lake Forest, California (less than 1 mile from the Irvine Spectrum); Herein referred to as Smart Kitchens 2.0 (16 kitchens). Smart Kitchens recently rented a \$4.15M office building and are beginning the process of renovating and converting the building into Smart Kitchens 2.0; a ghost kitchen and food court facility.

Form C Submission

Problem

Smart Kitchens 2.0 (16 kitchen rentals) is strategically positioned to address a fundamental challenge facing the food industry—the **daunting barriers to entry and expansion for both new and established restaurateurs**. Traditional brick-and-mortar restaurants incur substantial financial burdens, often exceeding \$250,000 in startup costs, and necessitate prolonged timelines for construction and regulatory compliance. The conventional model is fraught with inefficiencies, leading to extended periods of revenue generation and hindering the ability to swiftly adapt to evolving market demands. This industry-wide problem is exacerbated by the post-pandemic landscape, where safety concerns and changing consumer behaviors are reshaping the dynamics of the food delivery and pick-up sector.

Solution

Smart Kitchens 2.0 (16 kitchen rentals) offers a transformative solution to the challenges faced by the food industry, leveraging the proven success of its predecessor, Smart Kitchens 1.0. Recognizing the financial and operational hurdles that traditional brick-and-mortar restaurants encounter, Smart Kitchens provides restaurateurs with private ghost kitchen rentals at a fraction of the cost, mitigating the substantial expenses associated with building and maintaining physical establishments. Smart Kitchens 1.0 (15 Kitchen rentals) stands as a testament to the efficacy of this solution, having generated over \$1 million in annual sales revenue in 2022 and 1.2M in 2023, with a consistent 100% occupancy rate over a three-year period. The demonstrated success of Smart Kitchens 1.0 serves as a compelling case for the scalability and profitability of the concept.

Location, Location, Location

The building is immediately off the 5 Freeway at Lake Forest Drive. This offering has the benefit of a less-expensive Lake Forest address while being extremely close to the heart of the Irvine Spectrum

The expansion to Smart Kitchens 2.0 (16 kitchens) in Lake Forest, California underscores the replicability of the model. With a strategic \$4.15M million investment in an office space, Smart Kitchens is poised to renovate the building into a dynamic hub of ghost kitchens. The company's innovative approach not only significantly reduces the startup costs for new food operators but also expedites the launch process, enabling a health department approved kitchen in as little as three weeks. Furthermore, Smart Kitchens 2.0 introduces an exciting and disruptive concept in the food delivery industry with its virtual food hall and multi-restaurant delivery platform. By redefining the way customers experience variety, convenience, and safety in their food orders, Smart Kitchens 2.0 positions itself at the forefront of a transformative movement that is set to revolutionize the way people enjoy their meals.

Business Model

Smart Kitchens 2.0 (16 Kitchens) presents a compelling and sustainable business model that leverages the success of its established predecessor, Smart Kitchens 1.0 (15 kitchens). At the core of their model is the provision of private ghost kitchen rentals to restaurateurs at a fraction of the cost associated with traditional brick-and-mortar establishments. This unique offering not only addresses the financial barriers for new entrants and established brands but also accelerates their market reach with a cost-effective geographic expansion strategy. The proven success of Smart Kitchens 1.0, which generated over \$1 million in annual sales revenue in 2022 and 2023 with a consistent 100% occupancy rate over three years, serves as a testament to the viability and scalability of the business model.

Generating Revenues:

1. 1 year (minimum) Kitchen Licensing Agreements (with extended year options)
2. Rents range from \$3,000-\$8,000 per month
3. Renters pay cam fees which cover all utility costs and leaves money left over for repairs.
4. Smart Kitchens captures a percentage of food orders (10%) pick up and to-go orders (20%) on delivery orders

Smart Kitchens 2.0's revenue streams are diversified, further enhancing the attractiveness of their investment proposition. This multifaceted revenue approach, combined with a commitment to efficiency and safety, positions Smart Kitchens 2.0 as an innovative player in the evolving landscape of the food industry, offering investors a unique opportunity to participate in a disruptive business model with a proven track record.

Market Projection

Smart Kitchens 2.0 enters a market with robust growth potential, as highlighted by the compelling market projections in the ghost kitchen industry. The global Ghost Kitchen market, estimated at USD 43.1 billion in 2019, signals a substantial and expanding opportunity. Notably, the United States has experienced a 25% increase in the number of ghost kitchens from 2019 to 2020, underlining the rising demand for innovative and cost-effective solutions in the food industry. In 2020, the pick-up/delivery revenue for ghost kitchens averaged an impressive \$487,000, emphasizing the financial viability of this model.

Major urban centers such as NYC and LA boast over 100 ghost kitchens each, indicating a widespread adoption of this concept in key markets. The projections also highlight a significant expected jump of over 60% in delivery sales made by restaurants and grocery stores by 2022. Furthermore, the willingness of 40% of U.S. consumers to pay for delivery from their favorite restaurant's ghost kitchen underscores the value consumers place on convenience and variety. Internationally, the explosive growth of ghost kitchens in China by more than 900% since 2018 and the presence of 320 ghost kitchens in the UAE, 60% of which are independent brands, showcase the global scalability and appeal of the ghost kitchen model. Smart Kitchens 2.0, with its proven success through Smart Kitchens 1.0, is strategically positioned to capture a substantial share of this flourishing market.

Competition

Smart Kitchens 2.0 operates in a dynamic market with notable opportunities and competition. While Smart Kitchens 1.0 has demonstrated impressive success and paved the way for the model's viability, it's crucial to acknowledge the competitive landscape shaping the ghost kitchen industry. **The global Ghost Kitchen market, estimated at USD 43.1 billion in 2019, signifies a lucrative space that has attracted various players aiming to capitalize on the rising demand for innovative food service solutions.**

In the United States, there has been a 25% increase in the number of ghost kitchens from 2019 to 2020, indicating a growing trend that has drawn the attention of multiple entrepreneurs and businesses. Major metropolitan areas like NYC and LA each house over 100 ghost kitchens, showcasing a concentration of competition in key markets. Furthermore, the expected jump of more than 60% in delivery sales made by restaurants and grocery stores by 2022 underscores the fierce competition in the broader food delivery space, with various models vying for consumer attention and market share. Smart Kitchens 2.0, building on the success of its predecessor, will need to strategically position itself, emphasizing its unique selling points, operational efficiency, and innovative approach to stay ahead in this competitive landscape and capture a significant share of the expanding market.

Traction & Customers

Smart Kitchens 2.0 will house (16) ghost kitchens and stands on the solid foundation of the remarkable success achieved by its predecessor, Smart Kitchens 1.0. The inaugural Smart Kitchens location in Irvine, launched just one week after the onset of the pandemic in March 2020, has experienced tremendous growth and success. Smart Kitchens 1.0, being the pioneer Ghost Kitchen concept in Orange County, has demonstrated an impressive three-year run rate with a consistent 100% occupancy level. This remarkable traction showcases the effectiveness of the business model and the growing demand for private ghost kitchen rentals in the market.

Building on the traction and achievements of Smart Kitchens 1.0 (which houses 15 kitchens), Smart Kitchens 2.0 (will house 16 kitchens) and is positioned to replicate and expand upon this success. The decision to open a new location in Lake Forest, California, underscores the confidence in the proven concept and addresses the increasing demand for cost-effective and efficient solutions in the food industry. As Smart Kitchens 2.0 embarks on this new venture, investors can take note of the robust traction achieved by Smart Kitchens 1.0, providing a tangible demonstration of the scalability, profitability, and market demand for the innovative ghost kitchen rental model.

Investors

Smart Kitchens 2.0 is a new entity and has not raised any funds to this point. Smart Kitchens 2.0 will be using this raise to begin building out 16 kitchens rentals; in their newly rented building located at 23072 Lake Center Drive, Lake Forest CA 92630. The facility has great freeway access, is located less than a 1 mile drive from the Irvine Spectrum and is surrounded by 7 hotels with dire need for more food options.

Smart Kitchens will be raising 1.235M for the buildout of these (16) kitchens and will be offering 25% of the company for this investment round. This investment round is for the buildout of (16) kitchens (Phase 1 buildout). After completed will generate over 1M in revenues and 50K+ in monthly net revenues.

Dividends and Exit Strategy

- \$40,000 net profit per month (if achieved) would be paid out annually as a dividend.
- If acquired this type of business is selling for a possible 5-7X revenues.
