

Dice Cream Robotics, Inc.

ANNUAL REPORT

3415 S SEPULVEDA BLVD

LOS ANGELES, CA 90034

(317) 294-2564

www.dice-cream.com

This Annual Report is dated April 25, 2024.

BUSINESS

Company Name: Dice Cream Robotics, Inc. (or the "Company").

Business Activities: Dice Cream Robotics specializes in the development of an autonomous ice cream parlor, merging the enjoyment of ice cream with advanced robotics technology. The Company is currently crafting a prototype for a planned launch in 2024.

Business Model: Dice Cream Robotics' proposed business model focuses on offering autonomous ice cream parlor pods under the Dice Cream brand, alongside white-labeled versions for other businesses. Revenue is anticipated to be generated through a Robotics-as-a-Service (RaaS) model and royalty fees on sales. This approach aims at reducing operational costs traditionally associated with ice cream parlors.

Target Customer Base: The Company aims to target high-traffic areas such as universities, malls, apartments, and arenas, positioning its product as an innovative solution in these settings.

Product/Service Details: Dice Cream Robotics is developing an autonomous ice cream parlor pod. This pod is designed to feature a robotic arm and additional robotic components to handle various tasks, offering up to 12 flavors and multiple combination possibilities with toppings and sauces. The product is in the development stage with a working prototype.

Market Scope: The Company's initial focus is on the national market.

Reasons to Invest: Dice Cream Robotics presents its approach as a potential game-changer in the food automation and ice cream industries, focusing on cost management and innovative technology. We believe the Company's leadership team, with extensive experience in related fields, is positioned to leverage its expertise in this venture.

Entity History: Dice Cream Robotics was established on September 1, 2023, under Delaware law and headquartered in Los Angeles, California. The Company represents a new entrant in the food automation sector.

Intellectual Property Specifics: The technology being developed by Dice Cream Robotics is aimed at showcasing innovation in autonomous food service solutions.

CEO's Concurrent Employment

The CEO of Dice Cream (Jack Yang) also works as a Consultant for Systems Engineering for Booz Allen Hamilton (Booz Allen) and currently splits time between the two roles, 25 hours a week and 40 hours a week, respectively. Jack leads all business aspects of the operations at Dice Cream and provides high-level guidance on engineering and software development at BoozAllen. Jack is not currently paid a salary for his work at Dice Cream but is paid a salary for his work at Booz Allen.

A plan for Jack to transition fully to a full-time role at Dice Cream has been reviewed and accepted by the management teams at both Dice Cream and Booz Allen. The plan is as follows:

Currently, Dice Cream does not pay salaries to C-level executives (Jack, Kevin Morris, Richard Wu, Christopher Louie, and Nick Degnan) to conserve cash balances to devote to completing product development. With the StartEngine

fundraise effort, the Company expects to be able to complete the development of its product after approximately 6 months, and then begin deploying its robots to begin generating revenue. At such time, Jack can then begin receiving cash compensation from Dice Cream and begin transitioning to concentrate his efforts on the Company full-time.

Name: Class A Common Stock

Type of security sold: Equity

Final amount sold: \$2.00

Number of Securities Sold: 200,000

Use of proceeds: Initial startup business capital

Date: September 01, 2023

Offering exemption relied upon: Section 4(a)(2)

Name: Class A Common Stock

Type of security sold: Equity

Final amount sold: \$9.80

Number of Securities Sold: 9,800,000

Use of proceeds: Initial startup business capital

Date: September 12, 2023

Offering exemption relied upon: Section 4(a)(2)

REGULATORY INFORMATION

The company has not previously failed to comply with the requirements of Regulation Crowdfunding;

**MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATION**

Operating Results - 2023 Compared to 2022

How long can the business operate without revenue:

The Company will be required to raise additional capital for the next 18-24 months in order to sustain operations, as it does not believe it will achieve meaningful revenue until that point.

Foreseeable major expenses based on projections:

The majority of our expenses will be related to research and development and general operations as we build the next versions of our ice cream machine.

These expenses include hardware to develop the machine (20% of operating expenses), software development to complete the ordering apparatus (10% of expenses), paying for engineering labor to build the machine (40% of expenses), rent payments to store and work on the machine (10%) and administrative costs (10%). We expect total operational expenses to total \$4,000,000 before our product is available to the public.

Future operational challenges:

Our biggest challenges will likely be related to building a machine that is operationally efficient and that will also be able to function profitably, deploying and completing beta testing of the machine, and scaling for public rollout expected in late 2025/early 2026.

Future challenges related to capital resources:

We believe we will need to raise at least over \$5 million if not more, in order to achieve meaningful revenue. The market is still in a period of uncertainty, and there is no guarantee that we will be able to raise all of the capital needed to achieve profitability in the business.

Future milestones and events:

Deploying our next version of the machine, our Beta unit, is our next big test and milestone, as this will be a street-side version that will be able to sell ice cream to the public, albeit in a controlled and monitored setting.

Liquidity and Capital Resources

At December 31, 2023, the Company had cash of \$2,940.00. [*The Company intends to raise additional funds through an equity financing.*]

Debt

Creditor: Massive Dynamic LLC

Amount Owed: \$249,096.00

Interest Rate: 6.0%

Maturity Date: October 13, 2024

The Company entered into a promissory note with Massive Dynamics LLC as of September 1, 2023, for a principal amount of \$249,096. The note has an interest rate of 6% and a maturity date of October 13, 2024. The total indebtedness as of the inception date is the same as the principal amount, \$249,096, with accrued interest of \$8,718.

DIRECTORS, EXECUTIVE OFFICERS AND SIGNIFICANT EMPLOYEES

Our directors and executive officers as of the date hereof, are as follows:

Name: Jack Yang

Jack Yang's current primary role is with Booz Allen Hamilton . Jack Yang currently services 40 hours per week in their role with the Issuer.

Positions and offices currently held with the issuer:

Position: Chief Executive Officer

Dates of Service: May, 2023 - Present

Responsibilities: Oversight of product development, strategic planning, and business development. No salary currently taken. Jack currently splits his time working for Dice Cream and Booz Allen Hamilton, spending 15-25 hours a week with Dice Cream. Please see the Company Overview section, above, for additional details.

Other business experience in the past three years:

Employer: Booz Allen Hamilton

Title: Consultant for Systems Engineering

Dates of Service: August, 2018 - Present

Responsibilities: Oversees an engineering team, and coordinates directly in activities and projects involving software development. Receives a \$200K salary.

Name: Kevin William Morris

Kevin William Morris's current primary role is with Atlas Rd. Kevin William Morris currently services 5 hours per week in their role with the Issuer.

Positions and offices currently held with the issuer:

Position: Chief Strategy Officer

Dates of Service: September, 2023 - Present

Responsibilities: Heading up fundraising and business development. No direct salary taken. My firm, Atlas Rd, is paying \$10k/month to manage fundraising activities. Equity package is 2%.

Other business experience in the past three years:

Employer: Atlas Rd

Title: CEO

Dates of Service: November, 2022 - Present

Responsibilities: Head of company. Kevin spends 35 hours a week with Atlas Rd.

Other business experience in the past three years:

Employer: Miso Robotics

Title: CFO

Dates of Service: September, 2019 - October, 2022

Responsibilities: Head of fundraising and finance

Other business experience in the past three years:

Employer: Vebu Labs (Formerly WaveMaker Labs)

Title: President

Dates of Service: March, 2019 - October, 2022

Responsibilities: Head of fundraising and finance

Other business experience in the past three years:

Employer: Ally Robotocis

Title: Board Member

Dates of Service: December, 2021 - November, 2022

Responsibilities: Oversaw fundraising efforts

Other business experience in the past three years:

Employer: Bobacino

Title: Co-founder and CFO

Dates of Service: January, 2020 - October, 2022

Responsibilities: Head of fundraising and finance

Other business experience in the past three years:

Employer: Graze, Inc.

Title: CFO

Dates of Service: September, 2019 - October, 2022

Responsibilities: Head of fundraising and finance

Name: Chang Jy Richard Wu

Chang Jy Richard Wu's current primary role is with Advance Development llc. Chang Jy Richard Wu currently services 10 hours per week in their role with the Issuer.

Positions and offices currently held with the issuer:

Position: Founder, CFO and Director

Dates of Service: October, 2022 - Present

Responsibilities: I am the principal of the company, came up with the idea, and funded the initial seed capital. No salary or equity compensation.

Other business experience in the past three years:

Employer: Advance Development llc

Title: general manager

Dates of Service: January, 2016 - Present

Responsibilities: i oversee development progress and finish entitlement process for the development. Richard spends 30 hours a week with Advance Development.

Name: Christopher Louie

Christopher Louie's current primary role is with Brndmkrs. Christopher Louie currently services 5 hours per week in their role with the Issuer.

Positions and offices currently held with the issuer:

Position: Chief Marketing Officer

Dates of Service: September, 2023 - Present

Responsibilities: Supporting all brand, content and marketing efforts for the fundraise and company in total. Salary: TBD, 25,000 options, vest immediately, works about 5 hours per week for Dice Cream

Other business experience in the past three years:

Employer: Brndmkrs

Title: CEO

Dates of Service: February, 2019 - Present

Responsibilities: Run all creative for the company. Spends about 5 hours a week working for Brndmkrs

Other business experience in the past three years:

Employer: Cue Inc.

Title: Content Studio Partner

Dates of Service: November, 2013 - Present

Responsibilities: Helped to develop and execute the company’s brand narrative, works about 10 hours per week for Cue Inc.

Other business experience in the past three years:

Employer: Walter Robot Studio

Title: Co-Founder and Director

Dates of Service: August, 2007 - Present

Responsibilities: Creating art through multiple mediums, including film, animation, art, and sculpture, working 5 hours a week for Walter Robot Studio

Other business experience in the past three years:

Employer: Bobacino

Title: Head of Marketing

Dates of Service: August, 2020 - January, 2024

Responsibilities: Helped to develop and execute the company’s brand narrative

Name: Nicholas Michael Degnan

Nicholas Michael Degnan's current primary role is with Unlimit Ventures, LLC. Nicholas Michael Degnan currently services 35 hours per week in their role with the Issuer.

Positions and offices currently held with the issuer:

Position: CTO

Dates of Service: July, 2023 - Present

Responsibilities: Head up technical and engineering development of the product, drawing from a background in robotics and automation. No Salary. My company, Unlimit Ventures, LLC, will be the engineering development team, including myself, and will be compensated based on negotiated rates. Equity package \$25k, works about 5 hours a week for Dice Cream

Other business experience in the past three years:

Employer: Unlimit Ventures, LLC

Title: Founder & CEO

Dates of Service: March, 2022 - Present

Responsibilities: Run a team of engineering and product development professionals. Spends about 35 hours per week for Unlimit Ventures

Other business experience in the past three years:

Employer: Wavemaker Labs, Inc.

Title: COO

Dates of Service: May, 2019 - February, 2022

Responsibilities: Run operations for a venture studio comprised of engineering and product development professionals focused on food automation and robotics.

Other business experience in the past three years:

Employer: Miso Robotics

Title: Board Director

Dates of Service: August, 2022 - February, 2023

Responsibilities: Board director representing shareholders

Other business experience in the past three years:

Employer: Graze Mowing

Title: CTO

Dates of Service: June, 2020 - February, 2022

Responsibilities: Led engineering and development efforts for the company

Other business experience in the past three years:

Employer: ROBOjuice

Title: Advisor

Dates of Service: May, 2022 - Present

Responsibilities: Advised company on challenges related to food robotics space.

PRINCIPAL SECURITY HOLDERS

Set forth below is information regarding the beneficial ownership of our Common Stock, our only outstanding class of capital stock, as of December 31, 2023, by (i) each person whom we know owned, beneficially, more than 10% of the outstanding shares of our Common Stock, and (ii) all of the current officers and directors as a group. We believe that, except as noted below, each named beneficial owner has sole voting and investment power with respect to the shares listed. Unless otherwise indicated herein, beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and includes voting or investment power with respect to shares beneficially owned.

Title of class: Class A Common Stock

Stockholder Name: MDX Holdings LLC (Richard Wu is sole Manager & owns 100%)

Amount and nature of Beneficial ownership: 9,800,000

Percent of class: 98.0

RELATED PARTY TRANSACTIONS

Name of Entity: Massive Dynamics LLC

Names of 20% owners: Richard Wu

Relationship to Company: 20%+ Owner

Nature / amount of interest in the transaction: Promissory note

Material Terms: The Company has received 1 promissory note from the related party Massive Dynamics LLC in the amount of \$249,096. The Company has also received 2 notes from the same related party in total amount of \$200,000 that are still not funded.

OUR SECURITIES

The company has authorized Class A Common Stock, and Class B Common Stock. As part of the Regulation Crowdfunding raise, the Company will be offering up to 2,500,000 of Class B Common Stock.

Class A Common Stock

The amount of security authorized is 10,000,000 with a total of 10,000,000 outstanding.

Voting Rights

Each share of Class A Common Stock has one vote in stockholder meetings and actions.

Material Rights

Dividends: Entitled to receive dividends when declared by the Board of Directors. If dividends are in the form of Common Stock, they will receive Class A shares or rights.

Liquidation Rights: Share equally with Class B stockholders in the distribution of assets in the event of liquidation, dissolution, or winding up of the Corporation.

Voting Rights: Each share of Class A Common Stock has one vote in stockholder meetings and actions.

Effect of Subdivision or Combination: If Class A shares are subdivided or combined, the same action must be taken for Class B shares.

Rights in Mergers or Other Transactions: Entitled to the same kind and amount of stock, securities, cash, or other property as Class B stockholders in mergers, consolidations, or similar transactions.

Equal Status: Except for the specific rights and preferences outlined, both classes of stock have the same rights, powers, privileges, and rank equally in all other respects.

Class B Common Stock

The amount of security authorized is 10,000,000 with a total of 0 outstanding.

Voting Rights

Class B Common Stock does not have voting rights, except as required by law only.

Material Rights

Dividends: Entitled to receive dividends on a pari passu basis with Class A stockholders. If dividends are in the form of Common Stock, they will receive Class B shares or rights.

Liquidation Rights: Share equally with Class A stockholders in the distribution of assets in the event of liquidation, dissolution, or winding up of the Corporation.

Voting Rights: Generally, Class B Common Stock does not have voting rights. Voting rights are granted only in specific circumstances as required by law.

Effect of Subdivision or Combination: If Class B shares are subdivided or combined, the same action must be taken for Class A shares.

Rights in Mergers or Other Transactions: Entitled to the same kind and amount of stock, securities, cash, or other property as Class A stockholders in mergers, consolidations, or similar transactions.

Equal Status: Except for the specific rights and preferences outlined, both classes of stock have the same rights,

powers, privileges, and rank equally in all other respects.

What it means to be a minority holder

As a minority holder of [Security Name] of the Company, you will have limited rights in regard to the corporate actions of the Company, including additional issuances of securities, company repurchases of securities, a sale of the Company or its significant assets, or company transactions with related parties. Further, investors in this offering may have rights less than those of other investors and will have limited influence on the corporate actions of the Company.

Dilution

Investors should understand the potential for dilution. The investor’s stake in a company could be diluted due to the Company issuing additional shares. In other words, when the Company issues more shares, the percentage of the Company that you own will go down, even though the value of the Company may go up. You will own a smaller piece of a larger company. This increase in the number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round, or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible bonds, preferred shares or warrants) into stock.

If the Company decides to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if the Company offers dividends, and most early-stage companies are unlikely to offer dividends, preferring to invest any earnings into the Company).

The type of dilution that hurts early-stage investors most occurs when the company sells more shares in a “down round,” meaning at a lower valuation than in earlier offerings.

If you are making an investment expecting to own a certain percentage of the company or expecting each share to hold a certain amount of value, it’s important to realize how the value of those shares can decrease by actions taken by the company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.

RISK FACTORS

Uncertain Risk An investment in the Company (also referred to as “we”, “us”, “our”, or the “Company”) involves a high degree of risk and should only be considered by those who can afford the loss of their entire investment. Furthermore, the purchase of any securities should only be undertaken by persons whose financial resources are sufficient to enable them to indefinitely retain an illiquid investment. Each investor in the Company should research thoroughly any offering before making an investment decision and consider all of the information provided regarding the Company as well as the following risk factors, in addition to the other information in the Company’s Form C. The following risk factors are not intended, and shall not be deemed to be, a complete description of the commercial, financial, and other risks inherent in the investment in the Company. Our business projections are only projections There can be no assurance that the Company will meet its projections. There can be no assurance that the Company will be able to find sufficient demand for its product or service, that people think it’s a better option than a competing product or service, or that we will be able to provide a product or service at a level that allows the Company to generate revenue, make a profit, or grow the business. Any valuation is difficult to assess The valuation for the offering was established by the Company. Unlike listed companies that are independently valued through market-driven stock prices, the valuation of private companies, especially startups, is difficult to assess, may not be exact, and you may risk overpaying for your investment. The transferability of the Securities you are buying is limited You should be prepared to hold this investment for several years or longer. For the 12 months following your investment, there will be restrictions on the securities you purchase. More importantly, there are a limited number of established markets for the resale of these securities. As a result, if you decide to sell these securities in the future, you may not be able to find, or may have difficulty finding, a buyer, and you may have to locate an interested buyer when you do seek to resell your investment. The Company may be acquired by an existing player in the industry. However, that may never happen or it may happen at a price that results in you losing money on this investment. Your investment could be illiquid for a long time You should be prepared to hold this investment for several years or longer. For the 12 months following your investment, there will be restrictions on how you can resell the securities you receive. More importantly, there are limited established markets for these securities. As a result, if you decide to sell these securities in the future, you may not be able to find a buyer. The Company may be acquired by an existing player in the same or a similar industry. However, that may never happen or it may happen at a price that results in you losing money on this investment. The Company may undergo a future change that could affect your investment The Company may change its business, management or advisory team, IP portfolio, location of its principal place of business or production facilities, or other changes that may result in adverse effects on your investment. Additionally, the Company may alter its corporate structure through a merger, acquisition, consolidation, or other restructuring of its current corporate entity structure. Should such a future change occur, it would be based on management’s review and determination that it is in the best interests of the Company. Your information rights are limited with limited post-closing disclosures The Company is required to disclose certain information about the Company, its business plan, and its anticipated use of proceeds, among other things, in this offering. Early-stage companies may be able to provide only limited information about their business plan and operations because it does not have fully developed operations or a long history to provide more disclosure. The Company is also only obligated to file information annually regarding its business, including financial statements. In contrast to publicly listed companies, investors will be entitled only to post-offering information that is required to be disclosed to them pursuant to applicable law or regulation, including Regulation CF. Such disclosure generally requires only that the Company issue an annual report via a Form C-AR. Investors are generally not entitled to interim updates or financial information. Some early-stage companies may lack professional guidance Some companies attribute their

success, in part, to the guidance of professional early-stage advisors, consultants, or investors (e.g., angel investors or venture capital firms). advisors, consultants, or investors may play an important role in a company through their resources, contacts, and experience in assisting early-stage companies in executing their business plans. An early-stage company primarily financed through Regulation Crowdfunding may not have the benefit of such professional investors, which may pose a risk to your investment. We may not have enough capital as needed and may be required to raise more capital. We anticipate needing access to credit in order to support our working capital requirements as we grow. It is a difficult environment for obtaining credit on favorable terms. If we cannot obtain credit when we need it, we could be forced to raise additional equity capital, modify our growth plans, or take some other action. Issuing more equity may require bringing on additional investors. Securing these additional investors could require pricing our equity below its current price. If so, your investment could lose value as a result of this additional dilution. In addition, even if the equity is not priced lower, your ownership percentage would be decreased with the addition of more investors. If we are unable to find additional investors willing to provide capital, then it is possible that we will choose to cease our sales activity. In that case, the only asset remaining to generate a return on your investment could be our intellectual property. Even if we are not forced to cease our sales activity, the unavailability of credit could result in the Company performing below expectations, which could adversely impact the value of your investment. Terms of subsequent financings may adversely impact your investment We will likely need to engage in common equity, debt, or preferred stock financings in the future, which may reduce the value of your investment in the Company. Interest on debt securities could increase costs and negatively impact operating results. Preferred stock could be issued in series from time to time with such designation, rights, preferences, and limitations as needed to raise capital. The terms of preferred stock could be more advantageous to those investors than to the holders of common stock or other securities. In addition, if we need to raise more equity capital from the sale of Common Stock, institutional or other investors may negotiate terms that are likely to be more favorable than the terms of your investment, and possibly a lower purchase price per security. Management's Discretion as to Use of Proceeds Our success will be substantially dependent upon the discretion and judgment of our management team with respect to the application and allocation of the proceeds of this offering. The Use of Proceeds described below is an estimate based on our current business plan. We, however, may find it necessary or advisable to re-allocate portions of the net proceeds reserved for one category to another, and we will have broad discretion in doing so. Projections: Forward Looking Information Any projections or forward-looking statements regarding our anticipated financial or operational performance are hypothetical and are based on management's best estimate of the probable results of our operations and may not have been reviewed by our independent accountants. These projections are based on assumptions that management believes are reasonable. Some assumptions invariably will not materialize due to unanticipated events and circumstances beyond management's control. Therefore, actual results of operations will vary from such projections, and such variances may be material. Any projected results cannot be guaranteed. The amount raised in this offering may include investments from company insiders or immediate family members Officers, directors, executives, and existing owners with a controlling stake in the Company (or their immediate family members) may make investments in this offering. Any such investments will be included in the raised amount reflected on the campaign page. Reliance on a single service or product All of our current services are variants of one type of service and/or product. Relying heavily on a single service or product can be risky, as changes in market conditions, technological advances, shifts in consumer preferences, or other changes can adversely impact the demand for the product or service, potentially leading to revenue declines or even business failure. We may never have an operational product or service It is possible that there may never be an operational Dice Cream or that the product may never be used to engage in transactions. It is possible that the failure to release the product or service is the result of a change in business model upon the Company's making a determination that the business model, or some other factor, will not be in the best interest of the Company. In addition, the failure to launch a product or service can result in significant losses of time and resources. Even if a product or service is launched, low adoption rates can result in lackluster revenue and diminished market share. Some of our products are still in the prototype phase and might never be operational products Developing new products and technologies can be a complex process that involves significant risks and uncertainties. Technical challenges, design flaws, manufacturing defects, and regulatory hurdles can all impact the success of a product or service. It is possible that there may never be an operational product or that the product may never be used to engage in transactions. It is possible that the failure to release the product is the result of a change in business model upon the Company's making a determination that the business model, or some other factor, will not be in the best interest of the Company and its stockholders. Developing new products and technologies entails significant risks and uncertainties Competition can be intense in many markets, and a failure to keep up with competitors or anticipate shifts in market dynamics can lead to revenue declines or market share losses. We are currently in the research and development stage and have only manufactured a prototype for our Dice Cream. Delays or cost overruns in the development of our Dice Cream and failure of the product to meet our performance estimates may be caused by, among other things, unanticipated technological hurdles, difficulties in manufacturing, changes to design, and regulatory hurdles. Any of these events could materially and adversely affect our operating performance and results of operations. Supply Chain and Logistics Risks The availability of raw materials, transportation costs, and supply chain disruptions can all impact the ability to manufacture and distribute products or services, leading to lost revenue or increased costs. Products and services that are not available when customers need them can lead to lost sales and damage to the brand's reputation. Quality and Safety of our Product and Service The quality of a product or service can vary depending on the manufacturer or provider. Poor quality can result in customer dissatisfaction, returns, and lost revenue. Furthermore, products or services that are not safe can cause harm to customers and result in liability for the manufacturer or provider. Safety issues can arise from design flaws, manufacturing defects, or improper use. Minority Holder; Securities with No Voting Rights The Class B Common Stock that an investor is buying has no voting rights attached to it. This means that you will have no rights to dictate how the Company will be run. You are trusting in management's discretion in making good business decisions that will grow your investments. Furthermore, in the event of a liquidation of our company, you will only be paid out if there is any cash remaining after all of the creditors of our company have been paid out. You are trusting that management will make the best decision for the company You are trusting in management's discretion. You are buying securities as a minority holder and therefore must trust the management of the Company to make good business decisions that grow your investment. Insufficient Funds The Company might not sell enough securities in this offering to meet its operating needs and fulfill its plans, in which case it may cease operating and result in a loss on your investment. Even if we sell all the stock we are offering now, the Company may need to raise more funds in the future, and if unsuccessful in doing so, the Company will fail. Even if we do make a successful offering in the future, the terms of that offering might result

in your investment in the Company being worth less, if later investors have better terms than those in this offering. This offering involves “rolling closings,” which may mean that earlier investors may not have the benefit of information that later investors have. Once we meet our target amount for this offering, we may request that StartEngine instruct the escrow agent to disburse offering funds to us. At that point, investors whose subscription agreements have been accepted will become our investors. All early-stage companies are subject to a number of risks and uncertainties, and it is not uncommon for material changes to be made to the offering terms, or to companies’ businesses, plans, or prospects, sometimes with little or no notice. When such changes happen during the course of an offering, we must file an amendment to our Form C with the SEC, and investors whose subscriptions have not yet been accepted will have the right to withdraw their subscriptions and get their money back. Investors whose subscriptions have already been accepted, however, will already be our investors and will have no such right. Our new product could fail to achieve the sales projections we expect. Our growth projections are based on the assumption that with an increased advertising and marketing budget, our products will be able to gain traction in the marketplace at a faster rate than our current products have. It is possible that our new products will fail to gain market acceptance for any number of reasons. If the new products fail to achieve significant sales and acceptance in the marketplace, this could materially and adversely impact the value of your investment. We face significant market competition. We will compete with larger, established companies that currently have products on the market and/or various respective product development programs. They may have much better financial means and marketing/sales and human resources than us. They may succeed in developing and marketing competing equivalent products earlier than us, or superior products than those developed by us. There can be no assurance that competitors will not render our technology or products obsolete or that the products developed by us will be preferred to any existing or newly developed technologies. It should further be assumed that competition will intensify. We are competing against other recreational activities. Although we are a unique company that caters to a select market, we do compete against other recreational activities. Our business growth depends on the market interest in the Company over other activities. We are an early stage company and have not yet generated any profits. Dice Cream Robotics was formed on September 1, 2023. Accordingly, the Company has a limited history upon which an evaluation of its performance and future prospects can be made. Our current and proposed operations are subject to all business risks associated with new enterprises. These include likely fluctuations in operating results as the Company reacts to developments in its market, managing its growth and the entry of competitors into the market. We will only be able to pay dividends on any shares once our directors determine that we are financially able to do so. Dice Cream Robotics has incurred a net loss and has had limited revenues generated since inception, if any. There is no assurance that we will be profitable in the near future or generate sufficient revenues to pay dividends to our shareholders. We are an early stage company and have limited revenue and operating history. The Company has a short history, few customers, and effectively no revenue. If you are investing in our company, it’s because you think that the autonomous ice cream parlor is a good idea, that the team will be able to successfully market, and sell the product or service, that we can price them right and sell them to enough people so that the Company will succeed. Further, we have never turned a profit and there is no assurance that we will ever be profitable. We are an early stage company operating in a new and highly competitive industry. The Company operates in a relatively new industry with a lot of competition from both startups and established companies. As other companies flood the market and reduce potential market share, Investors may be less willing to invest in a company with a declining market share, which could make it more challenging to fund operations or pursue growth opportunities in the future. Intense Market Competition. The market in which the Company operates may be highly competitive, with established players, emerging startups, and potential future entrants. The presence of competitors can impact the company's ability to attract and retain customers, gain market share, and generate sustainable revenue. Competitors with greater financial resources, brand recognition, or established customer bases may have a competitive advantage, making it challenging for the company to differentiate itself and achieve long-term success. Vulnerability to Economic Conditions. Economic conditions, both globally and within specific markets, can significantly influence the success of early-stage startups. Downturns or recessions may lead to reduced consumer spending, limited access to capital, and decreased demand for the Company's products or services. Additionally, factors such as inflation, interest rates, and exchange rate fluctuations can affect the cost of raw materials, operational expenses, and profitability, potentially impacting the Company's ability to operate. Uncertain Regulatory Landscape. Due to the unestablished nature of the market the business operates within, the potential introduction of new laws or industry-specific standards can impose additional costs and operational burdens on the Company. Non-compliance or legal disputes may result in fines, penalties, reputational damage, or even litigation, adversely affecting the Company's financial condition and ability to operate effectively. We have pending patent approvals that might be vulnerable. One of the Company's most valuable assets is its intellectual property. The Company's intellectual property such as patents, trademarks, copyrights, Internet domain names, and trade secrets may not be registered with the proper authorities. We believe one of the most valuable components of the Company is our intellectual property portfolio. Due to the value, competitors may misappropriate or violate the rights owned by the Company. The Company intends to continue to protect its intellectual property portfolio from such violations. It is important to note that unforeseeable costs associated with such practices may invade the capital of the Company due to its unregistered intellectual property. Our trademarks, copyrights and other intellectual property could be unenforceable or ineffective. Intellectual property is a complex field of law in which few things are certain. It is possible that competitors will be able to design around our intellectual property, find prior art to invalidate it, or render the patents unenforceable through some other mechanism. If competitors are able to bypass our trademark and copyright protection without obtaining a sublicense, it is likely that the Company’s value will be materially and adversely impacted. This could also impair the Company’s ability to compete in the marketplace. Moreover, if our trademarks and copyrights are deemed unenforceable, the Company will almost certainly lose any potential revenue it might be able to raise by entering into sublicenses. This would cut off a significant potential revenue stream for the Company. The cost of enforcing our trademarks and copyrights could prevent us from enforcing them. Trademark and copyright litigation has become extremely expensive. Even if we believe that a competitor is infringing on one or more of our trademarks or copyrights, we might choose not to file suit because we lack the cash to successfully prosecute a multi-year litigation with an uncertain outcome; or because we believe that the cost of enforcing our trademark(s) or copyright(s) outweighs the value of winning the suit in light of the risks and consequences of losing it; or for some other reason. Choosing not to enforce our trademark(s) or copyright(s) could have adverse consequences for the Company, including undermining the credibility of our intellectual property, reducing our ability to enter into sublicenses, and weakening our attempts to prevent competitors from entering the market. As a result, if we are unable to enforce our trademark(s) or copyright(s) because of the cost of enforcement, your investment in the Company could be significantly and adversely affected. The

loss of one or more of our key personnel, or our failure to attract and retain other highly qualified personnel in the future, could harm our business. Our business depends on our ability to attract, retain, and develop highly skilled and qualified employees. As we grow, we will need to continue to attract and hire additional employees in various areas, including sales, marketing, design, development, operations, finance, legal, and human resources. However, we may face competition for qualified candidates, and we cannot guarantee that we will be successful in recruiting or retaining suitable employees. Additionally, if we make hiring mistakes or fail to develop and train our employees adequately, it could have a negative impact on our business, financial condition, or operating results. We may also need to compete with other companies in our industry for highly skilled and qualified employees. If we are unable to attract and retain the right talent, it may impact our ability to execute our business plan successfully, which could adversely affect the value of your investment. Furthermore, the economic environment may affect our ability to hire qualified candidates, and we cannot predict whether we will be able to find the right employees when we need them. This would likely adversely impact the value of your investment. Our ability to sell our product or service is dependent on outside government regulation which can be subject to change at any time. Our ability to sell our products is subject to various government regulations, including but not limited to, regulations related to the manufacturing, labeling, distribution, and sale of our products. Changes in these regulations, or the enactment of new regulations, could impact our ability to sell our products or increase our compliance costs. Furthermore, the regulatory landscape is subject to regular change, and we may face challenges in adapting to such changes, which could adversely affect our business, financial condition, or operating results. In addition to government regulations, we may also be subject to other laws and regulations related to our products, including intellectual property laws, data privacy laws, and consumer protection laws. Non-compliance with these laws and regulations could result in legal and financial liabilities, reputational damage, and regulatory fines and penalties. It is also possible that changes in public perception or cultural norms regarding our products may impact demand for our products, which could adversely affect our business and financial performance, which may adversely affect your investment. We rely on third parties to provide services essential to the success of our business. Our business relies on a variety of third-party vendors and service providers, including but not limited to manufacturers, shippers, accountants, lawyers, public relations firms, advertisers, retailers, and distributors. Our ability to maintain high-quality operations and services depends on these third-party vendors and service providers, and any failure or delay in their performance could have a material adverse effect on our business, financial condition, and operating results. We may have limited control over the actions of these third-party vendors and service providers, and they may be subject to their own operational, financial, and reputational risks. We may also be subject to contractual or legal limitations in our ability to terminate relationships with these vendors or service providers or seek legal recourse for their actions. Additionally, we may face challenges in finding suitable replacements for these vendors and service providers, which could cause delays or disruptions to our operations. The loss of key or other critical vendors and service providers could materially and adversely affect our business, financial condition, and operating results, and as a result, your investment could be adversely impacted by our reliance on these third-party vendors and service providers.

Economic and market conditions The Company's business may be affected by economic and market conditions, including changes in interest rates, inflation, consumer demand, and competition, which could adversely affect the Company's business, financial condition, and operating results.

Force majeure events The Company's operations may be affected by force majeure events, such as natural disasters, pandemics, acts of terrorism, war, or other unforeseeable events, which could disrupt the Company's business and operations and adversely affect its financial condition and operating results.

Adverse publicity The Company's business may be negatively impacted by adverse publicity, negative reviews, or social media campaigns that could harm the Company's reputation, business, financial condition, and operating results.

Non-accredited investors may not be eligible to participate in a future merger or acquisition of the Company and may lose a portion of their investment. Investors should be aware that under Rule 145 under the Securities Act of 1933 if they invest in a company through Regulation Crowdfunding and that company becomes involved in a merger or acquisition, there may be significant regulatory implications. Under Rule 145, when a company plans to acquire another and offers its shares as part of the deal, the transaction may be deemed an offer of securities to the target company's investors, because investors who can vote (or for whom a proxy is voting on their behalf) are making an investment decision regarding the securities they would receive. All investors, even those with non-voting shares, may have rights with respect to the merger depending on relevant state laws. This means the acquirer's "offer" to the target's investors would require registration or an exemption from registration (such as Reg. D or Reg. CF), the burden of which can be substantial. As a result, non-accredited investors may have their shares repurchased rather than receiving shares in the acquiring company or participating in the acquisition. This may result in investors' shares being repurchased at a value determined by a third party, which may be at a lesser value than the original purchase price. Investors should consider the possibility of a cash buyout in such circumstances, which may not be commensurate with the long-term investment they anticipate.

The Chief Executive Officer does not currently receive a salary for his role with the Company. Jack Yang, the CEO of Dice Cream Robotics, Inc. (Dice Cream), does not currently receive a salary for his work at Dice Cream. Although Jack is committed to the Company and has invested significant sweat equity in Dice Cream, there is some level of risk in investing in a company whose day-to-day operations are managed by an individual who does not receive a salary. As the Company raises more money and generates more revenue Jack will begin to be paid a salary based on a predetermined compensation schedule. Once the Company receives approximately \$2.5M in additional capital funding, Jack intends to begin drawing a salary between \$125K and \$150K. Then once the Company opens 7 to 10 of its parlor locations, an increase in salary of between \$200K and \$250K will be reviewed by the board. However, if the Company does not raise substantial amounts or begin to generate substantial revenue from its locations, there is no guarantee Jack will be paid a salary for his work at Dice Cream. The Chief Executive Officer currently splits time between working for Dice Cream and another company. The CEO of Dice Cream Robotics, Inc. (Jack Yang) currently splits his time between working as a Consultant for Systems Engineering for Booz Allen Hamilton and Dice Cream. Although Jack intends to devote more of his time to Dice Cream moving forward, the capital needs of the business have necessitated him splitting time with another company to continue to generate a side income in order to have the funds to complete the development of Dice Cream's prototype. There is some level of risk in investing in a company whose day-to-day operations are managed by an individual who is not devoting 100% of their time to the Company. Once Dice Cream raises \$2.5M or more in additional funding for product development completion, and once the product has been deployed and becomes operational, Jack plans on leaving Booz Allen Hamilton and work full-time for Dice Cream.

RESTRICTIONS ON TRANSFER

The common stock sold in the Regulation CF offering, may not be transferred by any purchaser, for a period of one-year beginning when the securities were issued, unless such securities are transferred:

- (1) to the Company;
- (2) to an accredited investor;
- (3) as part of an offering registered with the SEC; or
- (4) to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance.

SIGNATURES

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100-503), the issuer certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form C and has duly caused this Form to be signed on its behalf by the duly authorized undersigned, on April 25, 2024.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors
Dice Cream Robotics, Inc.
Los Angeles, California

Opinion

We have audited the financial statements of Dice Cream Robotics, Inc., which comprise the balance sheet as of December 31, 2023, and the related statement of income, changes in stockholders' equity, and cash flow for the year ending December 31, 2023, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Dice Cream Robotics, Inc. as of December 31, 2023, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Dice Cream Robotics, Inc. and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Dice Cream Robotics Inc.'s ability to continue as a going concern for period of twelve months from the date of issuance of these financial statements.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material

misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users made on the basis of these financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Dice Cream Robotics, Inc.'s internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Dice Cream Robotics Inc.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Going Concern

As discussed in Note 10, certain conditions indicate that the Company may be unable to continue as a going concern. The accompanying financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern.

DICE CREAM ROBOTICS INC.
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2023

1. NATURE OF OPERATIONS

Dice Cream Robotics Inc., was founded on September 1, 2023, in the state of Delaware. The financial statements of Dice Cream Robotics, Inc. (which may be referred to as the “Company”, “we”, “us”, or “our”) are prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The Company’s headquarters are located in Los Angeles, California.

The Company designs, manufactures, and distributes ice cream vending machines.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (“US GAAP”). The Company has adopted a calendar year end of December 31, as its basis of reporting.

Use of Estimates

The preparation of financial statements in conformity with United States GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include all cash in banks. The Company’s cash is deposited in demand accounts at financial institutions that management believes are creditworthy. The Company’s cash and cash equivalents in bank deposit accounts, at times, may exceed federally insured limits. As of December 31, 2023, the Company’s cash and cash equivalents did not exceed FDIC insured limits.

Income Taxes

Dice Cream Robotics Inc. is an C corporation for income tax purposes. Under these provisions, the Company does not pay federal corporate income taxes on its taxable income. Instead, the shareholders are liable for individual federal and state income taxes on their respective shares of the Company’s taxable income. The Company has filed tax returns from inception through 2023 and is not subject to tax examination by the Internal Revenue Service or state regulatory agencies.

DICE CREAM ROBOTICS INC.
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2023

Concentration of Credit Risk

The Company maintains its cash with a major financial institution located in the United States of America which it believes to be creditworthy. Balances are insured by the Federal Deposit Insurance Corporation up to \$250,000. At times, the Company may maintain balances in excess of the federally insured limits.

Revenue Recognition

The Company recognizes revenues in accordance with FASB ASC 606, revenue from contracts with customers, when delivery of goods is the sole performance obligation in its contracts with customers. The Company typically collects payment upon sale and recognizes the revenue when the item has shipped and has fulfilled its sole performance obligation.

Revenue recognition, according to Topic 606, is determined using the following steps:

- 1) Identification of the contract, or contracts, with the customer: the Company determines the existence of a contract with a customer when the contract is mutually approved; the rights of each party in relation to the services to be transferred can be identified, the payment terms for the services can be identified, the customer has the capacity and intention to pay, and the contract has commercial substance.
- 2) Identification of performance obligations in the contract: performance obligations consist of a promised in a contract (written or oral) with a customer to transfer to the customer either a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer.
- 3) Recognition of revenue when, or how, a performance obligation is met: revenues are recognized when or as control of the promised goods or services is transferred to customers.

The Company has not yet earned revenue as it continues to be an early-stage development of the Company's commercial operations.

Advertising and Promotion

Advertising and promotional costs are expensed as incurred. Advertising and promotional expenses for the year ended December 31, 2023, amounted to \$94,050, which is included in sales and marketing expense.

Fair Value of Financial Instruments

The carrying value of the Company's financial instruments included in current assets and current liabilities (such as cash and cash equivalents, restricted cash and cash equivalents, accounts receivable, accounts payable, and accrued expenses approximate fair value due to the short-term nature of such instruments).

DICE CREAM ROBOTICS INC.
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2023

The inputs used to measure fair value are based on a hierarchy that prioritizes observable and unobservable inputs used in valuation techniques. These levels, in order of highest to lowest priority, are described below:

Level 1—Quoted prices (unadjusted) in active markets that are accessible at the measurement date for identical assets or liabilities.

Level 2—Observable prices that are based on inputs not quoted on active markets but corroborated by market data.

Level 3—Unobservable inputs reflecting the Company's assumptions, consistent with reasonably available assumptions made by other market participants. These valuations require significant judgment.

Subsequent Events

The Company considers events or transactions that occur after the balance sheet date, but prior to the issuance of the financial statements to provide additional evidence relative to certain estimates or to identify matters that require additional disclosure. Subsequent events have been evaluated through January 26, 2024, which is the date the financial statements were issued.

Recently Issued and Adopted Accounting Pronouncements

The FASB issues ASUs to amend the authoritative literature in ASC. There have been a number of ASUs to date, including those above, that amend the original text of ASC. Management believes that those issued to date either (i) provide supplemental guidance, (ii) are technical corrections, (iii) are not applicable to us or (iv) are not expected to have a significant impact on our financial statements.

Lease Accounting

In February 2016, the FASB issued ASU No. 2016-02, leases (*Topic 842*). The new standard introduces a new lessee model that brings substantially all leases onto the balance sheets. The amendments in the ASU are effective for fiscal years beginning after December 15, 2021.

We adopted the standard effective January 1, 2022, using the modified retrospective adoption method which allowed us to initially apply the new standard at the adoption date and recognize a cumulative-effect adjustment to the opening balance of accumulated deficit. In connection with our adoption of the new lease pronouncement, we recorded a charge to retain earnings.

Effects of Adoption

We have elected to use the practical expedient package that allows us to not reassess: (1) whether any expired or existing contracts are or contain leases, (2) lease classification for any expired or existing leases and (3) initial direct costs for any expired or existing leases. We additionally elected to use the practical expedients that allow lessees to: (1) treat the lease and non-lease components of leases as a single lease component for all of our leases and (2) not recognize on our balance sheet leases with terms less than twelve months.

DICE CREAM ROBOTICS INC.
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2023

We determine if an arrangement is a lease at inception. We lease certain manufacturing facilities, warehouses, offices, machinery and equipment, vehicles and office equipment under operating leases. Under the new standard, operating leases result in the recognition of ROU assets and lease liabilities on the consolidated balance sheet. ROU assets represent our right to use the leased asset for the lease term and lease liabilities represent our obligation to make lease payments. Under the new standard, operating lease ROU assets and liabilities are recognized at commencement date based on the present value of lease payments over the lease term. As most of our leases do not provide an implicit rate, upon adoption of the new standard, we used our estimated incremental borrowing rate based on the information available, including lease term, as of January 1, 2022, to determine the present value of lease payments. Operating lease ROU assets are adjusted for any lease payments made prior to January 1, 2022, and any lease incentives. Certain of our leases may include options to extend or terminate the original lease term. We generally conclude that we are not reasonably certain to exercise these options due primarily to the length of the original lease term and our assessment that economic incentives are not reasonably certain to be realized. Operating lease expense under the new standard is recognized on a straight-line basis over their lease term. Our current finance lease obligations consist primarily of cultivation and distribution facility leases.

Summary of Effects of Lease Accounting Standard Update Adopted in 2022

There were no effects since the Company has no long-term lease agreements.

3. DETAILS OF CERTAIN ASSETS AND LIABILITIES

Other current liabilities consist of the following items:

As of December 31	2023
Accrued interest	8,981
Total Other Current Liabilities	\$ 8,981

4. CAPITALIZATION AND EQUITY TRANSACTIONS

Common Stock

The Company is authorized to issue 10,000,000 shares of Common Stock Class A at a par value of \$0.00001 and 10,000,000 shares of Common Stock Class B at a par value of \$0.00001. As of December 31, 2023, 10,000,000 shares of Common Stock Class A have been issued and are outstanding.

5. DEBT

Promissory Notes

As of inception date (September 1, 2023), the Company entered into promissory notes. The Company has received 1 promissory note from the related party Massive Dynamics LLC in the amount of \$256,596. The

DICE CREAM ROBOTICS INC.
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2023

Company has also received 2 notes from the same related party in total amount of \$200,000 that are still not funded. The details of the Company's notes, and the terms are as follows:

Debt Instrument Name	Principal Amount	Interest rate	Borrowing Period	Maturity Date	As of December 31, 2023				
					Interest Expense	Accrued Interest	Current Portion	Non-Current Portion	Total Indebtedness
Massive Dynamics LLC Promissory Note	\$ 256,596	6%	10.5.2023	10.13.2023	\$ 8,981	\$ 8,981	\$ 256,596	\$ -	\$ 256,596
Total	\$ 256,596	6%			\$ 8,981	\$ 8,981	\$ 256,596	\$ -	\$ 256,596

The summary of the future maturities is as follows:

As of December 31, 2023

2024	\$ 256,596
2025	-
2026	-
Thereafter	-
Total	\$ 256,596

6. INCOME TAXES

The provision for income taxes for the year ended December 31, 2023, consists of the following:

As of Year Ended December 31,	2023
Net Operating Loss	\$ (96,284)
Valuation Allowance	96,284
Net Provision for income tax	\$ -

Significant components of the Company's deferred tax assets and liabilities on December 31, 2023, are as follows:

As of Year Ended December 31,	2023
Net Operating Loss	\$ (96,284)
Valuation Allowance	96,284
Total Deferred Tax Asset	\$ -

Management assesses the available positive and negative evidence to estimate if sufficient future taxable income will be generated to use the existing deferred tax assets. On the basis of this evaluation, the Company has determined that it is more likely than not that the Company will not recognize the benefits of the federal and state net deferred tax assets, and, as a result, full valuation allowance has been set against its net deferred tax assets as of December 31, 2023. The amount of the deferred tax asset to be realized could be adjusted if estimates of future taxable income during the carry-forward period are reduced or increased.

DICE CREAM ROBOTICS INC.
NOTES TO FINANCIAL STATEMENTS
FOR YEAR ENDED TO DECEMBER 31, 2023

For the fiscal year ending December 31, 2023, the Company had federal cumulative net operating loss ("NOL") carryforwards of \$324,188, and the Company had state net operating loss ("NOL") carryforwards of approximately \$324,188. Utilization of some of the federal and state NOL carryforwards to reduce future income taxes will depend on the Company's ability to generate sufficient taxable income prior to the expiration of the carryforwards. The federal net operating loss carryforward is subject to an 80% limitation on taxable income, does not expire, and will carry on indefinitely.

The Company recognizes the impact of a tax position in the financial statements if that position is more likely than not to be sustained on a tax return upon examination by the relevant taxing authority, based on the technical merits of the position. As of December 31, 2023, the Company had no unrecognized tax benefits.

The Company recognizes interest and penalties related to income tax matters in income tax expense. As of December 31, 2023, the Company had no accrued interest and penalties related to uncertain tax positions.

7. RELATED PARTY

The Company has received 1 promissory note from the related party Massive Dynamics LLC in the amount of \$256,596. The Company has also received 2 notes from the same related party in total amount of \$200,000 that are still not funded.

8. COMMITMENTS AND CONTINGENCIES

Contingencies

The Company's operations are subject to a variety of local and state regulation. Failure to comply with one or more of those regulations could result in fines, restrictions on its operations, or losses of permits that could result in the Company ceasing operations.

Litigation and Claims

From time to time, the Company may be involved in litigation relating to claims arising out of operations in the normal course of business. As of December 31, 2023, there were no pending or threatened lawsuits that could reasonably be expected to have a material effect on the results of the Company's operations.

9. SUBSEQUENT EVENTS

The Company has evaluated subsequent events for the period from December 31, 2023, through January 26, 2024, which is the date the financial statements were available to be issued.

There have been no other events or transactions during this time which would have a material effect on these financial statements.

10. GOING CONCERN

The Company lacks significant working capital and has commenced operations. The Company will incur significant additional costs before significant revenue is achieved. These matters raise substantial doubt about the Company's ability to continue as a going concern. During the next twelve months, the Company intends to fund its operations with funding from its proposed Regulation Crowdfunding campaign, and additional debt and/or equity financing as determined to be necessary. There are no assurances that management will be able to raise capital on terms acceptable to the Company. If the Company is unable to obtain sufficient amounts of additional capital, it may be required to reduce the scope of their planned development, which could harm our business, financial condition and operating results. The balance sheet and related financial statements do not include any adjustments that might result from these uncertainties.

CERTIFICATION

I, Jack Yang , Principal Executive Officer of Dice Cream Robotics, Inc., hereby certify that the financial statements of Dice Cream Robotics, Inc. included in this Report are true and complete in all material respects.
