Vennard is a veteran technologist with a proven past for success. I'm investing in the founder due to his track record of success. PerVista's solution addresses the growing issue in our country of gun violence. I'm a supporter of the 2nd amendment, however we need to leverage technology to the extent that we can, to minimize and eventual eradicate loss of life through gun violence. I hope others join me in my support of PerVista and other such technologies to make the world a safer place to live.

Invested \$5,000 this round & \$500,000 previously

Highlights

- 1 Currently Piloting with The Baltimore Orioles, Prince George's County, & Maryland Public Schools.
- 2 Est. \$3.4 Trillion Global Market of K-12 schools, universities under threat from active shooters

shooters.

3 Featured in Fortune Magazine, Technical.ly, WTOP, NBC 4 DC, Fox 5 DC, and CBS Baltimore.

4 More than \$350,000 previously raised.

5 Soft launch of platform in Washington, DC Region already underway.

AI-Powered 24/7 Threat Detection

Today gun violence and school shootings are an epidemic.

With PerVista, **there's hope.**

Our pioneering AI-powered platform is designed to transform the response to these tragic incidents.

PerVista's mission is simple: To enhance public safety by proactively identifying threats, aiming to significantly reduce the number of these

devastating events.

A Stark Reality

Gun violence is the leading cause of death among American children and teens, with children falling victim to this epidemic on a daily basis.

PROBLEM

ISSUE

Year over year increase in the number of shooting in schools and public places.

IMPACT

Reduction of liability for stakeholders responsible for safety in public places.

CUSTOMERS

Schools, hospital systems, sports teams, concert venues, office buildings.

APPLICABILITY

More rapid dispatch of police officers to the scene of active shooter events.

In fact, since the 1999 Columbine tragedy, over 338,000 students have experienced gun violence at school. And on top of this 2022 marked the highest number of school shootings since Columbine, **mirroring a broader rise in gun violence nationwide.**

This needs to stop.

And it can.

With the right tools and awareness, **this trend is preventable and reversible.**

Our Innovative Platform

PerVista's solution is not just technological—it's a **call to action.**

It integrates:

- **Predictive Analytics**: Aligning with real-time crime statistics to proactively manage potential threats.
- **Secure Online Marketplace**: Ensuring secure transactions and promoting safe firearm storage to prevent unauthorized access and tragedies.
- **Tailored AI Technology**: Our proprietary AI is a vigilant sentinel, trained to detect firearms without compromising personal privacy.
- **Advanced Drone Technology**: Safely assessing dangerous situations, thereby minimizing the risk to human life.

SOLUTION

PREDICTIVE ANALYTICS

Location rating index tied to real-time crime statistics, broken down by location and characteristics

ONLINE STOREFRONT

Secure transactions within the PerVista Marketplace via authenticated web and mobile platforms

TAILORED TECHNOLOGY

Proprietary Artificial Intelligence (AI) Model to match video images with firearms in PerVista database

DRONE TECHNOLOGY

Indoor and outdoor drones to navigate dangerous situations, without risking human life

With more than 340 school shootings in 2023, a new record, the urgency has never been greater.

PerVista Provides Real-Time Situation Awareness to First Responders

By utilizing breakthrough AI algorithms to perform real-time video analysis. PerVista is designed to keep our educational environments

many say, a solution designed to keep our environments safe and secure.

VS. THE COMPETITION

This space does have competitors, but PerVista is the only solution that offers a full end-to-end proprietary experience, with built-in predictive analytics that help to drive enhanced physical security.

At the heart of this innovative platform lies advanced machine learning capable of detecting guns, unusual activities, behaviors, or potential threats.

By proactively identifying these indicators, PerVista enables timely and appropriate interventions, significantly reducing the risk of harmful incidents such as school shootings.

Visualize a safer future with PerVista - where sophisticated algorithms transform raw video feeds into invaluable tools for security.

Our platform is not just about surveillance; it’s about anticipating and preventing potential threats, ensuring our children can focus on what truly matters - their education.

The Need For Real-Time Threat Detection Has Never Been Greater

Initially, PerVista’s management plans on rolling out their solution to K-

12 schools, universities, and other public venues.

Our business model encompasses tier-based subscriptions, transaction fees through our secure marketplace, and additional revenue through equipment sales and installations.

MARKET SIZE

Our Go-to-Market strategy targets K-12 schools, universities, and other public places that are under threat from active shooter events.
