Problem

Multiple Applications and Hight Costs

Autopilot addresses a critical challenge faced by home service business owners: the burden of managing multiple disparate applications. In today's digital age, these entrepreneurs find themselves juggling numerous tools for sales, lead tracking, task automation, and customer service, leading to inefficiencies and skyrocketing costs. This fragmented approach not only drains resources but also hampers growth potential as valuable time and energy are diverted into navigating complex software ecosystems rather than focusing on core business activities. Managing multiple disparate applications also means high costs to pay for each separate service.

PROBLEM

HSBOs are forced to juggle multiple apps, which is too complicated, and too expensive.

50% of the 2.5 million HBSOs can't afford it.

The other 50%... are juggling multiple apps.

No ability to market to their customers.

Handling phone calls is a nightmare.

Tracking marketing data is nearly impossible.

Expensive & complicated.

I dealt with this for 2 years and 4 months.
