COMPANY OVERVIEW

International Wings Factory, based in New York City, New York, is a premier destination for American casual chicken wings. We specialize in offering a diverse range of chicken wings, each uniquely flavored with our signature sauces and spices. Our customers range from local residents and office workers to tourists exploring the city. They choose us for our innovative flavors, high-quality ingredients, and the unique dining experience that celebrates the joy of eating wings.

Company History

International Wings Factory was established in 2012 by Deepak Ballaney, a certified chef from the Culinary Institute of America. Initially planning to open a fine dining French Asian concept, Deepak pivoted to the chicken wings business, inspired by his love for wings and the positive feedback from his kitchen team and guests. Despite the financial challenges, his passion led to the creation of a unique wings brand. Over the years, we have grown into a beloved local spot, featured on NBC, Fox News, CBS News, and various other media outlets. During the pandemic, a short film titled "The Wings Guy" was made about Deepak's journey, gaining acclaim at film festivals.

RISK FACTORS

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment. In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

You Might Lose Your Money

When you buy a certificate of deposit from a bank, the Federal government (through the FDIC) guarantees you will get your money back. Buying a Security is not like that at all. The ability of the Company to make the payments you expect, and ultimately to give you your money back, depends on a number of factors, including many beyond our control.

COVID-19 Might Have a Negative Material Effect on the Company

This offering is being launched at a time when the COVID-19 pandemic is requiring the closure of many businesses, large and small. The effects COVID-19 may have on economic activity are likely substantial and unknown; there is no guaranty the Company will not suffer material negative effects as a direct or indirect result of the pandemic.

Competition

The market in which we operate is highly competitive. The Company competes with many other businesses, both large and small, on the basis of quality and price of products, location and customer experience. Changes in customer preference away from the Company's core business or the inability to compete successfully against other competitors could negatively affect the Company's financial performance.

Licensing Risk

The Company may face changes in the state and federal laws in connection to any licensing required for the sale of its products. Such changes would require the dedication of Company resources to address or amend its current operations which may adversely affect its business strategy or profitability.

Interest Rate Might Not Adequately Compensate For Risk

Theoretically, the interest rate paid by a company should compensate the creditor for the level of risk the creditor is assuming. There is no certainty that the interest rate on your Security will compensate you adequately for the level of risk.

No Right to Participate in Management

As the owner of a Security, you will not have the right to control the Company in any way or to participate in its management. You should invest (buy a Security) only if you are willing to rely completely on the Company's management team.

Reliance On Management Team

Like almost all small businesses, the Company relies exclusively on the abilities of its management team. Should any of them die, leave the Company, or become ill for a long period of time, the Company would be damaged and might not repay your Security.

Limited Products And Services

Most small, local businesses sell only one or two products or services, making them vulnerable to changes in technology and/or customer preferences.

Supplier Risk

The Company relies on third-party suppliers for the materials used in the manufacture of its products. If any of these suppliers changes the pricing, distribution, terms of service, or relationship with the Company, this could materially affect its business and/or profitability. Factors outside of the Company's control, including general market conditions, may affect its relationship with these suppliers. In addition, its ability to meet the obligations of its customers may be adversely affected if its suppliers fail to comply with agreed-upon services or quality standards in a cost-effective or timely manner.

Risk of Economic Downturn

The products the Company sells are luxuries, not necessities. In the event of a recession or other economic downturn, customers might curtail their purchase of our products.

Environmental Risk

The Company is subject to the risk of environmental liability and limitations on operations due to environmental laws and regulations. The Company is subject to extensive federal, state, and local environmental, health and safety regulations. The risks of substantial costs and liabilities related to compliance with these laws and regulations is an inherent part of the Company's business. Future conditions may develop or be discovered that create substantial environmental compliance or remediation liabilities and costs.

Price Risk

The Company competes in an industry with a commodity product where the Company may not have control of the prices it will receive for its product or the prices it must pay for inputs. Price uncertainty may negatively impact the Company's business and financial situation.

Use of Funds Risk

At the discretion of the Company's executive management team, funds raised in this offering may be used differently than specifically outlined in this document's Use of Funds section.

Personnel Risk

The Company uses human personnel to produce its product. Accidents, illnesses, death, divorce, or lack of productivity could negatively impact the ability of personnel and, therefore, the business.

Lack Of Accounting Controls

Larger companies typically have in place strict accounting controls. Smaller companies like the Company lack these controls, exposing themselves to additional risk.

Reputation Risk

The success of the Company depends on the reputation of its brand. Adverse publicity concerning the Company's products or the Company itself could negatively impact the future of its business.

The Company Might Need More Capital

The Company might need to raise more capital in the future to expand its operations, buy property and equipment, hire drivers and other personnel, market its products and services, pay overhead and general administrative expenses, or a variety of other reasons. There is no assurance that additional capital will be available when needed, or that it will be available on terms that are not adverse to your interests as an investor. If the Company is unable to obtain additional funding when needed, it could be forced to delay its business plan or even cease operations altogether.

Future Investors Might Have Superior Rights

If the Company needs more capital in the future, it might borrow money and/or sell stock, and the new investors might have rights superior to those of an investor owning a Security. For example, they might have the right to be paid before you are, to receive larger distributions, to have a greater voice in management, or otherwise.

Inability To Sell Your Security

The law prohibits you from selling your Security (except in certain very limited circumstances) for one year after you acquire it. Even after that one-year period, a host of Federal and State securities laws may limit or restrict your ability to sell your securities. Even if you are permitted to sell, you will likely have difficulty finding a buyer because there will be no established market. Given these factors, you should be prepared to hold your Security for its full term.

Limitation of Individual Rights in Event of Default

In the event of a default under the Securities, an individual investor will not have the right to enforce his, her or its rights – for example, by bringing a lawsuit. Instead, the investors will appoint a representative using a procedure set forth in the Security Agreement. It's possible that the investors as a group will appoint a representative you don't like, or that the representative will do things you believe are wrong or misguided. Once a default has occurred and a representative has been appointed, all the expenses of the representative must be paid before any further payments are made with respect to the Securities.

Lack of Key Man Insurance

Although dependent on key personnel, the Company does not have any key man life insurance policies on any such people. In the event that such personnel die or become disabled, the Company will not receive compensation to assist for their absence and the loss of such person could negatively affect the Company.

The Owners Could Be Bad People Or Do Bad Things

The owners of the Company could be dishonest and take your money. Even people who are very honest sometimes do dishonest things in desperate situations – for example, when their company is on the line,

or they're going through a divorce or other stressful life event. It is possible that the management of the Company, or an employee, would steal from or otherwise cheat the Company, and you.

Uninsured Losses

Although the Company will carry some insurance, we might not buy enough insurance to guard against all the risks of our business. Also, there are some kinds of risks that are simply impossible to insure against, at least at a reasonable cost. Therefore, we could incur an uninsured loss that could damage our business.

Conflict Of Interest

In many ways your interests and the interests of the Company's management team will coincide: you all want the Company to be as successful as possible. However, your interests might be in conflict in other important areas, including these:

- You might want to keep the compensation of managers low, while managers want to make as much as they can.
- You might want the Company to act conservatively to conserve its cash, while the management team might want to grow more quickly.
- You might want the Company to look out for your interests, while the management team might subordinate your interests to the interests of employees, other investors, or others.
- The lawyers who prepared the legal documents represent the interests of the Company, not the interests of investors.

No Registration Under Securities Laws

The Security will not be registered with the SEC or the securities regulator of any State. Hence, neither the Company nor the Security are subject to the same degree of regulation and scrutiny as if they were registered.

Incomplete Offering Information

Title III does not require us to provide you with all the information that would be required in some other kinds of securities offerings, such as a public offering of shares (for example, publicly-traded firms must generally provide investors with quarterly and annual financial statements that have been audited by an independent accounting firm). Although Title III does require extensive information, as described above, it is possible that you would make a different decision if you had more information.

Lack Of Ongoing Information

The Company will be required to provide some information to investors for at least one year following the offering. However, this information is far more limited than the information that would be required of a publicly-reporting company; and the Company will be allowed to stop providing annual information in certain circumstances.

The Company is Not Subject to the Corporate Governance Requirements Of National Securities Exchanges

Any company whose securities are listed on a national stock exchange (for example, the New York Stock Exchange) is subject to a number of rules about corporate governance that are intended to protect investors. For example, the major U.S. stock exchanges require listed companies to have an audit committee made up entirely of independent members of the board of directors (i.e., directors with no material outside relationships with the company or management), which is responsible for monitoring

the company's compliance with the law. The Company will not be required to implement these and other investor protections.

Cost of Enforcement

If the Company defaulted, investors would have to engage lawyers and possibly other third parties to enforce their rights. The cost of enforcement could be prohibitive.

Other Lenders Could Have Superior Rights

The Company will take out other loans. In itself this is not risky, but these lenders will likely have a claim to collateral superior to the collateral claimed by the Security. For example, the lenders might have a claim to the future cash flows or equity ownership of the Company, or the equipment owned by the Company whereas the Security has a claim to the equipment purchased with its own proceeds. Moreover, the lenders might have clauses in their lending agreements with the Company that compel the Company to pay them first over other lenders. If the Company runs out of cash, and has a choice to pay the other lenders or the Holders of the Security, it might decide (or be required) to pay its other lenders first.

TRANSACTION MECHANICS

The following describes the process to invest in IWFNYC LLC and how an investor's transaction and delivery of securities will be completed.

- Investor Commitment:* Through the Honeycomb Portal, an investor will submit a requested investment amount. As a part of this process, an investor will execute an investment contract with IWFNYC LLC ("Security Agreement") by way of the investor's electronic signature.
- Acceptance of Investment:* Upon completion of the investment commitment, the investor will receive via email a confirmation of their transaction detailing the amount, terms, and date of execution.

- c. *Investor Transfer of Funds*: Upon receiving confirmation that an investment has been accepted, the investor will transfer funds to the escrow account of a third-party bank managed by Honeycomb Portal.
- d. *Early Closings*: If the target offering amount is met prior to the original deadline date, we may close the offering earlier, but no less than 21 days after the date on which the Form C is posted on the Honeycomb Portal.
- e. *Book Entry*: All investments will be in book entry form. This means that the Investor will not receive a certificate representing their investment. Each investment will be recorded by Honeycomb Portal and visible by the investor through their Investor Dashboard.

Investors may cancel an investment commitment until 48 hours prior to the deadline identified in these offering materials.

The intermediary will notify investors when the target offering amount has been met.

If the issuer reaches the target offering amount prior to the deadline identified in the offering materials, it may close the offering early if it provides notice about the new offering deadline at least five business days prior to such new offering deadline (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment).

If an investor does not cancel an investment commitment before the 48-hour period prior to the offering deadline, the funds will be released to the issuer upon closing of the offering and the investor will receive securities in exchange for his or investment.

If an investor does not reconfirm his or her investment commitment after a material change is made to the offering, the investor's investment commitment will be cancelled and the committed funds will be returned.

The Qualified Third Party of the Offering is Silicon Valley Bank, a division of First Citizens Bank & Trust Company.

Note: For more information about the investment and cancellation process, see Honeycomb's Education Materials.

Details of Security Being Offered

The securities being offered to investors is equity, which we refer to as "Security." The Security is governed by a separate document called an Equity Agreement, which you can view on the "Investor Info" tab of the campaign page.

This section summarizes the principal features of the Security Agreement. However, this is only a summary. Before investing, you should read the Security Agreement in their entirety.

- The principal amount of your Security Agreement will be the amount you invest.

- Your Security will be entitled to receive 40% of all franchise fees and royalties generated by the Company until you received a cumulative amount equal to the amount invested.
- After the Investor recoups the Investment amount, the Investor's share of the Company's profits will revert to 10%.
- All communications from the Company, including but not limited to all tax forms, will be via electronic delivery.
- All payments will be made in U.S. dollars as Automated Clearing House (ACH) deposits into an account you designate. If you don't authorize the Company to make such ACH distributions into a designated account, payments will be made by check and mailed to you after deducting a \$50 processing fee.
- Once you pay for your Security, you will have no obligation to contribute more money to the Company, and you will not be personally obligated for any debts of the Company.
- If there is a default under your Security, you may not take collection action personally. Instead, you and the other investors will together appoint a single representative to represent all of you. This Administrative Agent will have the power to take any action against the Company that he or she believes is appropriate. The fees and any expenses of the Administrative Agent will be the responsibility of the Company, but the Administrative Agent will be paid before any additional amounts are paid to you or other investors.
- If you want to sell your Security, you must first offer to sell it back to the company – a so-called "first right of refusal." If the Company doesn't buy it, the Company may impose restrictions on the transfer. For example, the Company may require a legal opinion that the transfer is allowed under the securities laws.
- The Security offered does not have any voting rights.
- The Terms of the Security being offered may not be modified or amended.

Restrictions on Transfer of the Securities Being Offered

The Security will be illiquid (meaning you might not be able to sell it) for four reasons:

- The Security Agreement prohibits the sale or other transfer of Security without the Company's consent.
- If you want to sell your Security, the Company will have the first right of refusal to buy it, which could make it harder to find a buyer.
- Even if a sale were permitted, there is no ready market for Security as there would be for a publicly-traded company.
- For a period of one year, you will not be allowed to transfer the Security except (i) to the Company itself, (ii) to an "accredited" investor, (iii) to a family or trust, or (iv) in a public offering of the Company's shares.

As a result, you should plan to hold your Security until maturity.

ADDITIONAL MATTERS RELATED TO THE SECURITY

1. *How may the rights of the securities being offered be materially limited, diluted or qualified by the rights of any other class of security identified above?*

The Company does not have the right to change the terms of the Security Agreement. However, it does have the right to create additional classes of securities, both equity securities and debt securities. Some of these additional classes of securities could have rights that are superior to those of the Security Agreement. For example, the Company could issue securities that are secured by specific property of the Company.

2. *Are there any differences not reflected above between the securities being offered and each other class of security of the issuer?*

No

3. *How could the exercise of rights held by the principal shareholders affect the purchasers of the securities being offered?*

The principal shareholders could make decisions that are bad for the company and thereby adversely affect the economic interests of investors holding securities. They could also issue other classes of securities with rights superior to those of investors holding the security.

4. *How are the securities being offered being valued? Include examples of methods for how such securities may be valued by the issuer in the future, including during subsequent corporate actions.*

The value of the Security is determined by the Owner of the Company based on the Owner's opinion about the value of the project.

The Owner does not expect there to be any reason to place a value on the Security in the future. In the event that future valuation is required, any value given the security by the company will be determined in accordance with U.S. generally accepted accounting principles.

5. *What are the risks to purchasers of the securities relating to minority ownership in the issuer?*

The principal shareholders could make decisions that are bad for the company and thereby adversely affect the economic interests of investors holding the security. They could also issue other classes of securities with rights superior to those of investors holding the security.

6. *What are the risks to purchasers associated with corporate actions, including additional issuances of securities, issuer repurchases of securities, a sale of the issuer or of assets of the issuer or transactions with related parties?*

The company could issue securities with rights superior to those of the Security.

If the company is sold, the owners of the Security have the right to receive all of the principal and accrued return.

Transactions with related parties – for example, the payment of excessive compensation – could reduce the amount of money available to make payments with respect to the security.

7. *What other exempt offerings has the issuer conducted within the past three years?*

None

8. *The issuer or any entities controlled by or under the common control with the issuer was not a party to any transaction since the beginning of the issuer's last fiscal year, or any currently proposed transaction, where the amount involved exceeds five percent of the aggregate amount of capital raised by the issuer in reliance on Section 4(a)(6) of the Securities Act during the preceding 12-month period, including the amount the issuer seeks to raise in the current offering, in which any of the following persons had or is to have a direct or indirect material interest:*

1. *any director or officer of the issuer;*
2. *any person who is, as of the most recent practicable date, the beneficial owner of 20 percent or more of the issuer's outstanding voting equity securities, calculated on the basis of voting power;*
3. *if the issuer was incorporated or organized within the past three years, any promoter of the issuer;*
4. *or (4) any immediate family member of any of the foregoing persons.*

None
