Vernon Prince

CEO/Lead Consultant
Orlando, Florida, United States

Summary

As CEO and Lead Consultant for Prince Tech Advisory, I leverage my 35+ years of engineering and manufacturing experience to advance and optimize the design, development, and implementation of cutting-edge manufacturing processes and technologies, from semiconductor fab to full solutions, for my defense and commercial customers.

My recent career experiences include Global Vice President of Manufacturing at Inflection, where I was responsible for the industrialization roadmap for quantum-based products, from the semiconductor fab processes to full product assembly and test.

Prior to Inflection I was the Senior Director of Advanced Manufacturing Engineering at Luminar Technologies, where I led the establishment and expansion of the advanced automotive manufacturing capabilities for the company's groundbreaking lidar sensors and systems. My core competencies include strategic planning, cross-functional leadership, continuous improvement, and manufacturing innovation. I am passionate about creating a culture of excellence and collaboration among my team and partners, and I am committed to advancing the state of the art in manufacturing and associated engineering.

Experience

White Elephants' Technology
CEO
Oct 2024 - Present (1 month)

Prince Tech Advisory
Lead Consultant
June 2024 - Present (6 months)
