Structure of Payout and other Rights	<ul style="list-style-type: none"> • Equity Investment shall carry a 20% premium (the "Premium"); both the Equity Investment and the Premium shall be paid out of the Waterfall, secured via worldwide

	<p>sales and recouped as further described in the Waterfall attached hereto as Exhibit I;</p> <ul style="list-style-type: none"> • Backend Revenue shall derive from Equity Investor's share of the "Equity Investor Backend" (defined as 50% of 100% of all available backend (defined as "Investor's Net Profits" in the Waterfall)) on a pro rata, pari passu basis with other equity investors to be paid in perpetuity and in accordance with the collection account management agreement ("CAMA") for the Picture. • For example and for the purpose of clarity, if Investor's Investment Amount is \$10,000 on a budget of \$3,000,000, then investor will be entitled to recoup $\\$10,000 + 20\% = \\$12,000$ total recoupment + 33.33% of 50% of the backend (which would be the investor's share of Equity Investor Backend on a pro rata, pari passu basis for a \$3M budget fully financed by equity). • If debt lenders require a backend position for a reduction in debt costs, Investor agrees that such backend percentage shall come out of the Equity Investor Backend and be treated as if the debt investor invested in an equity position (i.e., the debt lender may share in the "Equity Investor Backend"). For the purpose of clarity, a debt lender may negotiate for a set percentage share of Equity Investor Backend (for example, 2% of 100% of all available backend, which is 4% of Equity Investor Backend), or they may agree to share the percentage of the Equity Investor Backend that represents an equivalent savings that Company receives, shared on a pro-rata, pari passu basis with equity investors (i.e., debt investor agrees to drop their interest rate from 15% to 10%, saving Company \$100k in interest payments. In exchange for the lower interest rate, that \$100k in savings is treated as if it was an equity investment for the purposes of calculating debt investor's pro-rata pari passu share amongst all other investors).
