The Fund

GOAL/APPROACH

The fund seeks to maximize total return, consisting of capital appreciation and current income. To pursue this goal, the fund normally invests at least 80% of its assets in bonds, including corporate bonds, debentures, notes, mortgage-related securities, collateralized mortgage obligations (CMOs), asset-backed securities, convertible debt obligations, preferred stock, convertible preferred stock, municipal obligations and zero coupon bonds, that, when purchased, are rated A or better or are the unrated equivalent as determined by Dreyfus, and in securities issued or guaranteed by the U.S. government or its agencies or instrumentalities, including Treasury inflation-protected securities (TIPS).

The fund also may invest in:

- high grade commercial paper of U.S. issuers
- certificates of deposit, time deposits and bankers' acceptances
- fixed-income securities rated lower than A (but not lower than B), at the time of purchase, or the unrated equivalent as determined by Dreyfus

The fund may invest up to 20% of its net assets in bonds issued by foreign issuers that are denominated in U.S. dollars or foreign currencies, but will limit its investment in bonds issued by foreign issuers that are denominated in foreign currencies to no more than 10% of the fund's net assets.

The fund has no limit with respect to its portfolio maturity or duration.

The fund may, but is not required to, use derivatives, such as futures and options, as a substitute for taking a position in an underlying asset, to increase returns, to manage interest rate risk, or as part of a hedging strategy. The fund may enter into swap agreements, such as credit default swaps, which can be used to transfer the credit risk of a security without actually transferring ownership of the security or to customize exposure to particular corporate credit. The fund also may engage in short-

selling, typically for hedging purposes, such as to limit exposure to a possible market decline in the value of its portfolio securities. To enhance current income, the fund also may engage in a series of purchase and sale contracts or forward roll transactions in which the fund sells a mortgage-related security, for example, to a financial institution and simultaneously agrees to purchase a similar security from the institution at a later date at an agreed-upon price.

Concepts to understand

Bond: an IOU issued by a government or corporation that pays a stated rate of interest and returns the face value on the maturity date.

Bond rating: a ranking of a bond's quality, based on its ability to pay interest and repay principal. Bonds are rated from a high of AAA or Aaa (highly unlikely to default) through a low of D (companies already in default).

Mortgage-related securities: pools of residential or commercial mortgages with cash flows "passed through" to the holders of the securities via monthly payments of interest and principal.

CMO (collateralized mortgage obligation): a security that pools together mortgages and separates them into short-, medium-, and long-term positions (called tranches). Tranches pay different rates of interest depending on their maturity and cash flow predictability.

Convertible securities: corporate securities, usually preferred stock or bonds, that are exchangeable for a set amount of another form of security, usually common stock, at a preset price.

Credit default swap: a derivative instrument whereby the buyer makes fixed, periodic premium payments to the seller in exchange for being made whole on an agreed-upon amount of principal, should the specified reference entity (i.e., the issuer of a particular security) experience a "credit event" (e.g., failure to pay interest or principal, bankruptcy or restructuring).

MAIN RISKS

The fund's principal risks are discussed below. The value of your investment in the fund will fluctuate, which means you could lose money.

- *Interest rate risk.* Prices of bonds tend to move inversely with changes in interest rates. Typically, a rise in rates will adversely affect bond prices and, accordingly, the fund's share price. The longer the effective maturity and duration of the fund's portfolio, the more the fund's share price is likely to react to interest rates.
- *Call risk.* Some bonds give the issuer the option to call, or redeem, the bonds before their maturity date. If an issuer "calls" its bond during a time of declining interest rates, the fund might have to reinvest the proceeds in an investment offering a lower yield. During periods of market liquidity or rising interest rates, prices of the fund's "callable" issues are subject to increased price fluctuation.
- *Credit risk.* Failure of an issuer to make timely interest or principal payments, or a decline or perception of a decline in the credit quality of a bond, can cause a bond's price to fall, potentially lowering the fund's share price. Although the fund invests primarily in bonds rated A or better, it may invest to a limited extent in high yield ("junk") bonds, which involve greater credit risk, including the risk of default, than investment grade bonds and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments. The prices of high yield bonds can fall dramatically in response to bad news about the issuer or its industry, or the economy in general.
- *Market risk.* The market value of a security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically. Investments in foreign securities tend to have greater exposure to liquidity risk than domestic securities.
- *Market sector risk.* The fund's overall risk level will depend on the market sectors in which the fund is invested and the current interest rate, liquidity and credit quality of such sectors. The fund may significantly overweight or underweight certain companies, industries or market sectors, which may cause the fund's performance to be more or less sensitive to developments affecting those companies, industries or sectors.
- *Inflation-indexed bond risk.* Interest payments on inflation-indexed bonds can be unpredictable and will vary as the principal and/or interest is periodically adjusted based on the rate of inflation. If the index measuring inflation falls, the interest payable on these securities will be reduced. The U.S. Treasury has guaranteed that in the event of a drop in prices, it would repay the par amount of its inflation-indexed bonds. Inflation-indexed bonds issued by corporations generally do not guarantee repayment of principal. Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.
- *Prepayment and extension risk.* When interest rates fall, the principal on mortgage-backed and certain asset-backed securities may be prepaid. The loss of higher yielding underlying mortgages and the reinvestment of proceeds at lower interest rates can reduce the fund's potential price gain in response to falling interest rates, reduce the fund's yield, or cause the fund's share price to fall. When interest rates rise, the effective duration of the fund's mortgage-related and other asset-backed securities may lengthen due to a drop in prepayments of the underlying mortgages or other assets. This is known as extension risk and would increase the fund's sensitivity to rising rates and its potential for price declines.

- *Leveraging risk.* The use of leverage, such as borrowing money to purchase securities, engaging in reverse repurchase agreements, lending portfolio securities and engaging in forward commitment transactions, may magnify the fund's gains or losses.
- *Foreign investment risk.* The prices and yields of foreign bonds can be affected by political and economic instability or changes in currency exchange rates. The bonds of issuers located in emerging markets can be more volatile and less liquid than those of issuers in more mature economies.
- *Derivatives risk.* The fund may use derivative instruments, such as options, futures and options on futures (including those relating to foreign currencies, indexes and interest rates), swaps (including credit default swaps on corporate bonds and asset-backed securities) and other credit derivatives, and may invest in mortgage related and asset-backed securities. A small investment in derivatives could have a potentially large impact on the fund's performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that changes in the value of a derivative held by the fund will not correlate with the underlying instruments or the fund's other investments. Derivative instruments also involve the risk that a loss may be sustained as a result of the failure of the counterparty to the derivative instruments to make required payments or otherwise comply with the derivative instruments' terms. Credit default swaps and similar instruments involve greater risks than if the fund had invested in the reference obligation directly, since, in addition to general market risks, they are subject to illiquidity risk, counterparty risk and credit risks.
- *Short sale risk.* The fund may make short sales, which involves selling a security it does not own in anticipation that the security's price will decline. Short sales expose the fund to the risk that it will be required to buy the security sold short (also known as "covering" the short position) at a time when the security has appreciated in value, thus resulting in a loss to the fund.

Other potential risks

Under adverse market conditions, the fund could invest up to all of its assets in U.S. Treasury securities and money market securities. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund may not achieve its investment objective.

The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. Should the borrower of the securities fail financially, the fund may experience delays in recovering the loaned securities or exercising its rights in the collateral.

The fund may engage in short-term trading, which could produce higher transaction costs and taxable distributions and lower the fund's after-tax performance. The fund's forward roll transactions will increase its portfolio turnover rate.

PAST PERFORMANCE

The bar chart and table shown illustrate the risks of investing in the fund. The bar chart shows the changes in the fund's performance from year to year. The table compares the fund's average annual total returns to those of the Lehman Brothers U.S. Aggregate Index, an unmanaged index of corporate, U.S. government and agency debt instruments, and mortgage-backed and asset-backed securities. All returns assume reinvestment of dividends and distributions. Of course, past performance (before and after taxes) is no guarantee of future results.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Year-by-year total returns as of 12/31 each year (%)

Best Quarter: Q3 '06 +3.71%

Worst Quarter: Q2 '04 -3.55%

The fund's year-to-date total return as of 6/30/07 was 0.85%.

Average annual total returns as of 12/31/06

	1 Year	5 Years	10 Years
Fund <i>returns before taxes</i>	4.10%	4.40%	5.05%
Fund <i>returns after taxes on distributions</i>	2.44%	2.72%	2.85%
Fund <i>returns after taxes on distributions and sale of fund shares</i>	2.64%	2.76%	2.94%
Lehman Brothers U.S. Aggregate Index <i>reflects no deduction for fees, expenses or taxes</i>	4.33%	5.06%	6.24%

What this fund is – and isn't

This fund is a mutual fund: a pooled investment that is professionally managed and gives you the opportunity to participate in financial markets. It strives to reach its stated goal, although as with all mutual funds, it cannot offer guaranteed results.

An investment in this fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. You could lose money in this fund, but you also have the potential to make money.

EXPENSES

As an investor, you pay certain fees and expenses in connection with the fund, which are described in the table below. Annual fund operating expenses are paid out of fund assets, so their effect is included in the share price. The fund has no sales charge (load) or Rule 12b-1 distribution fees.

Fee table

Annual fund operating expenses

% of average daily net assets

Management fees	0.65%
Shareholder services fee	0.07%
Other expenses	0.26%
Total	0.98%

Expense example

1 Year	3 Years	5 Years	10 Years
\$100	\$312	\$542	\$1,201

This example shows what you could pay in expenses over time. It uses the same hypothetical conditions other funds use in their prospectuses: \$10,000 initial investment, 5% total return each year and no changes in expenses. The figures shown would be the same whether you sold your shares at the end of a period or kept them. Because actual returns and expenses will be different, the example is for comparison only.

Concepts to understand

Management fee: the fee paid to Dreyfus for managing the fund's portfolio and assisting in all aspects of the fund's operations. For the fiscal year ended March 31, 2007, Dreyfus waived a portion of its fee so that the effective management fee paid by the fund was 0.58%, reducing total expenses from 0.98% to 0.91%. This waiver was voluntary.

Shareholder services fee: a fee of up to 0.25% used to reimburse the fund's distributor for shareholder account service and maintenance.

Other expenses: fees paid by the fund for miscellaneous items such as transfer agency, custody, professional and registration fees. The fund also makes payments to certain financial intermediaries, including affiliates, who provide sub-administration, recordkeeping and/or sub-transfer agency services to beneficial owners of the fund.

MANAGEMENT

Investment adviser

The investment adviser for the fund is The Dreyfus Corporation (Dreyfus), 200 Park Avenue, New York, New York 10166. Founded in 1947, Dreyfus manages approximately \$201 billion in approximately 180 mutual fund portfolios. For the past fiscal year, the fund paid Dreyfus a management fee at the annual rate of 0.58% of the fund's average daily net assets. A discussion regarding the basis for the board's approving the fund's management agreement with Dreyfus is available in the fund's annual report for the fiscal year ended March 31, 2007. Dreyfus is the primary mutual fund business of The Bank of New York Mellon Corporation, a global financial services company focused on helping clients move and manage their financial assets, operating in 37 countries and serving more than 100 markets. The company is a leading provider of financial services for institutions, corporations and high-net-worth individuals, providing superior asset and wealth management, asset servicing, issuer services, and treasury services through a worldwide client-focused team. It has more than \$18 trillion in assets under custody and administration and \$1 trillion in assets under management, and it services more than \$11 trillion in outstanding debt. Additional information is available at www.bnymellon.com.

The Dreyfus asset management philosophy is based on the belief that discipline and consistency are important to investment success. For each fund, Dreyfus seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Catherine Powers is the primary portfolio manager of the fund. She has held this position since January 2005 and has been employed by Dreyfus since September 2001. Ms. Powers also is a senior portfolio manager for active core strategies, responsible for high grade core and core plus fixed-income strategies, with Standish Mellon Asset Management Company, LLC (Standish Mellon), a subsidiary of The Bank of New York Mellon Corporation and an affiliate of Dreyfus. Ms. Powers joined Standish Mellon in 1988.

The fund's Statement of Additional Information provides additional information about the portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of fund shares.

Distributor

The fund's distributor is MBSC Securities Corporation (MBSC), a wholly-owned subsidiary of Dreyfus. Dreyfus or MBSC may provide cash payments out of its own resources to financial intermediaries that sell shares of the fund or provide other services. Such payments are separate from any shareholder services fees or other expenses paid by the fund to the intermediaries. Because those payments are not made by you or the fund, the fund's expense ratio will not be affected by any such payments. These additional payments may be made to intermediaries, including affiliates, that provide shareholder servicing, sub-administration, record-keeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the financial intermediary. Cash compensation also may be paid from Dreyfus' or MBSC's own resources to intermediaries for inclusion of the fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." From time to time, Dreyfus or MBSC also may provide cash or non-cash compensation to financial intermediaries or their representatives in the form of occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a financial intermediary or its employees to recommend or sell shares of the fund to you. Please contact your financial representative for details about any payments they or their firm may receive in connection with the sale of fund shares or the provision of services to the fund.

Code of ethics

The fund, Dreyfus and MBSC have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. The Dreyfus code of ethics restricts the personal securities transactions of its employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the code is to ensure that personal trading by Dreyfus employees does not disadvantage any Dreyfus-managed fund.

FINANCIAL HIGHLIGHTS

This table describes the fund's performance for the fiscal periods indicated. "Total return" shows how much your investment in the fund would have increased (or decreased) during each period, assuming you had reinvested all dividends and distribu-

tions. These figures have been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the fund's financial statements, is included in the annual report, which is available upon request.

	2007	Year Ended March 31,			
		2006	2005	2004 ¹	2003

¹ As of April 1, 2003, the fund has adopted the method of accounting for interim payments on swap contracts in accordance with Financial Accounting Standards Board Statement No. 133. These interim payments are reflected within net realized and unrealized gain (loss) on swap contracts; however, prior to April 1, 2003, these interim payments were reflected within interest income/expense in the Statement of Operations. The effect of this change for the period ended March 31, 2004, was to increase net investment income per share by \$.01, decrease net realized and unrealized gain (loss) on investments per share by \$.01 and increase the ratio of net investment income to average net assets from 3.04% to 3.09%. Per-share data and ratios/supplemental data for periods prior to April 1, 2003 have not been restated to reflect this change in presentation.

² Based on average shares outstanding at each month end.

³ The portfolio turnover rates excluding mortgage dollar roll transactions for the periods ended March 31, 2007, March 31, 2006, March 31, 2005 and March 31, 2004 were 157.50%, 244.67%, 585.91% and 655.66%, respectively.

Your Investment

ACCOUNT POLICIES

Buying shares

You pay no sales charges to invest in this fund. Your price for fund shares is the fund's net asset value per share (NAV), which is generally calculated as of the close of trading on the New York Stock Exchange (NYSE) (usually 4:00 p.m. Eastern time) on days the NYSE is open for regular business. Your order will be priced at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. When calculating its NAV, the fund's investments generally are valued by one or more independent pricing services approved by the fund's board or on the basis of market quotations. The pricing service's procedures are reviewed under the general supervision of the board. If market quotations or prices from a pricing service are not readily available, or are determined not to reflect accurately fair value, the fund may value those investments at fair value as determined in accordance with the procedures approved by the fund's board. Fair value of investments may be determined by the fund's board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate under the circumstances. Using fair value to price investments may result in a value that is different from a security's most recent closing price and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the fund may trade on days that the fund is not open for business, thus affecting the value of the fund's assets on days when fund investors have no access to the fund.

Investments in foreign securities, high yield securities, municipal securities and certain other thinly traded securities may provide short-term traders arbitrage opportunities with respect to the fund's shares. For example, arbitrage opportunities may exist when trading in a portfolio security or securities is halted and does not resume, or the market on which such securities are traded closes before the fund calculates its NAV. If short-term investors in the fund were able to take advantage of these arbitrage opportunities, they could dilute the NAV of fund shares held by long-term investors. Portfolio valuation policies can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that such valuation policies will prevent dilution of the fund's NAV by short-term traders. While the fund has a policy regarding frequent trading, it too may not be completely effective to prevent short-term NAV arbitrage trading, particularly in regard to omnibus accounts. Please see "Your Investment — Account Policies — General Policies" for further information about the fund's frequent trading policy.

Concepts to understand

Traditional IRA: an individual retirement account. Your contributions may or may not be deductible depending on your circumstances. Assets grow tax-deferred; withdrawals and distributions are taxable in the year made.

Spousal IRA: an IRA funded by a working spouse in the name of a nonworking spouse.

Roth IRA: an IRA with non-deductible contributions, and tax-free growth of assets and distributions to pay retirement expenses, provided certain conditions are met.

Education Savings Account: an account with non-deductible contributions, and tax-free growth of assets and distributions, if used to pay certain educational expenses.

For more complete IRA information, consult Dreyfus or your tax professional.

Minimum investments

	Initial	Additional
Regular accounts	\$2,500	\$100
Traditional IRAs	\$750	no minimum
Spousal IRAs	\$750	no minimum
Roth IRAs	\$750	no minimum
Education Savings Accounts	\$500	no minimum <i>after the first year</i>
Dreyfus automatic investment plans	\$100	\$100

All investments must be in U.S. dollars. Third-party checks cannot be accepted. You may be charged a fee for any check that does not clear. Maximum Dreyfus TeleTransfer purchase is \$150,000 per day.

Selling shares

You may sell (redeem) shares at any time. Your shares will be sold at the next NAV calculated after your order is received in proper form by the fund's transfer agent or other authorized entity. Any certificates representing fund shares being sold must be returned with your redemption request. Your order will be processed promptly and you will generally receive the proceeds within a week.

Before selling or writing a check against shares recently purchased by check, Dreyfus TeleTransfer or Automatic Asset Builder, please note that:

- if you send a written request to sell such shares, the fund may delay sending the proceeds for up to eight business days following the purchase of those shares
- the fund will not honor redemption checks, or process wire, telephone, online or Dreyfus TeleTransfer redemption requests, for up to eight business days following the purchase of those shares

Limitations on selling shares by phone or online through www.dreyfus.com

Proceeds sent by	Minimum phone/online	Maximum phone/online
Check*	no minimum	\$250,000 <i>per day</i>
Wire	\$1,000	\$500,000 <i>for joint accounts every 30 days / \$20,000 per day</i>
Dreyfus TeleTransfer	\$500	\$500,000 <i>for joint accounts every 30 days / \$20,000 per day</i>

** Not available online on accounts whose address has been changed within the last 30 days.*

Written sell orders

Some circumstances require written sell orders along with signature guarantees. These include:

- amounts of \$10,000 or more on accounts whose address has been changed within the last 30 days
- requests to send the proceeds to a different payee or address

Written sell orders of \$100,000 or more must also be signature guaranteed.

A signature guarantee helps protect against fraud. You can obtain one from most banks or securities dealers, but not from a notary public. For joint accounts, each signature must be guaranteed. Please call to ensure that your signature guarantee will be processed correctly.

General policies

If your account falls below 50 shares, the fund may ask you to increase your balance. If it is still below 50 shares after 45 days, the fund may close your account and send you the proceeds.

Unless you decline teleservice privileges on your application, the fund's transfer agent is authorized to act on telephone or online instructions from any person representing himself or herself to be you and reasonably believed by the transfer agent to be genuine. You may be responsible for any fraudulent telephone or online order as long as the fund's transfer agent takes reasonable measures to confirm that instructions are genuine.

The fund is designed for long-term investors. Frequent purchases, redemptions and exchanges may disrupt portfolio management strategies and harm fund performance by diluting the value of fund shares and increasing brokerage and administrative costs. As a result, Dreyfus and the fund's board have adopted a policy of discouraging excessive trading, short-term market timing and other abusive trading practices (frequent trading) that could adversely affect the fund or its operations. Dreyfus and the fund will not enter into arrangements with any person or group to permit frequent trading.

The fund reserves the right to:

- change or discontinue its exchange privilege, or temporarily suspend the privilege during unusual market conditions
- change its minimum or maximum investment amounts
- delay sending out redemption proceeds for up to seven days (generally applies only during unusual market conditions or in cases of very large redemptions or excessive trading)
- "redeem in kind," or make payments in securities rather than cash, if the amount redeemed is large enough to affect fund operations (for example, if it exceeds 1% of the fund's assets)
- refuse any purchase or exchange request, including those from any individual or group who, in Dreyfus' view, is likely to engage in frequent trading

More than four roundtrips within a rolling 12-month period generally is considered to be frequent trading. A roundtrip consists of an investment that is substantially liquidated within 60 days. Based on the facts and circumstances of the trades, the fund may also view as frequent trading a pattern of investments that are partially liquidated within 60 days.

Dreyfus monitors selected transactions to identify frequent trading. When its surveillance systems identify multiple roundtrips, Dreyfus evaluates trading activity in the account for evidence of frequent trading. Dreyfus considers the investor's trading history in other accounts under common ownership or control, in other Dreyfus, Dreyfus Founders and Mellon Funds Trust funds, and if known, in non-affiliated mutual funds and accounts under common control. These evaluations involve judgments that are inherently subjective, and while Dreyfus seeks to apply the policy and procedures uniformly, it is possible that similar transactions may be treated differently. In all instances, Dreyfus seeks to make these judgments to the best of its abilities in a manner that it believes is consistent with shareholder interests. If Dreyfus concludes the account is likely to engage in frequent trading, Dreyfus may cancel or revoke the purchase or exchange on the following business day. Dreyfus may also temporarily or permanently bar such investor's future purchases into the fund in lieu of, or in addition to, canceling or revoking the trade. At its discretion, Dreyfus may apply these restrictions across all accounts under common ownership, control or perceived affiliation.

Fund shares often are held through omnibus accounts maintained by financial intermediaries, such as brokers and retirement plan administrators, where the holdings of multiple shareholders, such as all the clients of a particular broker, are aggregated. Dreyfus' ability to monitor the trading activity of investors whose shares are held in omnibus accounts is limited and dependent upon the cooperation of the financial intermediary in providing information with respect to individual shareholder transactions. However, the agreements between the distributor and financial intermediaries include obligations to comply with the terms of this prospectus. Further, all intermediaries have been requested in writing to notify the distributor immediately if, for any reason, they cannot meet their commitment to make fund shares available in accordance with the terms of the prospectus and relevant rules and regulations.

To the extent that the fund significantly invests in foreign securities traded on markets that close before the fund calculates its NAV, events that influence the value of these foreign securities may occur after the close of these foreign markets and before the fund calculates its NAV. As a result, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these foreign securities at the time the fund calculates its NAV (referred to as price arbitrage). This type of frequent trading may dilute the value of fund shares held by other shareholders. The fund has adopted procedures designed to adjust closing market prices of foreign equity securities under certain circumstances to reflect what it believes to be their fair value.

To the extent that the fund significantly invests in thinly traded high yield and municipal securities, certain investors may seek to trade fund shares in an effort to benefit from their understanding of the value of these securities (referred to as price arbitrage). Any such frequent trading strategies may interfere with efficient management of the fund's portfolio to a greater degree than funds that invest in highly liquid securities, in part because the fund may have difficulty selling these portfolio securities at advantageous times or prices to satisfy large and/or frequent redemption requests. Any successful price arbitrage may also cause dilution in the value of fund shares held by other shareholders.

Although the fund's frequent trading and fair valuation policy and procedures are designed to discourage market timing and excessive trading, none of these tools alone, nor all of them together, completely eliminates the potential for frequent trading.

Transactions made through Automatic Investment Plans, Automatic Withdrawal Plans, Dreyfus Auto-Exchange Privileges and automatic non-discretionary rebalancing programs approved in writing by Dreyfus generally are not considered to be frequent trading.

Third-party investments

If you invest through a third party (rather than directly with the distributor), the policies and fees may be different than those described herein. Banks, brokers, 401(k) plans, financial advisers and financial supermarkets may charge transaction fees and may set different minimum investments or limitations on buying or selling shares. Consult a representative of your plan or financial institution for further information.

DISTRIBUTIONS AND TAXES

The fund earns dividends, interest and other income from its investments, and distributes this income (less expenses) to shareholders as dividends. The fund also realizes capital gains from its investments, and distributes these gains (less any losses) to shareholders as capital gain distributions. The fund normally pays dividends once a month and capital gain distributions annually. Fund dividends and capital gain distributions will be reinvested in the fund unless you instruct the fund otherwise. There are no fees or sales charges on reinvestments.

Distributions paid by the fund are subject to federal income tax, and may also be subject to state or local taxes (unless you are investing through a tax-advantaged retirement account). For federal tax purposes, in general, certain fund distributions, including distributions of short-term capital gains, are taxable to you as ordinary income. Other fund distributions, including dividends from U.S. companies and certain foreign companies and distributions of long-term capital gains, generally are taxable to you as qualified dividends and capital gains, respectively.

High portfolio turnover and more volatile markets can result in significant taxable distributions to shareholders, regardless of whether their shares have increased in value. The tax status of any distribution generally is the same regardless of how long you have been in the fund and whether you reinvest your distributions or take them in cash.

If you buy shares of a fund when the fund has realized but not yet distributed income or capital gains, you will be “buying a dividend” by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Your sale of shares, including exchanges into other funds, may result in a capital gain or loss for tax purposes. A capital gain or loss on your investment in the fund generally is the difference between the cost of your shares and the amount you receive when you sell them.

The tax status of your distributions will be detailed in your annual tax statement from the fund. Because everyone’s tax situation is unique, please consult your tax advisor before investing.

SERVICES FOR FUND INVESTORS

Automatic services

Buying or selling shares automatically is easy with the services described below. With each service, you select a schedule and amount, subject to certain restrictions. You can set up most of these services with your application or by calling 1-800-645-6561.

For investing

Dreyfus Automatic Asset Builder® For making automatic investments from a designated bank account.

Dreyfus Payroll Savings Plan For making automatic investments through a payroll deduction.

Dreyfus Government Direct Deposit Privilege For making automatic investments from your federal employment, Social Security or other regular federal government check.

Dreyfus Dividend Sweep For automatically reinvesting the dividends and distributions from one Dreyfus fund into another (not available for IRAs).

For exchanging shares

Dreyfus Auto-Exchange Privilege For making regular exchanges from one Dreyfus fund into another.

For selling shares

Dreyfus Automatic Withdrawal Plan For making regular withdrawals from most Dreyfus funds.

Dreyfus Financial Centers

A full array of investment services and products are offered at Dreyfus Financial Centers. This includes information on mutual funds, brokerage services, tax-advantaged products and retirement planning.

Experienced financial consultants can help you make informed choices and provide you with personalized attention in handling account transactions. The Financial Centers also offer informative seminars and events. To find out whether a Financial Center is near you, call **1-800-645-6561**.

Checkwriting privilege

You may write redemption checks against your account in amounts of \$500 or more. These checks are free; however, a fee may be charged if you request a stop payment or if the transfer agent cannot honor a redemption check due to insufficient funds or another valid reason. Please do not post-date your checks or use them to close your account.

Exchange privilege

You can exchange shares worth \$500 or more (no minimum for retirement accounts) from one Dreyfus fund into another. You can request your exchange in writing, by phone or online. Be sure to read the current prospectus for any fund into which you are exchanging before investing. Any new account established through an exchange will have the same privileges as your original account (as long as they are available). There is currently no fee for exchanges, although you may be charged a sales load when exchanging into any fund that has one.

Dreyfus TeleTransfer privilege

To move money between your bank account and your Dreyfus fund account with a phone call or online, use the Dreyfus TeleTransfer privilege. You can set up Dreyfus TeleTransfer on your account by providing bank account information and following the instructions on your application.

Dreyfus Express® voice-activated account access

You can easily manage your Dreyfus accounts, check your account balances, transfer money between your Dreyfus funds, get price and yield information and much more — when it's convenient for you — by calling **1-800-645-6561**. Certain requests may require the services of a representative.

Retirement plans

Dreyfus offers a variety of retirement plans, including traditional and Roth IRAs, and Education Savings Accounts. Here's where you call for information:

- for traditional, rollover and Roth IRAs, and Education Savings Accounts, call **1-800-645-6561**
- for SEP-IRAs, Keogh accounts, 401(k) and 403(b) accounts, call **1-800-358-0910**

INSTRUCTIONS FOR **REGULAR ACCOUNTS**

TO OPEN AN ACCOUNT

In Writing

Complete the application.
Mail your application and a check to:
The Dreyfus Family of Funds
P.O. Box 55299, Boston, MA 02205-8553

TO ADD TO AN ACCOUNT

Fill out an investment slip, and write your account number on your check.
Mail the slip and the check to:
The Dreyfus Family of Funds
P.O. Box 105, Newark, NJ 07101-0105

TO SELL SHARES

Write a redemption check **or** write a letter of instruction that includes:

- your name(s) and signature(s)
- your account number
- the fund name
- the dollar amount you want to sell
- how and where to send the proceeds

Obtain a signature guarantee or other documentation, if required (see "Account Policies – Selling Shares").

Mail your request to:
The Dreyfus Family of Funds
P.O. Box 55263, Boston, MA 02205-8501

By Telephone

Wire Call to request an account application and an account number. Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900480025
- the fund name
- your account number
- name(s) of investor(s)

Return your application with the account number on the application.

Wire Have your bank send your investment to The Bank of New York, with these instructions:

- ABA# 021000018
- DDA# 8900480025
- the fund name
- your account number
- name(s) of investor(s)

Electronic check Same as wire, but insert "111" before your 14-digit account number.

Dreyfus TeleTransfer Request Dreyfus TeleTransfer on your application. Call to request your transaction.

Wire Be sure the fund has your bank account information on file. Call to request your transaction. Proceeds will be wired to your bank.

Dreyfus TeleTransfer Be sure the fund has your bank account information on file. Call to request your transaction. Proceeds will be sent to your bank by electronic check.

Check Call to request your transaction. A check will be sent to the address of record.

Concepts to understand

Wire transfer: for transferring money from one financial institution to another. Wiring is the fastest way to move money, although your bank may charge a fee to send or receive wire transfers. Wire redemptions from the fund are subject to a \$1,000 minimum.

Electronic check: for transferring money out of a bank account. Your transaction is entered electronically, but may take up to eight business days to clear. Electronic checks usually are available without a fee at all Automated Clearing House (ACH) banks.

For information and other assistance, call toll free in the U.S.

For More Information

Dreyfus A Bonds Plus, Inc.

SEC file number: 811-2625

More information on this fund is available free upon request, including the following:

Annual/Semiannual Report

Describes the fund's performance, lists portfolio holdings and contains a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the last fiscal year. The fund's most recent annual and semiannual reports are available at www.dreyfus.com.

Statement of Additional Information (SAI)

Provides more details about the fund and its policies. A current SAI is available at www.dreyfus.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (is legally considered part of this prospectus).

Portfolio Holdings

The fund will disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at www.dreyfus.com, under Mutual Fund Center — Dreyfus Mutual Funds — Mutual Fund Total Holdings. The information will be posted with a one-month lag and will remain accessible until the fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the fund will publicly disclose at www.dreyfus.com its complete schedule of portfolio holdings as of the end of such quarter.

A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

DESCRIPTION OF THE FUND

The Fund is a Maryland corporation that was organized on February 23, 1976. The Fund is an open-end management investment company, known as a mutual fund. The Fund is a diversified fund, which means that, with respect to 75% of the Fund's total assets, the Fund will not invest more than 5% of its assets in the securities of any single issuer nor hold more than 10% of the outstanding voting securities of any single issuer (other than, in each case, securities of other investment companies, and securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities).

The Dreyfus Corporation (the "Manager" or "Dreyfus") serves as the Fund's investment adviser.

MBSC Securities Corporation (the "Distributor") is the distributor of the Fund's shares.

Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Corporate Debt Securities. Corporate debt securities include corporate bonds, debentures, notes and other similar instruments, including certain convertible securities. Debt securities may be acquired with warrants attached. Corporate income-producing securities also may include forms of preferred or preference stock. The rate of interest on a corporate debt security may be fixed, floating or variable, and may vary inversely with respect to a reference rate such as interest rates or other financial indications. The rate of return or return of principal on some debt obligations may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies.

Convertible Securities. Convertible securities may be converted at either a stated price or stated rate into underlying shares of common stock. Convertible securities have characteristics similar to both fixed-income and equity securities. Convertible securities generally are subordinated to other similar but non-convertible securities of the same issuer, although convertible bonds, as corporate debt obligations, enjoy seniority in right of payment to all equity securities, and convertible preferred stock is senior to common stock of the same issuer. Because of the subordination feature, however, convertible securities typically have lower ratings than similar non-convertible securities.

Although to a lesser extent than with fixed-income securities, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stock. A unique feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of

the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

Convertible securities provide for a stable stream of income with generally higher yields than common stocks, but there can be no assurance of current income because the issuers of the convertible securities may default on their obligations. A convertible security, in addition to providing fixed income, offers the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. There can be no assurance of capital appreciation, however, because securities prices fluctuate. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality because of the potential for capital appreciation.

Municipal Obligations. Municipal obligations are debt obligations issued by states, territories and possessions of the United States and the District of Columbia and their political subdivisions, agencies and instrumentalities, or multistate agencies or authorities, and certain specified entities, generally to obtain funds for various public purposes, and include certain industrial development bonds issued by or on behalf of public authorities. Municipal obligations are classified as general obligation bonds, revenue bonds and notes. General obligation bonds are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue bonds are payable from the revenue derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source, but not from the general taxing power. Industrial development bonds, in most cases, are revenue bonds that do not carry the pledge of the credit of the issuing municipality, but generally are guaranteed by the corporate entity on whose behalf they are issued. Notes are short-term instruments which are obligations of the issuing municipalities or agencies and are sold in anticipation of a bond sale, collection of taxes or receipt of other revenues. Municipal obligations include municipal lease/purchase agreements, which are similar to installment purchase contracts for property or equipment issued by municipalities. Municipal obligations bear fixed, floating or variable rates of interest, which are determined in some instances by formulas under which the municipal obligation's interest rate will change directly or inversely to changes in interest rates or an index, or multiples thereof, in many cases subject to a maximum and minimum. Certain municipal obligations are subject to redemption at a date earlier than their stated maturity pursuant to call options, which may be separated from the related municipal obligation and purchased and sold separately. The Fund also may acquire call options on specific municipal obligations. The Fund generally would purchase these call options to protect the Fund from the issuer of the related municipal obligation redeeming, or other holder of the call option from calling away, the municipal obligation before maturity.

While, in general, municipal obligations are tax exempt securities having relatively low yields as compared to taxable, non-municipal obligations of similar quality, certain municipal obligations are taxable obligations offering yields comparable to, and in some cases greater than, the yields available on other permissible Fund investments. Dividends received by shareholders on Fund shares which are attributable to interest income received by the Fund from municipal obligations generally will be subject to Federal income tax. The Fund may invest in municipal obligations, the ratings of which correspond with the ratings of other permissible Fund

investments. The Fund currently intends to invest no more than 25% of its assets in municipal obligations. However, this percentage may be varied from time to time without shareholder approval.

Variable and Floating Rate Securities. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be event based, such as based on a change in the prime rate.

The Fund may invest in floating rate debt instruments (“floaters”). The interest rate on a floater is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. The interest rate on a floater resets periodically, typically every six months. Because of the interest rate reset feature, floaters provide the Fund with a certain degree of protection against rises in interest rates, although the Fund will participate in any declines in interest rates as well.

The Fund also may invest in inverse floating rate debt instruments (“inverse floaters”). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed or inversely to a multiple of the applicable index. An inverse floating rate security may exhibit greater price volatility than a fixed rate obligation of similar credit quality.

Mortgage-Related Securities. Mortgage-related securities are a form of derivative collateralized by pools of commercial or residential mortgages. Pools of mortgage loans are assembled as securities for sale to investors by various governmental, government-related and private organizations. These securities may include complex instruments such as collateralized mortgage obligations and stripped mortgage-backed securities, mortgage pass-through securities, interests in real estate mortgage investment conduits (“REMICs”), adjustable rate mortgages, real estate investment trusts (“REITs”), or other kinds of mortgage-backed securities, including those with fixed, floating and variable interest rates, those with interest rates based on multiples of changes in a specified index of interest rates and those with interest rates that change inversely to changes in interest rates, as well as those that do not bear interest.

Residential Mortgage-Related Securities—The Fund may invest in mortgage-related securities representing participation interests in pools of one- to four-family residential mortgage loans issued or guaranteed by governmental agencies or instrumentalities, such as the Government National Mortgage Association (“GNMA”), the Federal National Mortgage Association (“FNMA”) and the Federal Home Loan Mortgage Corporation (“FHLMC”), or issued by private entities. Residential mortgage-related securities may be issued using a variety of structures, including multi-class structures featuring senior and subordinated classes.

Mortgage-related securities issued by GNMA include GNMA Mortgage Pass-Through Certificates (also known as “Ginnie Maes”) which are guaranteed as to the timely payment of principal and interest by GNMA and such guarantee is backed by the full faith and credit of the

United States. GNMA certificates also are supported by the authority of GNMA to borrow funds from the U.S. Treasury to make payments under its guarantee. Mortgage-related securities issued by FNMA include FNMA Guaranteed Mortgage Pass-Through Certificates (also known as “Fannie Maes”) which are solely the obligations of FNMA and are not backed by or entitled to the full faith and credit of the United States. Fannie Maes are guaranteed as to timely payment of principal and interest by FNMA. Mortgage-related securities issued by FHLMC include FHLMC Mortgage Participation Certificates (also known as “Freddie Macs” or “PCs”). Freddie Macs are not guaranteed by the United States or by any Federal Home Loan Bank and do not constitute a debt or obligation of the United States or of any Federal Home Loan Bank. Freddie Macs entitle the holder to timely payment of interest, which is guaranteed by FHLMC. FHLMC guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. When FHLMC does not guarantee timely payment of principal, FHLMC may remit the amount due on account of its guarantee of ultimate payment of principal at any time after default on an underlying mortgage, but in no event later than one year after it becomes payable.

Commercial Mortgage-Related Securities—Commercial mortgage-related securities generally are multi-class debt or pass-through certificates secured by mortgage loans on commercial properties. These mortgage-related securities generally are structured to provide protection to the senior class investors against potential losses on the underlying mortgage loans. This protection generally is provided by having the holders of subordinated classes of securities (“Subordinated Securities”) take the first loss if there are defaults on the underlying commercial mortgage loans. Other protection, which may benefit all of the classes or particular classes, may include issuer guarantees, reserve funds, additional Subordinated Securities, cross-collateralization and over-collateralization.

Subordinated Securities—The Fund may invest in Subordinated Securities issued or sponsored by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other non-governmental issuers. Subordinated Securities have no governmental guarantee, and are subordinated in some manner as to the payment of principal and/or interest to the holders of more senior mortgage-related securities arising out of the same pool of mortgages. The holders of Subordinated Securities typically are compensated with a higher stated yield than are the holders of more senior mortgage-related securities. On the other hand, Subordinated Securities typically subject the holder to greater risk than senior mortgage-related securities and tend to be rated in a lower rating category, and frequently a substantially lower rating category, than the senior mortgage-related securities issued in respect of the same pool of mortgages. Subordinated Securities generally are likely to be more sensitive to changes in prepayment and interest rates and the market for such securities may be less liquid than is the case for traditional fixed-income securities and senior mortgage-related securities.

Collateralized Mortgage Obligations (“CMOs”) and Multi-Class Pass-Through-Securities—A CMO is a multiclass bond backed by a pool of mortgage pass-through certificates or mortgage loans. CMOs may be collateralized by (a) Ginnie Mae, Fannie Mae, or Freddie Mac pass-through certificates, (b) unsecuritized mortgage loans insured by the Federal Housing Administration or guaranteed by the Department of Veterans’ Affairs, (c) unsecuritized conventional mortgages, (d) other mortgage-related securities, or (e) any combination thereof.

Each class of CMOs, often referred to as a “tranche,” is issued at a specific coupon rate and has a stated maturity or final distribution date. Principal prepayments on collateral underlying a CMO may cause it to be retired substantially earlier than the stated maturities or final distribution dates. The principal and interest on the underlying mortgages may be allocated among the several classes of a series of a CMO in many ways. One or more tranches of a CMO may have coupon rates which reset periodically at a specified increment over an index, such as the London Interbank Offered Rate (“LIBOR”) (or sometimes more than one index). These floating rate CMOs typically are issued with lifetime caps on the coupon rate thereon. The Fund also may invest in inverse floating rate CMOs. Inverse floating rate CMOs constitute a tranche of a CMO with a coupon rate that moves in the reverse direction to an applicable index such as LIBOR. Accordingly, the coupon rate thereon will increase as interest rates decrease. Inverse floating rate CMOs are typically more volatile than fixed or floating rate tranches of CMOs.

Many inverse floating rate CMOs have coupons that move inversely to a multiple of the applicable indexes. The effect of the coupon varying inversely to a multiple of an applicable index creates a leverage factor. Inverse floaters based on multiples of a stated index are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and loss of principal. The markets for inverse floating rate CMOs with highly leveraged characteristics at times may be very thin. The Fund’s ability to dispose of its positions in such securities will depend on the degree of liquidity in the markets for such securities. It is impossible to predict the amount of trading interest that may exist in such securities, and therefore the future degree of liquidity.

Stripped Mortgage-Backed Securities—The Fund also may invest in stripped mortgage-backed securities which are created by segregating the cash flows from underlying mortgage loans or mortgage securities to create two or more new securities, each with a specified percentage of the underlying securities’ principal or interest payments. Mortgage securities may be partially stripped so that each investor class receives some interest and some principal. When securities are completely stripped, however, all of the interest is distributed to holders of one type of security, known as an interest-only security, or IO, and all of the principal is distributed to holders of another type of security known as a principal-only security, or PO. Strips can be created in a pass-through structure or as tranches of a CMO. The yields to maturity on IOs and POs are very sensitive to the rate of principal payments (including prepayments) on the related underlying mortgage assets. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IOs. Conversely, if the underlying mortgage assets experience less than anticipated prepayments of principal, the yield on POs could be materially and adversely affected.

Real Estate Investment Trusts—A REIT is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets the definitional requirements of the Internal Revenue Code of 1986, as amended (the “Code”). The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level Federal income tax and making the REIT a pass-through vehicle for Federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by

mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

REITs are characterized as equity REITs, mortgage REITs and hybrid REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depend upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs combine the characteristics of both equity and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate. The value of securities issued by REITs are affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for tax-free status under the Code or to maintain exemption from the Investment Company Act of 1940, as amended (the “1940 Act”).

Adjustable-Rate Mortgage Loans (“ARMs”)—ARMs eligible for inclusion in a mortgage pool generally will provide for a fixed initial mortgage interest rate for a specified period of time, generally for either the first three, six, twelve, thirteen, thirty-six, or sixty scheduled monthly payments. Thereafter, the interest rates are subject to periodic adjustment based on changes in an index. ARMs typically have minimum and maximum rates beyond which the mortgage interest rate may not vary over the lifetime of the loans. Certain ARMs provide for additional limitations on the maximum amount by which the mortgage interest rate may adjust for any single adjustment period. Negatively amortizing ARMs may provide limitations on changes in the required monthly payment. Limitations on monthly payments can result in monthly payments that are greater or less than the amount necessary to amortize a negatively amortizing ARM by its maturity at the interest rate in effect during any particular month.

Private Entity Securities—These mortgage-related securities are issued by commercial banks, savings and loan institutions, mortgage bankers, private mortgage insurance companies and other nongovernmental issuers. Timely payment of principal and interest on mortgage-related securities backed by pools created by non-governmental issuers often is supported partially by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance. The insurance and guarantees are issued by government entities, private insurers and the mortgage poolers. There can be no assurance that the private insurers or mortgage poolers can meet their obligations under the policies, so that if the issuers default on their obligations the holders of the security could sustain a loss. No insurance or guarantee covers the Fund or the price of the Fund’s shares. Mortgage-related securities issued by non-governmental issuers generally offer a higher rate of interest than government-agency and government-related securities because there are no direct or indirect government guarantees of payment.

Other Mortgage-Related Securities—Other mortgage-related securities that the Fund may invest in include securities other than those described above that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property, including

CMO residuals. Other mortgage-related securities may be equity or debt securities issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, homebuilders, mortgage banks, commercial banks, investment banks, partnerships, trusts and special purpose entities of the foregoing.

Asset-Backed Securities. Asset-backed securities are a form of derivative. The securitization techniques used for asset-backed securities are similar to those used for mortgage-related securities. These securities include debt securities and securities with debt-like characteristics. The collateral for these securities has included home equity loans, automobile and credit card receivables, boat loans, computer leases, airplane leases, mobile home loans, recreational vehicle loans and hospital account receivables. The Fund may invest in these and other types of asset-backed securities that may be developed in the future.

Asset-backed securities present certain risks that are not presented by mortgage-backed securities. Primarily, these securities may provide the Fund with a less effective security interest in the related collateral than do mortgage-backed securities. Therefore, there is the possibility that recoveries on the underlying collateral may not, in some cases, be available to support payments on these securities.

U.S. Government Securities. The Fund may invest in U.S. Treasury securities which include Treasury Bills, Treasury Notes and Treasury Bonds that differ in their interest rates, maturities and times of issuance. Treasury Bills have initial maturities of one year or less; Treasury Notes have initial maturities of one to ten years, and Treasury Bonds generally have initial maturities of greater than ten years. In addition to U.S. Treasury securities, the Fund may invest in securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities. Some obligations issued or guaranteed by U.S. Government agencies and instrumentalities are supported by the full faith and credit of the U.S. Treasury; others by the right of the issuer to borrow from the Treasury; others by discretionary authority of the U.S. Government to purchase certain obligations of the agency or instrumentality; and others only by the credit of the agency or instrumentality. These securities bear fixed, floating or variable rates of interest. While the U.S. Government currently provides financial support to such U.S. Government-sponsored agencies or instrumentalities, no assurance can be given that it will always do so, since it is not so obligated by law.

Inflation-Indexed Bonds. The Fund may invest in inflation-indexed bonds, which are fixed-income securities whose value is periodically adjusted according to the rate of inflation. Two structures are common. The U.S. Treasury and some other issuers utilize a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the Consumer Price Index ("CPI") accruals as part of a semiannual coupon.

Inflation-indexed securities issued by the U.S. Treasury have varying maturities and pay interest on a semi-annual basis equal to a fixed percentage of the inflation-adjusted principal amount. If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of

the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed and will fluctuate. The Fund also may invest in other inflation-related bonds which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rate of inflation rises at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds. Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the Consumer Price Index for Urban Consumers ("CPI-U"), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

Zero Coupon, Pay-in-Kind and Step-Up Securities. The Fund may invest in zero coupon U.S. Treasury securities, which are Treasury Notes and Bonds that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interests in such stripped debt obligations and coupons. Zero coupon securities also are issued by corporations and financial institutions which constitute a proportionate ownership of the issuer's pool of underlying U.S. Treasury securities. A zero coupon security pays no interest to its holders during its life and is sold at a discount to its face value at maturity. The Fund may invest in pay-in-kind bonds, which are bonds that generally pay interest through the issuance of additional bonds. The Fund also may purchase step-up coupon bonds, which are debt securities that typically do not pay interest for a specified period of time and then pay interest at a series of different rates. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of securities that pay cash interest periodically having similar maturities and credit qualities. In addition, unlike bonds that pay cash interest throughout the period to maturity, the Fund will realize no cash until

the cash payment date unless a portion of such securities are sold and, if the issuer defaults, the Fund may obtain no return at all on its investment. Federal income tax law requires the holder of a zero coupon security or of certain pay-in-kind or step-up bonds to accrue income with respect to these securities prior to the receipt of cash payments. To maintain its qualification as a regulated investment company and avoid liability for Federal income taxes, the Fund may be required to distribute such income accrued with respect to these securities and may have to dispose of portfolio securities under disadvantageous circumstances in order to generate cash to satisfy these distribution requirements. See “Dividends, Distributions and Taxes.”

Investment Companies. The Fund may invest in securities issued by other investment companies to the extent consistent with its investment objective. Under the 1940 Act, the Fund’s investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund’s total assets with respect to any one investment company and (iii) 10% of the Fund’s total assets in the aggregate. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company’s expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. The Fund also may invest its uninvested cash reserves or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund’s securities lending program in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above. See “Lending Portfolio Securities.”

Foreign Securities. The Fund may invest up to 20% of its net assets in bonds issued by foreign issuers denominated in U.S. dollars or foreign currencies, but will limit its investment in bonds issued by foreign issuers that are denominated in foreign currencies to no more than 10% of its net assets. These securities include equity and debt securities of companies organized under the laws of countries other than the United States and debt securities issued or guaranteed by one or more foreign governments or any of their political subdivisions, agencies or instrumentalities or supranational entities that are determined by the Manager to be of comparable quality to the other obligations in which the Fund may invest. They also include securities of companies whose principal trading market is in a country other than the United States or of companies (including those that are located in the United States or organized under U.S. law) that derive a significant portion of their revenue or profits from foreign businesses, investments or sales, or that have a majority of their assets outside the United States. They may be traded on foreign securities exchanges or in the foreign over-the-counter markets. Supranational entities include international organizations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies. Examples include the International Bank for Reconstruction and Development (the World Bank), the European Coal and Steel Community, the Asian Development Bank and the InterAmerican Development Bank.

Illiquid Securities. The Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund’s investment objective. These securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on

resale, repurchase agreements providing for settlement in more than seven days after notice, and certain privately negotiated, non-exchange traded options and securities used to cover such options. As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

Money Market Instruments. The Fund may invest in money market instruments consisting of U.S. Government securities, certificates of deposit, time deposits, bankers' acceptances, short-term investment grade corporate bonds and other short-term debt instruments, and repurchase agreements. Under normal market conditions, the Fund does not expect to have more than 20% of its net assets invested in money market instruments. However, when the Manager determines that adverse market conditions exist, the Fund may adopt a temporary defensive position and invest up to 100% of its assets in money market instruments.

Investment Techniques

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Duration and Portfolio Maturity. The Fund invests without regard to maturity or duration limitations. As a measure of a fixed-income security's cash flow, duration is an alternative to the concept of "term to maturity" in assessing the price volatility associated with changes in interest rates. Generally, the longer the duration, the more volatility an investor should expect. For example, the market price of a bond with a duration of three years would be expected to decline 3% if interest rates rose 1%. Conversely, the market price of the same bond would be expected to increase 3% if interest rates fell 1%. The market price of a bond with a duration of six years would be expected to increase or decline twice as much as the market price of a bond with a three-year duration. Duration is a way of measuring a security's maturity in terms of the average time required to receive the present value of all interest and principal payments as opposed to its term to maturity. The maturity of a security measures only the time until final payment is due; it does not take account of the pattern of a security's cash flows over time, which would include how cash flow is affected by prepayments and by changes in interest rates. Incorporating a security's yield, coupon interest payments, final maturity and option features into one measure, duration is computed by determining the weighted average maturity of a bond's cash flows, where the present values of the cash flows serve as weights. In computing the duration of the Fund, the Manager will estimate the duration of obligations that are subject to features such as prepayment or redemption by the issuer, put options retained by the investor or other imbedded options, taking into account the influence of interest rates on prepayments and coupon flows.

For purposes of calculating average effective portfolio maturity, a security that is subject to redemption at the option of the issuer on a particular date (the "call date") which is prior to the security's stated maturity may be deemed to mature on the call date rather than on its stated maturity date. The call date of a security will be used to calculate average effective portfolio maturity when the Manager reasonably anticipates, based upon information available to it, that the issuer will exercise its right to redeem the security. The Manager may base its conclusion on such factors as the interest-rate paid on the security compared to prevailing market rates, the

amount of cash available to the issuer of the security, events affecting the issuer of the security, and other factors that may compel or make it advantageous for the issuer to redeem a security prior to its stated maturity.

Leverage. Leveraging (that is, buying securities using borrowed money) exaggerates the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio. These borrowings will be subject to interest costs which may or may not be recovered by appreciation of the securities purchased; in certain cases, interest costs may exceed the return received on the securities purchased. For borrowings for investment purposes, the 1940 Act requires the Fund to maintain continuous asset coverage (total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed. If the required coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the amount of its borrowings and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. The Fund also may be required to maintain minimum average balances in connection with such borrowing or pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

The Fund may enter into reverse repurchase agreements with banks, brokers or dealers. This form of borrowing involves the transfer by the Fund of an underlying debt instrument in return for cash proceeds based on a percentage of the value of the security. The Fund retains the right to receive interest and principal payments on the security. At an agreed upon future date, the Fund repurchases the security at principal plus accrued interest. Reverse repurchase agreements may be preferable to a regular sale and later repurchase of the securities because it avoids certain market risks and transaction costs. Such transactions, however, may increase the risk of potential fluctuations in the market value of the Fund's assets. In addition, interest costs on the cash received may exceed the return on the securities purchased. To the extent the Fund enters into a reverse repurchase agreement, the Fund will segregate permissible liquid assets at least equal to the aggregate amount of its reverse repurchase obligations, plus accrued interest, in certain cases, in accordance with releases promulgated by the Securities and Exchange Commission. The Securities and Exchange Commission views reverse repurchase transactions as collateralized borrowings by the Fund. Except for these transactions, the Fund's borrowings generally will be unsecured.

Short-Selling. In these transactions, the Fund sells a security it does not own in anticipation of a decline in the market value of the security. The Fund may make short-sales to hedge positions, for duration and risk management, to maintain portfolio flexibility or to enhance returns. To complete a short-sale transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is obligated to replace the security borrowed by purchasing it subsequently at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund, which would result in a loss or gain, respectively.

The Fund will not sell securities short if, after effect is given to any such short sale, the total market value of all securities sold short would exceed 25% of the value of the Fund's net assets.

The Fund also may make short sales "against the box," in which the Fund enters into a short sale of a security it owns or has the immediate and unconditional right to acquire at no additional cost at the time of the sale.

Until the Fund closes its short position or replaces the borrowed security, it will:
(a) segregate permissible liquid assets in an amount that, together with the amount provided as collateral, always equals the current value of the security sold short; or (b) otherwise cover its short position.

Lending Portfolio Securities. The Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund's investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund's total assets (including the value of all assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The Fund may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize the risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Derivatives. The Fund may invest in, or enter into derivatives for a variety of reasons, including to hedge certain market or interest rate risks, to provide a substitute for purchasing or selling particular securities or to increase potential income gain. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, and related indexes. Examples of derivative instruments the Fund may use (in addition to mortgage-related securities and asset-backed securities) include options contracts, futures contracts, options on futures contracts, swaps and credit derivatives. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to

invest than “traditional” securities would. The Fund’s portfolio managers, however, may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by a Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund’s performance.

If the Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund’s return or result in a loss. The Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. By contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Manager will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by the Fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Some derivatives the Fund uses involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index.) This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable. Pursuant to regulations and/or published positions of the Securities Exchange Commission, the Fund maybe required to segregate permissible liquid assets or engage in other measures approved by the Securities and Exchange Commission or its staff, to “cover” the Fund’s obligations relating to its transactions in derivatives. For example, in the case of future contracts or forward contracts that are not contractually required to cash settle, the Fund must set aside liquid assets equal to such contracts’ full notional value (generally, the total numerical value of the asset underlying a future or forward contract at the time of valuation) while the positions are open. With respect to futures contracts or forward

contracts that are contractually required to cash settle, however, the Fund is permitted to set aside liquid assets in an amount equal to the Fund's daily marked-to-market net obligation (i.e., the Fund's daily net liability) under the contracts, if any, rather than such contracts' full notional value. By setting aside assets equal to only its net obligations under cash-settled futures and forward contracts, the Fund may employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional value of such contracts.

The Fund will not be a commodity pool. The Fund has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility, as a registered investment company, for an exclusion from the definition of commodity pool operator and that the Fund is not subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

Futures Transactions--In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the original purchase price, the fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. Transaction costs also are included in these calculations.

The Fund may enter into futures contracts in U.S. domestic markets. Engaging in these transactions involves risk of loss to the Fund which could adversely affect the value of the Fund's net assets. Although the Fund intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures and options with respect thereto by the Fund also is subject to the Manager's ability to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the transaction being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the

market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Specific Futures Transactions. The Fund may purchase and sell stock index futures contracts. A stock index future obligates the Fund to pay or receive an amount of cash equal to a fixed dollar amount specified in the futures contract multiplied by the difference between the settlement price of the contract on the contract's last trading day and the value of the index based on the stock prices of the securities that comprise it at the opening of trading in such securities on the next business day.

The Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

Options--In General. The Fund may purchase call and put options and write (i.e., sell) covered call and put option contracts. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by the Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction such as by segregating permissible liquid assets. A put option written by the Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken or otherwise cover the transaction. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be

able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. The Fund may purchase and sell call and put options on securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities.

The Fund may purchase cash-settled options on interest rate swaps in pursuit of its investment objective. A cash-settled option on a swap gives the purchaser the right, but not the obligation, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms.

Successful use by the Fund of options will be subject to the Manager's ability to predict correctly movements in interest rates and prices of securities underlying options. To the extent such predictions are incorrect, the Fund may incur losses.

Swap Transactions and Other Credit Derivatives. The Fund may engage in swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, credit default swaps, and index swap agreements and other credit derivative products, to seek to mitigate risk, manage maturity and duration, reduce portfolio turnover, or obtain a particular desired return at a lower cost to the Fund than if the Fund had invested directly in an instrument that yielded the desired return. The Fund also may enter into options on swaps, sometimes called "swaptions."

Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are generally calculated with respect to a "notional amount," *i.e.*, the return on or increase in value of a particular dollar amount invested at a particular interest rate, or in a "basket" of credit default swaps or securities representing a particular index. The "notional amount" of the swap agreement is only used as a basis upon which to calculate the obligations that the parties to a swap agreement have agreed to exchange.

Most swap agreements entered into by the Fund are cash settled and calculate the obligations of the parties to the agreement on a "net basis." Thus, the Fund's current obligations (or rights) under a swap agreement generally will be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the segregation of permissible liquid assets of the Fund.

A swap option is a contract that gives a counterparty the right (but not the obligation) in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. A cash-settled option on a swap gives the purchaser the right in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from

financial institutions, including securities brokerage firms. Depending on the terms of the particular option agreement, the Fund generally will incur a greater degree of risk when it writes a swap option than it will incur when it purchases a swap option. When the Fund purchases a swap option, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when the Fund writes a swap option, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.

Interest rate swaps are over-the-counter contracts in which each party agrees to make a periodic interest payment based on an index or the value of an asset in return for a periodic payment from the other party based on a different index or asset. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index rises above a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. Interest rate collars involve selling a cap and purchasing a floor or vice versa to protect the Fund against interest rate movements exceeding given minimum or maximum levels.

The Fund may enter into credit default swap agreements and similar agreements, which may have as reference obligations securities that are or are not currently held by the Fund. The protection "buyer" in a credit default contract may be obligated to pay the protection "seller" an up front payment or a periodic stream of payments over the term of the contract provided generally that no credit event on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the "par value" (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. The Fund may be either the buyer or seller in the transaction. If the Fund is a buyer and no credit event occurs, the Fund recovers nothing if the swap is held through its termination date. However, if a credit event occurs, the Fund may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. As a seller, the Fund generally receives an up front payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. Credit default swaps and similar instruments involve greater risks than if the Fund had invested in the reference obligation directly, since, in addition to general market risks, they are subject to illiquidity risk, counterparty risk and credit risk.

The Fund may invest in credit linked securities issued by a limited purpose trust or other vehicle that, in turn, invests in a derivative instrument or basket of derivative instruments, such as credit default swaps or interest rate swaps, to obtain exposure to certain fixed income markets or to remain fully invested when more traditional income producing securities are not available. Like an investment in a bond, an investment in these credit linked securities represents the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the security. However, these payments are conditioned on the issuer's receipt of payments from, and the issuer's potential obligations to, the counterparties to certain derivative instruments entered into by the issuer of the credit linked security. For example, the

issuer may sell one or more credit default swaps entitling the issuer to receive a stream of payments over the term of the swap agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par (or other agreed upon value) of the referenced debt obligation.

The use of credit derivatives is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If the Manager is incorrect in its forecasts of default risks, market spreads or other applicable factors, or a counterparty defaults, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. In addition, it is possible that developments in the credit derivatives market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap or other credit derivative agreements or to realize amounts to be received under such agreements.

The Fund will enter into swap and other credit derivatives transactions only when the Manager believes it would be in the best interests of the Fund to do so. In addition, the Fund will enter into swap and other credit derivative agreements only with counterparties that meet certain standards of creditworthiness (generally, such counterparties would have to be eligible counterparties under the terms of the Fund's repurchase agreement guidelines).

Future Developments. The Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in its Prospectus or Statement of Additional Information.

Forward Roll Transactions. To enhance current income, the Fund may enter into forward roll transactions with respect to mortgage-related securities. In a forward roll transaction, the Fund sells a mortgage-related security to a financial institution, such as a bank or broker-dealer, and simultaneously agrees to purchase a similar security from the institution at a later date at an agreed upon price. The securities that are purchased will bear the same interest rate as those sold, but generally will be collateralized by different pools of mortgages with different prepayment histories than those sold. During the period between the sale and purchase, the Fund will not be entitled to receive interest and principal payments on the securities sold. Proceeds of the sale typically will be invested in short-term instruments, particularly repurchase agreements, and the income from these investments, together with any additional fee income received on the sale, will be expected to generate income for the Fund exceeding the yield on the securities sold. Forward roll transactions involve the risk that the market value of the securities sold by the Fund may decline below the purchase price of those securities. The Fund will segregate permissible liquid assets at least equal to the amount of the repurchase price (including accrued interest).

Forward Commitments. The Fund may purchase or sell securities on a forward commitment, when-issued or delayed delivery basis, which means delivery and payment take place in the future after the date of the commitment to purchase or sell the securities at a predetermined price and/or yield. Typically, no interest accrues to the purchaser until the security is delivered. When purchasing a security on a forward commitment, when-issued or delayed delivery basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its net asset value. Because the Fund is not required to pay for these securities until the delivery date, these risks are in addition to the risks associated with the Fund's other investments. If the Fund is fully or almost fully invested when forward commitment, when-issued or delayed delivery purchases are outstanding, such purchases may result in a form of leverage. The Fund intends to engage in forward commitment, when-issued and delayed delivery transactions to increase its portfolio's financial exposure to the types of securities in which it invests. Leveraging the portfolio in this manner will increase the Fund's exposure to changes in interest rates and will increase the volatility of its returns. The Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Securities purchased on a forward commitment, when-issued or delayed delivery basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities purchased on a forward commitment, when-issued or delayed delivery basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a forward commitment, when-issued or delayed delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed delivery basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share.

Foreign Currency Transactions. The Fund may enter into foreign currency transactions for a variety of purposes, including: to fix in U.S. dollars, between trade and settlement date, the value of a security the Fund has agreed to buy or sell; to hedge the U.S. dollar value of securities the Fund already owns, particularly if it expects a decrease in the value of the currency in which the foreign security is denominated; or to gain exposure to the foreign currency in an attempt to realize gains.

Foreign currency transactions may involve, for example, the Fund's purchase of foreign currencies for U.S. dollars or the maintenance of short positions in foreign currencies. A short position would involve the Fund agreeing to exchange an amount of a currency it did not currently own for another currency at a future date in anticipation of a decline in the value of the currency sold relative to the currency the Fund contracted to receive. The Fund's success in these transactions may depend on the Manager's ability to predict accurately the future exchange rates between foreign currencies and the U.S. dollar.

Currency exchange rates may fluctuate significantly over short periods of time. They generally are determined by the forces of supply and demand in the foreign exchange markets and the relative merits of investments in different countries, actual or perceived changes in interest rates and other complex factors, as seen from an international perspective. Currency exchange rates also can be affected unpredictably by intervention, or the failure to intervene, by U.S. or foreign governments or central banks, or by currency controls or political developments in the United States or abroad.

Certain Investment Considerations and Risks

Fixed-Income Securities. Even though interest-bearing securities are investments which promise a stable stream of income, the prices of such securities generally are inversely affected by changes in interest rates and, therefore, are subject to the risk of market price fluctuations. Certain securities that may be purchased by the Fund, such as those with interest rates that fluctuate directly or indirectly based on multiples of a stated index, are designed to be highly sensitive to changes in interest rates and can subject the holders thereof to extreme reductions of yield and possibly loss of principal. The values of fixed-income securities also may be affected by changes in the credit rating or financial condition of the issuer. Certain securities purchased by the Fund, such as those rated Baa or lower by Moody's Investors Service, Inc. ("Moody's") and BBB or lower by Standard & Poor's Rating Services ("S&P") and Fitch Ratings ("Fitch", and together with Moody's and S&P, the "Rating Agencies"), may be subject to such risk with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated fixed-income securities. Once the rating of a portfolio security has been changed, the Fund will consider all circumstances deemed relevant in determining whether to continue to hold the security. See "Appendix" for the average distribution of Fund investments in corporate bonds by ratings for the percent shown and for a description of certain ratings assigned by S&P, Moody's and Fitch.

High Yield Lower Rated Securities. The Fund may invest up to 20% of its net assets in higher yielding (and therefore higher risk) debt securities such as those rated Ba by Moody's or BB by S&P or Fitch, or as low as those rated B by the Rating Agencies (commonly known as "high yield" or "junk" bonds) at the time of purchase by the Fund. Such securities may be subject to greater risks and market fluctuations than certain low yielding securities. See "Appendix" for a general description of the Rating Agencies ratings. Ratings are relative and subjective and, although ratings may be useful in evaluating the safety or interest and principal payments, they do not evaluate the market value risk of such obligations. Although these ratings may be an initial criterion for selection of portfolio investments, the Manager also will evaluate these securities and the ability of the issuers of such securities to pay interest and principal. Investors should be aware that the market values of many of these securities tend to be more sensitive to economic conditions than are higher rated securities. These securities generally are considered by the Rating Agencies to be predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation and generally will involve more credit risk than securities in the higher rating categories. The Fund will rely on the Manager's judgment, analysis and experience in evaluating the creditworthiness of an issuer.

Bond prices are inversely related to interest rate changes; however, bond price volatility also is inversely related to coupon. Accordingly, below investment grade securities may be relatively less sensitive to interest rate changes than higher quality securities of comparable maturity, because of their higher coupon. This higher coupon is what the investor receives in return for bearing greater credit risk. The higher credit risk associated with below investment grade securities potentially can have a greater effect on the value of such securities than may be the case with higher quality issues of comparable maturity, and will be a substantial factor in the Fund's relative share price volatility.

Companies that issue certain of these securities often are highly leveraged and may not have available to them more traditional methods of financing. Therefore, the risk associated with acquiring the securities of such issuers generally is greater than is the case with higher rated securities. For example, during an economic downturn or a sustained period of rising interest rates, highly leveraged issuers of these securities may not have sufficient revenues to meet their interest payment obligations. The issuer's ability to service its debt obligations also may be affected adversely by specific corporate developments, or the issuer's inability to meet specific projected business forecasts, or the unavailability of additional financing. The risk of loss because of default by the issuer is significantly greater for the holders of these securities because such securities generally are unsecured and often are subordinated to other creditors of the issuer.

Because there is no established retail secondary market for many of these securities, the Fund anticipates that such securities could be sold only to a limited number of dealers or institutional investors. To the extent a secondary trading market for these securities does exist, it generally is not as liquid as the secondary market for higher rated securities. The lack of a liquid secondary market may have an adverse impact on market price and yield and the Fund's ability to dispose of particular issues when necessary to meet liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of a liquid secondary market for certain securities also may make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio and calculating its net asset value. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of these securities. In such cases, judgment may play a greater role in valuation because less reliable, objective data may be available.

These securities may be particularly susceptible to economic downturns. An economic recession could adversely affect the ability of the issuers of lower rated bonds to repay principal and pay interest thereon and increase the incidence of default for such securities. It is likely that an economic recession also could disrupt severely the market for such securities and have an adverse impact on their value.

The Fund may acquire these securities during an initial offering. Such securities may involve special risks because they are new issues. The Fund has no arrangement with any persons concerning the acquisition of such securities, and the Manager will review carefully the credit and other characteristics pertinent to such new issues.

The credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon bonds, pay-in-kind bonds and step-up bonds, in which the Fund may invest up to 5% of

its total assets. In addition to the risks associated with the credit rating of the issuers, the market prices of these securities may be very volatile during the period no interest is paid.

Mortgage-Related Securities. Mortgage-related securities are derivative instruments, subject to both credit and prepayment risk, although they may provide opportunities for enhanced total return, the lower rated mortgage-related securities in which the Fund may invest are likely to be more volatile and less liquid, and more difficult to price accurately than more traditional debt securities.

Mortgage-related securities generally are subject to credit risks associated with the performance of the underlying mortgage properties and to prepayment risk. In certain instances, the credit risk associated with mortgage-related securities can be reduced by third party guarantees or other forms of credit support. Improved credit risk does not reduce prepayment risk which is unrelated to the rating assigned to the mortgage-related security. Prepayment risk can lead to fluctuations in value of the mortgage-related security which may be pronounced. If a mortgage-related security is purchased at a premium, all or part of the premium may be lost if there is a decline in the market value of the security, whether resulting from changes in interest rates or prepayments on the underlying mortgage collateral. Certain mortgage-related securities that may be purchased by the Fund, such as inverse floating rate CMOs, have coupons that move inversely to a multiple of a specific index which may result in a form of leverage. As with other interest-bearing securities, the prices of certain mortgage-related securities are inversely affected by changes in interest rates. However, although the value of a mortgage-related security may decline when interest rates rise, the converse is not necessarily true, since in periods of declining interest rates the mortgages underlying the security are more likely to be prepaid. For this and other reasons, a mortgage-related security's stated maturity may be shortened by unscheduled prepayments on the underlying mortgages, and, therefore, it is not possible to predict accurately the security's return to the Fund. Moreover, with respect to certain stripped mortgage-backed securities, if the underlying mortgage securities experience greater than anticipated prepayments of principal, the Fund may fail to fully recoup its initial investment even if the securities are rated in the highest rating category by a nationally recognized statistical rating organization. During periods of rapidly rising interest rates, prepayments of mortgage-related securities may occur at slower than expected rates. Slower prepayments effectively may lengthen a mortgage-related security's expected maturity which generally would cause the value of such security to fluctuate more widely in response to changes in interest rates. Were the prepayments on the Fund's mortgage-related securities to decrease broadly, the Fund's effective duration, and thus sensitivity to interest rate fluctuations, would increase. Commercial real property loans, however, often contain provisions that reduce the likelihood that such securities will be prepaid. The provisions generally impose significant prepayment penalties on loans and in some cases there may be prohibitions on principal prepayments for several years following origination.

Foreign Securities. Investing in the securities of foreign issuers, as well as instruments that provide investment exposure to foreign securities and markets, involves risks that are not typically associated with investing in U.S. dollar-denominated securities of domestic issuers. Investments in foreign issuers may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the

currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. A change in the value of such foreign currency against the U.S. dollar also will result in a change in the amount of income a Fund has available for distribution. Because a portion of the Fund's investment income may be received in foreign currencies, the Fund will be required to compute its income in U.S. dollars for distribution to shareholders, and therefore the Fund will absorb the cost of currency fluctuations. After the Fund has distributed income, subsequent foreign currency losses may result in the Fund having distributed more income in a particular fiscal period than was available from investment income, which could result in a return of capital to shareholders. In addition, if the exchange rate for the currency in which the Fund receives interest payments declines against the U.S. dollar before such income is distributed as dividends to shareholders, the Fund may have to sell portfolio securities to obtain sufficient cash to enable the Fund to pay such dividends. Commissions on transactions in foreign securities may be higher than those for similar transactions on domestic stock markets and foreign custodial costs are higher than domestic custodial costs. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have on occasion been able to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign securities markets generally are not as developed or efficient as those in the United States. Securities of some foreign issuers are less liquid and more volatile than securities of comparable U.S. issuers. Similarly, volume and liquidity in most foreign securities markets are less than in the United States and, at times, volatility of price can be greater than in the United States.

Because evidences of ownership of foreign securities usually are held outside the United States, by investing in such securities the Fund will be subject to additional risks which include possible adverse political and economic developments, seizure or nationalization of foreign deposits and adoption of governmental restrictions which might adversely affect or restrict the payment of principal and interest on the foreign securities to investors located outside the country of the issuer, whether from currency blockage or otherwise. Foreign securities held by the Fund may trade on days when the Fund does not calculate its net asset value and thus may affect the Fund's net asset value on days when investors have no access to the Fund.

Since foreign securities often are purchased with and payable in currencies of foreign countries, the value of these assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in currency rates and exchange control regulations.

Investment Restrictions

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in bonds, including corporate bonds, debentures, notes, mortgage-related securities, CMOs, asset-backed securities, convertible debt obligations, preferred stock, convertible preferred stock, municipal obligations and zero coupon bonds, that, when purchased, are rated A or better or are the unrated equivalent as determined by the Manager, and in securities issued or guaranteed by the U.S. government or its agencies or

instrumentalities, including Treasury inflation-protected securities (TIPS) (or other instruments with similar economic characteristics). The Fund has adopted a policy to provide its shareholders with at least 60 days' prior notice of any change in its policy to so invest 80% of its assets.

The Fund's investment objective is a fundamental policy, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. In addition, the Fund has adopted investment restrictions numbered 1 through 8 as fundamental policies. Investment restrictions numbered 9 through 12 are not fundamental policies and may be changed by vote of a majority of the Fund's Board members at any time. The Fund may not:

1. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowing to no more than 33-1/3% of the value of the Fund's total assets). For purposes of this Investment Restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.
2. Underwrite the securities of other issuers except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities, and except that the Fund may bid separately or as part of a group for the purchase of municipal obligations directly from an issuer for its own portfolio to take advantage of the lower purchase price available.
3. Purchase or sell real estate, commodities or oil and gas interests, provided that the Fund may purchase and sell securities that are secured by real estate or interests therein or issued by companies that invest or deal in real estate or interests therein or real estate investment trusts and hold and sell real estate as a result of ownership of such securities or instruments, and provided further that the Fund may purchase and sell options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.
4. Make loans to others, except through the purchase of debt obligations or the entry into repurchase agreements. However, the Fund may lend its portfolio securities in an amount not to exceed 33-1/3% of the value of the Fund's total assets. Any loans of portfolio securities will be made according to guidelines established by the Securities and Exchange Commission and the Fund's Board.
5. With respect to 75% of the value of its total assets, invest more than 5% of its assets in the securities of any one issuer or hold more than 10% of the outstanding voting securities of such issuer, except for securities issued or guaranteed by the U.S. Government or any of its agencies or institutions which may be purchased without limitation.
6. Invest more than 25% of its assets in any particular industry, provided that there shall be no limitation on the purchase of obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

7. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except to the extent that the activities permitted in Investment Restriction Nos. 1, 3, 8 and 12 may be deemed to give rise to a senior security.

8. Purchase securities on margin, but the Fund may make margin deposits in connection with transactions in options, forward contracts, futures contracts, including those related to indices, and options on futures contracts or indices.

9. Invest in companies for the purpose of exercising control.

10. Invest in securities of other investment companies, except to the extent permitted under the 1940 Act.

11. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities which are illiquid if, in the aggregate, more than 15% of the value of the Fund's net assets would be so invested.

12. Pledge, mortgage, hypothecate or otherwise encumber its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the deposit of assets in escrow in connection with the purchase of securities on a when-issued or delayed-delivery basis and collateral and initial or variation margin arrangements with respect to options, forward contracts, futures contracts, including those related to indices, and options on futures contracts or indices.

If a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values of assets will not constitute a violation of such restriction. With respect to Investment Restriction No. 1, however, if borrowings exceed 33-1/3% of the value of the Fund's total assets as a result of changes in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

MANAGEMENT OF THE FUND

The Fund's Board is responsible for the management and supervision of the Fund and approves all significant agreements with those companies that furnish services to the Fund. These companies are as follows:

The Dreyfus Corporation	Investment Adviser
MBSC Securities Corporation	Distributor
Dreyfus Transfer, Inc.	Transfer Agent
Mellon Bank, N.A.	Custodian

Board Members of the Fund¹

¹ None of the Board members are "interested persons" of the Fund, as defined in the 1940 Act.

Board members of the Fund, together with information as to their positions with the Fund, principal occupations and other board memberships and affiliations, are shown below.

<u>Name (Age)</u> <u>Position with Fund (Since)</u>	<u>Principal Occupation</u> <u>During Past 5 Years</u>	<u>Other Board Memberships and Affiliations</u>
Joseph S. DiMartino (63) Chairman of the Board (1995)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i> Sunair Services Corporation, a provider of certain outdoor-related services to homes and businesses, <i>Director</i> Ivory Investment Management, L.P., a registered investment adviser to three private funds, <i>SeniorAdvisor</i>
Peggy C. Davis (63) Board Member (2006)	Shad Professor of Law, New York University School of Law (1983 – present) Writer and teacher in the fields of evidence, constitutional theory, family law, social sciences and the law, legal process and professional methodology and training	None
David P. Feldman (67) Board Member (1994)	Corporate Director and Trustee	BBH Mutual Funds Group (11 funds) <i>Director</i> The Jeffrey Company, a private investment company, <i>Director</i>
James F. Henry (76) Board Member (1991)	President, The International Institute for Conflict Prevention and Resolution, a non-profit organization principally engaged in the development of alternatives to business litigation (Retired 2003) Advisor to The Elaw Forum, a consultant on managing corporate legal costs Advisor to John Jay Homestead (the restored home of the first U.S. Chief Justice) Individual Trustee of several trusts	Director, advisor and mediator involved in several non-profit organizations, primarily engaged in domestic and international dispute resolution, and historic preservation

<u>Name (Age)</u> <u>Position with Fund (Since)</u>	<u>Principal Occupation</u> <u>During Past 5 Years</u>	<u>Other Board Memberships and Affiliations</u>
Ehud Houminer (66) Board Member (2006)	Executive-in-Residence at the Columbia Business School, Columbia University	Avnet Inc., an electronics distributor, Director International Advisory Board to the MBA Program School of Management, Ben Gurion University, Chairman
Gloria Messinger (77) Board Member (2006)	Arbitrator for American Arbitration Association and National Association of Securities Dealers, Inc. Consultant in Intellectual Property	Theater for a New Audience, Inc., Director Brooklyn Philharmonic, Director
Dr. Martin Peretz (67) Board Member (1991)	Editor-in-Chief of The New Republic Magazine Lecturer in Social Studies at Harvard University (1965-2002) Director of TheStreet.com, a financial information service on the web	American Council of Trustees and Alumni, <i>Director</i> Pershing Square Capital Management, <i>Advisers</i> Montefiore Investment, <i>General Partner</i> Harvard Center for Blood Research, <i>Trustee</i> Bard College, <i>Trustee</i> Board of Overseers of YIVO Institute For Jewish Research, <i>Chairman</i>
Anne Wexler (77) Board Member (2006)	Chairman of the Wexler & Walker Public policy Associates, consultants specializing in government relations and public affairs from January 1981 to present	Wilshire Mutual Funds (5 funds), <i>Director</i> National Parks Association, <i>Director</i> The Community Foundation for the National Capital Region, <i>Director</i> Member of the Council of Foreign Relations Member of the National Park Foundation

Board members are elected to serve for an indefinite term. The Fund has standing audit, nominating and compensation committees, each comprised of its Board members who are not “interested persons” of the Fund, as defined in the 1940 Act. The function of the audit committee is (i) to oversee the Fund’s accounting and financial reporting process and the audits of the Fund’s financial statements and (ii) to assist in the Board members’ oversight of the integrity of the Fund’s financial statements, the Fund’s compliance with legal and regulatory requirements and the independent registered public accounting firm’s qualifications, independence and performance. The Fund’s nominating committee is responsible for selecting and nominating persons as members of the Board for election or appointment by the Board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the committee takes into consideration various factors listed in the nominating committee charter, including character and integrity, business and professional experience, and whether the committee believes the person has the ability to apply sound and independent business judgment and would act in the interest of the Fund and its shareholders. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Fund, c/o The Dreyfus Corporation Legal Department, 200 Park Avenue, 8th Floor East, New York, New York 10166, which includes information regarding the recommended nominee as specified in the nominating committee charter. The function of the compensation committee is to establish the appropriate compensation for serving on the Board. The Fund also has a standing pricing committee comprised of any one Board member. The

function of the pricing committee is to assist in valuing the Fund's investments. The audit committee met four times, and the compensation and nominating committees each met once during the fiscal year ended March 31, 2007. The pricing committee had no meetings during the last fiscal year.

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2006.

Name of Board Member	Fund	Aggregate Holding of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member
Joseph S. DiMartino	None	Over \$100,000
Peggy C. Davis	None	\$1 - \$10,000
David P. Feldman	None	Over \$100,000
James F. Henry	None	Over \$100,000
Ehud Houminer	None	Over \$100,000
Gloria Messinger	None	Over \$100,000
Dr. Martin Peretz	None	\$10,001 - \$50,000
Anne Wexler	None	None

As of December 31, 2006, none of the Board members or their immediate family members owned securities of the Manager, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager or the Distributor.

Currently, the Fund and 13 other funds (comprised of 40 portfolios) in the Dreyfus Family of Funds pay each Board member their respective allocated portion of an annual retainer of \$85,000, and a fee of \$10,000 for each regularly scheduled Board meeting attended, \$2,000 for separate in-person committee meetings attended which are not held in conjunction with a regularly scheduled Board meeting and \$1,000 for Board meetings and separate committee meetings attended that are conducted by telephone. The Chairman of the Board receives an additional 25% of such compensation and the Audit Committee Chairman receives an additional \$15,000 per annum. (Prior to October 1, 2006, the Fund paid its Board members its allocated portion of an annual retainer of \$60,000 and, prior to September 26, 2006 a fee of \$8,000 per meeting (with a minimum of \$500 per meeting and per telephone meeting) attended for the Fund and seven other funds). The Fund also reimburses each Board member for travel and out of pocket expenses in connection with attending Board or committee meetings. Emeritus Board members, are entitled to receive an annual retainer of one-half the amount paid to them as Board members and a per meeting attended fee of one-half the amount paid to Board members.

The aggregate amount of compensation paid to each Board member by the Fund for the fiscal year ended March 31, 2007, and by all funds in the Dreyfus Family of Funds for which such person is a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) for the year ended December 31, 2006, was as follows:

Name of Board Member	Aggregate Compensation From the Fund [*]	Total Compensation From the Fund and Fund Complex Paid to Board Member ^(**)
Joseph S. DiMartino	\$3,311	\$857,400 (193)
Peggy C. Davis***	\$829	\$125,750 (72)
David P. Feldman	\$3,187	\$217,000 (58)
John M. Fraser, Jr. ⁺	\$971	\$32,500 (49)
James F. Henry	\$3,102	\$111,250 (49)
Ehud Houminer***	\$829	\$143,250 (79)
Rosalind Gersten Jacobs ⁺⁺	\$2,434	\$71,750 (21)
Dr. Paul A. Marks ⁺⁺⁺	\$2,928	\$111,250 (49)
Gloria Messinger***	\$829	\$93,250 (49)
Dr. Martin Peretz	\$3,102	\$112,250 (49)
Anne Wexler***	\$713	\$134,250 (58)

* Amount does not include the cost of office space, secretarial services and health benefits for the Chairman and expenses reimbursed to Board members for attending Board meetings, which in the aggregate amounted to \$3,119.

** Represents the number of separate portfolios comprising the investment companies in the Fund Complex, including the Fund, for which the Board member serves.

*** Mr. Houminer and Mesdames Davis, Messinger, and Wexler were elected Board members of the Fund effective September 26, 2006.

+ Emeritus Board member since May 24, 2000.

++ Emeritus Board member since December 31, 2005.

+++ Emeritus Board member since December 31, 2006.

Officers of the Fund

J. DAVID OFFICER, President since December 2006. Chief Operating Officer, Vice Chairman and a director of the Manager, and an officer of 83 investment companies (comprised of 165 portfolios) managed by the Manager. He is 58 years old and has been an employee of the Manager since April 1998.

PHILLIP N. MAISANO, Executive Vice President. Chief Investment Officer, Vice Chair and a director of the Manager, and an officer of 83 investment companies (comprised of 165 portfolios) managed by the Manager. Mr. Maisano also is an officer and/or board member of certain other investment management subsidiaries of The Bank of New York Mellon Corporation, each of which is an affiliate of the Manager. He is 60 years old and has been an employee of the Manager since November 2006. Prior to joining the Manager, Mr. Maisano served as Chairman and Chief Executive Officer of EACM

Advisors, an affiliate of the Manager, since August 2004, and served as Chief Executive Officer of Evaluation Associates, a leading institutional investment consulting firm, from 1988 until 2004.

MARK N. JACOBS, Vice President since March 2000. Executive Vice President, Secretary and General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 61 years old and has been an employee of the Manager since June 1977.

MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 47 years old and has been an employee of the Manager since October 1991.

JAMES BITETTO, Vice President and Assistant Secretary since August 2005. Associate General Counsel and Assistant Secretary of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since December 1996.

JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. She is 51 years old and has been an employee of the Manager since October 1988.

JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since June 2000.

JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. She is 44 years old and has been an employee of the Manager since February 1984.

JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since February 1991.

ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 55 years old and has been an employee of the Manager since May 1986.

JEFF PRUSNOFSKY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 42 years old and has been an

employee of the Manager since October 1990.

JAMES WINDELS, Treasurer since November 2001. Director – Mutual Fund Accounting of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 48 years old and has been an employee of the Manager since April 1985.

GAVIN C. REILLY, Assistant Treasurer since December 2005. Tax Manager of the Investment Accounting and Support Department of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Manager since April 1991.

ROBERT S. ROBOL, Assistant Treasurer since August 2005. Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since October 1988.

ROBERT SALVIOLO, Assistant Treasurer. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since June 1989.

ROBERT J. SVAGNA, Assistant Treasurer since August 2005. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 84 investment companies (comprised of 181 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since November 1990.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since September 2002. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 80 investment companies (comprised of 177 portfolios) managed by the Manager. He is 36 years old and has been an employee of the Distributor since October 1998.

JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004. Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (84 investment companies, comprising 181 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund serving for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 50 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

The address of each Board member and officer of the Fund is 200 Park Avenue, New York, New York 10166.

The Fund's Board members and officers, as a group, owned less than 1% of the Fund's shares outstanding on July 6, 2007.

The following shareholders owned of record, 5% or more of the outstanding voting securities of the Fund on July 6, 2007:

MANAGEMENT ARRANGEMENTS

Investment Adviser. The Manager is a wholly-owned subsidiary of The Bank of New York Mellon Corporation (“BNY Mellon”) a global financial services company focused on helping clients move and manage their financial assets, operating in 37 countries and serving more than 100 markets. The company is a leading provider of financial services of institutions, corporations and high-net-worth individuals, providing superior asset and wealth management, asset servicing, issuer services, and treasury services through a worldwide client-focused team.

The Manager provides management services pursuant to the Management Agreement (the “Agreement”) between the Fund and the Manager. The Agreement is subject to annual approval by (i) the Fund’s Board or (ii) vote of a majority (as defined in the 1940 Act) of the outstanding voting securities of the Fund, provided that in either event its continuance also is approved by a majority of the Board members who are not “interested persons” (as defined in the 1940 Act) of the Fund or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. The Agreement is terminable without penalty, on 60 days’ notice, by the Fund’s Board or by vote of a majority of the Fund’s shares or, not less than 90 days’

notice, by the Manager. The Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of the Manager: Jonathan Little, Chair of the Board; Thomas F. Eggers, President, Chief Executive Officer and a director; Jonathan Baum, Vice Chair-Distribution and a director; J. Charles Cardona, Vice Chair and a director; Diane P. Durnin, Vice Chair and a director; Phillip N. Maisano, Chief Investment Officer, Vice Chair and a director; J. David Officer, Chief Operating Officer, Vice Chair and a director; Mark N. Jacobs, Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President-Corporate Communications; Jill Gill, Vice President--Human Resources; Anthony Mayo, Vice President – Information Systems; Theodore A. Schachar, Vice President--Tax; Alex G. Sciulli, Vice President; Gary Pierce, Controller; Joseph W. Connolly, Chief Compliance Officer; James Bitetto, Assistant Secretary; and Ronald P. O'Hanley III, director.

BNY Mellon and its affiliates may have deposit, loan and commercial banking or other relationships with the issuers of securities purchased by the Fund. The Manager has informed management of the Fund that in making its investment decisions it does not obtain or use material inside information that BNY Mellon or its affiliates may possess with respect to such issuers.

The Fund, the Manager and the Distributor have adopted a Code of Ethics that permits its personnel, subject to such respective Code of Ethics, to investment in securities, including securities that may be purchased or held by the Fund. The Manager's Code of Ethics subjects its employees' personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics, and are also subject to the oversight of BNY Mellon's Investment Ethics Committee (the "Committee"). Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in funds(s) they manage or for which they otherwise provide investment advice.

The Manager maintains office facilities on behalf of the Fund and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Fund. The Manager may pay the Distributor for shareholder services from the Manager's own assets, including past profits but not including the management fees paid by the Fund. The Distributor may use part or all of such payments to pay securities dealers, banks or other financial institutions (collectively, "Service Agents") in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

Portfolio Management. The Manager provides day-to-day management of the Fund's portfolio of investments in accordance with the stated policies of the Fund, subject to the approval of the Fund's Board. The Manager also maintains a research department with a professional staff of portfolio managers and securities analysts who provide research services for

the Fund and for other funds advised by the Manager. The Manager is responsible for investment decisions and provides the Fund with portfolio managers who are authorized by the Board to execute purchases and sales of securities. The Fund's portfolio managers are Catherine Powers and Chris Pellegrino, each of whom is employed by the Manager and Standish Mellon Asset Management, LLC ("Standish"), an affiliate of the Manager.

Portfolio Manager Compensation. The portfolio managers' cash compensation is comprised primarily of a market-based salary and an incentive compensation plan (annual and long term incentive). The portfolio managers are dual employees of Dreyfus and are compensated by Standish, and not by Dreyfus or the Fund. Funding for the Standish Annual Incentive Plan and Long Term Incentive Plan is through a pre-determined fixed percentage of overall Fund profitability. Therefore, all bonus awards are based initially on Fund performance. The investment professionals are eligible to receive annual cash bonus awards from the incentive compensation plan. Annual awards are granted in March, for the prior calendar year. Individual awards for investment professionals are discretionary, based on product performance relative to both benchmarks and peer comparisons and goals established at the beginning of each calendar year. Goals are to a substantial degree based on investment performance, including performance for one and three year periods. Also considered in determining individual awards are team participation and general contributions to Standish.

All portfolio managers are also eligible to participate in the Standish Long Term Incentive Plan. This plan provides for an annual award, payable in deferred cash that cliff vests after 3 years, with an interest rate equal to the average year over year earnings growth of Standish (capped at 20% per year). Management has discretion with respect to actual participation.

Portfolio managers whose compensation exceeds certain levels may elect to defer portions of their base salaries and/or incentive compensation pursuant to BNY Mellon's elective deferred compensation plan.

Additional Information About the Portfolio Managers. The following table lists the number and types of other accounts advised by the primary portfolio manager and assets under management in those accounts as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Registered Investment Company Accounts</u>	<u>Assets Managed</u>	<u>Pooled Accounts</u>	<u>Assets Managed</u>	<u>Other Accounts</u>	<u>Assets Managed</u>
Catherine Powers	7	\$1.6b	-0-	-\$0-	65	\$8.4b

None of the funds or accounts are subject to a performance-based advisory fee.

The dollar range of Fund shares beneficially owned by the primary portfolio manager are as follows as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Dollar Range of Fund Shares Beneficially Owned</u>
Catherine Powers	None

Portfolio managers may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of institutions such as pension funds, insurance companies and foundations), bank common trust accounts and wrap fee programs ("Other Accounts").

Potential conflicts of interest may arise because of Dreyfus' management of the Fund and Other Accounts. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Dreyfus may be perceived as causing accounts it manages to participate in an offering to increase Dreyfus' overall allocation of securities in that offering, or to increase Dreyfus' ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability and allocation of investment opportunities generally, could raise a potential conflict of interest, as Dreyfus may have an incentive to allocate securities that are expected to increase in value to preferred accounts. Initial public offerings, in particular, are frequently of very limited availability. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the Fund, that they are managing on behalf of Dreyfus. Dreyfus periodically reviews each portfolio's manager's overall responsibilities to ensure that he or she is able to allocate the necessary time and resources to effectively manage the Fund. In addition, Dreyfus could be viewed as having a conflict of interest to the extent that Dreyfus or its affiliates and/or portfolio managers have a materially larger investment in Other Accounts than their investment in the Fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the Fund. For these or other reasons, the portfolio manager may purchase different securities for the Fund and the Other Accounts, and the performance of securities purchased for the Fund may vary from the performance of securities purchased for Other Accounts. The portfolio manager may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the Fund, which could have the potential to adversely impact the Fund, depending on market conditions.

A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in another account, such as when a purchase increases the value of securities previously purchase by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Conflict of interest similar to those described above arise when portfolio managers are employed by a sub-investment adviser or are dual employees of the Manager and an affiliated entity and such portfolio managers also manage Other Accounts.

Dreyfus' goal is to provide high quality investment services to all of its clients, while meeting Dreyfus' fiduciary obligation to treat all clients fairly. Dreyfus has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that it believes address the conflicts associated with managing multiple accounts for multiple clients. In addition, Dreyfus monitors a variety of areas, including compliance with Fund guidelines, the allocation of IPOs, and compliance with the firm's Code of Ethics. Furthermore, senior investment and business personnel at Dreyfus periodically review the performance of the portfolio managers for Dreyfus-managed funds.

Expenses. All expenses incurred in the operation of the Fund are borne by the Fund, except to the extent specifically assumed by the Manager. The expenses borne by the Fund include: taxes, interest, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager, Securities and Exchange Commission fees, state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of independent pricing services, costs of maintaining the Fund's existence, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of shareholders' reports and meetings, costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders, and any extraordinary expenses.

As compensation for the Manager's services, the Fund has agreed to pay the Manager a monthly management fee at the annual rate of 0.65% of the value of the Fund's average daily net assets. All fees and expenses are accrued daily and deducted before declaration of dividends to investors. The management fees payable by the Fund for the fiscal years ended March 31, 2005, 2006 and 2007 amounted to \$2,839,719, \$2,408,504 and 2,055,808, respectively. For the fiscal years ended March 31, 2005, 2006 and 2007, the management fees payable by the Fund was reduced by \$100,380, \$370,539 and \$198,820, respectively, pursuant to an undertaking by the Manager, resulting in a net fee paid of \$2,739,339, \$2,037,965 and \$1,856,988, respectively.

The Manager has agreed that if the aggregate expenses of the Fund, excluding taxes, brokerage commissions and (with the prior written consent of the necessary state securities commissions) extraordinary expenses, but including the management fee, exceed 1½% of the average value of the Fund's net assets for the fiscal year, the Fund may deduct from the fees to be paid to the Manager under the Agreement, or the Manager will bear such excess expenses.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of the Fund's net assets increases.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager located at 200 Park Avenue, New York, New York 10166, serves as the Fund's distributor on a best efforts basis pursuant to an agreement with the Fund which is renewable annually. The Distributor also acts as distributor for the other funds in the Dreyfus Family of Funds, Mellon Funds Trust and

the Mellon Institutional Funds. Before June 30, 2007, the Distributor was known as “Dreyfus Service Corporation.”

The Distributor may pay Service Agents, that have entered into agreements with the Distributor a fee based on the amount invested through such Service Agents in Fund shares by employees participating in qualified or non-qualified employee benefit plans, including pension, profit-sharing and other deferred compensation plans, whether established by corporations, partnerships, non-profit entities or state and local governments (“Retirement Plans”), or other programs. The term “Retirement Plans” does not include IRAs, IRA “Rollover Accounts” or IRAs set up under Simplified Employee Pension Plans (“SEP-IRAs”). Generally, the Distributor may pay such Service Agents a fee of up to 1% of the amount invested through the Service Agents. The Distributor, however, may pay Service Agents a higher fee and reserves the right to cease paying these fees at any time. The Distributor will pay such fees from its own funds, other than amounts received from the Fund, including past profits or any other source available to it. Sponsors of such Retirement Plans or the participants therein should consult their Service Agent for more information regarding any such fee payable to the Service Agent.

The Manager or the Distributor may provide additional cash payments out of its own resources to financial intermediaries that sell shares of the Fund or provide other services. Such payments are separate from to any shareholder services fees or other expenses paid by the Fund to the intermediaries. Because those payments are not made by you or the Fund, the Fund's expenses ratio will not be affected by any such payments. These additional payments may be made to Service Agents, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid from the Manager's or the Distributor's own resources to Service Agents for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as “revenue sharing.” From time to time, the Manager or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for the due diligence trips; educational conference sponsorship; support for recognition programs; and other forms of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended. In some cases, these payments or compensation may create an incentive for a Service Agent to recommend or sell shares of the Fund to you. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

Transfer and Dividend Disbursing Agent and Custodian. Dreyfus Transfer, Inc. (the “Transfer Agent”), a wholly-owned subsidiary of the Manager, 200 Park Avenue, New York, New York 10166, is the Fund’s transfer and dividend disbursing agent. Under a transfer agency agreement with the Fund, the Transfer Agent arranges for the maintenance of shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by the Fund. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of

shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses.

Mellon Bank, N.A. (the “Custodian”), an affiliate of the Manager, One Mellon Bank Center, Pittsburgh, Pennsylvania 15258, is the Fund’s custodian. Under a custody agreement with the Fund, the Custodian holds the Fund’s securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of the Fund’s assets held in custody and receives certain securities transactions charges.

HOW TO BUY SHARES

General. Fund shares may be purchased through the Distributor or Service Agents that have entered into service agreements with the Distributor. Fund shares are sold without a sales charge. You may be charged a fee if you effect transactions in Fund shares through a Service Agent. You will be charged a fee if an investment check is returned unpayable. Share certificates are issued only upon your written request. No certificates are issued for fractional shares.

The Fund reserves the right to reject any purchase order. The Fund will not establish an account for a “foreign financial institution,” as that term is defined in Department of the Treasury rules implementing section 312 of the USA PATRIOT Act of 2001. Foreign financial institutions include: foreign banks (including foreign branches of U.S. depository institutions); foreign offices of U.S. securities broker-dealers, futures commissions merchants, and mutual funds; non-U.S. entities that, if they were located in the United States, would be securities broker-dealers, futures commission merchants or mutual funds; and non-U.S. entities engaged in the business of a currency dealer or exchanger or a money transmitter.

The minimum initial investment is \$2,500, or \$1,000 if you are a client of a Service Agent which maintains an omnibus account in the Fund and has made an aggregate minimum initial purchase for its customers of \$2,500. Subsequent investments must be at least \$100. However, the minimum initial investment is \$750 for Dreyfus-sponsored Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs, and rollover IRAs) and 403(b)(7) Plans with only one participant and \$500 for Dreyfus-sponsored Education Savings Account, with no minimum for subsequent purchases. The initial investment must be accompanied by the Account Application. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Fund’s Board, or the spouse or minor child of any of the foregoing, the minimum initial investment is \$1,000. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. The Fund reserves the right to offer Fund shares without regard to minimum purchase requirements to employees participating in certain Retirement Plans or other programs where contributions or account information can be transmitted in a manner and form acceptable to the Fund. Fund shares are offered without regard to the minimum subsequent investment requirements to shareholders purchasing Fund shares through the Dreyfus Managed Assets

Program or through other wrap account programs. The Fund reserves the right to further vary the initial and subsequent investment minimum requirements at any time.

Fund shares also are offered without regard to the minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan pursuant to the Dreyfus Step Program described under “Shareholder Services.” These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect you against loss in a declining market.

Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this Statement of Additional Information, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. As discussed under “Management Arrangements – Distributor,” Service Agents may receive revenue sharing payments from the Manager or the Distributor. The receipt of such payments could create an incentive for a Service Agent to recommend or sell shares of the Fund instead of other mutual funds where such payments are not received. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

Shares are sold on a continuous basis at the net asset value per share next determined after an order in proper form is received by the Transfer Agent or other authorized entity. Net asset value per share is determined as of the close of trading on the floor of the New York Stock Exchange (currently 4:00 p.m., Eastern time), on each day the New York Stock Exchange is open for regular business. For purposes of determining net asset value per share, options and futures contracts will be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share is computed by dividing the value of the Fund's net assets (i.e., the value of its assets less liabilities) by the total number of shares outstanding. For information regarding the methods employed in valuing the Fund's investments, see “Determination of Net Asset Value.”

For certain institutions that have entered into agreements with the Distributor, payment for the purchase of Fund shares may be transmitted, and must be received by the Transfer Agent, within three business days after the order is placed. If such payment is not received within three business days after the order is placed, the order may be canceled and the institution could be held liable for resulting fees and/or losses.

Dreyfus TeleTransfer Privilege. You may purchase shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House (“ACH”) member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the share price determined on that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or made on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the share price determined on the next bank business day following such purchase order. To qualify to use the Dreyfus TeleTransfer Privilege, the initial payment for purchase of Fund shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See “How to Redeem Shares--Dreyfus TeleTransfer Privilege.”

Transactions Through Securities Dealers. Fund shares may be purchased and redeemed through securities dealers which may charge a fee for such services. Some dealers will place the Fund’s shares in an account with their firm. Dealers also may require the following: that the customer invest more than the \$1,000 minimum investment through dealers; the customer not take physical delivery of stock certificates; the customer not request redemption checks to be issued in the customer’s name; fractional shares not be purchased; monthly income distributions be taken in cash; or other conditions.

There is no sales or service charge by the Fund or the Distributor, although investment dealers, banks and other financial institutions may make reasonable charges to investors for their services. The services provided and the applicable fees are established by each dealer or other institution acting independently of the Fund. The Fund has been given to understand that these fees may be charged for customer services including, but not limited to, same-day investment of client funds; same-day access to client funds; advice to customers about the status of their accounts, yield currently being paid or income earned to date; provision of periodic account statements showing security and money market positions; other services available from the dealer, bank or other institution; and assistance with inquiries related to their investment. Any such fees will be deducted monthly from the investor’s account, which on smaller accounts could constitute a substantial portion of distributions. Small, inactive, long-term accounts involving monthly service charges may not be in the best interest of investors. Investors should be aware that they may purchase shares of the Fund directly from the Fund without imposition of any maintenance or service charges, other than those already described herein.

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

SHAREHOLDER SERVICES PLAN

The Fund has adopted a Shareholder Services Plan (the “Plan”) pursuant to which the Fund reimburses the Distributor an amount not to exceed an annual rate of 0.25% of the value of the Fund’s average daily net assets for certain allocated expenses of providing personal services and/or maintaining shareholder accounts. The services provided may include personal services related to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of shareholder accounts.

A quarterly report of the amounts expended under the Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, the Plan provides that material amendments must be approved by the Fund’s Board and by the Board members who are not “interested persons” (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Plan by vote cast in person at a meeting called for the purpose of considering such amendments. The Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Plan. The Plan is terminable at any time by vote of a majority of the Board members who are not “interested persons” and have no direct or indirect financial interest in the operation of the Plan.

For the fiscal year ended March 31, 2007, the Fund paid \$218,844 pursuant to the Plan.

HOW TO REDEEM SHARES

General. The Fund ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the Securities and Exchange Commission. However, if you have purchased Fund shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder® and subsequently submit a written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Fund will not honor redemption checks under the Checkwriting Privilege, and will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege, for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder order against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares will not be redeemed until the Transfer Agent has received your Account Application.

Checkwriting Privilege. The Fund provides redemption checks (“Checks”) automatically upon opening an account, unless you specifically refuse the Checkwriting Privilege by checking the applicable “No” box on the Account Application. The Checkwriting Privilege may be established for an existing account by a separate signed Shareholder Services Form. Checks will be sent only to the registered owner(s) of the account and only to the address of record. The Account Application or Shareholder Services Form must be manually signed by the registered owner(s). Checks are drawn on your Fund account and may be made payable to the order of any person in an amount of \$500 or more. When a Check is presented to the Transfer Agent for

payment, the Transfer Agent, as your agent, will cause the Fund to redeem a sufficient number of shares in your account to cover the amount of the Check. Dividends are earned until the Check clears. After clearance, a copy of the Check will be returned to you. You generally will be subject to the same rules and regulations that apply to checking accounts, although election of this Privilege creates only a shareholder-transfer agent relationship with the Transfer Agent. If you hold shares in a Dreyfus-sponsored IRA account, you may be permitted to make withdrawals from your IRA account using checks furnished to you by The Dreyfus Trust Company.

You should date your Checks with the current date when you write them. Please do not postdate your Checks. If you do, the Transfer Agent will honor, upon presentment, even if presented before the date of the Check, all postdated Checks which are dated within six months of presentment for payment, if they are otherwise in good order.

Checks are free, but the Transfer Agent will impose a fee for stopping payment of a Check upon your request or if the Transfer Agent cannot honor a Check due to insufficient funds or other valid reason. If the amount of the Check is greater than the value of the shares in your account, the Check will be returned marked insufficient funds. Checks should not be used to close an account.

The Checkwriting Privilege will be terminated immediately, without notice, with respect to any account which is, or becomes, subject to backup withholding on redemptions. Any Check written on an account which has become subject to backup withholding on redemptions will not be honored by the Transfer Agent.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you, and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Fund will initiate payment for shares redeemed pursuant to this Privilege on the next business day if the Transfer Agent receives a redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive wire redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Stock Certificates; Signatures."

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. Investors should be aware that if they have selected the Dreyfus TeleTransfer Privilege, any

request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. See “How to Buy Shares--Dreyfus TeleTransfer Privilege.”

Stock Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. A fee may be imposed to replace lost or stolen certificates, or certificates that were never received. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program (“STAMP”) and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and “Signature-Guaranteed” must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians, and may accept other suitable verification arrangements from foreign investors, such as consular verification. For more information with respect to signature-guarantees, please call one of the telephone numbers listed on the cover.

Redemption Commitment. The Fund has committed itself to pay in cash all redemption requests by any shareholder of record, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of the Fund’s net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the Securities and Exchange Commission. In the case of requests for redemption in excess of such amount, the Fund’s Board reserves the right to make payments in whole or in part in securities or other assets of the Fund in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Fund’s portfolio is valued. If the recipient sells such securities, brokerage charges might be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when trading in the markets the Fund ordinarily utilizes is restricted, or when an emergency exists as determined by the Securities and Exchange Commission so that disposal of the Fund’s investments or determination of its net asset value is not reasonably practicable or (c) for such other periods as the Securities and Exchange Commission by order may permit to protect the Fund’s shareholders.

SHAREHOLDER SERVICES

Fund Exchanges. You may purchase, in exchange for shares of the Fund, shares of certain other funds managed or administered by the Manager or shares of certain funds advised

by Founders Asset Management LLC (“Founders”), an indirect subsidiary of the Manager, to the extent such shares are offered for sale in your state of residence. Shares of other funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as “Purchased Shares”) may be exchanged for shares of other funds sold with a sales load (referred to herein as “Offered Shares”), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.

To accomplish an exchange under item D above, you must notify the Transfer Agent of your prior ownership of fund shares and your account number.

To request an exchange, you or your Service Agent acting on your behalf must give exchange instructions to the Transfer Agent in writing or by telephone or online. The ability to issue exchange instructions by telephone or online is given to all Fund shareholders automatically, unless you check the applicable “No” box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic or online instructions (including over the Dreyfus Express® voice response telephone system) from any person representing himself or herself to be you, and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form may not be exchanged by telephone or online. No fees currently are charged shareholders directly in connection with exchanges, although the Fund reserves the right, upon not less than 60 days’ written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the Securities and Exchange Commission.

To establish a personal retirement plan by exchange, shares of the fund being exchanged must have a value of at least the minimum initial investment required for the fund into which the exchange is being made.

During times of drastic economic or market conditions, the Fund may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate

components – redemption orders with a simultaneous request to purchase the other fund’s shares. In such a case, the redemption request would be processed at the Fund’s next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of the Fund, shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under “Fund Exchanges.” Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by the investor. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction. Shares held under IRA and other retirement plans are eligible for this Privilege. Exchanges of IRA shares may be made between IRA accounts and from regular accounts to IRA accounts, but not from IRA accounts to regular accounts. With respect to all other retirement accounts, exchanges may be made only among those accounts.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-645-6561, or visiting www.dreyfus.com. The Fund reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus-Automatic Asset Builder®. Dreyfus-Automatic Asset Builder permits you to purchase Fund shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Fund shares (minimum of \$100 and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans’, military or other payments from the U.S. Government automatically deposited into your Fund account. You may deposit as much of such payments as you elect.

Dreyfus Payroll Savings Plan. Dreyfus Payroll Savings Plan permits you to purchase Fund shares (minimum of \$100 per transaction) automatically on a regular basis. Depending upon your employer’s direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer’s payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Step Program. Dreyfus Step Program enables you to purchase Fund shares without regard to the Fund's minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan. To establish a Dreyfus Step Program account, you must supply the necessary information on the Account Application and file the required authorization form(s) with the Transfer Agent. For more information concerning this Program, or to request the necessary authorization form(s), please call toll free 1-800-782-6620. You may terminate your participation in this Program at any time by discontinuing your participation in Dreyfus-Automatic Asset Builder, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan, as the case may be, as provided under the terms of such Privilege(s). Investors who wish to purchase Fund shares through the Dreyfus Step Program in conjunction with a Dreyfus-sponsored retirement plan may do so only for IRAs, SEP-IRAs and IRA "Rollover Accounts." The Fund may modify or terminate this Program at any time.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from the Fund in shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. Shares of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund that does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that impose a contingent deferred sales charge ("CDSC") and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from the Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of

Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. The Automatic Withdrawal Plan may be established by filing an Automatic Withdrawal Plan application with the Transfer Agent or by oral request from any of the authorized signatories on the account by calling 1-800-554-4611. The Automatic Withdrawal Plan may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which share certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

Corporate Pension/Profit-Sharing and Personal Retirement Plans. The Fund makes available to corporations a variety of prototype pension and profit-sharing plans including a 401(k) Salary Reduction Plan. In addition, the Fund makes available Keogh Plans, IRAs (including regular IRAs, spousal IRAs for a non-working spouse, Roth IRAs, SEP-IRAs, and Rollover IRAs), Education Savings Accounts and 403(b)(7) Plans. Plan support services also are available.

Investors who wish to purchase Fund shares in conjunction with a Keogh Plan, a 403(b)(7) Plan or an IRA, including a SEP-IRA, may request forms for adoption of such plans from the Distributor.

The entity acting as custodian for Keogh Plans, 403(b)(7) Plans or IRAs may charge a fee, payment of which could require the liquidation of shares. All fees charged are described in the appropriate form.

Shares may be purchased in connection with these plans only by direct remittance to the entity acting as custodian. Purchases for these plans may not be made in advance of receipt of funds.

You should read the prototype retirement plan and the form of custodial agreement for further details on eligibility, service fees and tax implications, and should consult a tax adviser.

DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. The Fund's investments are valued each business day using available market quotations or at fair value. Substantially all of the Fund's investments (excluding short-term investments) are valued each business day by an independent pricing service (the "Service") approved by the Fund's Board. When, in the judgment of the Service, quoted bid prices for investments are readily available and are representative of the bid side of the market, investments are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other investments is determined by the Service based on methods which include consideration of: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. Short-term investments are not valued by the Service and may be carried at amortized cost, which approximates value. Investments traded in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange. Expenses and fees,

including the management fee paid by the Fund (reduced by the expense limitation, if any), are accrued daily and are taken into account for the purpose of determining the net asset value of Fund shares.

Restricted securities, as well as securities or other assets for which recent market quotations are not readily available, or are determined by the Fund not to reflect accurately fair value, or are not valued by the Service, are valued at fair value as determined in good faith based on procedures approved by the Board. Fair value of investments may be determined by the Fund's Board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate. The factors that may be considered when fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased or sold, and public trading in similar securities of the issuer or comparable issuers. The valuation of a security based on fair value procedures may differ from the security's most recent closing price, and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the Fund may trade on days that the Fund is not open for business, thus affecting the value of the Fund's assets on days when Fund investors have no access to the Fund. Restricted securities which are, or are convertible into, securities of the same class of other securities for which a public market exists usually will be valued at such market value less the same percentage discount at which the restricted securities were purchased. This discount will be revised periodically by the Board if it believes that the discount no longer reflects the value of the restricted securities. Restricted securities not of the same class as securities for which a public market exists usually will be valued initially at cost. Any subsequent adjustment from cost will be based upon considerations deemed relevant by the Board.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Management believes that the Fund has qualified for treatment as a "regulated investment company" under the Code, for the fiscal year ended March 31, 2007. The Fund intends to continue to so qualify if such qualification is in the best interests of its shareholders. As a regulated investment company, the Fund will pay no Federal income tax on its net investment income and net realized capital gains to the extent such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment company, the Fund must distribute to its shareholders at least 90% of its net income (consisting of net investment income and short term capital gain) and meet certain asset diversification and other requirements. If the Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

The Fund ordinarily declares and pays dividends from its net investment income monthly, and distributes net realized securities gains, if any, once a year, but it may make distributions on a more frequent basis to comply with the distribution requirements of the Code, in all events in a manner consistent with the provisions of the 1940 Act. The Fund will not make distributions from net realized securities gains unless capital loss carryovers, if any, have been utilized or have expired.

If you elect to receive dividends and distributions in cash, and your dividend and distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividend or distribution and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

Any dividend or distribution paid shortly after an investor's purchase may have the effect of reducing the aggregate net asset value of the shares below the cost of the investment. Such a dividend or distribution would be a return of capital in an economic sense, although taxable as described in the Prospectus. In addition, the Code provides that if a shareholder holds shares of the Fund for six months or less and has received a capital gain distribution with respect to such shares, any loss incurred on the sale of such shares will be treated as a long-term capital loss to the extent of the capital gain distribution received.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gains and losses. However, a portion of the gain or loss realized from the disposition of non-U.S. dollar denominated securities (including debt instruments, certain forward contracts and options, and certain preferred stock) may be treated as ordinary income or loss. In addition, all or a portion of any gains realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. Finally, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by the Fund from certain forward contracts and options transactions ("Section 1256 Contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing transactions. In addition, any Section 1256 contracts remaining unexercised at the end of the Fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund characterized as described above.

Offsetting positions held by the Fund involving certain futures or forward contracts or options transactions with respect to actively traded personal property may be considered, for tax purposes, to constitute "straddles". To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by the Fund may constitute "mixed straddles". The Fund may make one or more elections with

respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If the Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial position") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") with respect to the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Fund generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively.

If the Fund enters into certain derivatives (including forward contracts, long positions under notional principal contracts, and related puts and calls) with respect to equity interests in certain pass-through entities (including other regulated investment companies, real estate investment trusts, partnerships, real estate mortgage investment conduits and certain trusts and foreign corporations), long-term capital gain with respect to the derivative may be recharacterized as ordinary income to the extent it exceeds the long-term capital gain that would have been realized had the interest in the pass-through entity been held directly by the Fund during the term of the derivative contract. Any gain recharacterized as ordinary income will be treated as accruing at a constant rate over the term of the derivative contract and may be subject to an interest charge. The Treasury has authority to issue regulations expanding the application of these rules to derivatives with respect to debt instruments and/or stock in corporations that are not pass-through entities.

Investment by the Fund in securities issued at a discount or providing for deferred interest or for payment of interest in the form of additional obligations, such as zero coupon, pay-in-kind or step-up securities could, under special tax rules, affect the amount, timing and character of distributions to shareholders. For example, the Fund could be required to recognize annually a portion of the discount (or deemed discount) at which such securities were issued and to distribute such portion in order to maintain its qualification as a regulated investment company. In such case, the Fund may be required to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy these distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Fund could subject you to a \$50 penalty imposed by the Internal Revenue Service.

PORTFOLIO TRANSACTIONS

General. The Manager assumes general supervision over the placement of securities purchase and sale orders on behalf of the funds it manages. Funds managed by dual employees of the Manager and an affiliated entity, and funds with a sub-investment adviser, execute

portfolio transactions through the trading desk of the affiliated entity or sub-investment adviser, as applicable (the “Trading Desk”). Those funds use the research facilities, and are subject to the internal policies and procedures, of applicable affiliated entity or sub-investment adviser.

The Trading Desk generally has the authority to select brokers (for equity securities) or dealers (for fixed income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions is made in the best judgment of the Trading Desk and in a manner deemed fair and reasonable. In choosing brokers or dealers, the Trading Desk evaluates the ability of the broker or dealer to execute the transaction at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of a fund are selected on the basis of their professional capability and the value and quality of their services. The Trading Desk attempts to obtain best execution for the funds by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the quality and efficiency of the broker’s or dealer’s execution; (v) the broker’s or dealer’s willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counter-party risk (*i.e.*, the broker’s or dealer’s financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (*e.g.*, foreign or domestic security, large block, illiquid security). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors will be more important than others in determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

Investment decisions for one fund or account are made independently from those for other funds or accounts managed by the portfolio managers. Under the Trading Desk’s procedures, portfolio managers and their corresponding Trading Desks may seek to aggregate (or “bunch”) orders that are placed or received concurrently for more than one fund or account. In some cases, this policy may adversely affect the price paid or received by a fund or an account, or the size of the position obtained or liquidated. As noted above, certain brokers or dealers may be selected because of their ability to handle special executions such as those involving large block trades or broad distributions, provided that the primary consideration of best execution is met. Generally, when trades are aggregated, each fund or account within the block will receive the same price and commission. However, random allocations of aggregate transactions may be made to minimize custodial transaction costs. In addition, at the close of the trading day, when reasonable and practicable, the completed securities of partially filled orders will generally be allocated to each participating fund and account in the proportion that each order bears to the total of all orders (subject to rounding to “round lot” amounts and other relevant factors).

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the portfolio managers will not be deterred from changing a Fund’s investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness

of brokerage commissions paid is evaluated by the Trading Desk based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs, and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that a fund invests in foreign securities, certain of such fund's transactions in those securities may not benefit from the negotiated commission rates available to funds for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The portfolio managers may deem it appropriate for one fund or account they manage to sell a security while another fund or account they manage is purchasing the same security. Under such circumstances, the portfolio managers may arrange to have the purchase and sale transactions effected directly between the funds and/or accounts ("cross transactions"). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

Funds and accounts managed by the Manager, an affiliated entity or a sub-investment adviser may own significant positions in portfolio companies which, depending on market conditions, may affect adversely the ability to dispose of some or all of such positions.

For the fiscal years ended March 31, 2005, 2006 and 2007, the amounts paid by the Fund for brokerage commissions, were as follows:

<u>Fiscal Year Ended</u>	<u>Commissions</u>
2007	\$22,347
2006	\$9,476
2005	\$390,677

For the fiscal years ended March 31, 2005, 2006 and 2007, there were no spreads or concessions paid on principal transactions.

The reason for the difference between the aggregate dollar amount of brokerage commissions paid in 2005 and such amounts paid in 2006 and 2007 primarily is due to decreased trading activity.

The Fund contemplates that, consistent with the policy of seeking best price and execution, brokerage transactions may be conducted through affiliates of the Manager. The Board has adopted procedures in conformity with Rule 17e-1 under the 1940 Act to ensure that all brokerage commissions paid to affiliates of the Manager are reasonable and fair. There were no commissions paid to affiliates for the fiscal year ended March 31, 2007.

Regular Broker-Dealers. The Fund may acquire securities issued by one or more of its "regular brokers or dealers," as defined in Rule 10b-1 under the 1940 Act. Rule 10b-1 provides that a "regular broker or dealer" is one of the ten brokers or dealers that, during the Fund's most

recent fiscal year (i) received the greatest dollar amount of brokerage commissions from participating, either directly or indirectly, in the Fund's portfolio transactions, (ii) engaged as principal in the largest dollar amount of the Fund's portfolio transactions or (iii) sold the largest dollar amount of the Fund's securities. For the fiscal year ended March 31, 2007, the Fund acquired securities from its regular brokers or dealers as follows (the issuer of the securities and the aggregate value per issuer is as of March 31, 2007):

<u>Name of Regular Broker or Dealer</u>	<u>Aggregate Value Per Issuer</u>
Goldman, Sachs & Co.	\$905,000
Citigroup Global Markets, Inc.	\$2,426,000
Merrill Lynch, Pierce, Fenner & Smith Inc.	\$1,183,000
Lehman Brothers Inc.	\$486,000
J.P. Morgan Chase & Co.	\$4,645,000
Credit Suisse First Boston Corporation	\$2,925,000

Disclosure of Portfolio Holdings. It is the policy of the Fund to protect the confidentiality of its portfolio holdings and prevent the selective disclosure of non-public information about such holdings. The Fund will publicly disclose its holdings in accordance with regulatory requirements, such as periodic portfolio disclosure in filings with the Securities and Exchange Commission. The Fund will publicly disclose its complete schedule of portfolio holdings, as reported on a month-end basis, on www.dreyfus.com. The information will be posted with a one-month lag and will remain accessible until the Fund files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the Fund will publicly disclose on the website its complete schedule of portfolio holdings as of the end of such quarter.

If portfolio holdings are released pursuant to an ongoing arrangement with any party, the Fund must have a legitimate business purpose for doing so, and neither the Fund, nor Dreyfus or its affiliates, may receive any compensation in connection with an arrangement to make available information about the Fund's portfolio holdings. The Fund may distribute portfolio holdings to mutual fund evaluation services such as Standard & Poor's, Morningstar or Lipper Analytical Services; due diligence departments of broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds before their public disclosure; and broker-dealers that may be used by the Fund, for the purpose of efficient trading and receipt of relevant research, provided that: (a) the recipient does not distribute the portfolio holdings to persons who are likely to use the information for purposes of purchasing or selling Fund shares or Fund portfolio holdings before the portfolio holdings become public information; and (b) the recipient signs a written confidentiality agreement.

The Fund may also disclose any and all portfolio information to its service providers and others who generally need access to such information in the performance of their contractual

duties and responsibilities and are subject to duties of confidentiality, including a duty not to trade on non-public information, imposed by law and/or contract. These service providers include the Fund's custodian, auditors, investment adviser, administrator, and each of their respective affiliates and advisers.

Disclosure of the Fund's portfolio holdings may be authorized only by the Fund's Chief Compliance Officer, and any exceptions to this policy are reported quarterly to the Fund's Board.

SUMMARY OF THE PROXY VOTING POLICY, PROCEDURES AND GUIDELINES OF THE DREYFUS FAMILY OF FUNDS

The Board of each fund in the Dreyfus Family of Funds has delegated to the Manager the authority to vote proxies of companies held in the fund's portfolio. The Manager, through its participation on the Mellon Proxy Policy Committee (the "MPPC"), applies Mellon's Proxy Voting Policy, related procedures, and voting guidelines when voting proxies on behalf of the funds.

The Manager recognizes that an investment adviser is a fiduciary that owes its clients, including funds it manages, a duty of utmost good faith and full and fair disclosure of all material facts. An investment adviser's duty of loyalty requires an adviser to vote proxies in a manner consistent with the best interest of its clients and precludes the adviser from subrogating the clients' interests to its own. In addition, an investment adviser voting proxies on behalf of a fund must do so in a manner consistent with the best interests of the fund and its shareholders.

The Manager seeks to avoid material conflicts of interest by participating in the MPPC, which applies detailed, pre-determined written proxy voting guidelines (the "Voting Guidelines") in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, the MPPC engages a third party as an independent fiduciary to vote all proxies of funds managed by Mellon or its affiliates (including the Dreyfus Family of Funds), and may engage an independent fiduciary to vote proxies of other issuers at its discretion.

All proxies received by the funds are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. The guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in Mellon's or the Manager's policies on specific issues. Items that can be categorized under the Voting Guidelines are voted in accordance with any applicable guidelines or referred to the MPPC, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines are referred to the MPPC for discussion and vote. Additionally, the MPPC reviews proposals where it has identified a particular company, industry or issue for special scrutiny. With regard to voting proxies of foreign companies, the MPPC weighs the cost of voting and potential inability to sell the securities (which may occur during the voting process) against the benefit of voting the proxies to determine whether or not to vote. With respect to securities lending transactions, the MPPC seeks to balance the economic benefits of continuing to participate in an open securities lending transaction against the inability to vote proxies.

When evaluating proposals, the MPPC recognizes that the management of a publicly-held company may need protection from the market's frequent focus on short-term considerations, so as to be able to concentrate on such long-term goals as productivity and development of competitive products and services. In addition, the MPPC generally supports proposals designed to provide management with short-term insulation from outside influences so as to enable them to bargain effectively with potential suitors to the extent such proposals are discrete and not bundled with other proposals. The MPPC believes that a shareholder's role in the governance of a publicly-held company is generally limited to monitoring the performance of the company and its management and voting on matters which properly come to a shareholder vote. However, the MPPC generally opposes proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. Accordingly, the MPPC generally votes in accordance with management on issues that the MPPC believes neither unduly limit the rights and privileges of shareholders nor adversely affect the value of the investment.

On questions of social responsibility where economic performance does not appear to be an issue, the MPPC attempts to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the particular social issue including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The MPPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take actions on issues.

In evaluating proposals regarding incentive plans and restricted stock plans, the MPPC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the MPPC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The MPPC generally votes against proposals that permit or are silent on the repricing or replacement of stock options without shareholder approval.

Information regarding how the Manager voted proxies for the Fund is available at <http://www.dreyfus.com> and on the Securities Exchange Commission's website at <http://www.sec.gov> on the Fund's Form N-PX filed with the Securities and Exchange Commission.

INFORMATION ABOUT THE FUND

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and nonassessable. Fund shares are of one class and have equal rights as to dividends and in liquidation. Shares have no preemptive, subscription or conversion rights and are freely transferable.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Fund to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Fund to hold a special meeting of shareholders for purposes of removing a Board member from office. Fund shareholders may remove a Board member by the affirmative vote of a majority of the Fund's outstanding voting shares. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing other funds in the Dreyfus Family of Funds. Accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive or abusive trading. In addition, the Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Fund will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Fund will take reasonable steps to prevent excessive short term trading deemed to be harmful to the Fund, it may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

The Fund sends annual and semi-annual financial statements to all its shareholders.

COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Fund, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Fund's Prospectus.

Ernst & Young LLP, 5 Times Square, New York, New York 10036, an independent registered public accounting firm, has been selected to serve as the independent registered public accounting firm for the Fund.

APPENDIX

The average distribution of investments of the Fund in corporate bonds (excluding convertible preferred stock and convertible bonds) by ratings for the fiscal year ended March 31, 2007, calculated monthly on a dollar weighted basis, was as follows:

<u>Moody's</u>	or	<u>S&P or Fitch</u>	<u>Percentage of Value</u>
Aaa		AAA	81.1%
Aa		AA	8.0%
A		A	17.6%
Baa		BBB	24.1%
Ba		BB	2.8%
B		B	1.3%
NR		NR	.4%*
			<u>135.3%</u>

* Included in the NR (i.e., Not Rated) category are securities comprising 0.4% of the Fund's market value which, while not rated, have been determined by the Manager to be of comparable quality to securities in the following rating category: Aaa/AAA (0.4%).

The actual distribution of the Fund's corporate bond investments by ratings on any given date will vary, and the distribution of the Fund's investments by ratings as set forth above should not be considered as representative of the Fund's future portfolio composition.

Rating Categories

Description of certain ratings assigned by S&P, Moody's, and Fitch:

S&P

Long-term

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C

A subordinated debt or preferred stock obligation rated 'C' is currently highly vulnerable to nonpayment. The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action taken, but payments on this obligation are being continued. A 'C' also will be assigned to a preferred stock issue in arrears on dividends or sinking fund payments, but that is currently paying.

D

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

r

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

N.R.

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.

Short-term

A-1

A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are given a plus sign (+) designation. This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B

A short-term obligation rated 'B' is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

C

A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus sign (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

Commercial paper**A-1**

This designation indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

A-2

Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issues designated 'A-1'.

A-3

Issues carrying this designation have an adequate capacity for timely payment. They are, however, more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designations.

B

Issues rated B are regarded as having only speculative capacity for timely payment.

C

This rating is assigned to short-term debt obligations with a doubtful capacity for payment.

D

Debt rated 'D' is payment default. The 'D' rating category is used when interest payments or principal payments are not made on the due date, even if the applicable grace period has not expired, unless S&P believes such payments will be made during such grace period.

Moody's

Long-term

Aaa

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large margin or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

A

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered

adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba

Bonds rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B

Bonds rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa

Bonds rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca

Bonds rated 'Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C

Bonds rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated **Prime-3** (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

MIG/VMIG--U.S. short-term

Municipal debt issuance ratings are designated as Moody's Investment Grade (MIG) and are divided into three levels -- MIG 1 through MIG 3.

The short-term rating assigned to the demand feature of variable rate demand obligations (VRDOs) is designated as VMIG. When either the long- or short-term aspect of a VRDO is not rated, that piece is designated NR, e.g., Aaa/NR or NR/VMIG 1.

MIG 1/VMIG1

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2/VMIG 2

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3/VMIG 3

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Fitch

Long-term investment grade

AAA

Highest credit quality. ‘AAA’ ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA

Very high credit quality. ‘AA’ ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A

High credit quality. ‘A’ ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

BBB

Good credit quality. ‘BBB’ ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Long-term speculative grade

BB

Speculative. ‘BB’ ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

B

Highly speculative. ‘B’ ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

CCC, CC, C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. ‘CC’ ratings indicate that default of some kind appears probable. ‘C’ ratings signal imminent default.

DDD, DD, D

Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. ‘DDD’ obligations have the highest potential for recovery, around 90% - 100% of outstanding amounts and accrued interest. ‘DD’ ratings indicate potential recoveries in the range of 50% - 90% and ‘D’ the lowest recovery potential, i.e., below 50%.

Entities rated in this category have defaulted on some or all of their obligations. Entities rated ‘DDD’ have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated ‘DD’ and ‘D’ are generally undergoing a formal reorganization or liquidation process; those rated ‘DD’ are likely to satisfy a higher portion of their outstanding obligations, while entities rated ‘D’ have a poor prospect of repaying all obligations.

Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

F1

Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

F2

Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.

F3

Fair credit quality. The capacity for timely payment of financial commitment is adequate; however, near-term adverse changes could result in a reduction non-investment grade.

B

Speculative. Minimal capacity for timely payment of financial commitments plus vulnerability to near-term adverse changes in financial and economic conditions.

C

High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D

Default. Denotes actual or imminent payment default.

‘NR’ indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ long-term rating category, to categories below ‘CCC’, or to short-term ratings other than ‘F1.’
