

The following table explains how price protection calculates allowable prices:

<b>BlockCross Price Protection</b>	<b>&lt;= \$5.00</b>	<b>Between \$5.00 and \$90.00</b>	<b>&gt;= \$90.00</b>
Buyer Protection: Maximum allowable price, based on national best offer when buyer accepted ("Offer").	Offer	Offer + [10bps]	Offer + \$0.09
Seller Protection: Minimum allowable price, based on national best bid when seller accepted ("Bid").	Bid	Bid – [10bps]	Bid \$0.09
