Form 6-K

**REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13a-16 OR 15d-16 UNDER
THE SECURITIES EXCHANGE ACT OF 1934**

Report on Form 6-K for 13 September 2010

Commission File Number 1-31615

Sasol Limited
1 Sturdee Avenue
Rosebank 2196
South Africa

(Name and address of registrant's principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒ Form 40-F ☐

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): ☐

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): ☐

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ☐ No ☒

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b):
82-_____.

Enclosures: Sasol Limited financial results for the year ended
30 June 2010

Sasol Limited
(Incorporated in the Republic of South Africa)
Registration number 1979/003231/06

("Sasol" or "the company")

Sasol Limited financial results for the year ended 30 June 2010
focused and energised
Earnings per share up by 17% to R26,68
Synfuels volumes up by 3,9%
Cash fixed costs reduced
Strong cash flows generated from operating activities
Total dividend up by 24% to R10,50 per share
Strong balance sheet to fund growth
Growth projects remain on track

Overview

Chief executive, Pat Davies says: "Sasol continued to deliver on its strategy by focusing on world-class performance of our existing assets and progressing growth opportunities that are based on our proprietary technology. The prompt actions taken in response to the global economic crisis, though painful, have resulted in a more efficient and effective organisation. Our financial position is strong and we have the flexibility to pursue our sustainable growth strategy with vigour. Our focus remains on optimising our businesses, leveraging our technology and investing strategically to enhance shareholder returns on a sustainable basis."

Earnings attributable to shareholders for the year ended 30 June 2010 increased by 17% from R13,6 billion in the previous financial year to R15,9 billion, while earnings per share and headline earnings per share increased by 17% to R26,68 and by 5% to R26,57, respectively, over the same period.

Operating profit of R23,9 billion declined marginally by 3% compared with the previous financial year. Operating profit was positively impacted by improved production volumes, higher average crude oil prices (average dated Brent was US\$74,37/barrel in 2010 compared with US\$68,14/barrel in 2009) and chemical product prices. A 16% stronger average rand/US dollar exchange rate (R7,59/US\$1 in 2010 compared with R9,04/US\$1 in 2009), however, outweighed the benefits realised from the oil price. The average crude oil price achieved during the previous financial year was positively impacted by the effect of the oil hedges which resulted in a net gain of R5,1 billion. Similar oil hedges were not entered into during the financial year under review. The operating profit in 2010 was not affected by large once-off charges compared with the previous financial year. The previous

year's once-off charges included competition related administrative penalties of R3,9 billion and Sasol Inzalo share-based payment expenses of R3,2 billion. The 2010 financial year includes a much lower Sasol Inzalo share-based payment expense of R824 million.

The decrease in the effective tax rate is as a result of the absence of competition related administrative penalties and lower share-based payment expenses compared with the prior year, both of which are not deductible for tax.

Cash flow from operating activities was R27,3 billion compared with R48,2 billion of the previous year. While cash flow generated by the existing businesses was strong, working capital increased from a working capital ratio of 15,3% (expressed as a ratio of turnover) compared with the previous year's ratio of 11,2% as a result of price and volume effects. The group's growth plans remained on track during the 2010 financial year, resulting in capital expenditure of R16,1 billion for the year.

Chief financial officer, Christine Ramon says: "Our dedicated focus on operational efficiency, while maintaining strict cost discipline, has delivered results.

We have been able to achieve cash fixed costs savings of R1 billion for the year, resulting in a reduction in cash fixed costs. The initiatives we have embarked on support the focus of our businesses to deliver sustainable performance through the cycles. Our growth plans remain on track and we will actively pursue our capital investment opportunities in the forthcoming year, where we estimate capital expenditure to be in the region of R19 billion. We continue to plan carefully for an economic recovery, albeit volatile. The strength of our balance sheet and healthy cash flows position us well to respond to opportunities and challenges that the current environment presents."

Existing assets deliver results

South African energy cluster

Sasol Mining - low US dollar coal prices depress operating profit
Operating profit of R815 million was 49% lower than the previous year mainly as a result of lower US dollar coal prices combined with a strong rand/US dollar exchange rate and increased Project Mafutha pre-feasibility costs. This was partially offset by higher Synfuels and Infrachem coal prices, increased production volumes due to operational efficiencies achieved during the year and lower costs per unit.

Sasol Gas - improved gross margin on the back of higher sales volumes

Operating profit increased by 2% to R2 479 million compared with the previous year. Although gas prices decreased, the effect

thereof was negated as sales volumes increased resulting in a higher margin.

Sasol Synfuels - improved plant stability results in increased production volumes

Sasol Synfuels' operating profit decreased by 48% to R13 175 million compared with the previous year. Production volumes were 3,9% higher than the previous year as a result of improved plant stability. Unit cash costs, reflected a 5,8% reduction mainly as a result of capitalising shutdown and major inspection costs. However, the decline in operating profit resulted largely from stronger rand/US dollar exchange rates, which were partially offset by higher average oil prices. In addition, the operating profit in the prior year included a gain of R4 904 million relating to the oil hedge.

Sasol Oil - increased sales volumes

Sasol Oil recorded an operating profit of R1 364 million compared with an operating loss of R351 million for the previous year. Sales volumes increased by 7% compared with the previous year, especially due to demand by wholesalers and overland exporters into Southern Africa. This increase was supported by increased production as well as improved marketing margins during a period of less volatile crude oil prices. The improvement in operating profit was negated to some extent by the stronger rand/US dollar exchange rate and weaker refining margins.

International energy cluster

Sasol Synfuels International (SSI) - Oryx GTL main contributor of operating profit

SSI recorded an operating profit of R131 million compared with an operating loss of R235 million for the previous year. This was mainly due to a once-off loss of R771 million realised on the reduction of our economic interest in the Escravos gas-to-liquids (GTL) project in the prior year. The Oryx GTL facility had an unscheduled shutdown in the second quarter of 2010 as a result of a failure in a vendor supplied air compressor unit and a planned statutory shutdown in the fourth quarter of 2010, resulting in lower production. This, together with a stronger rand/US dollar exchange rate and despite higher crude oil prices, resulted in Oryx GTL delivering a lower operating profit for the year. The Oryx GTL facility operated at 90% capacity, excluding the impact of the planned shutdown, in the second half of 2010.

Sasol Petroleum International (SPI) - lower sales volumes

Operating profit decreased by 70% to R337 million compared with the previous year, mainly due to lower sales volumes from the Etame oil field cluster in Gabon, coupled with a stronger rand/US dollar exchange rate. Higher average oil and gas prices partially negated these effects. In addition, condensate sales volumes from Mozambique decreased by 62% compared to the previous year, in line with expectations. Work continued according to schedule on

the US\$300 million expansion of the onshore gas production facilities in Pande and Temane, Mozambique, to increase the current annual capacity of 120 million gigajoules to 183 million gigajoules.

Chemical cluster

Sasol Polymers - increase in sales volumes

Operating profit increased by 1% to R958 million compared with the previous year, mainly due to increased sales volumes and a reduction in fixed costs partially offset by foreign exchange translation differences. Sasol Polymers reorganised its South African structure, with a focus of cutting costs and improving productivity. Benefits from these turnaround plans have already started to bear fruit, with an increase in sales margins and reductions in costs during the latter part of the financial year. Sasol Arya Polymer Company continued to ramp up its production during the course of the year and ended with an average capacity utilisation of 65% for the year, contributing R771 million to Sasol Polymers operating profit.

Sasol Solvents - improved sales volumes

Operating profit increased by 133% to R1 154 million compared with the previous year due to improved sales volumes on the back of higher production. Stronger margins and a reduction in cash fixed costs further contributed to the increase in operating profit, which was partially offset by the strength of the rand against the US dollar.

Sasol Olefins & Surfactants (Sasol O&S) - improved margins as market demand recovers

Sasol O&S recorded an operating profit of R2 492 million compared with an operating loss of R160 million in the previous year. The improvement in the operating profit is mainly as a result of improved margins as the demand in the market recovered. The positive effect of the turnaround plan has been partially offset by negative foreign exchange impacts. The 2010 financial year includes a partial reversal of the impairment of the Sasol Italy assets amounting to R348 million, endorsing the positive outlook for the business in future.

Other chemical businesses - European wax business and the fertiliser business make a positive contribution

Other chemical businesses recorded an operating profit of R892 million compared with an operating loss of R3 525 million for the previous year. The prior year included once-off items such as the European Commission administrative penalty relating to Sasol Wax GmbH, the administrative penalty payable by Sasol Nitro to the South African Competition Commission and the impairment and closure provisions related to the Phalaborwa operations. The negative effect of the stronger rand/US dollar exchange rate and the slower than expected recovery in the US wax market, was negated by the improved sales volumes in the European wax market.

The fertiliser business also reported improved product margins during 2010.

Competition law compliance

Regarding competition law, we continue to focus on enhancing Sasol's competition law compliance processes and systems throughout the group.

There are matters that remain subject to investigation. The South African Competition Commission (the Commission) has initiated investigations in respect of some of the industries in which Sasol participates, including the South African piped gas, coal mining, petroleum, fertiliser, wax and polymer industries. During 2010, we received two notices of non-referral in regard to investigations that were conducted by the Commission into the South African candle wax industry. We are not aware of any further investigations by the Commission in respect of this industry.

On 5 July 2010, Sasol Nitro, a division of Sasol Chemical Industries Limited, concluded a settlement agreement with the Commission. The settlement agreement reached is in full and final settlement of the alleged contraventions of excessive pricing and exclusionary practices arising from complaints lodged with the Commission by Nutri-Flo and Profert. Sasol Nitro did not, as part of the settlement, admit to having committed any excessive pricing or exclusionary conduct. The Commission is of the view that the settlement, which involves a structural solution and several changes to Sasol Nitro's fertiliser business model, will address their competition concerns. As a result, no administrative penalty was imposed. The Competition Tribunal (the Tribunal) confirmed the settlement agreement on 20 July 2010. On 12 August 2010, the Commission announced that it had referred its complaints of excessive pricing of polypropylene and propylene in the domestic South African market against Sasol Chemical Industries Limited (SCI) and of price fixing in respect of polypropylene against SCI and Safripol (Pty) Limited (Safripol) to the Tribunal for adjudication. The allegation of collusion on prices relates to an agreement concluded between Sasol Polymers, a division of SCI, and Safripol in 1994, which was structured at the behest of the former Competition Board, following the formation of Polifin (the Sasol/AECI joint venture) in 1994. The agreement was structured to ensure Safripol's ongoing access to propylene supply at a market-related price. Sasol Polymers has been liaising with the Commission in its investigation. The Commission indicated that it is seeking an administrative penalty of 10% of SCI's annual turnover for each of the alleged contraventions. There is no reasonable certainty as to whether or not SCI will be found to have contravened competition laws as alleged, whether a penalty will be imposed and the quantum thereof if imposed. SCI intends defending the matter before the Tribunal should an amicable resolution of the matter with the Commission not be achieved.

On 30 October 2009, after being advised that certain provisions in a suite of agreements concluded between Sasol Gas, Coal, Energy and Power Resources Limited (CEPR) and Spring Lights Gas (Pty) Ltd (Spring Lights) constituted contraventions of the Competition Act (the Act), Sasol Gas applied for leniency in terms of the Commission's corporate leniency policy and obtained conditional leniency. On 20 August 2010, Spring Lights concluded a settlement agreement with the Commission in terms of which Spring Lights acknowledged the mentioned contraventions and agreed to pay an administrative penalty of R10,8 million. The settlement agreement was referred to the Tribunal on 1 September 2010 for confirmation, but the matter was postponed sine die to enable the Commission to make a ruling on an exception application of Spring Lights.

We continue to interact and cooperate with the Commission in respect of the leniency applications as well as in the areas that are subject to Competition Commission investigations. As and when appropriate, we will make further announcements in respect of material matters.

Sustaining Sasol into the future

Developments in the sustainable development area include the following:

In South Africa, various policy development processes are currently being undertaken by government departments to address interdependent issues of climate change and the security of energy supply into the economy. This includes climate change policy on the back of pledges tabled at Copenhagen, a potential tax on carbon emissions investigated by National Treasury and a review of the Integrated Resource Plan (IRP) as part of energy supply policy. The group is currently in the process of assessing the impact of these potential changes on business.

The recordable case rate for employees and service providers, including injuries and illnesses, was 0,51 at 30 June 2010 compared with 0,54 at 30 June 2009.

We deeply regret having had eight fatalities (two of whom were service providers) during this financial year and as a matter of urgency have renewed our focus on safety as one of our top priorities for 2011.

The group was rated a level 4 contributor by Empowerdex in respect of our broad-based black economic empowerment (BBBEE) procurement process. We are a value adding enterprise meaning that for each R1,00 spent on Sasol products, customers receive R1,25 BBBEE preferential procurement recognition. We achieved our level 4 contributor status earlier than our targeted date of 2012.

Growth projects on track

Our strong cash flow generation has facilitated the further advancement of the pipeline of capital projects:

In December 2009, the Project Application Report for the China coal-to-liquids (CTL) plant was submitted to the Chinese Government for approval. We are expecting a decision thereon in the second half of the 2011 financial year.

The feasibility study for the Uzbekistan GTL plant is expected to be completed by the end of the second quarter of the 2011 financial year.

Detailed engineering and construction on the expansion of the wax production facility in Sasolburg is progressing according to plan, with the first phase of the project expected to be completed and ready for operation towards the end of 2012.

In February 2010, the Secunda Natural Gas Growth programme at Sasol Synfuels in South Africa was approved by the board. The first step of this R14,2 billion programme, which will result in a 3% increase in production volumes, has been completed with two gas turbines delivering 200 megawatts of electricity into the national grid.

Sasol Polymers will invest R1,9 billion in an ethylene purification unit at its plant in Sasolburg, South Africa. The plant is expected to come on stream in the second half of the 2013 calendar year.

Sasol Nitro will invest R0,95 billion in a replacement fertiliser granulation unit at its plant in Secunda, South Africa. The plant is expected to come on stream in the second half of the 2011 calendar year.

In South Africa, coal blasting and extraction of the 170 000 ton sample of coal on Project Mafutha (a proposed greenfields CTL facility) was successfully completed in 2010. The coal has been transported to Secunda and the coal gasification trials are scheduled and planned for completion during the latter half of the 2010 calendar year. However, pending clarity on the large-scale coal gasification tests and the provision of a commercially viable carbon capture and storage solution, this project will not progress into the feasibility phase within the originally envisaged timeline. More certainty relating to the South African government's prioritisation of the country's mega energy projects is expected towards the end of the 2010 calendar year.

In July 2010, SPI was jointly, with Statoil ASA and Chesapeake Energy Corporation, awarded an onshore petroleum Technical Cooperation Permit covering approximately 88 000 square kilometres. This permit awards the applicants the right to study the prospectivity for shale gas in the Karoo Basin in the central region of South Africa.

Strong balance sheet maintained

Gearing at 30 June 2010 of 1,0% (30 June 2009: negative 1,2%) remained low as a result of improved operating results. This low level of gearing is expected to be maintained in the short-term. At the annual general meeting of 27 November 2009, shareholders renewed the authority to buy back up to 4% of the issued share capital for a further 12 months. No shares were repurchased during the 2010 financial year.

Outlook* - improved operational performance for the 2011 financial year, but cautious due to macro economic variables. While there has been some stability in global markets and it is anticipated that this will continue, the potential sovereign debt crisis in Europe indicates that the recovery in the global economy appears to be fragile. Recent chemical product demand and product prices have shown some improvement and the crude oil price has been less volatile compared with the prior year. The strength of the rand/US dollar exchange rate remains the single biggest external factor exerting pressure on our profitability.

Our production volumes have improved across the group through initiatives aimed at achieving operational efficiencies and plant stability. We anticipate that we will be able to maintain Synfuels' production volumes for the coming year taking into account the planned one in eight years full factory shut down during financial year 2011. Oryx is expected to perform at planned operating rates and Arya will continue to ramp up. Our focus in the year ahead will be to continue to contain cost inflation through the efficiency and effectiveness of our functions. However, considering the uncertain macro economic environment and our assumptions in respect of crude oil and product prices, weaker refining margins as well as the stronger rand/US dollar exchange rate, we are cautious on the outlook for the year ahead. The current volatility and uncertainty of global markets make it difficult to be more precise in this outlook statement.

The board has decided to increase the final dividend given the increase in earnings for the past year and taking into account the overall improved market and economic conditions, together with the ongoing strength of our financial position and current capital investment plans. This approach is consistent with our recently announced progressive dividend policy and track record of dividend growth as a key component of adding shareholder value.

* In accordance with standard practice, it is noted that this information has not been reviewed or reported on by the company's external auditors.

Acquisitions and disposals of businesses

With effect from 30 September 2009, Sasol O&S disposed of its inorganics business in Italy for a consideration of e0,6 million. With effect from 24 November 2009, SPI acquired a participation right in the Sofala and M-10 Blocks in Mozambique for a purchase consideration of US\$7,4 million.

Subsequent events

On 5 July 2010, Sasol Nitro, a division of Sasol Chemical Industries Limited, concluded a settlement agreement with the Competition Commission of South Africa. This agreement was subsequently confirmed by the Competition Tribunal on 20 July 2010 and includes the divestiture of five regional fertiliser blending operations.

On 12 August 2010, the Commission announced that it had referred its complaints of excessive pricing of polypropylene and propylene in the domestic South African market against SCI and of price fixing in respect of polypropylene against SCI and Safripol to the Tribunal for adjudication. (Refer to competition law compliance matters above.)

On 20 August 2010, Spring Lights concluded a settlement agreement with the Commission in terms of which Spring Lights acknowledged the mentioned contraventions and agreed to pay an administrative penalty of R10,8 million. The settlement agreement was referred to the Tribunal on 1 September 2010 for confirmation but the matter was postponed.

On 24 August 2010, SPI and Petronas announced the joint assignment of a 15% participating interest in the offshore M-10 Block, in Mozambique to Empresa Nacional de Hidrocarbonetos (ENH), the Mozambique national hydrocarbon exploration company. This results in an equity split in the M-10 Block of a 42,5% participating interest to each of SPI and Petronas with the remaining 15% to be held by ENH.

Declaration of cash dividend number 61

A final cash dividend of South African R7,70 per ordinary share (2009: R6,00 per share) has been declared. This brings the dividend for the full year to R10,50 per ordinary share (2009: R8,50 per share). The final cash dividend is payable on all ordinary shares, excluding the Sasol preferred ordinary shares. The salient dates for holders of ordinary shares are:

Last day for trading to qualify for and participate in the dividend (cum dividend)	Friday, 8 October 2010
Trading ex dividend commences	Monday, 11 October 2010
Record date	Friday, 15 October 2010
Dividend payment date	Monday, 18 October 2010

Holders of American Depositary Receipts ¹

Ex dividend on New York Stock Exchange (NYSE)	Wednesday, 13 October 2010
Record date	Friday, 15 October 2010
Approximate date for currency conversion	Tuesday, 19 October 2010
Approximate dividend payment date	Friday, 29 October 2010

¹ All dates are approximate as the NYSE approves the record date after receipt of the dividend declaration.

On Monday, 18 October 2010, dividends due to certificated shareholders on the South African registry will either be electronically transferred to shareholders' bank accounts or, in the absence of suitable mandates, dividend cheques will be posted to such shareholders. Shareholders who hold dematerialised shares will have their accounts held by their CSDP or broker credited on Monday, 18 October 2010.

Share certificates may not be dematerialised or re-materialised between Monday, 11 October 2010 and Friday, 15 October 2010, both days inclusive.

* Includes share-based payment expenses related to the Sasol Inzalo share transaction.

Forward-looking statements: In this document we make certain statements that are not historical facts and relate to analyses and other information which are based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to our future prospects, developments

and business strategies. Examples of such forward-looking statements include, but are not limited to, statements regarding exchange rate fluctuations, volume growth, increases in market share, total shareholder return and cost reductions. Words such as "believe", "anticipate", "expect", "intend", "seek", "will", "plan", "could", "may", "endeavour" and "project" and similar expressions are intended to identify such forward-looking statements, but are not the exclusive means of identifying such statements. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and there are risks that the predictions, forecasts, projections and other forward-looking statements will not be achieved. If one or more of these risks materialise, or should underlying assumptions prove incorrect, our actual results may differ materially from those anticipated. You should understand that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors are discussed more fully in our most recent annual report under the Securities Exchange Act of 1934 on Form 20-F filed on 9 October 2009 and in other filings with the United States Securities and Exchange Commission. The list of factors discussed therein is not exhaustive; when relying on forward-looking statements to make investment decisions, you should carefully consider both these factors and other uncertainties and events. Forward-looking statements apply only as of the date on which they are made, and we do not under take any obligation to update or revise any of them, whether as a result of new information, future events or otherwise. Please note: A billion is defined as one thousand million. All references to years refer to the financial year ended 30 June. Any reference to a calendar year is prefaced by the word "calendar".

Basis of preparation and accounting policies

The preliminary summarised consolidated financial results for year ended 30 June 2010 have been prepared in compliance with the Listings Requirements of the JSE Limited, International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (in particular International Accounting Standard 34 Interim Financial Reporting), the AC500 Standards as issued by the Accounting Practices Board or its successor and the South African Companies Act, 1973, as amended. The accounting policies applied in the presentation of the preliminary summarised consolidated financial results are in terms of IFRS and are consistent with those applied for the year ended 30 June 2009, except as follows:

Sasol Limited early adopted the following standards, which except if otherwise stated, did not have a significant impact on the financial results:

IAS 23 (Revised), Borrowing Costs (effective 1 July 2009).
 IAS 24 (Amendment), Related Party Disclosures.
 Various improvements to IFRSs.

These preliminary summarised consolidated financial results have been prepared in accordance with the historic cost convention except that certain items, including derivatives and available-for-sale financial assets, are stated at fair value. The preliminary summarised consolidated financial results are presented in rand, which is Sasol Limited's functional and presentation currency.

Related party transactions

The group, in the ordinary course of business, entered into various sale and purchase transactions on an arm's length basis at market rates with related parties.

Significant changes in contingent liabilities since 30 June 2009
 On 29 June 2010, a settlement agreement between Veolia Water Systems (Veolia) and Sasol Synfuels was signed. Sasol Synfuels have agreed to settle the claim with Veolia by the payment of an amount of R160 million (including interest) to Veolia. The amount has been provided for at 30 June 2010.

On 5 July 2010, Sasol Nitro, a division of Sasol Chemical Industries Limited, concluded a settlement agreement with the

Commission. The Tribunal confirmed the settlement agreement on 20 July 2010 and no administrative penalty was imposed. As part of the settlement agreement, the complaints on abuses of dominance brought by Nutri-flo and Profert, upon which we have previously reported, have been settled. A non material liability has been recognised in this respect at 30 June 2010.

On 12 August 2010, the Commission announced that it had referred its complaints of excessive pricing of polypropylene and propylene in the domestic South African market against SCI and of price fixing in respect of polypropylene against SCI and Safripol to the Tribunal for adjudication. The Commission indicated that it is seeking an administrative penalty of 10% of SCI's annual turnover for each of the alleged contraventions. There is no certainty that the turnover of SCI, which houses Sasol's South African chemical businesses such as Sasol Nitro, Sasol Polymers, Sasol Solvents and Sasol Wax, rather than that of Sasol Polymers is the correct base from which to calculate a potential administrative penalty. Further, there is no reasonable certainty as to whether or not SCI will be found to have contravened competition laws as alleged, whether a penalty will be imposed and the quantum thereof if imposed. For these reasons, it is currently not possible to make an estimate of the contingent liability and accordingly, no provision was made at 30 June 2010.

Independent audit by the auditors

The preliminary summarised consolidated statement of financial position at 30 June 2010 and the related preliminary summarised consolidated income statement, statements of comprehensive income, changes in equity and cash flows for the year then ended was audited by KPMG Inc. The individual auditor assigned to perform the audit is Mr AW van der Lith. Their unqualified audit report is available for inspection at the registered office of the company.
