NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1- ORGANIZATION AND LINE OF BUSINESS:

Organization and Basis of Presentation:

The accompanying unaudited interim condensed consolidated financial statements of Advanced Oxygen Technologies, Inc. (“Group” or the “Company”) have been prepared by management in accordance with accounting principles generally accepted in the United States of America for interim financial information and pursuant to rules and regulations of the Securities and Exchange Commission (“SEC”). Accordingly, they do not include all information and footnotes required by generally accepted accounting principles for annual audited financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included.

The results of operations for the six months ended December 31, 2016 are not necessarily indicative of the results to be expected for the year ending June 30, 2017. The accompanying unaudited interim condensed consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements and notes related thereto for the years ended June 30, 2016 and 2015 included in Form 10-K filed with the SEC.

Lines of Business:

The Company, through its wholly owned subsidiary Anton Nielsen Vojens ApS ("ANV")owns income producing commercial real estate leased until 2026. The real estate consists solely of the land with no buildings or improvements (“Land”). All improvements on the Land are those of the tenant.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Revenue recognition of rental income:

Revenues are recognized during the period in which the rental payment is received. The Company applies the provisions of FASB Accounting Standards Codification ('ASC') 605-10. Revenue Recognition in Financial Statements ASC 605-10, provides guidance on recognition, presentation, and disclosure of revenues in financial statements filed with the SEC.

The Company's source of revenue is from a commercial property lease in which quarterly payments are received pursuant to the property lease which is in effect until 2026.

Property Plant and Equipment:

Land and buildings are recognized at cost. Land is carried at cost less accumulated impairment losses.

Impairment of Real Estate Investments:

The Company continually monitors events and changes in circumstances that could indicate that the carrying amounts of its real estate investments may not be recoverable or realized. When indicators of potential impairment suggest that the carrying value of real estate investments may not be recoverable, the Company assesses the recoverability by estimating whether the Company will recover the carrying value of its real estate investments through its undiscounted future cash flows and the eventual disposition of the investment. If, based on this analysis, the Company does not believe that it will be able to recover the carrying value of its real estate investments, the Company would record an impairment loss to the extent that the carrying value exceeds the estimated fair value of its real estate investments.

Foreign Currency Translation:

Foreign currency transactions are translated applying the current rate method. Assets and liabilities are translated at current rates. Stockholders' equity accounts are translated at the appropriate historical rates and revenue and expenses are translated at weighted average rates for the year. Exchange rate differences that arise between the rate at the transaction date and the one in effect at the payment date, or at the balance sheet date, are recognized in the income statement.

Income Taxes:

The Company accounts for income taxes under the asset and liability method of accounting. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is required when it is less likely than not that the Company will be able to realize all or a portion of its deferred tax assets. Because it is doubtful that the net operating losses of recent years will ever be used, a valuation allowance has been recognized equal to the tax benefit of net operating losses generated.

Net Earnings per Share:

Basic earnings per share is computed by dividing income available to common shareholders by the weighted-average number of common shares available. Diluted earnings per share is computed similar to basic earnings per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. As of December 31, 2016 and June 30, 2016 there were 10,000 and 10,000, respectively potential dilutive shares and because of the net loss, the effect of these potential common shares is anti-dilutive.

Cash and Cash Equivalents:

For purposes of the statement of cash flows, the Company considers all highly-liquid investments purchased with original maturities of three months or less to be cash equivalents. The Company maintains its cash in bank deposit accounts which, at December 31, 2016 did not exceed federally insured limits. The Company has not experienced any losses in such accounts and believes that it is not exposed to any significant credit risk on such amounts.

Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenue and expenses during the reported period. Actual results could differ from those estimates.

Concentrations of Credit Risk:

Financial instruments that potentially subject the Company to major credit risk consist principally of a single subsidiary of Anton Nielsen Vojens ApS.

Reclassification:

Certain balances in previously issued financial statements have been reclassified to be consistent with the current period presentation.

Recently Issued Accounting Standards:

In February 2016, the FASB issued ASU No. 2016-02 - Leases (Topic 842), which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (i.e. lessees and lessors). The new standard requires lessees to apply a dual approach, classifying leases as either financing or operating leases based on the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight line basis over the term of the lease, respectively. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Leases with a term of 12 months or less will be accounted for similar to existing guidance for operating leases today. The new standard requires lessors to account for leases using an approach that is substantially equivalent to existing guidance for sales-type leases, direct financing leases and operating leases. The standard is effective on January 1, 2019, however early adoption is permitted. The Company is in the process of evaluating the impact of this new guidance.

In February 2015, the FASB issued Accounting Standards Update No. 2015-02 (ASU 2015-02) "Consolidation (Topic 810): Amendments to the Consolidation Analysis." ASU 2015-02 changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. It is effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. We do not anticipate that the adoption of ASU 2015-02 will have any impact on our consolidated financial statements.

Other recent accounting pronouncements issued by the FASB did not or are not believed by management to have a material impact on the Company's present or future financial statements.

The fluctuations were due to currency flucuations, as the revenues were the same for both comparitive periods.

Selling, general and administrative expenses: G&A expenses for the three month period ending December 31, 2016 and December 31, 2015 were $9,413 and $7,151 respectively and the G&A expenses for the six month period ending December 31, 2016 and December 31, 2015 were $15,650 and $7,374 respectively. Interest expense: Interest expense for the three month period ending December 31, 2016 and December 31, 2015 was $1,663 and $2,128 respectively. The changes in interest expenses for 2016 are primarily due to the currency fluctuations and the reduction of debt.

ITEM 4. CONTROLS AND PROCEDURES:

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

We conducted an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer who is also our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (“Exchange Act”), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by the company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s rules and forms. Disclosure controls and procedures also include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. Based on this evaluation, our Chief Executive Officer and Acting Chief Financial Officer concluded as of December 31, 2016 that our disclosure controls and procedures were not effective at ensuring that the material information required to be disclosed in the Exchange Act reports is recorded, processed, summarized and reported as required in applicable SEC rules and forms.

During the six month period ended December 31, 2016, there were no changes in our internal control over financial reporting identified in connection with management’s evaluation of the effectiveness of our internal control over the financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act.
