### HIGHLIGHTS 2Q 2017\*

- Second quarter net income was \$2.0B, total company revenue was \$39.9B; EPS was \$0.51, all up year over year
- Total Company adjusted pre-tax profit of \$2.5B and lower tax rate drove adjusted EPS of \$0.56, up \$0.04 year over year
- Lower adjusted pre-tax profit due to higher commodity cost, mainly steel, unfavorable exchange and non-repeat of last year's gain on the sale of majority stake in OEConnection LLC
- In the U.S.: Year-over-year average transaction prices rose nearly five times the industry average in the quarter and incentives declined as a percent of vehicle price, while the industry increased
- Automotive profits driven by North America, with Europe and Asia Pacific also profitable; outside North America, other regions were about breakeven in total; Ford Credit pre-tax profit was \$619M, up 55 percent year over year
- Automotive operating cash flow was positive; continue to expect full-year shareholder distributions of about \$2.7B
- 2017: Expect full year adjusted EPS of \$1.65 to \$1.85 with adjusted effective tax rate now expected to be about 15 percent

## AUTOMOTIVE SEGMENT RESULTS

	Wholesales	Revenue (GAAP)	Market Share	Operating Margin (GAAP)	Pre-Tax Profit (GAAP)
<b>2Q 2017</b>	<b>1,651K</b>	<b>\$37.1B</b>	<b>7.4%</b>	<b>5.9%</b>	<b>\$2.2B</b>
<b>B/(W) 2Q 2016</b>	<b>(43)K</b>	<b>\$0.1B</b>	<b>(0.1) ppts</b>	<b>(1.8) ppts</b>	<b>\$(0.6)B</b>

### North America

- Wholesale volume was down 1 percent, revenue up 3 percent year over year, driven by continued strength of series and vehicle mix and higher net pricing
- Market share improvement in truck and utilities was more than offset by lower fleet sales
- For 2017: Continue to expect North America operating margin and profit to be lower than 2016, mainly due to higher commodity costs and increased engineering expense, mainly for utilities and autonomous vehicles

	Wholesales	Revenue	Market Share	Operating Margin	Pre-Tax Results
<b>2Q 2017</b>	<b>807K</b>	<b>\$24.5B</b>	<b>14.4%</b>	<b>9.0%</b>	<b>\$2.2B</b>

### South America

- All key metrics improved for the third consecutive quarter
- Wholesales were up 12 percent; revenue up 18 percent, reflecting higher volume and favorable pricing
- Market share improved due to performance of the Ka
- For 2017: Continue to expect loss to improve from last year, as a result of favorable market factors as the economy continues to recover

<b>2Q 2017</b>	<b>93K</b>	<b>\$1.5B</b>	<b>9.2%</b>	<b>(12.6)%</b>	<b>\$(185)M</b>

### Europe

- Ninth consecutive quarterly profit, but key metrics were lower due to Brexit effects and launch of the all-new Fiesta
- Kuga, Ka and commercial vehicle share improved, while overall share was down due to Fiesta launch
- For 2017: Continue to expect Europe to remain profitable, although below 2016 levels, mainly due to Brexit effects and higher commodity cost. Favorable market factors and continued improvement in Russia will be a partial offset

<b>2Q 2017</b>	<b>375K</b>	<b>\$7.1B</b>	<b>7.3%</b>	<b>1.2%</b>	<b>\$88M</b>
<b>B/(W) 2Q 2016</b>	<b>(55)K</b>	<b>\$(1.0)B</b>	<b>(0.2) ppts</b>	<b>(4.6) ppts</b>	<b>\$(379)M</b>

### Middle East & Africa

- Pre-tax results improved due to favorable cost performance, reflecting mainly lower material and freight costs, and favorable exchange
- Other key metrics lower due to lower wholesale volume, largely reflecting lower share and lower industry
- For 2017: Continue to expect results in the region to improve compared to 2016 due to lower cost and favorable exchange with lower volume a partial offset

<b>2Q 2017</b>	<b>24K</b>	<b>\$0.6B</b>	<b>3.4%</b>	<b>(9.7)%</b>	<b>\$(53)M</b>
<b>B/(W) 2Q 2016</b>	<b>(14)K</b>	<b>\$(0.4)B</b>	<b>(1.2) ppts</b>	<b>(2.5) ppts</b>	<b>\$12M</b>

### Asia Pacific

- Wholesale volume up 7 percent; revenue up 21 percent, reflecting strength of full line up of SUVs and continued growth of Lincoln in China
- Market share was up, due to higher share in China because of strong JMC commercial vehicle gains and Lincoln performance
- For 2017: Continue to expect pre-tax profits to improve from 2016 due to favorable volume and mix, and lower cost

<b>2Q 2017</b>	<b>352K</b>	<b>\$3.4B</b>	<b>3.7%</b>	<b>4.1%</b>	<b>\$143M</b>
<b>B/(W) 2Q 2016</b>	<b>24K</b>	<b>\$0.6B</b>	<b>0.1 ppts</b>	<b>4.4 ppts</b>	<b>\$151M</b>

## FORD CREDIT RESULTS

### Ford Credit

- Best quarterly pre-tax profit since 2011
- Continued receivables growth globally
- For 2017: Now expect full-year pre-tax profit higher than \$1.5B, reflecting an improved lease residual outlook, along with higher volume, margin and a strong cost focus

	Pre-Tax Results
<b>2Q 2017</b>	<b>\$619M</b>
<b>B/(W) 2Q 2016</b>	<b>\$219M</b>

Statements included or incorporated by reference herein may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on expectations, forecasts, and assumptions by our management and involve a number of risks, uncertainties, and other factors that could cause actual results to differ materially from those stated, including, without limitation:

- Decline in industry sales volume, particularly in the United States, Europe, or China, due to financial crisis, recession, geopolitical events, or other factors;
- Lower-than-anticipated market acceptance of Ford’s new or existing products or services, or failure to achieve expected growth;
- Market shift away from sales of larger, more profitable vehicles beyond Ford’s current planning assumption, particularly in the United States;
- Continued or increased price competition resulting from industry excess capacity, currency fluctuations, or other factors;
- Fluctuations in foreign currency exchange rates, commodity prices, and interest rates;
- Adverse effects resulting from economic, geopolitical, protectionist trade policies, or other events;
- Work stoppages at Ford or supplier facilities or other limitations on production (whether as a result of labor disputes, natural or man-made disasters, tight credit markets or other financial distress, production constraints or difficulties, or other factors);
- Single-source supply of components or materials;
- Labor or other constraints on Ford’s ability to maintain competitive cost structure;
- Substantial pension and other postretirement liabilities impairing liquidity or financial condition;
- Worse-than-assumed economic and demographic experience for pension and other postretirement benefit plans (e.g., discount rates or investment returns);
- Restriction on use of tax attributes from tax law “ownership change;”
- The discovery of defects in vehicles resulting in delays in new model launches, recall campaigns, or increased warranty costs;
- Increased safety, emissions, fuel economy, or other regulations resulting in higher costs, cash expenditures, and/or sales restrictions;
- Unusual or significant litigation, governmental investigations, or adverse publicity arising out of alleged defects in products, perceived environmental impacts, or otherwise;
- Adverse effects on results from a decrease in or cessation or claw back of government incentives related to investments;
- Cybersecurity risks to operational systems, security systems, or infrastructure owned by Ford, Ford Credit, or a third party vendor or supplier;
- Failure of financial institutions to fulfill commitments under committed credit and liquidity facilities;
- Inability of Ford Credit to access debt, securitization, or derivative markets around the world at competitive rates or in sufficient amounts, due to credit rating downgrades, market volatility, market disruption, regulatory requirements, or other factors;
- Higher-than-expected credit losses, lower-than-anticipated residual values, or higher-than-expected return volumes for leased vehicles;
- Increased competition from banks, financial institutions, or other third parties seeking to increase their share of financing Ford vehicles; and
- New or increased credit regulations, consumer or data protection regulations, or other regulations resulting in higher costs and/or additional financing restrictions.

We cannot be certain that any expectation, forecast, or assumption made in preparing forward-looking statements will prove accurate, or that any projection will be realized. It is to be expected that there may be differences between projected and actual results. Our forward-looking statements speak only as of the date of their initial issuance, and we do not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events, or otherwise. For additional discussion, see “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2016, as updated by subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K.

\* We measure and evaluate our Automotive segment operating cash flow on a different basis than Net cash provided by/(used in) operating activities in our consolidated statement of cash flows. Automotive segment operating cash flow includes additional elements management considers to be related to our Automotive operating activities, primarily capital spending and non-designated derivatives, and excludes outflows for funded pension contributions, separation payments, and other items that are considered operating cash flows under U.S. GAAP. The table above quantifies the reconciling adjustments to Net cash provided by/(used in) operating activities for the period ended June 30, 2017.

## NON-GAAP FINANCIAL MEASURES THAT SUPPLEMENT GAAP MEASURES

We use both GAAP and non-GAAP financial measures for operational and financial decision making, and to assess Company and segment business performance. The non-GAAP measures listed below are intended to be considered by users as supplemental information to their equivalent GAAP measures, to aid investors in better understanding our financial results. We believe that these non-GAAP measures provide useful perspective on underlying business results and trends, and a means to assess our period-over-period results. These non-GAAP measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. These non-GAAP measures may not be the same as similarly titled measures used by other companies due to possible differences in method and in items or events being adjusted.

Total Company Adjusted Pre-tax Profit (Most Comparable GAAP Measure: Net income attributable to Ford) – The non-GAAP measure is useful to management and investors because it allows users to evaluate our pre-tax results excluding pre-tax special items. Pre-tax special items consist of (i) pension and OPEB remeasurement gains and losses that are not reflective of our underlying business results, (ii) significant restructuring actions related to our efforts to match production capacity and cost structure to market demand and changing model mix, and (iii) other items that we do not necessarily consider to be indicative of earnings from ongoing operating activities. When we provide guidance for adjusted pre-tax profit, we do not provide guidance on a net income basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB remeasurement gains and losses.

Adjusted Earnings Per Share (Most Comparable GAAP Measure: Earnings Per Share) – Measure of Company's diluted net earnings per share adjusted for impact of pre-tax special items (described above), and tax special items. The measure provides investors with useful information to evaluate performance of our business excluding items not indicative of underlying run rate of our business. When we provide guidance for adjusted earnings per share, we do not provide guidance on an earnings per share basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB remeasurement gains and losses.

Adjusted Effective Tax Rate (Most Comparable GAAP Measure: Effective Tax Rate) – Measure of Company's tax rate excluding pre-tax special items (described above) and tax special items. The measure provides an ongoing effective rate which investors find useful for historical comparisons and for forecasting. When we provide guidance for adjusted effective tax rate, we do not provide guidance on an effective tax rate basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB remeasurement gains and losses.
