(Unaudited)

1. The consolidated balance sheet of Graco Inc. and Subsidiaries (the Company) as of March 27, 2009 and the related statements of earnings and cash flows for the thirteen weeks then ended have been prepared by the Company and have not been audited.

In the opinion of management, these consolidated financial statements reflect all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position of Graco Inc. and Subsidiaries as of March 27, 2009, and the results of operations and cash flows for all periods presented.

10. The Company accounts for all derivatives, including those embedded in other contracts, as either assets or liabilities and measures those financial instruments at fair value. The accounting for changes in the fair value of derivatives depends on their intended use and designation.

As part of its risk management program, the Company may periodically use forward exchange contracts and interest rate swaps to manage known market exposures. Terms of derivative instruments are structured to match the terms of the risk being managed and are generally held to maturity. The Company does not hold or issue derivative financial instruments for trading purposes. All other contracts that contain provisions meeting the definition of a derivative also meet the requirements of, and have been designated as, normal purchases or sales. The Company's policy is to not enter into contracts with terms that cannot be designated as normal purchases or sales.

In 2007, the Company entered into interest rate swap contracts that effectively fix the rates paid on a total of \$80 million of variable rate borrowings. One contract fixed the rate on \$40 million of borrowings at 4.7 percent plus the applicable spread (depending on cash flow leverage ratio) until December 2010. The second contract fixed an additional \$40 million of borrowings at 4.6 percent plus the applicable spread until January 2011. Both contracts have been designated as cash flow hedges against

interest rate volatility. Consequently, changes in the fair market value are recorded in accumulated other comprehensive income (loss) (AOCI). Amounts included in AOCI will be reclassified to earnings as interest rates increase and as the swap contracts approach their expiration dates. Net amounts paid or payable under terms of the contracts were charged to interest expense and totaled \$0.6 million in the first quarter of 2009.

The Company periodically evaluates its monetary asset and liability positions denominated in foreign currencies. The Company enters into forward contracts or options, or borrows in various currencies, in order to hedge its net monetary positions. These instruments are recorded at current market values and the gains and losses are included in other expense (income), net. There were eight contracts outstanding as of March 27, 2009, with notional amounts totaling \$15.6 million. There were 26 contracts outstanding during all or part of the first quarter of 2009, with net gains of \$0.4 million partially offsetting \$0.6 million of exchange losses on net monetary positions, included in other expense (income), net. The Company believes it uses strong financial counterparts in these transactions and that the resulting credit risk under these hedging strategies is not significant.

The Company uses significant other observable inputs to value the derivative instruments used to hedge interest rate volatility and net monetary positions. The fair market value and balance sheet classification of such instruments follows:

	Balance Sheet Classification	March 27, 2009	December 26, 2008
Gain (loss) on interest rate hedge contracts	Other current liabilities	<u>\$ (5,009)</u>	<u>\$ (4,936)</u>
Gain (loss) on foreign currency forward contracts			
Gains		\$ 706	\$ 1,868
Losses		<u>(555)</u>	<u>(670)</u>
Net	Accounts receivable	<u>\$ 151</u>	<u>\$ 1,198</u>

11. In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements." This statement establishes a consistent framework for measuring fair value and expands disclosures on fair market value measurements. SFAS No. 157 was effective for the Company starting in fiscal 2008 for financial assets and liabilities. With respect to non-financial assets and liabilities, the statement was effective for the Company starting in fiscal 2009. The adoption of this statement as it pertains to non-financial assets and liabilities had no significant impact on the consolidated financial statements.

**Item 2.****GRACO INC. AND SUBSIDIARIES****MANAGEMENT'S DISCUSSION AND ANALYSIS OF  
FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Overview**

The Company designs, manufactures and markets systems and equipment to move, measure, control, dispense and spray fluid materials. Management classifies the Company's business into three reportable segments: Industrial, Contractor and Lubrication. Key strategies include development of new products, expansion of distribution and new market penetration.

The following Management's Discussion and Analysis reviews significant factors affecting the Company's results of operations and financial condition. This discussion should be read in conjunction with the financial statements and the accompanying notes to the financial statements.

**Results of Operations**

Net sales, net earnings and earnings per share were as follows (in millions except per share amounts and percentages):

	Thirteen Weeks Ended		
	March 27, 2009	March 28, 2008	% Change
Net Sales	\$ 137.9	\$ 204.1	(32)%
Net Earnings	\$ 2.8	\$ 35.6	(92)%
Diluted Net Earnings per Common Share	\$ 0.05	\$ 0.57	(91)%

Operating results were severely affected by the depth of the recession and its impact on the markets served by the Company. Sales and orders decreased in all segments and regions. Currency translation had an unfavorable effect on sales (\$6 million) and net earnings (\$2 million). The Company recorded \$4 million of cost related to an additional workforce reduction in March, as part of continued efforts to align operations with market and economic conditions.

<sup>2</sup> Europe, Africa and Middle East

Consolidated sales decreased 32 percent (29 percent at consistent exchange rates). Sales decreased 31 percent in the Americas, 40 percent in Europe (32 percent at consistent exchange rates) and 24 percent in Asia Pacific.

Gross profit margin, expressed as a percentage of sales, was 46.7 percent, down from 54.8 percent last year, due to lower production volumes (approximately 4 percentage points), unfavorable currency translation rates (approximately 2 percentage points), workforce reduction costs (approximately 1½ percentage points) and increased pension cost (approximately 1 percentage point).

Total operating expenses were slightly lower than last year. Product development expense increased by \$2 million as continued investment in new and improved products is a key component of the Company's strategy for future growth. Offsetting this increase was a decrease of \$2 million from translation effects. Increases in pension expense (\$3 million) and severance expense related to the additional workforce reduction in 2009 (\$1 million) were offset by the effects of the work force reduction in the fourth quarter of 2008, lower incentive and bonus provisions and other spending reductions.

The effective tax rate of 34 percent for the first quarter was higher than last year's first quarter rate of 30 percent due to the settlement of the examination of the Company's income tax returns in the first quarter of 2008.

## Segment Results

Certain measurements of segment operations compared to last year are summarized below:

### Industrial

	<u>Thirteen Weeks Ended</u>

Industrial segment sales decreased 33 percent in the Americas, 40 percent in Europe (32 percent at consistent translation rates) and 27 percent in Asia Pacific.

The impacts of low factory volume, workforce reduction costs, currency translation and increased product development spending contributed to the decrease in operating earnings as a percentage of sales.

### Contractor

Net sales (in millions)

Contractor segment sales decreased 25 percent in the Americas, 40 percent in Europe (31 percent at consistent translation rates) and 17 percent in Asia Pacific.

The impacts of low factory volume, channel sales mix, workforce reduction costs, currency translation and increased product development spending contributed to the decrease in operating earnings as a percentage of sales. This segment continued to incur expenses related to the rollout of entry-level paint sprayers to additional paint and home center stores in 2009.

## Lubrication

	<u>Thirteen Weeks Ended</u>	
	<u>March 27, 2009</u>	<u>March 28, 2008</u>

The impacts of low factory volume, product sales mix, workforce reduction costs, increased product development spending and costs related to discontinued products contributed to the decrease in operating earnings as a percentage of sales.

## **Liquidity and Capital Resources**

In the first quarter of 2009, the Company used cash to reduce the borrowings under its long-term line of credit by \$13 million and paid dividends of \$11 million. Significant uses of cash and borrowings in the first quarter of 2008 included \$60 million for purchases and retirement of Company common stock, \$35 million for a business acquisition and \$11 million for payment of dividends.

Since the end of 2008, inventories have been reduced by \$6 million. Accounts receivable decreased by \$21 million from continuing collections and lower sales levels.

At March 27, 2009, the Company had various lines of credit totaling \$279 million, of which \$98 million was unused. Internally generated funds and unused financing sources are expected to provide the Company with the flexibility to meet its liquidity needs in 2009.

## **Outlook**

Management expects that global economic conditions will continue to present a challenging operating environment in the near term. Workforce reductions initiated in 2008 and the further reduction announced in March of 2009 were made to align operations with market conditions and are expected to yield \$18 million in annualized savings. To the extent permitted by working capital resources, management intends to protect its human capital and continue making targeted investments in strategic operating and growth initiatives, including new product development, improving manufacturing efficiencies, expanding distribution and entering new markets.

Working capital management will continue to be a high priority for the remainder of 2009. The Company plans to reduce inventory by an additional \$25 million. Additional focus will be on collection of receivables over their normal cycle. Given the uncertainty in world economies and the possibility of continued weakness in markets served, the Company is considering cost-effective alternative liquidity options.

## **SAFE HARBOR CAUTIONARY STATEMENT**

A forward-looking statement is any statement made in this report and other reports that the Company files periodically with the Securities and Exchange Commission, or in press or earnings releases, analyst briefings and conference calls, which reflects the Company's current thinking on market trends and the Company's future financial performance at the time they are made. All forecasts and projections are forward-looking statements.

The Company desires to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995 by making cautionary statements concerning any forward-looking statements made by or on behalf of the Company. The Company cannot give any assurance that the results forecasted in any forward-looking statement will actually be achieved. Future results could differ materially from those expressed, due to the impact of changes in various factors. These risk factors include, but are not limited to: economic conditions in the United States and other major world economies, currency fluctuations, political instability, changes in laws and regulations, and changes in product demand. Please refer to Item 1A of, and Exhibit 99 to, the Company's Annual Report on Form 10-K for fiscal year 2008 for a more comprehensive discussion of these and other risk factors.

Investors should realize that factors other than those identified above and in Item 1A and Exhibit 99 might prove important to the Company's future results. It is not possible for management to identify each and every factor that may have an impact on the Company's operations in the future as new factors can develop from time to time.
