Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934 requires the Corporation's directors, executive officers and persons who own more than ten percent of the Corporation's common stock to file reports of ownership and changes in ownership with the Securities and Exchange Commission and the National Association of Securities Dealers (NASD). Such persons are also required to furnish the Corporation with copies of all such reports. Based solely on its review of the copies of such reports received by the Corporation, the Corporation believes that its directors and executive officers filed all required reports during or with respect to the fiscal year ending June 30, 2002 on a timely basis with the exception of Mr. McGowen who filed a late Form 4 on December 6, 2001, reporting the sale of 500 shares of Common Stock on October 18, 2001 and the sale of 1,000 shares of Common Stock on October 15, 2001, and a late Form 4 on August 10, 2002, reporting the sale of 1,000 shares of Common Stock on February 14, 2002.

Item 11. - Executive Compensation

Compensation Committee Report On Executive Compensation

The Compensation Committee of the Board of Directors (the “Committee”) reviews each salary adjustment for the Company’s officers and recommends those adjustments to the full board. The Committee also provides recommendations to the full Board regarding the structure of incentive compensation including contributions to the Company’s Annual Management Incentive Plan, the Company’s Long Term Incentive Plan, the Company’s Incentive Stock Option Plan, as well as the Employee Stock Ownership Plan (ESOP). It also provides recommendations regarding Director compensation.

The Committee’s objectives are as follows:

1. The Committee seeks to attract and retain the necessary management talent to successfully lead the Company. The Committee believes it must provide a compensation package that is competitive in the marketplace with other comparable companies.
2. The Committee encourages decision-making that enhances shareholder value. The Committee believes that this objective is met by linking executive pay to corporate performance.

The Compensation Committee believes that the various compensation plans it employs achieve the above stated objectives. The plans just referred to are summarized below. Total compensation for executive officers is determined by marketplace survey data, Company performance and individual performance. A control point and a salary range are established for each executive based on market information of companies in the gas utility industry. Each executive receives a base salary and annual incentive award which, when combined, place the executive within the compensation range for the position. The amount of the incentive award varies based upon the Company’s performance. Incentive awards have traditionally ranged from 0% to 85% of base salary.

The Annual Management Incentive Plan in place during the fiscal year provided for the payment of a cash bonus depending on two criteria, earnings per share relative to a predetermined target and achieving a predetermined Economic Value Added (EVA) target. Incentives awarded under this plan increase as the Company’s performance, as measured by these two criteria, improves. In fiscal year 2002, no payments were made to the CEO or other executive officers since the targets established by the Management Incentive Plan were not met. In June of 2002, the Committee amended the Management Incentive Plan to provide for awards to executive officers of up to 15% of base salaries to executive officers if the Company successfully satisfies the earnings per share target established by the Board. The plan also permits for the payment of additional sums of incentives if the target is exceeded.

Executive officers also receive up to 5% of their base salaries upon completion of certain objectives that support the Company’s Balanced Goal Card objectives. During the fiscal year each executive officer received approximately 5% of his base salary as a result of this incentive.

The Energy West Long Term Incentive Plan was adopted in 1999. It has established a targeted return of 50% to the Shareholder over the course of a three year period beginning in fiscal year 2000. The Plan requires the achievement of both annual earnings per share targets as well as an increase in shareholder return before any payment under the plan is earned. In the Fiscal Year ended 2001, \$216,306 was earned by plan participants. This payment was made as a result of the accomplishment of financial results in fiscal year 2001. A total pool of \$600,000 was available for distribution to participants over the

entire three year period. The financial targets required by the plan were not met in fiscal year 2002 and no payments under this plan were earned in fiscal year 2002 and the plan has expired according to its terms.

In September 1999, the Company adopted a Change of Control Severance Plan that requires severance payments to employees whose employment is terminated as a result of a change of control. This plan covers executive officers as well as most other employees of the Company. The Plan requires payment of two weeks of base salary for every year of service with a minimum payment of three months and a maximum of one year of base salary for officers of the Company.

In August 2000, the Board adopted a Retention Bonus Plan under which \$1.5 million dollars was authorized by the Board of Directors for allocation to key employees, including the named executive officers who would be paid a cash incentive for continued employment if the Company became involved in a potential change of control negotiation with a third party.

Chief Executive Officer Compensation

Compensation for the Chief Executive Officer is accomplished through the same combination of base salary, annual incentive award and long term plans as just discussed with respect to executive officers of the Company, with one exception. When Mr. Geske served as President and Chief Executive Officer, the Board instituted a Deferred Compensation Plan for the CEO. That plan paid Mr. Geske certain amounts calculated by total return to the shareholder (share price appreciation and dividend payments). The plan paid the incentive earned under this plan into an escrow account on Mr. Geske's behalf. Mr. Geske became eligible to receive the amount escrowed three years after it was earned. In the fall of 2001, Mr. Geske retired from his position and as part of a separation agreement received the amounts earned in fiscal year 2001 without waiting the three years required by the Plan. The Board of Directors also authorized the payment of \$50,000 to Mr. Geske as part of the separation agreement.

Mr. Bernica was promoted to President and Chief Executive Officer in the fall of 2001. His compensation is determined under the same mix of base salary and incentive plans as are other executive officers of the Company. In fiscal year 2002, Mr. Bernica received \$4,299 for the achievement of his Balanced Goal Card objectives. As indicated above, no payment in fiscal year 2002 was earned under either of the other two incentive plans

The foregoing report is furnished by the Compensation Committee:

Thomas N. McGowen, Jr., Chairman; David A. Flitner, George D. Ruff

Director Compensation

The Company paid its outside directors an annual retainer of \$4,000 per year, \$1,250 per Board meeting, \$450 per Committee meeting held on a different day from a full Board meeting and \$250 for each Committee meeting held on the same day as a full Board meeting. For Board or Committee meetings held by telephone conference, the rate is one half the regular rate indicated.

The directors have the option under the Deferred Compensation Plan for Directors to receive their compensation in the form of stock, cash, or in the form of deferred stock equivalents. In addition to the annual retainer and meeting fees, each Director may receive an annual award of Company Common Stock pursuant to the Deferred Compensation Plan for Directors. Incentive awards are paid in the form of Common Stock. The amount of Common Stock awarded is determined by an amount equal to a percentage of Director's compensation equivalent to the percentage of compensation paid to the Chief Executive Officer under the Management Incentive Plan. For example, if the Chief Executive Officer is paid an incentive under the Management Incentive Plan of 30%, that same 30% would be applied to the total compensation paid to each director during the fiscal year to arrive at a dollar amount. Those incentive dollars would then be utilized to purchase Company Common Stock on behalf of each director. Incentives associated with fiscal year 2002 did not result in the distribution of any shares of stock since no payout was made to the CEO under the Management Incentive Plan.

In addition any director residing in the Company's service territory is entitled to a 50% discount for the energy provided in the Director's residence by the Company. In 2002, the only director receiving this benefit was Mr. Andrew Davidson.

Performance of the Company's Common Stock

The following graph sets forth the cumulative total shareholder return (assuming reinvestment of dividends) to shareholders of Energy West Incorporated during the five year period ended June 30, 2002, as well as an overall stock market index (S&P 500 Index) and the peer group index (S&P Utility Index).
