Henry J. Herrmann, CFA

Dear Shareholder:

Over the last 12 months, investors have witnessed a dramatic reversal of fortune that began in March 2009, when several government programs were implemented to stabilize the economy and financial markets. These programs included a housing rescue plan, the purchase of Treasuries and mortgage-backed securities in the open market and the acquisition of toxic real estate assets from banks. In all, the total package amounted to in excess of \$1 trillion. In addition, short-term interest rates at the time were reduced to essentially zero, where they remain. These aggressive efforts, and similar policies implemented in many foreign markets, eliminated the threat of a global financial and economic meltdown, which seemed almost inevitable in the absence of any response.

Despite the bleak economic outlook at that time, investors began to demonstrate some appetite for risk, recognizing the power of the initiatives put in place. Stocks and bonds began to rally. In the spring of 2009, numerous economic “green shoots” began to appear, including an upturn in housing and a recovery in demand for consumer durable goods. By the third quarter of 2009, gross domestic product expanded at a 2.28 percent annualized rate. Progress continued as 2009 wound to a close. In the fourth quarter of 2009, gross domestic product expanded 5.3 percent. Stocks, which first turned up in March, continued their upward trajectory into early 2010.

Challenges remain, including persistent high unemployment, continued stress in the beleaguered U.S. housing sector, a ballooning government deficit and substantial uncertainty regarding the effect of the inevitable unwinding of all of the stimulus initiatives. Nonetheless, markets closed the fiscal year ended March 31, 2010 on a high note; the S&P 500 Index gained 49.78 percent during the period. Fixed-income markets, as measured by the Citigroup Broad Investment Grade Index, also did well, increasing 6.44 percent for the fiscal year.

Although numerous imponderables remain, we are optimistic that better days are ahead. Interest rates are low, government policy remains accommodative, companies are reporting more robust activity and job creation seems to be developing. The economy in the first calendar quarter expanded at a 3.2 percent rate. Corporate profits in the quarter are expanding sharply; this backdrop should translate into a higher stock market, as my belief continues to be that stock prices follow earnings.

Economic Snapshot

	3/31/10	3/31/09
S&P 500 Index	1169.43	797.87
MSCI EAFE Index	1584.27	1056.23
Citigroup Broad Investment Grade Index (annualized yield to maturity)	3.26%	3.35%
U.S. unemployment rate	9.7%	8.5%
30-year fixed mortgage rate	4.99%	4.85%
Oil Price per barrel	\$83.76	\$49.66

Sources: Bloomberg, U.S. Department of Labor

All government statistics shown are subject to periodic revision. The S&P 500 Index is an unmanaged index that tracks the stocks of 500 primarily large-cap U.S. companies. MSCI EAFE Index is an unmanaged index comprised of securities that represent the securities markets in Europe, Australasia and the Far East. Citigroup Broad Investment Grade Index is an unmanaged index comprised of securities that represent the bond market. Annualized yield to maturity is the rate of return anticipated on a bond if it is held until the maturity date. It is not possible to invest directly in any of these indexes. Mortgage rates shown reflect the average rate on a conventional loan with a 60-day lender commitment. Oil prices reflect the market price of West Texas intermediate grade crude.

As always, we thank you for your continued trust in Ivy Funds, and encourage you to share in our optimism for the future.

Respectfully,

Henry J. Herrmann, CFA
President

The opinions expressed in this letter are those of the President of the Ivy Funds and are current only through the end of the period of the report, as stated on the cover. The President's views are subject to change at any time, based on market and other conditions, and no forecasts can be guaranteed.

David P. Ginther

Below, David P. Ginther, CPA, portfolio manager of the Ivy Dividend Opportunities Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. He has managed the Fund since its inception and has 15 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Dividend Opportunities Fund (Class A shares at net asset value)	39.29%
Benchmark(s) and/or Lipper Category	
Russell 1000 Index (generally reflects the performance of stocks that represent the equity market)	51.61%
Lipper Equity Income Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	46.51%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Rocky start, dramatic finish

The fiscal year ended March 31, 2010, proved to be one of dramatic change in the investment markets. When the year began, the U.S. financial system stood at the brink of collapse and the global economy threatened to slip into the greatest worldwide recession since the 1930s. But the tide had actually begun to turn shortly before our last report to you. On March 6, 2009, the Dow Jones Industrial Average broke below 6500 and the S&P 500 declined to 666.79, falling another 25 percent from the end of 2008 and recording losses of more than 50 percent from their 2007 peaks. As alarming as that was, the market had found its floor.

Since then, markets rallied impressively. Investment banks, many of which had received TARP assistance, posted strong first quarter 2009 earnings, which in turn sparked a reversal in investor sentiment. Investors once again discovered their appetite for risk and demonstrated their preference for lower-quality or less financially secure businesses, driving a low-quality rally that ultimately drove up the prices of those businesses that had declined the most in the credit crisis. By mid-year news of improving earnings and better consumer sentiment about the global economic outlook bolstered equities.

This upward trajectory continued during the second half of 2009. U.S. gross domestic product registered growth in the third quarter for the first time in more than a year, while the final quarter of 2009 saw a broad-based advance, with all sectors recording gains and a number of economic indicators improving, suggesting that continued recovery was moving toward sustainability. Also notable during the fourth quarter was the strengthening of the dollar versus many foreign currencies and the global response to the debt default by Dubai World, a

state-owned development company in the United Arab Emirates. This event served as a harsh reminder that while the credit crisis may have faded from the forefront of investors' minds, it may not be over. Although U.S. markets stumbled only briefly in response, the default reignited concern about the economic challenges facing some of the weakest European countries – particularly Greece. But the year ended on a decidedly positive note, with the market rebounding nearly 65 percent from the bottom to end 2009 near its highs for the year.

The momentum that drove the equity markets higher throughout much of 2009 continued into the first quarter of 2010, albeit at about half the pace of the final quarter of 2009. Although many economic indicators pointed to continued recovery and increasing stability in the U.S. economy, domestic equities spent the bulk of the first quarter of 2010 searching for direction. This was due in part to events taking place in several emerging markets. China began to tighten credit in an effort to slow down its perhaps too-rapidly-growing economy and stave off inflation. We think China ultimately will manage this successfully, but in the meantime, fallout from that situation, combined with escalating concern about economic challenges facing some of the weakest European countries – particularly Greece – has resulted in increased volatility and restrained the U.S. market. We anticipate that this volatility will continue as central banks, both here and abroad, continue to reduce their quantitative easing. We also expect that lingering high unemployment, sluggish wage gains, relatively tight credit and record-high home foreclosures will continue to restrain domestic economic growth for some time to come.

Steadfast approach

Despite the rapidly evolving market that characterized the Fund's fiscal year, we did not stray from our long-held approach to identifying those companies that we feel possess the balance-sheet strength, sustainable business models and earning power and that, in our belief, stand to benefit the most in the early stages of economic recovery. We maintained our focus on dividend growth, rather than high-yielding stocks, and focused on total returns in an effort to achieve a combination of income growth and long-term capital appreciation. We entered the year defensively positioned, emphasizing stocks that we thought were less sensitive to the recession, but this overly defensive posture ultimately restrained the Fund's performance relative to its benchmark and peers.

On the plus side, absolute performance was helped earlier by the Fund's then-substantially overweight stake in energy – a position we undertook on the belief that the oil and gas oversupply that characterized the market earlier in the year was temporary and that energy prices would move higher. An overweight in consumer staples also proved beneficial in absolute terms.

As the year progressed, earnings growth, driven by revenue growth and the ongoing benefits of cost cutting, continued to surprise on the upside. We did make some tactical shifts in an effort to take advantage of this changing environment. One of our larger efforts was to position the Fund a bit more aggressively. Specifically, we increased exposure to the consumer discretionary, industrials and materials sectors and also added selected names in information technology and financials. We eliminated some higher-yielding telecom names – firms that did not appear to us to have upside opportunity – in favor of other holdings that we think are more likely to provide dividend growth and capital appreciation for total return as the economy improves. We have reduced the Fund's overall exposure to energy, but added a few names we think are well positioned to benefit from demand for energy that we believe will likely outstrip supply. We reduced exposure in consumer staples and health care as well.

Cautiously optimistic

The economic outlook continues to improve, although concerns remain about the strength and sustainability of recovery. We fully expect credit to continue to improve throughout 2010, although we think stimulus will begin to slow in the latter half of the year. We are not yet concerned about inflation, despite the enormous liquidity that was injected by the Federal government into the system in an effort to stimulate the economy, because unemployment remains high – a factor that we believe will keep wages from rising too quickly. We are concerned, however, about the effect of increased regulation and taxes, which could restrain economic growth and recovery. In the near term, we remain cautious on consumer spending due to the high unemployment rate, although we believe employment growth will improve in the months ahead. Finally, we believe that dividend-paying stocks should benefit from a continued low-interest-rate environment in which total returns become increasingly important.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Dividend paying investments may not experience the same price appreciation as non-dividend paying investments. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Dividend Opportunities Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Dividend Opportunities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E	Class I	Class Y
1-year period ended 3-31-10	31.28%	33.88%	38.30%	31.32%	39.80%	39.58%
5-year period ended 3-31-10	2.58%	2.64%	3.03%	—	—	3.95%
10-year period ended 3-31-10	—	—	—	—	—	—
Since inception of Class ⁽³⁾ through 3-31-10	5.09%	5.05%	5.21%	-5.69%	-3.17%	6.17%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) 6-30-03 for Class A, Class B, Class C and Class Y shares and 4-2-07 for Class E and Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

As a shareholder of a Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, redemption fees and exchange fees; and (2) ongoing costs, including management fees, distribution and service fees, and other Fund expenses. The Illustration of Fund Expenses for each Fund is intended to help you understand your ongoing costs (in dollars) of investing in a Fund and to compare these costs with the ongoing costs of investing in other mutual funds. Each example is based on an investment of \$1,000 invested at the beginning of the period and held for the six-month period ended March 31, 2010.

Actual Expenses

The first line for each share class in each table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, a \$7,500 account value divided by \$1,000 = 7.5), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During Period” to estimate the expenses you paid on your account during this period. There may be additional fees charged to holders of certain accounts that are not included in the expenses shown in the tables. These fees apply to Individual Retirement Accounts (IRAs), IRA Rollovers, Roth IRAs, Conversion Roth IRAs, Simplified Employee Pension (SEP), Simple IRAs, Tax-Sheltered Accounts (TSAs), Keogh Plans, Owner Only 401(k) (Exclusive K) Plans and Final Pay Plans. As of the close of the six months covered by the tables, a customer is charged an annual fee of \$15 within each plan type. This fee is waived for IRA Rollovers and Conversion Roth IRAs if the customer owns another type of IRA. Coverdell Education Savings Account plans are charged an annual fee of \$10 per customer. You should consider the additional fees that were charged to your Fund account over the six-month period when you estimate the total ongoing expenses paid over the period and the impact of these fees on your ending account value as such additional expenses are not reflected in the information provided in the expense tables. Additional fees have the effect of reducing investment returns.

Hypothetical Example for Comparison Purposes

The second line for each share class in each table provides information about hypothetical account values and hypothetical expenses based on the Fund’s actual expense ratio and an assumed rate of return of five percent per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this five percent hypothetical example with the five percent hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the tables are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees or exchange fees. Therefore, the second line of each share class in the tables is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

ILLUSTRATION OF FUND EXPENSES

Ivy Dividend Opportunities Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,094.60	1.35%	\$ 7.12
Class B	\$1,000	\$1,089.70	2.36%	\$12.33
Class C	\$1,000	\$1,089.90	2.06%	\$10.76
Class E	\$1,000	\$1,094.90	1.37%	\$ 7.12
Class I	\$1,000	\$1,096.70	0.99%	\$ 5.14
Class Y	\$1,000	\$1,095.30	1.21%	\$ 6.29
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,018.18	1.35%	\$ 6.86
Class B	\$1,000	\$1,013.17	2.36%	\$11.88
Class C	\$1,000	\$1,014.68	2.06%	\$10.38
Class E	\$1,000	\$1,018.10	1.37%	\$ 6.86
Class I	\$1,000	\$1,020.01	0.99%	\$ 4.95
Class Y	\$1,000	\$1,018.89	1.21%	\$ 6.06

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

(A) No dividends were paid during the preceding 12 months.

(B) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date that the variable rate resets.

The following acronyms are used throughout this schedule:

ADR = American Depositary Receipts

REIT = Real Estate Investment Trust

Industry classifications are unaudited.

Paul J. Ariano

William Jeffery III

Paul K. LeCoq

Kenneth F. McCain

Carl Wiese

Ivy Micro Cap Growth Fund is subadvised by Wall Street Associates. Wall Street Associates has managed the Fund since its inception in February 2009.

Below, Paul J. Ariano, CFA, William Jeffery III, Paul K. LeCoq, Kenneth F. McCain, and Carl Wiese, CFA, portfolio managers of the Ivy Micro Cap Growth Fund, discuss the Fund's positioning, performance and results for the fiscal year ended March 31, 2010.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Micro Cap Growth Fund (Class A shares at net asset value) 66.16%

Benchmark(s) and/or Lipper Category

Russell 2000 Growth Index 60.31%
(generally reflects the performance of smaller company stocks)

Russell Microcap Growth Index 62.48%
(generally reflects the performance of stocks in the smallest category of publicly traded companies)

Lipper Small-Cap Growth Funds Universe Average 59.39%
(generally reflects the performance of the universe of funds with similar investment objectives)

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. Multiple indexes are shown because the Fund's management team expects to typically invest in companies of more than one level of market capitalization.

Back in the swing

For the 12 months ended March 31, 2010, investors enjoyed a massive stock and commodities market rally as deeply oversold markets bounced off the March 2009 lows. The period produced strong equity returns typical of an emerging cyclical recovery. The global economy continues to improve, and the United States is participating due to sustained monetary and fiscal stimulus, improving retail sales, less-negative employment news and rock-bottom interest rates. On March 16 the Federal Reserve reiterated its resolve to maintain "exceptionally low" interest rates for "an extended period." As a result, by the end of the fiscal period, stock indices hit recovery highs.

Good things come in threes

Investments in the technology sector produced the greatest contribution to the Fund's return for the period, driven by strong stock selection in the group. Investments in the consumer discretionary and energy sectors posted triple-digit returns for the period and outpaced the benchmark sector returns. Investments in the health care sector detracted from the Fund's performance, as the group rose only 54 percent and trailed the broader benchmark return for the year. The Fund had an overweight position in the sector, but stock selection was additive for the period. Performance for the group has improved since Congress finalized the health care reform bill and uncertainties have been removed.

Unfolding market environment presents benefits

As a positive long-term trend continues to develop in the energy sector, we continue to overweight the sector with particular emphasis on oil and gas drilling, service, exploration, production, infrastructure building and associated technologies. While short-run demand destruction, deleveraging and a "speculative unwind" negatively impacted these groups in the 2008–09 downturn, energy and resource-oriented companies have performed well during the recent market recovery. Cyclical declines can and do occur, and history has told us that as conditions improved, demand for energy and commodities returned and prospects for related companies improved.

Health care companies are becoming important contributors to performance, and we continue to maintain an overweight target versus comparable benchmarks in this sector. Despite investor uncertainty regarding the fate of health care, there's a positive case for health care companies as many experience high relative profitability, attractive valuations and improving profit margins. Demographic trends and revenue increases are positive factors for health care technology, equipment, services and pharmaceutical companies. The medical technology, equipment, device and diagnostics companies we find most attractive are in the midst of ramping up product cycles and are experiencing robust earnings growth. We think biotechnology companies should continue to see above-average prospects as they experience a greater share of new drug approvals and "big pharma" pushes hard via partnerships to replace large drugs coming off patent. Health care-related companies historically have been resistant to economic downturns, but the intense political scrutiny faced by this sector raises investor concern. However, many believe the passing of Congress' health care bill will cause the political pressure to abate. Investors' uncertainty may diminish as they see that these groups are fundamentally strong, attractively valued and positioned for long-term improvement in revenues, earnings and margins.

Many factors continue to negatively impact household budgets, making stock selection extremely challenging and important within the consumer discretionary sector. This has been a difficult period, yet consumers have come out of hibernation spurred by the fiscal stimulus, a rebounding stock market and pent-up demand that needs to be satisfied. We remain somewhat cautious and maintain an equal-weight target weighting versus

comparable benchmarks in this sector. While consumer confidence and spending have begun to improve, labor markets continue to suffer, making the current environment for consumer-related companies quite difficult, and one that demands a focus on valuations.

Technology companies have improved, and we continue to target an overweight position versus comparable benchmarks in this sector. We believe the diverse thematic influences within technology industry groups will positively impact select companies that are either gaining market share and/or exhibiting strong growth rates. We expect the Fund's software- and hardware-related positions should benefit from outsourcing, security, data storage, business redundancy, disaster preparedness and digitization trends. Semiconductor-related companies continue to see some positive changes. Global technology orders are strengthening, technology production and retail sales are improving, technology durable orders are improving, and global semiconductor capacity use and semi-cap equipment orders are gaining. Valuation measures for these technology groups remain attractive. Looking ahead, we may see the start of a personal computer upgrade cycle. Wireless and smart phone penetration is expected to continue and technology suppliers to the developing world should see robust demand.

Into the future

We expect companies to continue seeing higher forecasted long-term earnings growth rates versus comparable benchmarks. While the number of U.S.-based investment opportunities remains high, we continue to encounter more compelling investment candidates in foreign-based companies, all of which trade on major U.S. exchanges and some of which are benchmark constituents. These foreign-based companies exhibit the same positive characteristics we have traditionally looked for in all investment candidates (with more compelling valuations). Such companies have the added benefit of their operations concentrated within the fastest-growing economies on the planet – countries experiencing strong emerging profit cycles expected to last for decades. In an environment in which overall growth rates are low, companies that exhibit strong and highly predictable rates of growth eventually command premium valuations. Historically, during economically slow periods, investors recognized the attractiveness of true growth stocks. We think this recognition is occurring, and while valuations are not as cheap as they were earlier this year, they are still compelling. As confidence continues to build, history tells us that one of the most rewarding settings for growth equity portfolios appear to be in place for investors – an environment in which growth is scarce and a premium is paid for companies expanding at a more rapid pace than the overall economy.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Investing in micro-cap stocks may carry more risk than investing in stocks of larger, more established companies. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Micro Cap Growth Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Micro Cap Growth Fund

(UNAUDITED)

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment.

(2) The value of the investment in the Fund is impacted by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

(3) Because the Fund commenced operations on a date other than at the end of a month, and partial month calculations of the performances of the indexes (including income) are not available, investment in the indexes was effected as of February 28, 2009.

Average Annual Total Return ⁽⁴⁾	Class A	Class B	Class C	Class I	Class Y
1-year period ended 3-31-10	56.61%	59.49%	64.45%	66.68%	65.38%
5-year period ended 3-31-10	—	—	—	—	—
10-year period ended 3-31-10	—	—	—	—	—
Since inception of Class ⁽⁵⁾ through 3-31-10	46.43%	48.63%	52.85%	54.85%	53.77%

(4) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(5) 2-17-09 for Class A, Class B, Class C, Class I and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

ILLUSTRATION OF FUND EXPENSES

Ivy Micro Cap Growth Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*

Class I	\$1,000	\$1,016.45	1.70%	\$ 8.57
Class Y	\$1,000	\$1,014.34	2.12%	\$10.68

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

(A) No dividends were paid during the preceding 12 months.

(B) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date that the variable rate resets.

The following acronym is used throughout this schedule:

ADR = American Depositary Receipts

Industry classifications are unaudited.

Timothy J. Miller

Below, Timothy J. Miller, portfolio manager of the Ivy Small Cap Value Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. He has managed the Fund for two years and has 31 years of industry experience.

Note: Effective April 1, 2010, Matthew T. Norris assumed portfolio management duties for the Ivy Small Cap Value Fund.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Small Cap Value Fund (Class A shares at net asset value) 51.87%

Benchmark(s) and/or Lipper Category

Russell 2000 Value Index 65.01%
(generally reflects the performance of small-company value-style stocks)

Lipper Small-Cap Value Funds Universe Average 71.82%
(generally reflects the performance of the universe of funds with similar investment objectives)

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Dramatic reversal

The 12-month period ended March 31, 2010, nearly captures the market's rally from its low point in March 2009 to the most recent high. The big move off of the bottom was led by the lowest-quality stocks that had been left for dead during the credit crisis; accordingly value outperformed growth in all segments of the market. At the height of the credit crisis last year, fears of a closed window for refinancing sent one last wave of panic selling of stocks of many companies that had overleveraged their balance sheets or had significant near-term debt maturities. As these bankruptcy fears were ameliorated by Fed actions and an eventual credit recovery, the risk premium eased and these stocks jumped dramatically off the bottom. This rebound continued for the balance of the year, leading to spectacular gains for the highest-risk, most-leveraged companies in the index. Breaking down the index into quintiles of various quality metrics, the data confirms this pattern. In terms of return on equity, the lowest quintile of companies performed the best. Looking at price-to-earnings ratios, the companies producing losses performed the best during the year, with the smallest companies dramatically outperforming the largest companies.

Beneficial weightings helped, but quality lagged

Ivy Small Cap Value Fund's return trailed that of its benchmark index during the period. The Fund was overweight in three of the four best-performing sectors – consumer discretionary, materials and technology – and underweight in the three worst sectors – utilities, staples and financials. The weightings were important because of the large discrepancy between the best- and worst-performing sectors for the year.

The three top-performing sectors mentioned above were up between 85 and 115 percent for the year, versus the three worst, which were up only 25 to 50 percent. This positive sector allocation, however, was more than offset by conservative stock positioning, which resulted in the Fund's relative underperformance. In particular, the Fund's consumer discretionary stocks lagged the dramatic gains of the index in the specialty retail and household durables industries. While the Fund had large gains from stocks such as Liberty Media Corporation, Liberty Capital Series, Avnet, Inc. and Tenneco Automotive Inc., it was lacking exposure to many lower-quality companies that were up two- and three-fold from the bottom. This accounted for approximately half of the underperformance.

The Fund faced a similar scenario in the materials sector, in which the benefits of an overweight position were offset by underexposure to the lowest-tier names that were resurrected in the recovery. The Fund's best performers included Red Back Mining Inc. (this security has been removed from the portfolio), Ashland Inc. and Thompson Creek Metals Company Inc. (this security has also been removed from the portfolio) while the higher quality, defensive companies, such as Silgan Holdings Inc. and Sensient Technologies Corporation, lagged. The financials sector was also a bright spot for the Fund in the past year. Strong stock selection was driven by our strategy in favoring the strongly capitalized, aggressive acquirers in the banking sector. Among the large winners were Wintrust Financial Corporation, East West Bancorp, Inc. and Texas Capital Bancshares, Inc.

The Fund's top individual contributors included the aforementioned banks, along with Brigham Exploration Company and Celestica Inc. (both of which the Fund no longer holds, as they reached what we deem to be fair market value), BE Aerospace, Inc. and Sanmina-SCI Corporation. The Fund's energy positions were focused on the oil exploration companies operating in the oil-based Bakken shale field in North Dakota. Brigham Exploration Company, American Oil & Gas Inc. and Whiting Petroleum Corporation were also strong performers, and have been removed from the portfolio. In the technology sector, the Fund focused on distributors and contract manufacturers, and realized large gains from Celestica Inc. and Sanmina-SCI Corporation. On the flip side, the Fund's weakest absolute performers tended to be the higher-quality defensive companies such as Silgan Holdings Inc., BJ's Wholesale Club, Inc. and several utilities.

The future for value looks bright

The outlook for small cap value stocks remains attractive to us, albeit more selective, given the substantial move in the market over the past 12 months. The financial sector, which lagged in the last 12 months, appears poised for a period of outperformance, and it represents a very large weighting for both the index and the Fund. In addition, the market's search for yield appears to be favoring many groups that fall into the value category. The economic recovery in the United States and the attendant rise in the dollar also can favor this domestically oriented fund. Finally, we believe the effort to continue to emphasize the lower-expectation, best-valued opportunities in the market should be rewarded in the ensuing year.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in small-cap stocks may carry more risk than investing in stocks of larger, more established companies. Value stocks are stocks of companies that may have experienced adverse business or industry developments; or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's manager to be undervalued may never reach what the manager believes to be its full value, or such security's value may decrease. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Small Cap Value Fund.

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E ⁽³⁾	Class I	Class Y
1-year period ended 3-31-10	43.14%	46.16%	50.79%	44.03%	52.91%	52.54%
5-year period ended 3-31-10	3.11%	3.05%	3.54%	—	—	4.77%
10-year period ended 3-31-10	9.35%	—	—	—	—	—
Since inception of Class ⁽⁴⁾ through 3-31-10	—	5.03%	5.38%	-2.06%	0.15%	6.61%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) Class E shares are not currently available for investment.

(4) 12-8-03 for Class B, Class C and Class Y shares and 4-2-07 for Class E and Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Venture Fund merged into the Ivy Small Cap Value Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Venture Fund Class A shares, restated to reflect current sales charges applicable to Ivy Small Cap Value Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Small Cap Value Fund. If these expenses were reflected, performance shown would differ.

Class E**	\$1,000	\$1,167.60	1.25%	\$ 6.72
Class I	\$1,000	\$1,167.30	1.13%	\$ 6.07
Class Y	\$1,000	\$1,165.80	1.39%	\$ 7.47
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,016.47	1.70%	\$ 8.57
Class B	\$1,000	\$1,010.73	2.85%	\$ 14.28
Class C	\$1,000	\$1,012.62	2.47%	\$ 12.38
Class E**	\$1,000	\$1,018.72	1.25%	\$ 6.26
Class I	\$1,000	\$1,019.30	1.13%	\$ 5.65
Class Y	\$1,000	\$1,018.00	1.39%	\$ 6.96

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

**Class closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

(A) No dividends were paid during the preceding 12 months.

(B) Listed on an exchange outside the United States.

(C) Rate shown is the yield to maturity at March 31, 2010.

(D) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date that the variable rate resets.

The following acronyms are used throughout this schedule:

ADR = American Depositary Receipts

REIT = Real Estate Investment Trust

Industry classifications are unaudited.

Matthew T. Norris

Below, Matthew T. Norris, CFA, portfolio manager of the Ivy Value Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. He has managed the Fund since its inception and has 18 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Value Fund (Class A shares at net asset value)	57.09%
---	---------------

Benchmark(s) and/or Lipper Category

Russell 1000 Value Index (generally reflects the performance of value-style stocks)	53.55%
---	---------------

Lipper Large-Cap Value Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	49.89%
--	---------------

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

With spring came strength

The market recovered from the lows of spring 2009 thanks, in part, to the impact of various economic stimulus packages. The Russell 1000 Value index, the most directly comparable index for large-cap value investors, enjoyed strong positive performance. Areas of strength included economically sensitive sectors such as retail, consumer products and real estate. Also strong were some financial areas such as banking, which started the calendar year down and experienced a sudden rise throughout the remainder of the year. Lagging areas included more defensive or non-economically sensitive sectors such as utilities and telecommunications.

Ivy Value Fund's performance was strong due to individual stock selection and a consistent approach to managing portfolio risk. Positive relative performance was driven by large holdings. The Fund also had little exposure to utilities and telecomm, which were weak sectors for the period.

Market recovery contributes to impressive returns

A key strategy of the Fund is to invest in individual equities that we feel are undervalued relative to their prospects, while also attempting to diversify investments in an effort to minimize the impact from macro events. The companies we chose contributed to absolute return as they rose back towards their true value. Some of the returns were impressive, coming off the lows set in March 2009.

As is consistent with long-term portfolio management, we eliminated certain companies from the Fund when they reached a value thought to be reasonable. We added other names when opportunity presented itself. Individual stock selection was the primary contributor to the Fund's strong performance.

A look ahead

The Fund continues to focus on companies with high free-cash flows, thus indicating value. Especially attractive to us were profitable companies with excess cash available, yet limited growing areas to deploy that cash. This situation leads to the use of cash to pay shareholders higher dividends or repurchase their own stock. We believe that investor returns may be coming from actions such as this versus significantly higher earnings or price-to-earnings multiple expansion.

The Fund was overweight in technology and insurance, where the greatest concentration of ideas presented themselves for our investing style. It was underweight in utilities, telecomm and capital equipment, where there was not a large enough discount to our estimate of value to warrant investing.

We believe the Federal Reserve ultimately is going to raise rates as the economy continues to improve, although timing is uncertain. We keep this in mind when assessing the values of firms in which we may invest. Going forward, we do not anticipate meaningful change in our investment process or management philosophy. We continue to search, one company at a time, for names that can offer good value investment opportunities.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Value stocks are stocks of companies that may have experienced adverse business or industry developments; or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's manager to be undervalued may never reach what the manager believes to be its full value, or such security's value may decrease. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Value Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Value Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E ⁽³⁾	Class I	Class Y
1-year period ended 3-31-10	48.06%	50.60%	55.58%	48.97%	58.20%	57.52%
5-year period ended 3-31-10	0.65%	0.46%	0.92%	—	—	2.12%
10-year period ended 3-31-10	1.02%	—	—	—	—	—
Since inception of Class ⁽⁴⁾ through 3-31-10	—	3.11%	3.36%	-5.27%	-3.26%	4.56%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) Class E shares are not currently available for investment.

(4) 12-8-03 for Class B, Class C and Class Y shares and 4-2-07 for Class E and Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Cornerstone Fund merged into the Ivy Value Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Cornerstone Fund Class A shares, restated to reflect current sales charges applicable to Ivy Value Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Value Fund. If these expenses were reflected, performance shown would differ.

Michael L. Avery

Ivy Managed European/Pacific Fund and Ivy Managed International Opportunities Fund

Below, Michael L. Avery, portfolio manager of the Ivy Managed European/Pacific Fund and Ivy Managed International Opportunities Fund, discusses the positioning, performance and results for each Fund for the fiscal year ended March 31, 2010. He has managed each Fund since its inception on April 2, 2007, and he has 31 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Managed European/Pacific Fund (Class A shares at net asset value)	59.43%
Benchmark(s)	
MSCI AC Asia ex Japan Index (generally reflects the performance of Asia stocks, not including Japan)	73.70%
MSCI Europe Index (generally reflects the performance of European stocks)	56.12%

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Managed International Opportunities Fund (Class A shares at net asset value)	50.82%
Benchmark(s)	
MSCI AC World ex-USA Index (generally reflects the performance of overseas stocks)	60.95%

Past performance is not necessarily indicative of future performance. Please note that Fund returns include applicable fees and expenses, whereas the index returns do not include any such fees. Multiple indexes are shown for the Ivy Managed European/Pacific Fund because that Fund invests in multiple parts of the world outside the United States. For additional performance information for each Fund, please see the Comparison of Change in Value of a \$10,000 Investment and the Average Annual Total Return information for each Fund found on pages 36 and 37 of this report.

Ivy Managed European/Pacific Fund:

A year of dramatic reversal

The fiscal year ended March 31, 2010, opened on a note of heightened anxiety, as the global financial system stood at the brink of collapse and the global economy threatened to slip into recession. But the tide began to turn shortly before our last report to you. Thanks to rapid and unprecedented intervention by governments in many developed and emerging markets, global stock markets began to anticipate recovery. As Central banks in the United States and Europe (and elsewhere) launched into quantitative easing, the markets bid up assets, including gold, real estate and equities, and left the dollar behind. The momentum continued largely unabated in European markets during the year. Equity valuation spreads had widened to unprecedented levels at the beginning of the year. Value began to dramatically outperform growth and the dollar went into freefall against international currencies. Investors seemed to lose their fear of risk and moved back into equities. Recovery in European markets continued into the final quarter of 2009, although the pace of recovery began to cool. The benefits stemming from the

billions of dollars that were injected into the European economy via tax cuts and spending incentive programs continued as well, driving progress in nearly all sectors of the European market.

During the past fiscal year, within the Ivy Managed European/Pacific Fund, we shifted the underlying fund mix from an approximate 67/33 split between Ivy Pacific Opportunities Fund and Ivy European Opportunities Fund to an 80/20 split in favor of the Ivy Pacific Opportunities Fund. The reallocation was driven by our belief in the potential we see for growth in the emerging middle class in emerging markets, such as China, and our belief that Europe will face some difficulty recovering from recession.

Ivy Managed International Opportunities Fund:

Accommodative policy, increasing appetite for risk

The year was also a positive one for the Asia Pacific ex-Japan market, as stocks rose substantially there as the global economy continued to recover from deep recession. The Asian economy experienced a V-shaped recovery, fueled by robust domestic demand in China and India. China's gross domestic product grew by 8.7 percent during calendar year 2009, far outpacing investor expectations at the beginning of the year, thanks to unprecedented intervention by the Chinese government, which implemented a 4 trillion renminbi (\$586 billion) stimulus package. Monetary and fiscal policies in Asian countries remained accommodative during the period, providing abundant liquidity to the biggest market rally in the decade. As the United States launched into quantitative easing, China's rapid loan growth materialized. Risk appetite was high and emerging market equities were favored throughout the period, as they were less leveraged and cheaper in valuation when compared to their developed-market peers. While demand from emerging economies remained robust, western economies, including the United States and Europe, showed solid signs of recovery, helping Asian countries – particularly South Korea, Taiwan and Singapore – record a strong rebound in export orders. Taiwan and China were the best-performing markets in Asia during the final quarter of 2009. India, unfortunately, suffered its worst drought since 1972 and saw double-digit food inflation. Those troubles, combined with less-than-expected loan growth, restrained the Indian market. Nonetheless, international equity funds, and emerging market funds in particular, experienced large cash inflows.

This past fiscal year we made only slight adjustments to the allocation of assets in the Fund's underlying portfolios. The Fund's largest weightings, at 25 percent of net assets each, are allocated to Ivy International Core Equity Fund and Ivy International Balanced Fund. Ivy International Growth Fund and Ivy Pacific Opportunities Fund each represent a 20 percent allocation, slight increases to each compared to the last fiscal period. The remaining 10 percent of Fund assets are allocated to Ivy European Opportunities Fund. This positioning reflected our belief that Europe would have greater difficulty recovering from recession than would other international markets. This positioning also permitted the overall portfolio to maintain exposure to international fixed-income markets while benefitting from the tremendous growth taking place in what we anticipated would be faster-growing emerging equity markets.

Our outlook

We still see a mixed picture for many European economies. The sovereign debt crisis facing Greece creates a bit of a question mark for other European markets. The European region recently posted a positive gross domestic product number, but Greece continues to be a potential drag on other euro countries. We expect that some other countries will begin to withdraw or pull back their fiscal stimulus, which could create some difficulties. That said, central banks are keeping rates low, and inflation remains benign, which is a positive sign. We don't believe we will see a deflationary environment develop. Private consumption remains weak across Europe because of high unemployment, which we believe has not yet peaked. Due to the Greek turmoil and high budget deficits, we think it is likely that European currencies may remain under pressure for some time to come.

Our outlook for Asia is optimistic. We believe that the continuous urbanization trend and excellent demography will continue to strongly drive the Asian economy in the next decade. As Asian households become middle class consumers, consumption and infrastructure build-out themes bode well, in our view, for opportunistic investing. In the short term, we are cognizant of the current risks facing the market, including changing government policy in China, inflation risk in India and Indonesia and political risk in Thailand and North Korea. However, we do not agree with the assertion that China is a huge bubble that will soon burst. We do see some problems in Chinese property market and high local government borrowings, but we believe these problems are confined and controllable. Compared to developed markets, we think Asia will continue to benefit from a high savings rate and relatively low levels of consumer, corporate and government debt.

Each Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of each Fund's shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest rate risk and, as such, a Fund's net asset value may fall as interest rates rise.

International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country and differences in accounting standards and foreign regulations. These and other risks are more fully described in each Fund's prospectus.

The opinions expressed in this report are those of the Funds' manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Managed European/Pacific Fund or the Ivy Managed International Opportunities Fund.

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the tables), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

**Class closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Andrew Massie

James Thompson

Ivy Cundill Global Value Fund is subadvised by Mackenzie Financial Corporation.

Below, portfolio managers Andrew Massie and James Thompson, Jr., portfolio managers of the Ivy Cundill Global Value Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Massie has 27 years of industry experience and has managed the Fund for two years. Mr. Thompson has 26 years of industry experience and became a co-manager of the Fund in April 2009.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Cundill Global Value Fund (Class A shares at net asset value) 49.03%

Benchmark(s) and/or Lipper Category

MSCI World Index 52.37%
(generally reflects the performance of securities that represent the global stock market)

Lipper Global Small-Cap/Mid-Cap Funds Universe Average 62.31%
(generally reflects the performance of the universe of funds with similar investment objectives)

Lipper Global Multi-Cap Value Funds Universe Average 52.57%
(generally reflects the performance of the universe of funds with similar investment objectives)

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Note: The Fund's Lipper peer group classification changed to Lipper Global Multi-Cap Value Funds Universe Average effective April 2010. Both category averages are shown in this year's report for comparison purposes.

The Fund had strong absolute returns for the fiscal year ended March 31, 2010. The primary contributor to these results was the dramatic worldwide recovery of equity markets after the collapse in those same markets in the previous 52-week period. On a relative basis, the Fund's return was below that of its benchmark index. This relative underperformance is largely attributable to two major factors: First, the Fund was conservatively focused in 2008 during the market collapse, which helped its performance, and it remained so last year. For the fiscal year ended March 31, 2010, risky equities performed best. By and large, the worse companies performed in 2008, the better they performed the following year. As such, given the Fund's conservative stance, its performance was hurt. Second, we strategically hedged the Fund's currency exposure, and this, too, had a negative impact. Comparing the benchmark index in U.S. dollar (unhedged) terms to the benchmark in local currency (hedged proxy) terms equates to a discernible difference in the hedged index versus the non-hedged. Taken together, our relative performance was good, given the above conservative posture.

Reconfirming our strategic focus

As value investors we are appraisers of businesses. We value (appraise) a company and compare it to what it trades for in the public market. When we can buy at a significant discount to what we believe to be the company's intrinsic value, we do so if we believe that we are not accepting too much risk.

We believe that money remains on the sideline to invest. We believe that the economies of the world are likely to continue to improve, although perhaps slowly. The Fund's companies have improved earnings and balance sheets, and we are seeing increased dividends and share buyback activity as well as private market transactions.

Yet we worry, perhaps for no other reason than we saw opportunity everywhere a year ago and see so little now. As prices have recovered, they reflect the good news. So where do we go? We have several strategic focuses for the coming year. First, we are reappraising the Fund's companies to make sure valuations reflect current economic reality as opposed to the gloom of last year, which means our appraisals are generally moving up (typical in a recovery period). Second, we are working harder (and smarter) to find values. To date, we have had some success and we remain hopeful that we can remain fully invested. Third, we are reemphasizing our historic focus on understanding the nature of a company's business value growth, the likelihood of the valuation arbitrage closing and, if possible, identifying the particular catalyst to closing the gap between value and price. Finally, we continue to look for non-consensus ideas in all asset categories that have the potential to deliver solid returns with low risk, such as debt, TARP warrants and restructurings.

Our outlook

In the past year, we were exposed to various segments, but had high exposure to the financial (insurance, in particular) and telecommunications sectors. As global investors, our exposure to the United States increased, largely at the expense of Japan.

Over the next 12 months, we expect to focus on non-index oriented ideas and non-traditional, equity-type investments. The Fund's sector exposure is likely to remain focused on financials (largely insurance, but also increasing banking exposure), telecommunications, and oil and gas. Our exposure to the United States is likely to remain high and our exposure to Japan may increase slightly. We are looking for ideas outside of our traditional geographies and remain hopeful that this search pays off. As always, we will remain mindful of the downside and appropriate margins of safety.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Value stocks are stocks of companies that may have experienced adverse business or industry developments; or may be subject to special risks that have caused the stocks to be out of favor and, in the opinion of the Fund's manager, undervalued. The value of a security believed by the Fund's manager to be undervalued may never reach what the manager believes to be its full value, or such security's value may decrease.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The indexes noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Cundill Global Value Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Cundill Global Value Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

(2) Because the Fund commenced operations on a date other than at the end of a month, and partial month calculations of the performances of the indexes (including income) are not available, investment in the indexes was effected as of September 30, 2001.

Average Annual Total Return ⁽³⁾	Class A	Class B	Class C	Class E	Class I	Class Y	Advisor Class ⁽⁴⁾
1-year period ended 3-31-10	40.47%	43.51%	48.10%	40.82%	49.77%	50.14%	49.99%
5-year period ended 3-31-10	1.22%	1.33%	1.78%	—	—	2.95%	3.03%
10-year period ended 3-31-10	—	—	—	—	—	—	—
Since inception of Class ⁽⁵⁾ through 3-31-10	4.96%	5.97%	5.89%	-6.54%	-3.90%	7.73%	5.83%

(3) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(4) Advisor Class shares are no longer available for investment.

(5) 9-4-01 for Class A shares, 9-26-01 for Class B shares, 10-19-01 for Class C shares, 4-2-07 for Class E and Class I shares, 7-24-03 for Class Y shares and 4-19-00 for Advisor Class shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

Advisor Class**	\$1,000	\$1,019.01	1.19%	\$ 5.96

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

**Class closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Thomas A. Mengel

Below, Thomas Mengel, portfolio manager of the Ivy European Opportunities Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Mengel has 23 years of industry experience and became manager of the Fund in July 2009. The Fund previously was subadvised by Henderson Investment Management Ltd.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy European Opportunities Fund (Class A shares at net asset value)	44.42%
Benchmark(s) and/or Lipper Category	
MSCI Europe Index (generally reflects the performance of securities representing the European stock market)	56.11%
Lipper European Region Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	56.78%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A year of dramatic reversal

This fiscal year ended March 31, 2010, opened on a note of heightened anxiety, as the global financial system stood at the brink of collapse and the global economy threatened to slip into the greatest worldwide recession since the 1930s. But the tide began to turn shortly before our last report to you. Thanks to rapid and unprecedented intervention by governments in many developed and emerging markets, global stock markets began to anticipate recovery. As central banks in the United States and Europe (and elsewhere) launched into quantitative easing, the markets bid up assets, including gold, real estate and equities, and left the dollar behind. This provided a healthy backdrop for international equities.

The momentum continued largely unabated during the second and third quarters. Equity valuation spreads had widened to unprecedented levels at the beginning of the year. Value began to dramatically outperform growth and the dollar went into freefall against international currencies. Investors seemed to lose their fear of risk, to some degree, and began to move back into equities. Recovery continued into the final quarter of 2009, although the pace of recovery began to cool. The benefits stemming from the billions of dollars that were injected into the European economy via tax cuts and spending incentive programs continued as well, driving progress in nearly all sectors of the market.

European markets slowed precipitously during the first quarter of 2010 but remained positive in absolute terms. Economic development slowed during the quarter and delivered mixed signals. Concerns over sovereign credit risk driven by Greece and poor weather conditions also hampered progress. Spain, Italy and peripheral countries, including Ireland and Portugal,

are still struggling, which casts a shadow of doubt over European economic recovery. The United Kingdom remains vulnerable due to high deficits and the upcoming Parliamentary election, which could prove negative for the markets. Yet another hurdle for the United Kingdom is that credit remains fairly tight. Generally, banks in Europe know they have potentially more debt to write down, so they're keeping a tight fist on lending. However, Germany demonstrated growth in exports and France benefited from higher private consumption, so the picture was not entirely bleak.

Reallocation completed

We completed our efforts to reallocate the Fund during the latter half of its fiscal year. However, the Fund underperformed its benchmark index for the period. Sectors that contributed to absolute performance were energy and information technology. Overweight stakes in discretionary and consumer staples stocks also helped. The Fund's relative performance was particularly restrained by its financials holdings, an area in which the Fund was underweight its benchmark. In the first quarter of 2010, we increased our holdings in small- and mid-sized stocks.

Strategic repositioning accomplished, hedging deployed

Part of our strategy in restructuring the Fund after assuming management in July 2009 has been to position it more aggressively. During the first half of the period we adjusted holdings to make the portfolio more in line with its index. During the latter half of the year, we purchased more small- and mid-cap stocks, which now represent roughly 25 percent of Fund assets. The portfolio has a more growth-oriented portfolio now than it did a year ago. We continue to look for opportunities in this end of the capitalization range, with a goal of getting about one-half of the portfolio invested in small- to mid-cap companies. We also have, as a result of currency weakness, hedged part of the Fund's currency exposure. In geographical terms, we continue to overweight Germany and Switzerland, due to their positive economic outlook, and continue to underweight Italy and Spain, given the debt and economic challenges they are currently facing.

Likely better days ahead, but further recovery will happen slowly

We still see a mixed picture for many European economies. The sovereign debt crisis facing Greece creates a bit of a question mark for other European markets. The European region recently posted a positive gross domestic product number, but Greece continues to be a potential drag on other Euro countries. We expect that some other countries will begin to withdraw or pull back their fiscal stimulus, which could create some difficulties. That said, central banks are keeping rates low, and inflation remains benign, which is a positive sign. We don't believe we will see a deflationary environment develop. Private consumption remains weak across Europe because of unemployment, which we believe has not yet peaked. Due to the Greek turmoil and high budget deficits, we think it is likely that European currencies may remain under pressure for some time to come. We remain cautiously optimistic about the months ahead and we will continue to look for companies that are exposed to the emerging middle class.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. The value of the Fund's investments, as measured in U.S. dollars, may be unfavorably affected by changes in foreign currency exchange rates and exchange control regulations. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy European Opportunities Fund.

John C. Maxwell

Below, John C. Maxwell, CFA, portfolio manager of the Ivy International Balanced Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Maxwell has managed the Fund since April 15, 2009. He has 17 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy International Balanced Fund (Class A shares at net asset value)	42.40%
Benchmark(s) and/or Lipper Category	
MSCI AC World ex U.S.A. Index (generally reflects the performance of securities representing international stock markets)	60.93%
J.P. Morgan Non-U.S. Government Bond Index (generally reflects the performance of securities representing the international government bond market)	8.18%
Lipper Mixed-Asset Target Allocation Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	39.96%

Multiple indexes are presented because the Fund invests in multiple asset classes.

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Overall the biggest single driver of performance this year was our aggressive weighting of equities compared to fixed-income securities in the Fund. Throughout the year, fixed-income securities were weighted at the low end of their disclosed investment range (30 to 50 percent of the Fund's total assets may be invested in fixed-income securities), while equities were at the high end of their disclosed investment range (50 to 70 percent of the Fund's total assets may be invested in equities). Our reasoning for preferring equities to fixed income was twofold. First, we had a positive outlook for economic recovery, which normally favors stocks over bonds. Second, and probably more important, throughout the period equity yields (dividend, earnings or free cash flow) were at an historic discount to bonds and remain cheap today.

Within the equity side of the fund stock and sector selection were the largest contributors to our performance over the fiscal year ended March 31, 2010, a period in which the Fund was overweight in the cyclical industries and underweight in defensive ones. With the exception of consumer staples, the big defensive industries – utilities, integrated telecommunications services, pharmaceuticals and large integrated oil – all underperformed considerably, and the Fund was significantly underweight in that group. The cyclical industries where we were overweight and that made the strongest contribution to performance were oil services, information technology and consumer discretionary. Sectors that hurt our performance,

where we did not have enough exposure, were financials and materials, though our stock selection was generally good in these sectors.

Meanwhile, bond spreads over the past 12 months have tightened enormously to reflect the market's changing view on the economy. This has been good for bond prices in general, as it supports the belief that the huge government stimulus programs will drive economic growth and recovery. In other words, both bond and equity markets now seem to believe that the worst of the economic decline is well behind us.

Geography helped generate strong results

While we manage the Fund more around sectors than countries, our two big geography-specific calls during the fiscal year worked out well. For the first time in more than three years we made Australia an overweight due to relative economic prospects and reasonable prices. Subsequently, Australia paid off handsomely as it was the best-performing large country in the index. In addition, we remained underweight in Japan due to its poor economic prospects; this paid off as well, as Japan was the worst-performing large country in the index. Finally, given our heavy exposure to non-Treasury issuers, the Fund benefited significantly from our corporate bond exposure.

Elsewhere, cash, which represented about 3 percent of the Fund through the year, provided a headwind, with the market going up so much and the U.S. dollar weakening markedly versus the index basket of currencies. We typically hold our cash in U.S. dollars.

A strong rebound off a deep bottom

The 12-month period ended March 31, 2010, was very strong as equity investors decided that the world as we know it is not going to end. We were pleased that we were able to participate and offset the majority of the losses incurred in the previous year.

The Fund's fiscal year started in the middle of the steepest part of the market rebound. In April and May of 2009, the market rose dramatically as economic data was stabilizing in most parts of the world and rising in many emerging markets, particularly in Asia. Furthermore, we gained confidence that the global stimulus was going to avert a disaster. In these early months we owned solid companies that were oversold in the downturn. This period also represented the best part of the Fund's annual

performance relative to its benchmark. The Fund had a very strong value (as opposed to growth) orientation as we entered the fiscal year.

In May and early June of 2009 we sold some of our strong performers that recovered beyond our expectations and started to buy what we felt were more stable growers and defensive stocks that had lagged. The next leg of the market started in July as company earnings proved much better than expected. In general, companies acted quickly and decisively in the crisis to cut costs while maintaining surprising pricing discipline. At this time we decided late-cycle stocks with secular growth themes were a reasonable investment option and we reintroduced our theme of buying companies exposed to infrastructure spending.

The market reached levels around where we are today in late October of 2009. In November we saw the first concrete signs of tightening in Europe, the U.S. and China. In the developed world it was more about removing extraordinary measures that were no longer necessary, while in China it was more traditional tightening, such as increasing reserve requirements.

We started talking about Greece last December. For us, Greece is a proxy for all over-levered developed market countries that are doing a poor job of managing their budgets. Japan, the U.S. and the U.K. as well as other Eurozone countries fit this description. Given this, the financial strength of most developed markets – particularly after the last year and half – are at a point at which investors are asking if it is an appropriate risk/reward to lend them money and only receive a very minimal return. The inability for developed market countries to borrow at low rates is the biggest near-term risk we see in the system.

Our outlook

As we enter fiscal year 2011, we believe the Fund is positioned for a better-than-expected cyclical recovery. The changes to our top 10 holdings are representative of the increased cyclical exposure, although we also have the Fund positioned with a strong contingent of defensive stable stocks. In addition, our focus on cash generation and dividends across most of our names should provide a buffer should the market take a more negative tone. Today, our three major themes for investing are the strengthening emerging markets consumer, particularly in Asia, strong growth in infrastructure spending and high and believable dividends. Our ideal holding is one that is exposed to our themes, is experiencing strong cash generation, has a strong balance sheet and has good prospects for relative sales growth. We expect incremental purchases will be among growth stocks. With regard to positioning, we continue to run at low levels of cash and expect to have direct emerging markets exposure.

Looking ahead, we are optimistic about the prospects for stocks based on the belief that economic growth in developed markets likely will exceed expectations. In most emerging markets we believe expectations are already high, given the evidence of the last 12 months; we are in line with this assessment. We are also very encouraged by how well most companies have managed the downturn. We believe the cost disciplines shown in the

downturn will lead to strong profit leverage in the upturn. That said, we are not sounding the all-clear signal, recognizing that big risks remain.

Our largest concerns are that either sovereign debt costs will rise beyond government's capacity to pay; governments will remain too accommodative and create inflation or another bubble that will have to unravel; or, conversely, governments will remove stimulus or tighten too rapidly, causing a double dip from which a rebound at current leverage ratios would be protracted, to say the least. When considering the latter scenarios, we believe governments will tend to err on the side of inflation as it would be more challenging to dig out of a double-dip situation.

Given this view, and the fact that bond and equity markets have rallied strongly over the past year – and on a number of measures are in a state of overvaluation – we remain cautious. We continue to focus on finding what we feel are strong corporate bond issuers around the globe that should be able to weather a number of economic environments. We maintain a short duration on the Fund's bond holdings in order to have better visibility in these highly uncertain times.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy International Balanced Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy International Balanced Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E	Class I	Class Y
1-year period ended 3-31-10	34.21%	36.79%	41.42%	34.51%	43.15%	42.69%
5-year period ended 3-31-10	2.71%	2.71%	3.16%	—	—	4.05%
10-year period ended 3-31-10	5.18%	—	—	—	—	—
Since inception of Class ⁽³⁾ through 3-31-10	—	5.47%	5.74%	-4.33%	-1.78%	6.69%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) 12-8-03 for Class B, Class C and Class Y shares and 4-2-07 for Class E and Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus International Balanced Fund merged into the Ivy International Balanced Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus International Balanced Fund Class A shares, restated to reflect current sales charges applicable to Ivy International Balanced Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy International Balanced Fund. If these expenses were reflected, performance shown would differ.

ILLUSTRATION OF FUND EXPENSES

Ivy International Balanced Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,031.10	1.44%	\$ 7.31
Class B	\$1,000	\$1,025.30	2.43%	\$ 12.25

Class E	\$1,000	\$1,031.10	1.33%	\$ 6.70
Class I	\$1,000	\$1,032.50	0.98%	\$ 4.98
Class Y	\$1,000	\$1,031.80	1.25%	\$ 6.30
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,017.77	1.44%	\$ 7.26
Class B	\$1,000	\$1,012.80	2.43%	\$ 12.18
Class C	\$1,000	\$1,014.57	2.08%	\$ 10.48
Class E	\$1,000	\$1,018.30	1.33%	\$ 6.66
Class I	\$1,000	\$1,020.02	0.98%	\$ 4.95
Class Y	\$1,000	\$1,018.72	1.25%	\$ 6.26

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

The following forward foreign currency contracts were outstanding at March 31, 2010:

Type	Currency	Counterparty	Principal Amount of Contract (Denominated in Indicated Currency)	Settlement Date	Unrealized Appreciation	Unrealized Depreciation
Sell	Euro	Goldman Sachs International	37,000	5-10-10	\$ 538	\$ —

(A) Listed on an exchange outside the United States.

(B) Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$7,603 or 2.86% of net assets.

(C) No dividends were paid during the preceding 12 months.

(D) Principal amounts are denominated in the indicated foreign currency, where applicable (AUD – Australian Dollar, BRL – Brazilian Real, EUR – Euro, GBP – British Pound, KRW – South Korean Won, MXN – Mexican Peso, MYR – Malaysian Ringgit, NZD – New Zealand Dollar, PLN – Polish Zloty and SEK – Swedish Krona).

(E) Rate shown is the yield to maturity at March 31, 2010.

(F) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date the variable rate resets.

The following acronym is used throughout this schedule:

ADR = American Depositary Receipts

John C. Maxwell

Below, John C. Maxwell, CFA, portfolio manager of the Ivy International Core Equity Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Maxwell has managed and/or co-managed the Fund for four years and he has 17 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy International Core Equity Fund (Class A shares at net asset value)	56.68%
Benchmark(s) and/or Lipper Category	
MSCI EAFE Index (with net dividends) (generally reflects the performance of securities representing the international securities markets)	54.45%
Lipper International Large-Cap Core Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	51.20%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Stock and sector selection were the largest contributors to our performance over the fiscal year ended March 31, 2010, a period during which the Fund was overweight the cyclical industries and underweight defensive ones. With the exception of consumer staples, the big defensive industries all underperformed considerably. The Fund's relative performance was boosted by its significant underweight in two of these arenas – utilities and integrated oil. The cyclical industries where we were overweight and that made the strongest contribution to performance were oil services, information technology and consumer discretionary. Sectors that hurt our performance, where we did not have enough exposure, were financials and materials, though our stock selection within these sectors was generally good.

Geography helps generate strong results

While we manage the Fund more around sectors than countries, our two big geographically specific calls during the fiscal year worked out well. For the first time in more than three years, we made Australia an overweight due to relative economic prospects and reasonable prices. Subsequently, Australia paid off handsomely as it was the best-performing large country in the index. In addition, we remained underweight in Japan due to poor economic prospects; this paid off as well, as Japan was the worst-performing large country in the index. Finally, we had just a little more than 9 percent of the Fund in emerging markets throughout the period, an area where performance was a little disappointing.

Cash with the market going up so much and the U.S. dollar weakening markedly versus the index basket of currencies. We typically hold our cash in U.S. dollars.

A strong rebound off a deep bottom

The 12-month period ended March 31, 2010, was very strong as equity investors decided that the world as we know it is not going to end. As such, we were pleased that we were able to participate and offset the majority of the losses the Fund incurred in the previous year.

The fiscal year started in the middle of the steepest part of the market rebound. In the months of April and May 2009, the market rose dramatically as economic data was stabilizing in most parts of the world and rising in many emerging markets, particularly in Asia. Furthermore, we gained confidence that the global stimulus could avert an economic disaster. In these early months, we owned solid companies that got oversold in the downturn. This period also represented the best part of our annual performance relative to the benchmark. The Fund had a very strong value (as opposed to growth) orientation as we entered the fiscal year.

In May and early June of 2009 we sold some of our strong performers that recovered beyond our expectations and started to buy what we felt were more stable growers and defensive stocks that had lagged. The next leg of the market started in July when company earnings proved much better than expected. In general, companies acted quickly and decisively in the crisis to cut costs while maintaining surprising pricing discipline. At this time, we decided late-cycle stocks with secular growth themes were a reasonable investment option and we reintroduced our theme of buying companies exposed to infrastructure spending.

As early as late October 2009, the market reached levels around where they were at the end of the Fund's fiscal year. In November we saw the first concrete signs of tightening in Europe, the U.S. and China. In the developed world it was more about removing extraordinary measures that were no longer necessary, while in China it was more traditional tightening, such as increasing reserve requirements.

Greece's debt problems remain concerning. For us, Greece is a proxy for all over-levered developed-market countries that are doing a poor job of managing their budgets. Japan, the United States and the U.K., as well as other Eurozone countries, fit this description. Given this, the financial strength of most developed markets – particularly after the last year and half – are at a point where investors are asking if it is an appropriate risk/reward to

lend them money and only receive a very minimal return. The potential inability for developed market countries to borrow at low rates is the biggest near-term risk we see in the system.

Our outlook

As we enter the new fiscal year, we believe the Fund is positioned for a better-than-expected cyclical recovery. The changes to our top 10 holdings are representative of the increased cyclical exposure, although we also remain with a strong contingent of defensive stable stocks. In addition, our focus on cash generation and dividends across all our names is designed to provide a buffer should the market take a more negative tone. Today, our three major themes are the strengthening emerging markets consumer, particularly in Asia; strong growth in infrastructure spending; and high and believable dividends. Our ideal holding is one that is exposed to our themes, is experiencing strong cash generation, has a strong balance sheet and has good prospects for relative sales growth. With regard to positioning, we continue to run at low levels of cash and expect to have about 15 percent of the Fund's assets invested in emerging markets.

Looking ahead, we are optimistic about the prospects for stocks based on the belief that economic growth in developed markets likely will exceed expectations. In most emerging markets, we believe expectations are already high, given the evidence of the last 12 months. We are very encouraged by how well most companies have managed the downturn. We believe the cost disciplines shown in the downturn will lead to strong profit leverage in the upturn. That said, we are not sounding the all-clear signal, recognizing that big risks remain.

Our largest concerns are that either sovereign debt costs rise beyond government's capacity to pay; governments remain too accommodative and create inflation or another bubble that will have to unravel; or, conversely, governments remove stimulus or tighten too rapidly, causing a double dip from which a rebound at current leverage ratios would be protracted, to say the least. When considering the latter scenarios, we believe governments will tend to err on the side of inflation as it would be more challenging to dig out of a double-dip situation.

We are monitoring spreads, willingness of banks to lend, money flows and how stimuli-supported parts of the global market are performing as the stimulus is removed. Obviously, based on the Greek discussion above, we want to see stable-to-improving sovereign spreads. We are looking for signs that banks, particularly in the developed world, are willing to take more risk and extend credit. We also are watching money flows to see where the next bubble might occur. Finally, we are monitoring areas such as automobile and home purchases to see if they continue to improve when stimulus measures are removed.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. Investing in emerging markets may accentuate these risks. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy International Core Equity Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy International Core Equity Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E	Class I	Class Y
1-year period ended 3-31-10	47.67%	51.20%	55.61%	47.67%	57.44%	57.10%
5-year period ended 3-31-10	7.76%	7.97%	8.28%	—	—	9.23%
10-year period ended 3-31-10	3.96%	3.49%	3.56%	—	—	—
Since inception of Class ⁽³⁾ through 3-31-10	—	—	—	-3.21%	-0.56%	12.65%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) 4-2-07 for Class E and Class I shares and 7-24-03 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

ILLUSTRATION OF FUND EXPENSES

Ivy International Core Equity Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,040.10	1.52%	\$ 7.75
Class B	\$1,000	\$1,035.10	2.42%	\$12.31

Class I	\$1,000	\$1,041.60	1.11%	\$ 5.61
Class Y	\$1,000	\$1,040.50	1.36%	\$ 6.94
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,017.35	1.52%	\$ 7.67
Class B	\$1,000	\$1,012.88	2.42%	\$12.18
Class C	\$1,000	\$1,014.21	2.15%	\$10.78
Class E	\$1,000	\$1,017.29	1.53%	\$ 7.67
Class I	\$1,000	\$1,019.40	1.11%	\$ 5.55
Class Y	\$1,000	\$1,018.15	1.36%	\$ 6.86

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Chace Brundige

Below, Chace Brundige, CFA, portfolio manager of the Ivy International Growth Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Brundige has managed the Fund for one year and he has 16 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy International Growth Fund (Class A shares at net asset value)	47.70%
Benchmark(s) and/or Lipper Category	
MSCI EAFE Growth Index (generally reflects the performance of securities representing international growth securities markets)	50.60%
Lipper International Large-Cap Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	53.41%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

A strong rebound off a deep bottom

The fiscal year ended March 31, 2010, was a period in which global markets performed strongly as global economic recovery gained traction. As the U.S. launched into quantitative easing and China's rapid loan growth materialized, markets correctly bid up assets – gold, real estate and equities – and left the U.S. dollar in the dust. All of this provided a strong environment for international equities for the year.

This positive momentum continued largely unabated throughout the second and third quarters. Equity valuation spreads had widened to unprecedented levels at the beginning of the year. Value investments began to dramatically outperform their growth counterparts and the dollar continued to weaken against international currencies as investors moved away from safety and increasingly used it as a source of funds. Credit spreads that had been so wide tightened dramatically, causing the credit window to open once again (at least for large corporations). European and Japanese banks began to recapitalize and leveraged companies of all kinds began to refinance.

In November, we saw the first concrete signs of tightening in Europe, the U.S. and China. In the developed world it was more about removing extraordinary measures that no longer were necessary, while in China it was more traditional tightening, such as increasing reserve requirements. Global gross domestic product growth has rebounded, led by China and other emerging economies, while many in the west face a tepid rebound. As calendar-year 2009 wound to a close, momentum slowed perceptibly, and the U.S. dollar began to strengthen versus the index basket of international currencies, breaking a six-month trend of significant weakening. In general, the

availability and cost of money continued to improve globally, although credit availability to consumers and small businesses remains tight in most developed markets.

Factors impacting performance

Sector returns for the Fund's fiscal year were fairly balanced, with both stable and cyclical sectors among the outperformers. Consumer discretionary emerged as the Fund's strongest source of absolute performance. Outstanding stock selection in this arena more than compensated for the Fund's relative underweight exposure. Energy holdings also added significantly to performance. The Fund's better stock selection drove results that were more than double that of the index in that sector. Materials holdings were also helpful throughout most of the Fund's fiscal year; however, the Fund's significant underweight in this arena dampened relative results. While we have identified attractive portfolio candidates within the materials space, we have not forced a particular sector weighting into the Fund as our process is generally focused on finding companies that fit our investment criteria, rather than making broad sector bets.

Positioning for 2010

We made some changes in late 2009 to position the Fund for a different market in 2010. We increased our exposure to Japan and have focused on export-driven companies that we feel are competitively positioned. Currencies are always difficult to call. From our vantage point, the risk to the yen versus the U.S. dollar is solidly skewed to the downside, so we entered 2010 having hedged our entire yen exposure. The Fund's cyclical exposure has been focused in information technology and energy – companies we purchased on their own merits as opposed to a sector or industry call – but we feel information technology will benefit as companies generally focus capital expenditure budgets on driving efficiencies and cost saving versus increasing production. We believe that our oil services positions could benefit from a global recovery and we prefer that commodity to others based on secular consumer demand in emerging economies as well as a relatively unresponsive global supply. Our concern regarding the materials sector, generally speaking, is that much near-term demand has been generated through stimulus policy decisions in China combined with a focused inventory build ahead of the use of those materials at prices that were considered attractive. Therefore, we feel that the demand outlook, while solid, could be bumpy throughout the rest of 2010.

A halting recovery, significant headwinds

We see a lot of positives and negatives playing tug-of-war in the equity markets. We think that unprecedented corporate cuts in fixed expenses and capital spending have generally prepared companies for strong margin expansion in the recovery. Earnings estimates that came down so sharply since late 2007 appear to have bottomed and may be on their way back up. We believe stocks have anticipated this, but strengthening economic growth could drive marked positive earnings estimate revisions – a clear positive for the market. As the credit crunch in developed markets caused companies to cut expenses and conserve working capital, inventories broadly drew down to very low levels. We're now seeing the expected inventory restocking. Continued improvement in final demand could accentuate this inventory effect. While we often hear anecdotes of companies and supply chains having learned to exist with lower inventories, we believe that any hint of shortages would quickly result in a snapback. This will probably occur in certain industries and geographies.

The elephant in the room is that developed economies will eventually be forced to increase taxes and cut spending. Budget deficits cannot perpetually expand, and without a strong multi-year recovery, this mess won't be outgrown. China injected \$1 trillion into its economy in the first half of 2009 through a policy-driven increase in bank lending. This had an immediate and positive effect on the economy and more directly on asset prices. We think a good chunk of that is likely yet to be deployed into the real economy through infrastructure projects. However, loan growth has slowed and we believe will continue at a slower rate. Also, the dramatic effect on the property market has caused the government to tighten real estate policies somewhat in an effort to avoid a bubble. As non-traditional monetary measures are unwound, short-term rates are increased and stimulus spending growth fades, we believe the effects will weigh on equity markets.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy International Growth Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy International Growth Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E ⁽³⁾	Class I	Class Y
1-year period ended 3-31-10	39.20%	42.03%	46.15%	39.59%	48.28%	47.95%
5-year period ended 3-31-10	4.30%	4.23%	4.49%	—	—	5.61%
10-year period ended 3-31-10	-0.78%	-1.28%	-1.22%	—	—	—
Since inception of Class ⁽⁴⁾ through 3-31-10	—	—	—	-6.57%	-4.29%	8.24%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) Class E shares are not currently available for investment.

(4) 4-2-07 for Class E and Class I shares and 7-24-03 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

Class I	\$1,000	\$1,062.60	1.15%	\$ 5.88
Class Y	\$1,000	\$1,061.20	1.42%	\$ 7.32
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,017.33	1.52%	\$ 7.67
Class B	\$1,000	\$1,012.19	2.56%	\$ 12.78
Class C	\$1,000	\$1,012.53	2.49%	\$ 12.48
Class E**	\$1,000	\$1,018.73	1.24%	\$ 6.26
Class I	\$1,000	\$1,019.20	1.15%	\$ 5.75
Class Y	\$1,000	\$1,017.85	1.42%	\$ 7.16

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

**Class closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Frederick Jiang

Below, Frederick Jiang, CFA, portfolio manager of the Ivy Pacific Opportunities Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Jiang has managed the Fund for six years and has 15 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Pacific Opportunities Fund (Class A shares at net asset value)	67.50%
Benchmark(s) and/or Lipper Category	
MSCI AC Asia ex Japan Index (generally reflects the performance of stocks that represent Asian stocks outside Japan)	73.68%
Lipper Pacific Ex Japan Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	75.60%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Economic recovery fueled stock market gains

The fiscal year ended March 31, 2010, was a positive one for the Asia Pacific ex-Japan market, while stocks rose substantially as the global economy continued to recover from deep recession. The Asian economy experienced a V-shaped recovery, fueled by robust domestic demand in China and India. China's gross domestic product grew by 8.7 percent during calendar year 2009, far outpacing investor expectations at the beginning of the year, thanks to unprecedented intervention by the Chinese government, which implemented a 4 trillion renminbi (\$586 billion) stimulus package.

Accommodative policy, increasing appetite for risk

Monetary and fiscal policies in Asian countries remained accommodative during the period, providing abundant liquidity to the biggest market rally in the decade. As the United States launched into quantitative easing and China's rapid loan growth materialized, markets began to correctly bid up assets – gold, real estate and equities – sending the dollar into a free fall against many foreign currencies, a trend that persisted throughout most of calendar year 2009. Risk appetite was high and emerging market equities were favored during the period, as they were less leveraged and cheaper in valuation when compared to their developed-market peers. While demand from emerging economies remained robust, western economies, including the United States and Europe, shows solid signs of recovery, helping Asian countries – particularly South Korea, Taiwan and Singapore – record a strong rebound in export orders. Taiwan and China were the best-performing major markets in Asia during the final quarter of 2009. The Taiwan market did well due to accelerated technology spending by companies and consumers globally, after a sharp decline during the financial

crisis. As 2009 wound to a close, China and Taiwan signed a Memorandum of Understanding to cooperate and open up financial sectors on both sides, which drove the markets even higher. At the same time, India, suffering from its worst drought since 1972, saw double-digit food inflation. Those troubles, combined with less-than-expected loan growth, restrained the Indian market. Nonetheless, international equity funds, and emerging market funds in particular, experienced large cash inflows.

A different first quarter

Conditions changed precipitously in early 2010. The markets rallied the first two weeks of the year on confidence in the global economic recovery, but earlier-than-expected monetary policy tightening in China and escalating concerns about the debt problems facing Greece sent the Asia equity index down by almost 14 percent from mid January to mid February. However, the market rebounded in the second half of the quarter as the United States and China continued to churn out good numbers. We also saw a bit of reversal in investor sentiment. In Asia, the Greater China markets that had been the best-performing markets in late 2009, became the worst performers in the first quarter of 2010. Although the Fund's overweight in China contributed to absolute performance, the overweight caused the Fund to underperform its index and peers. Developing economies continued to perform strongly. Indonesia, Thailand, India and South Korea performed well, and Malaysia also performed strongly after lagging in 2009. Industrial production in India and bank loan growth came in higher than expected and food prices stabilized, while corporate earnings forecasts in South Korea were revised up as global demand for technology products grew.

Cash position dragged performance relative to benchmark

The Ivy Pacific Opportunities Fund held a larger-than-normal amount of cash during the fiscal year. We had large inflows relative to the size of the Fund, and we were skeptical about the sustainability of the recovery in highly indebted economies and we were not aggressive enough to chase the rally. This high cash position was the main driver of the Fund's underperformance relative to its benchmark index. Excluding cash, the Fund actually outpaced the benchmark index nicely. When the market rallies as it did during the fiscal year, even a small cash position can reduce relative performance by a meaningful margin.

The Fund's currency allocation was another factor driving relative underperformance. The Fund was overweight in China and Hong Kong, both of which trade in a currency that is pegged to the U.S. dollar. In contrast, other Asian currencies rallied against the U.S. dollar, including the India rupee, the Korean won and the Taiwan dollar. The Fund was underweight in these countries, a posture that ultimately restrained relative and absolute performance. Lastly, our stock selections in India and South Korea underperformed their local benchmark, which also contributed negatively to the Fund's relative performance.

Stock and country selection helped absolute performance

Overall, the Fund's country allocation and individual security selection worked well in absolute terms. The Fund's underweight exposure to both South Korea and Taiwan contributed significantly to absolute returns. Security selection in China, Hong Kong and Singapore also played out very favorably. True to our strategy, the Fund held substantial positions in companies that we believe are positioned to benefit from rising consumption in the Asian region. We believe that the rapidly expanding middle class in Asia will generate huge demand for products that fit local markets well. Hyundai Motor Company, for instance, as a low-cost maker of high-quality cars, enjoys the largest market share in India and is a major player in the world's largest car market, China. Tencent Holdings Limited, a major Internet instant-messaging company in China, has a user base of more than 200 million and yet still enjoys double-digit annualized revenue growth on a quarterly basis. Share prices of Hyundai Motor Company and Tencent Holdings Limited more than doubled during the period and rewarded the Fund handsomely.

Smaller markets were overlooked

The Fund's relative underweight positions in smaller markets such as Indonesia, Thailand, the Philippines and India all contributed meaningfully to absolute returns. These markets historically have been subject to more political, inflation and currency risks, and have been more volatile and riskier than the regional markets as a whole. However, they all did exceptionally well during the period. Stocks that restrained performance during the period included online gaming company Shanda Games Limited. That company's new game did not perform as well as expected and the firm also suffered from departures of a few senior executives. Those two factors drove the firm's share price down significantly, which detracted from the Fund's performance.

Continued focus on household income and consumption growth in Asia

The Fund was constructed with a focus on growing household income and consumption across Asia. This theme remains in place. However, we did trim the Fund's stake in real estate developers in China and Singapore because we believed property prices might be rising ahead of fundamentals. At the same time, we increased the Fund's exposure to Asian financial stocks. The emerging middle class in Asia has increased demand

for financial services as they generate higher incomes. We also increased the Fund's weighting in the energy sector, particularly among coal mining firms. Demand for energy can only increase as the Asian economies expand an average of 6 to 7 percent per year. We believe that the price of coal is likely to move higher in coming years.

The future looks bright

We believe that the continuing urbanization trend and excellent demography will continue to strongly drive the Asian economy in the next decade. As more Asian households become middle class consumers, consumption and infrastructure build-out themes bode well, in our view, for opportunistic investing. In the short term, we are cognizant of the current risks facing the market, including changing government policy in China, inflation risk in India and Indonesia, and political risk in Thailand and North Korea. However, we do not agree with the assertion of some "new China experts" that China is a huge bubble that will soon burst. We do see some problems in the Chinese property market and high local government borrowings, but we believe that these problems are confined and controllable. Compared to developed Western markets, we think Asia will continue to benefit from a high savings rate and relatively low levels of consumer, corporate and government debt.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. The value of the Fund's investments, as measured in U.S. dollars, may be unfavorably affected by changes in foreign currency exchange rates and exchange control regulations. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Pacific Opportunities Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Pacific Opportunities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E ⁽³⁾	Class I	Class Y	Advisor Class ⁽³⁾
1-year period ended 3-31-10	57.86%	61.65%	66.42%	58.64%	68.44%	67.93%	68.52%
5-year period ended 3-31-10	13.09%	13.12%	13.58%	—	—	14.77%	15.12%
10-year period ended 3-31-10	7.61%	7.01%	7.31%	—	—	—	8.41%
Since inception of Class ⁽⁴⁾ through 3-31-10	—	—	—	3.89%	6.14%	18.43%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) Class E shares are not currently available for investment. Advisor Class shares are no longer available for investment.

(4) 4-2-07 for Class E and Class I shares and 7-24-03 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

**Class closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

The following forward foreign currency contracts were outstanding at March 31, 2010:

Type	Currency	Counterparty	Principal Amount of Contract (Denominated in Indicated Currency)	Settlement Date	Unrealized Appreciation	Unrealized Depreciation
Sell	Japanese Yen	Deutsche Bank AG	6,470,000	4–21–10	\$ 1,751	\$ —

(A)No dividends were paid during the preceding 12 months.

(B>Listed on an exchange outside the United States.

(C)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$56,803 or 8.37% of net assets.

(D)Illiquid restricted security. At March 31, 2010, the following restricted security was owned:

Security	Acquisition Date(s)	Shares	Cost	Market Value
Vietnam Azalea Fund Limited	6–14–07 to 1–28–09	500	\$ 3,304	\$ 2,355

The total value of this security represented approximately 0.35% of net assets at March 31, 2010.

(E)Deemed to be an affiliate due to the Fund owning at least 5% of the voting securities. The Fund and other mutual funds managed by its investment manager, Ivy Investment Management Company, or other related parties together own 30% of the outstanding shares of this security at March 31, 2010.

(F)Rate shown is the yield to maturity at March 31, 2010.

(G)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date the variable rate resets.

Cynthia P. Prince-Fox

Below, Cynthia P. Prince-Fox, portfolio manager of the Ivy Balanced Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. She has managed the Fund for six years and has 27 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Balanced Fund (Class A shares at net asset value)	30.35%
--	---------------

Benchmark(s) and/or Lipper Category

S&P 500 Index (generally reflects the performance of large- and medium-sized U.S. stocks)	49.78%
---	---------------

Citigroup Treasury/Govt Sponsored/Credit Index (generally reflects the performance of securities in the bond market)	7.28%
--	--------------

Lipper Mixed-Asset Target Allocation Growth Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	39.96%
---	---------------

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees. Multiple indexes are presented because the Fund invests in multiple asset classes.

The Fund underperformed for the fiscal year ended March 31, 2010, primarily due to stock selection versus sector selection. Some of this can be explained by lower-quality stocks outperforming higher-quality stocks. We have traditionally positioned the portfolio in higher-quality stocks over the long term. Additionally, we were overweight in traditional defensive sectors such as consumer staples and health care. These holdings served us well during the financial crisis, but substantially lagged the rebound in sectors that had been hit the hardest. Within our fixed-income holdings, we were primarily in government treasuries and higher-rated corporate bonds, both of which underperformed lower-rated bonds for most of the year. Lastly, we did carry cash early in the year, which was a drag on performance when the markets started to rebound off the March 2009 bottom. As we put our cash to work, we remained focused on companies that we felt were well positioned to weather further economic fallout in the event that credit availability remained challenged.

Technology and consumer discretionary sectors lead the way

Our top contributors (on an absolute basis) were in the technology sector, which was the Fund's best performing sector during the year. The second-best sector was consumer discretionary, where cosmetics leader The Estee Lauder Companies Inc. was a top contributor to performance as the company cut costs under new leadership and appears set to benefit from recent signs of an improving operating environment in key areas such as travel retail, emerging markets and

restocking of department store inventories in the United States. Another holding that had a positive overall impact on performance was Ford Motor Company. In some ways Ford Motor Company is symbolic of what corporate America has been dealing with over the past several years: They came into this downturn with a heavily leveraged balance sheet, only to watch the annualized selling rate of automobiles collapse. However, in the same year we witnessed the near collapse of General Motors Corporation and Chrysler Group LLC, Ford Motor Company turned in a profit for the third quarter of 2009, gained market share and had a marked increase in sales in the final month of the year. They were able to produce these results because of aggressive moves to refocus the company to be a world competitor. This will be critical in the globalization race, as China surpassed the U.S. as the largest car market in the world in 2009.

The biggest detractors to performance were in financials and utilities. The financial group rallied significantly off the March 2009 lows, turning in double-digit gains in both the second and third quarter of 2009. Some of the Fund's larger positions in the trust banks and insurance stocks lagged the initial rally in March, primarily because they had held up well during the crisis. As we began 2009, our interest was in owning the financial institutions that we believed would be the survivors, and that remains our focus as we head into 2010. In utilities, the Fund's largest holding in that sector, Exelon Corporation, was hit by lower power prices and volumes. We maintain our position, however, as the company looks to have the most leverage to a power price recovery and should also benefit from passage of federal climate change regulation.

We made a number of changes to our individual holdings in both the equity and bond portfolios. However, for the majority of the year, allocation remained substantially the same. We maintained a minimum weight of 25 percent in fixed-income securities. Current areas of emphasis remain in industrials, consumer discretionary, technology and financials. The industrial sector represents one of the Fund's largest overweight positions and we think stands to benefit from a global recovery as many of the Fund's holdings appear to be at a competitive advantage to their global counterparts based on certain raw material inputs. Strong performance by the Fund's discretionary holdings seems to indicate an easing of fear regarding the consumer as evidence mounts that consumers are shopping and taking vacations. Rising demand, coupled with strong financial

discipline, should result in a robust environment for earnings as we move through the year. Detractors from performance were in energy and technology. We increased the Fund's weight in technology as fundamentals appear to be improving and we believe information technology spending generally should improve with better corporate profit growth. Key underweighted areas include health care and telecommunications service. The latter is seeing improved demand for their services, but faces higher capital intensity over the next year to build out a more robust wireless network to support growing data demand. To this end, we have chosen to own the companies that supply the equipment.

Knocking down the "wall of worry"

While we have been climbing a wall of worry in the financial markets, the wall of uncommitted cash that corporations, individuals and institutions have on their balance sheets signifies to us that we still have firepower on the sidelines that can be put to work as confidence increases. The bond market has been the recipient of some of this cash as there have been massive inflows into the fixed-income markets over the past five quarters. We would expect some of the cash to find its way into equities, providing further support to the rally. Given this and further evidence that this economy is building on itself have kept us focused on owning companies that we feel will benefit from a cyclical recovery that appears to still be in the early stages.

Given the rally in equity markets in 2009, we expect returns to be more muted in 2010 as countries and economies continue to work through the lasting effects of the global financial crisis. While uncertainties remain, we do not think that improved sentiment is the only driving factor behind the current rebound. We have seen corporate earnings improve on the back of cost-cutting efforts across numerous industries. This should open the door for powerful earnings growth when top-line sales recover. We will continue to position the Fund to take advantage of this potential.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Balanced Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Balanced Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E ⁽³⁾	Class I	Class Y
1-year period ended 3-31-10	22.85%	25.26%	29.59%	23.14%	30.93%	30.51%
5-year period ended 3-31-10	4.16%	4.25%	4.64%	—	—	5.53%
10-year period ended 3-31-10	0.29%	—	—	—	—	—
Since inception of Class ⁽⁴⁾ through 3-31-10	—	4.77%	4.96%	1.48%	3.64%	5.91%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) Class E shares are not currently available for investment.

(4) 12-8-03 for Class B, Class C and Class Y shares and 4-2-07 for Class E and Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Spectrum Fund merged into the Ivy Balanced Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Spectrum Fund Class A shares, restated to reflect current sales charges applicable to Ivy Balanced Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Balanced Fund. If these expenses were reflected, performance shown would differ.

ILLUSTRATION OF FUND EXPENSES

Ivy Balanced Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,096.20	1.33%	\$ 7.02
Class B	\$1,000	\$1,091.50	2.14%	\$ 11.19
Class C	\$1,000	\$1,092.50	1.96%	\$ 10.25
Class E**	\$1,000	\$1,097.50	1.11%	\$ 5.77
Class I	\$1,000	\$1,097.50	1.00%	\$ 5.24
Class Y	\$1,000	\$1,096.90	1.24%	\$ 6.50
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,018.28	1.33%	\$ 6.76
Class B	\$1,000	\$1,014.24	2.14%	\$ 10.78
Class C	\$1,000	\$1,015.15	1.96%	\$ 9.87
Class E**	\$1,000	\$1,019.39	1.11%	\$ 5.55
Class I	\$1,000	\$1,019.94	1.00%	\$ 5.05
Class Y	\$1,000	\$1,018.76	1.24%	\$ 6.26

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

**Class closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

*Not shown due to rounding.

(A)No dividends were paid during the preceding 12 months.

(B)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010.

(C)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$4,677 or 2.73% of net assets.

(D)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be illiquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$201 or 0.12% of net assets.

(E)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date that the variable rate resets.

The following acronyms are used throughout this schedule:

CMO = Collateralized Mortgage Obligation

REMIC = Real Estate Mortgage Investment Conduit

Industry classifications are unaudited.

Frederick Sturm

Ivy Global Natural Resources Fund is subadvised by Mackenzie Financial Corp. of Canada.

Below, Frederick Sturm, CFA, portfolio manager of the Ivy Global Natural Resources Fund, discusses positioning, performance and results for the fiscal year ended March 31, 2010. He has managed the Fund since its inception 13 years ago and has 28 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Global Natural Resources Fund (Class A shares at net asset value)	67.87%
Benchmark(s)/Lipper Category	
Morgan Stanley Commodity Related Index (generally representative of an unmanaged group of natural resources stocks)	67.19%
Lipper Global Natural Resources Funds Universe Average (generally representative of the performance of funds with similar investment objectives)	53.61%

Please note that the Fund returns include applicable investment fees and expenses, whereas the index returns do not include any such fees.

Inflation is triumphing over deflation

Congratulations to Central banks, which we believe have succeeded in moving markets past the deflation/inflation inflection point. We share the view that stubborn unemployment pressures and unresolved debt issues will make it politically more difficult for central banks to slam on the breaks again, than letting a firming economy raise product prices. The process of gradually normalizing monetary policy and government spending will no doubt cause occasional jitters, and cause investors to cycle between “risk on” and “risk off.” We believed a more hopeful outlook for the U.S. economy, Chinese tightening measures and declining natural gas prices caused markets to rotate away from global resources sectors and into consumer, banking and technology. Given the strong recovery from the lows last year, we consider this a positive consolidation for resources and a hopeful base to sponsor further gains by the end of the year.

Moving from macro to micro

Our commentary over the past few months has highlighted that 2010 would be a transition year from government and central bank policy push to consumer and business spending pull. We also suggested that transitions by their nature have bumps along the way, but these bumps should be more speed reducing than trip ending. The road in the first few months of 2010 has continued bumpy with headline risk in Greece, posturing by more central banks about gradual normalization and continued bickering in Washington. We still maintain that road repair is progressing better than is visible to the average investor, and we remain hopeful that renewed job growth will provide the basis for continued, even if gradual, economic improvement.

During the period we spent time in Brazil, Saudi Arabia and the UAE, and at a series of conferences in order to meet with energy and mining companies. The purpose of the Middle East travel was to meet with companies and government officials to monitor the speed of potential production increases versus the speed of growth in internal demand. Consider the circumstance in Saudi Arabia. This country of close to 28 million people of which 5 million are resident foreigners, is a very young country by population mix and is growing at 3.5 to 4 percent per year based on population alone. Add in industrialization and lifestyle enhancing consumption, and the demand for electricity is projected to grow close to 6 percent for the foreseeable future or by roughly 75 percent over the next 10 years. In addition, the leadership of the Kingdom well recognizes the long-term benefits of diversifying its productive base by investing in the education of its people. The new Princess Nora University under construction for some 40,000 students is an impressive undertaking and is amongst the largest single construction sites in the world, spanning 8 square kilometers with cranes as far as the eye can see. Rather than take all the profits from selling oil, to drill more wells to supply foreigners with yet more oil, Saudi leadership is logically seeking to balance the allocation of capital to a number of worthy projects. Saudi Arabia is said to have the fourth-largest reserves of natural gas. Yet a number of indicators point to growing concern that while new production has been allocated for electricity generation over the next two years, beyond that electricity producers could be “on allocation.” The Saudis have gone to great length to be counted on as a reliable partner and supplier and they deserve due credit for this. But this should not simply be taken for granted. The production for internal consumption needs rather than for seaborne trade availability is one of the themes we expect will become more prominent in a number of commodities over the next few years.

Looking east

China’s contribution to global economic recovery should also be honorably recognized. However, the growth in its domestic economy is not without its challenges. A harsh winter with snowfall interrupting coal supply chains is now yielding to low rains that are denying hydro dams the ability to produce electricity at normal capacity. There are still ample coal reserves in the world, but that the seaborne coal trade tightness is pushing prices up so quickly gives evidence that the world has underestimated go-forward demands and underinvested in the required infrastructure. Metallurgical coal for making steel has

been particularly tight as China seeks to import more than it did at the prior cycle peak in order to keep up with steel making demand. Metallurgical coal prices were increased by 55 percent this quarter and are moving higher again as buyers finding themselves “on allocation” scurry to secure the extra they require. Fifteen years ago we clearly described a potential multi-decade cycle of growing emerging market demand but the progression is still impressive to witness. A short five years ago China was a structural exporter of coal to the world. This quarter, the top holding in the Fund is Alpha Natural Resources Inc. (“Alpha”), a U.S. coal producer exporting to China’s demand. Alpha’s share price continues to outperform the market.

Potential implications of changes in bulk goods pricing

One of the most dramatic developments during the year occurred in the first quarter of 2010 – the insistence by suppliers of bulk materials, namely iron ore and coal, to end the practice of signing annual contracts. Unlike other commodities that trade mostly on near-term spot prices, bulks were historically settled based on an annual contract. However, during this past downturn, buyers felt empowered to refuse to take delivery despite the contracts. The Fund was already positioned for stronger bulks pricing with Alpha and Mitsubishi Corporation as good examples. The contract developments suggested that the outperformance could extend into another leg. In anticipation of iron ore prices advancing an impressive 75 to 100 percent, we added back some exposure that we reduced last year, this time preferring Rio Tinto plc for valuation reasons. We continued to add to Asian-based coal producers. Somewhat more controversial would be the Fund increasing copper exposure during the pullback in February. Restocking has helped push copper prices up more than 150 percent from the low in December 2008. Inventories are sufficient to argue that the price could be ahead of itself and may not have exciting upside from here. Given a lack of meaningful new mine development, it is not clear that copper cannot advance to record highs once the developed economies strengthen. We are not counting on this as our investment case rests more on the sheer wealth creation over time that copper prices near these levels may deliver.

Opportunities in natural gas

We have stayed underweight, but not completely out of natural gas stocks. Having any exposure to this sector detracted from results for investors during the latter part of the Fund’s fiscal year. The spread between oil and gas prices should narrow but oil is now almost purely a transportation and chemicals fuel, whereas natural gas is a heating and electricity fuel. Today there are fewer substitution opportunities than in the past, which is why the spread will only gradually narrow. New lands targeting horizontal drilling require an initial round of drilling to secure the lease. This has maintained drilling rates and production at higher levels than the market expected. Now the market seems determined to impose a more substantive industry response by pushing prices to punishing levels. We are not yet substantively buying the dip. The decline in natural gas prices was also

partially responsible for investors becoming more cautious about renewable energy. The Fund did well to focus on the most competitive Chinese suppliers, but all solar producers came under pressure. We are often asked about the future of nuclear power. Great idea, but we see it as more of a second half of decade focus.

The outlook for commodities

Our base case expectation of continued, even if gradual, growth in global economic activity suggests the supply/demand outlook for almost all commodities should improve into 2011. Declining inventories alone are bullish for resource investors. However, the speed of recovery and the potential push to new highs will reflect the tightness of global supply and the specific relevance to resumed demand from emerging markets. This is consistent with our “not all bad, nor all good” general outlook. It also suggests maintaining core weightings in the sectors delivering leadership rather than rushing too quickly to rotate into the laggard sectors. Fertilizers have seen the lows but we see them in more of a gradual uptrend than a spike reversal, so we approach this sector as a trade around core positions based on valuations. Before the current multi-year trade in commodities is over, we should see the lesser commodities get tight too. Zinc is not exciting today, so no major mining companies want to make major investments in new mines. Unless this changes, we believe zinc supply will decline by 15 percent over the next four to five years as old mines close.

Looking ahead

Most investors are still reflecting on 2009 in light of the 2008 aftershocks, and are fussing about what the next quarter will bring. Very few have peered into 2011, and if they do, it is with the expectation that investors will run into a wall of persistent damaging interest rate hikes. These reasonable concerns are helping to keep valuations in check. The February sell-off was a good example of momentum traders selling into presumed second derivative peaks based on the beginning of Chinese policy tightening. We understand that trading rhythm, remain prepared to deploy derivatives to help manage volatility, and suspect that a further advance into late spring/early summer would have us defer additional purchases and take another close look at pullback risks. But we also want to be careful not to lose our positions on the first solid recovery bounce in resources. Until we get closer to a business cycle peak, we believe investors should keep looking to buy dips rather than be anxious to cash in on each short-term peak.

Investing takes time to compound. If you can commit to a reasonable time horizon, then we still keep emphasizing the importance of turning off the squawk box and imagine yourself in 2015 looking back. We have begun a new bull market in stocks, in the economy and a stealth bullish turn in inflation. In that context equities appear fairly valued with upside potential, and corporate bond markets should outperform government bonds which look overpriced. Stealth markets are tricky, because they mask themselves by never offering up much convincing

while they march along. So we end up not noticing until they go off to new highs, and then participating only when markets are obviously advancing beyond. This appears to be how the resources market is progressing.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investing in companies involved in one specified sector may be more risky and volatile than an investment with greater diversification. International investing involves additional risks, including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations. Investing in natural resources can be riskier than other types of investment activities because of a range of factors, including price fluctuation caused by real and perceived inflationary trends and political developments; and the cost assumed by natural resource companies in complying with environmental and safety regulations. Investing in physical commodities, such as gold, exposes the Fund to other risk considerations such as potentially severe price fluctuations over short periods of time. The Fund may use short selling or derivatives to hedge various instruments, for risk management purposes or to increase investment income or gain in the Fund. These techniques involve additional risk. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio manager and are current only through the end of the period of the report as stated on the cover. The manager's views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Global Natural Resources Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Global Natural Resources Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E	Class I	Class R	Class Y	Advisor Class ⁽³⁾
1-year period ended 3-31-10	58.22%	62.37%	66.67%	58.43%	68.45%	67.60%	68.22%	68.68%
5-year period ended 3-31-10	7.05%	7.33%	7.56%	—	—	—	8.55%	8.74%
10-year period ended 3-31-10	14.17%	13.94%	14.01%	—	—	—	—	15.11%
Since inception of Class ⁽⁴⁾ through 3-31-10	—	—	—	-5.24%	-2.67%	4.64%	16.22%	—

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I, Class R and Class Y shares are not subject to sales charges.

(3) Advisor Class shares are no longer available for investment.

(4) 4-2-07 for Class E and Class I shares, 12-29-05 for Class R shares and 7-24-03 for Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

**Class closed to investment.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

					<u>\$ 2,039</u>	<u>\$ 5,468</u>

(A) Listed on an exchange outside the United States.

(B) No dividends were paid during the preceding 12 months.

(C) At March 31, 2010, the following restricted securities were owned (Buried Hill Energy and Konarka Technologies, Inc. are illiquid):

Security	Acquisition Date(s)	Shares	Cost	Market Value
Atacama Minerals Corp.	8-19-08	5,880	\$ 5,541	\$ 2,895
Buried Hill Energy (Cyprus) Public Company Limited	5-1-07 to 4-17-08	3,630	6,183	7,260
Konarka Technologies, Inc., 8.0% Cumulative	8-31-07	3,500	10,850	12,565
			<u>\$22,574</u>	<u>\$22,720</u>

The total value of these securities represented approximately 0.39% of net assets at March 31, 2010.

(D) Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be illiquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$19,187 or 0.33% of net assets.

(E) Deemed to be an affiliate due to the Fund having at least 5% of the voting securities.

(F) Principal amounts are denominated in the indicated foreign currency, where applicable (BRL – Brazilian Real).

(G) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010.

(H) Rate shown is the yield to maturity at March 31, 2010.

(I) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date the variable rate resets.

Joseph R. Betlej

Lowell R. Bolken

Ivy Real Estate Securities Fund is subadvised by Advantus Capital Management, Inc.

Below, Joseph R. Betlej, CFA, and Lowell R. Bolken, portfolio managers of the Ivy Real Estate Securities Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Betlej has managed the Fund since its inception and has 25 years of industry experience. Mr. Bolken has managed the Fund for four years and has 20 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Real Estate Securities Fund (Class A shares at net asset value)	94.78%
Benchmark(s) and/or Lipper Category	
Wilshire Real Estate Securities Index (generally reflects the performance of securities representing the commercial real estate market)	115.44%
Lipper Real Estate Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	104.70%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

The real estate securities market enjoyed an astonishing rebound during the fiscal year ended March 31, 2010 reflected, in part, by high levels of government intervention in credit and housing markets. Many stocks in the sector began the year at significant discounts to underlying value of property assets, indicating deep concern over the effects of the global recession and credit crunch. Fears of bankruptcies, asset liquidation and heavy tenant losses abated during the spring of 2009 as market liquidity was restored and capital replenished. Investors came to realize during the fiscal year that well-managed real estate investment trusts (REIT) would not only survive, but were effectively re-positioning operations. In many cases, companies were taking advantage of distressed conditions to improve efficiency and profitability.

Operating fundamentals weakened for much of the fiscal year across all property types amid a rapidly rising U.S. unemployment rate and a sharp pullback in consumer spending. Debt markets for commercial real estate remain challenged, with the cost of financing property rising and the available loan-to-values significantly lessened. However, by the late autumn of 2009, signs of stabilization began to appear and the stock market began looking to 2011 as a turning point for commercial real estate. REIT stock prices tended to follow the direction of the broader financial sector over the course of the fiscal year.

Real estate securities market rebounds

This past fiscal year saw a comeback for commercial real estate stocks, the overall equity market and the Fund. However, we did not perform as well as our peer group and benchmark. For much of the year, the Fund had a more defensive portfolio positioning than its unmanaged benchmark and, at times, higher-than-usual levels of cash, collectively contributing to

underperformance. Due to concerns of a weakening economy and consequent weakness in real estate fundamentals, we sought to position the Fund more conservatively. As such, we focused on real estate securities that we believed were of higher quality for a longer period than our peers. Subsequently, the real estate securities market began to reward greater levels of risk-taking than we were comfortable with in the second and third quarters of the fiscal year.

Government fiscal action and Federal Reserve intervention in credit markets were perhaps the most influential factors affecting absolute performance during the Fund's fiscal year. The Fund's results reflected a highly unusual environment in which real and implied government support for many types of income securities mattered as much as careful analysis of the fundamental operations of individual real estate companies. It was an exceptional fiscal year from an absolute standpoint. Real estate stocks were among the best-performing sectors in the overall equity market in the past 12 months, and returns of publicly-held REITs generally outpaced those available in the far less-liquid private real estate market.

During the fiscal year, we increased the Fund's weighting in hotels and reduced its cash levels. We decreased the Fund's exposure to regional malls, and we were underweight apartments, self-storage operators and shopping centers for most of the fiscal year. We maintained a small portion of the portfolio in non-benchmark index real estate-related securities, and this had a mixed effect on the Fund's annual results. Real estate brokerage firms did well during the second half, but cellular phone tower companies were weak. Concerns about the timing of a rebound in real estate fundamentals have us remaining cautious. Although the market appears to be ready to accept an increased risk appetite among REITs, we are likely to focus on those companies with better-than-average balance sheets that we feel exhibit earnings stability or growth going into mid-cycle recovery.

Our outlook

We believe that many REITs are positively positioned to take advantage of tremendous opportunities that the market may offer as the U.S. economy retools for growth. Rising REIT share prices appear to reflect increased optimism about the U.S. economy. Fundamentals may be weak for much of 2010, but we believe the market is focusing on 2011. As valuations in the broader equity market have become higher, investment

portfolios with broader mandates appear to have been looking at REITs as a way to participate in the continuing recovery of asset values. Worth noting is that many properties still sell at levels that are below their replacement costs, providing an opportunity for long-term appreciation. Many investors appear excited about the potential for a continued turnaround in asset values.

Still, as 2010 progresses, the cost of capital to REITs may increase with rising interest rates, and may face growing pressure as government deficit-related borrowing grows. State and local government budgets have been under significant pressures that show little sign of abatement. Commercial real estate could become a source to cover these deficits through property tax and fee increases, reducing the profitability of a real estate venture. We feel the sector has strong prospects in the months ahead as the second stage of a real estate recovery unfolds.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Investment risks associated with real estate securities, in addition to other risks, include rental income fluctuation, depreciation, property tax value changes and differences in real estate market values. Real estate securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. Investing in companies involved in one specified sector may be more risky and volatile than an investment with greater diversification. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Real Estate Securities Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT Ivy Real Estate Securities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E	Class I	Class R	Class Y
1-year period ended 3-31-10	83.58%	88.14%	93.33%	84.38%	96.35%	95.59%	96.18%
5-year period ended 3-31-10	0.81%	0.66%	1.16%	—	—	—	2.44%
10-year period ended 3-31-10	10.18%	—	—	—	—	—	—
Since inception of Class ⁽³⁾ through 3-31-10	—	4.53%	4.87%	-13.31%	-10.72%	-1.51%	6.12%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I, Class R and Class Y shares are not subject to sales charges.

(3) 12-8-03 for Class B, Class C and Class Y shares, 4-2-07 for Class E and Class I shares and 12-29-05 for Class R shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Real Estate Securities Fund merged into the Ivy Real Estate Securities Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Real Estate Securities Fund Class A shares, restated to reflect current sales charges applicable to Ivy Real Estate Securities Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Real Estate Securities Fund. If these expenses were reflected, performance shown would differ.

ILLUSTRATION OF FUND EXPENSES

Ivy Real Estate Securities Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,194.70	1.91%	\$10.42
Class B	\$1,000	\$1,186.60	3.20%	\$17.49
Class C	\$1,000	\$1,190.30	2.69%	\$14.68

Class R	\$1,000	\$1,196.20	1.71%	\$ 9.33
Class Y	\$1,000	\$1,198.00	1.40%	\$ 7.69
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,015.40	1.91%	\$ 9.57
Class B	\$1,000	\$1,008.97	3.20%	\$16.07
Class C	\$1,000	\$1,011.52	2.69%	\$13.48
Class E	\$1,000	\$1,016.62	1.67%	\$ 8.37
Class I	\$1,000	\$1,019.08	1.17%	\$ 5.96
Class R	\$1,000	\$1,016.42	1.71%	\$ 8.57
Class Y	\$1,000	\$1,017.95	1.40%	\$ 7.06

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Citigroup Broad Investment Grade Index 6.44%
(generally reflects the performance of securities representing the bond market)

Lipper Corporate Debt Funds A Rated Universe Average 16.97%
(generally reflects the performance of the universe of funds with similar investment objectives)

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

With spring came strength

The U.S. economy, while certainly not showing a strong cyclical rebound in the first calendar quarter of 2010, has begun to grow again. A year earlier the situation was quite different, as investors expected a very severe and prolonged recession. The U.S. unemployment rate was rising rapidly. Credit markets were frozen. The housing market was in a state of free fall as foreclosures mounted.

The situation began to stabilize in the late spring and early summer of 2009 as a result of massive federal intervention. While decent for the first quarter of 2010, the U.S. economy's growth rate appears to be held back primarily by weak employment and flat home prices. Job growth is nominal and businesses remain wary that consumer spending will be weak as households struggle under large debts and lost housing wealth. Housing prices may have bounced off the bottom in 2009, but recent national surveys suggest they've begun to turn down and may fall further as government stimulus programs expire. A huge overhang of delinquent loans only increases the prospect for more distressed sales, further pressuring prices.

Toward the middle of the Fund's fiscal year, corporate profitability began to pick up nicely. Large corporations in general appeared to be in good financial shape. While revenue growth for many companies remained small, capital structures improved, as did credit spreads. This trend increased the attractiveness of many corporate bonds.

Corporate bonds and commercial mortgage-backed securities play starring roles

Corporate bonds and commercial mortgage-backed securities (CMBS) played a leading role in the year. They contributed to the Fund outpacing the Citigroup Broad Investment Grade Index, the benchmark index. The Fund's results (not including sales charges) were less than the return of the Fund's Lipper peer group, the Corporate Debt Funds A Rated Universe Average.

Corporate bonds and CMBS also contributed to portfolio performance as the markets anticipated the recession would end and a recovery would ensue. While U.S. Treasury yields generally rose over the year, corporate and CMBS yields fell, as investors became more comfortable with the notion that defaults would lessen due to the Federal Reserve's significant liquidity programs, and as a result prices of these securities rose substantially.

Longer-term U.S. Treasury yields rose more than 1 percent, negatively impacting bond prices, particularly early in the fiscal year. The 10-year Treasury yield rose from about 2.60 percent to nearly 4 percent in the first quarter of 2010 as the economy began to show early signs it might recover.

During the course of the year, we increased the Fund's exposure to higher-yielding corporate bonds and asset-backed securities. We reduced the Fund's holdings in agency mortgage-backed securities and other government guaranteed bonds.

A look ahead

We do not believe interest rates will rise much in the coming months. The U.S. business cycle is not that strong and near-term inflation pressures remain low, and may even be dropping. We believe that falling home prices and rents, flat commodity prices and slow money growth all point to lower inflation. As a consequence, it is possible that the Fed won't be pressured to raise rates in the next couple quarters given the prospect of stubbornly high unemployment and signs of moderating inflation.

Corporate and other non-government bonds have been the best performers year to date and we are of the belief that this will continue until yields relative to Treasuries fall further. In our view, investors are continuing to reach for yield in a zero-percent-for-cash environment. At the end of the fiscal year, spreads for corporate bonds averaged 150 basis points (1.5 percentage points) more than comparable maturity Treasuries while CMBS spreads to comparable maturity Treasuries are about 250 basis points. So far in calendar year 2010, commercial real estate bonds, CMBS and real estate investment trust bonds have been among the best performers despite deteriorating property level fundamentals. While growth is a little slow to engender a really strong economic rebound, it appears to be just right for bonds to perform well as interest rates have remained range bound and credit improves.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government. However, other U.S. government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB) are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

On Sept. 7, 2008, the Federal Housing Finance Agency (FHFA), an agency of the U.S. government, placed Fannie Mae and Freddie Mac into conservatorship, a statutory process with the objective of returning the entities to normal business operations. FHFA will act as the conservator to operate Fannie Mae and Freddie Mac until they are stabilized. It is unclear what effect this conservatorship will have on the securities issued or guaranteed by Fannie Mae or Freddie Mac.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Bond Fund.

PORTFOLIO HIGHLIGHTS

Ivy Bond Fund

ALL DATA IS AS OF MARCH 31, 2010 (UNAUDITED)

Asset Allocation

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Bond Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E	Class I	Class Y
1-year period ended 3-31-10	9.59%	10.84%	15.44%	9.61%	16.73%	16.41%
5-year period ended 3-31-10	1.62%	1.45%	1.96%	—	—	2.82%
10-year period ended 3-31-10	4.24%	—	—	—	—	—
Since inception of Class ⁽³⁾ through 3-31-10	—	1.68%	1.92%	-0.11%	2.42%	2.83%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) 12-8-03 for Class B, Class C and Class Y shares and 4-2-07 for Class E and Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Bond Fund merged into the Ivy Bond Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Bond Fund Class A shares, restated to reflect current sales charges applicable to Ivy Bond Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Bond Fund. If these expenses were reflected, performance shown would differ.

ILLUSTRATION OF FUND EXPENSES

Ivy Bond Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,042.60	1.14%	\$ 5.82
Class B	\$1,000	\$1,037.10	2.18%	\$ 11.10
Class C	\$1,000	\$1,038.80	1.88%	\$ 9.58
Class E	\$1,000	\$1,042.30	1.21%	\$ 6.13
Class I	\$1,000	\$1,044.50	0.80%	\$ 4.09
Class Y	\$1,000	\$1,043.20	1.06%	\$ 5.41
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,019.25	1.14%	\$ 5.75
Class B	\$1,000	\$1,014.05	2.18%	\$ 10.98
Class C	\$1,000	\$1,015.58	1.88%	\$ 9.47
Class E	\$1,000	\$1,018.90	1.21%	\$ 6.06
Class I	\$1,000	\$1,020.93	0.80%	\$ 4.04
Class Y	\$1,000	\$1,019.63	1.06%	\$ 5.35

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

*Not shown due to rounding.

(A)No dividends were paid during the preceding 12 months.

(B)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be illiquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$9,719 or 4.80% of net assets.

(C)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$20,284 or 10.02% of net assets.

(D)Zero coupon bond.

(E)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010.

(F)Security is fully guaranteed by the Federal Deposit Insurance Corporation for both interest and principal under the Debt Guarantee Program of the Temporary Liquidity Guarantee Program. The guarantee expires at the earlier of the security's maturity date or December 31, 2012.

(G)Amount shown in principal column represents notional amount for computation of interest.

(H)The interest rate for this security is a stated rate, but the interest payments are determined by multiplying the inflation-adjusted principal by one half of the stated rate for each semiannual interest payment date.

(I)Securities serve as collateral for the following open futures contracts at March 31, 2010:

Description	Type	Expiration Date	Number of Contracts	Market Value	Unrealized Appreciation (Depreciation)
U.S. 10 Year Treasury Note	Long	6–21–10	—*	\$ 9,881	\$ (35)
U.S. 30 Year Treasury Bond	Short	6–30–10	—*	(7,432)	(91)
U.S. 5 Year Treasury Note	Short	6–30–10	—*	(5,398)	4
U.S. 2 Year Treasury Note	Long	6–30–10	—*	21,696	(33)
				<u>\$ 18,747</u>	<u>\$(155)</u>

(J)Rate shown is the yield to maturity at March 31, 2010.

(K)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date that the variable rate resets.

The following acronyms are used throughout this schedule:

CMBS = Commercial Mortgage-Backed Security

CMO = Collateralized Mortgage Obligation

REIT = Real Estate Investment Trust

REMIC = Real Estate Mortgage Investment Conduit

TBA = To Be Announced

Industry classifications are unaudited.

See Accompanying Notes to Financial Statements.

Mark G. Beischel

Daniel J. Vrabac

Below, Mark G. Beischel, CFA, and Daniel J. Vrabac portfolio managers of the Ivy Global Bond Fund, discuss the Fund's positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Beischel has managed the Fund since its inception and has 16 years of industry experience. Mr. Vrabac has also managed the Fund since its inception and has 31 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Global Bond Fund (Class A shares at net asset value) 12.84%

Benchmark(s) and/or Lipper Category

Barclays Capital U.S. Dollar-Denominated Universal Index 10.37%
(generally reflects the performance of securities representing the world's bond markets)

Lipper Global Income Funds Universe Average 19.53%
(generally reflects the performance of the universe of funds with similar investment objectives)

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

Optimism that stimulus will drive recovery lifts bond prices

Over the past 12 months, the consensus view in the market has shifted from recession to recovery. Regarding bonds, the yield spread is the additional yield an investor receives for owning bonds other than U.S. Treasuries. When the economy is doing well, spreads in general are smaller and reflect less concern over risk. When the economy is not doing well, spreads widen out with the increased risk concern. Bond spreads over the past 12 months have tightened enormously to reflect the market's changing view on the economy. This has been good for bond prices in general. The reason for this good behavior is the belief that the huge government stimulus programs will drive economic growth and recovery. In other words, both bond and equity markets now believe that the worst of the economic decline is well behind us.

The Fund underperformed its Lipper index over the past 12 months. Looking at just the past 12 months may be somewhat misleading, however. Fiscal year 2009 contained the global financial crisis, and the first quarter of 2010 saw the global market bounce back. It makes some sense to average the two years together as different risk levels are contained in the Fund and the indexes. The Lipper Index was clearly the most volatile on a two-year basis; the Barclays Index is higher quality and showed lower volatility, and Ivy Global Bond Fund was in the middle. It should be stated that the degree of movement in the markets was unprecedented during and after the global financial crisis. The performance of any fund or index over this two-year time period should not be considered normal.

Corporate bonds, cash helped

One of the key factors behind absolute performance was the spread tightening referred to above. Given our heavy exposure to non-Treasury issuers, the fund benefited significantly from our corporate bond exposure. As an example, during the fiscal year, investment grade bond spreads tightened nearly 350 basis points, or 3.5 percentage points. This spread change would approximate an increase in price of 14 percent on a five-year bond, assuming no changes in other factors. During the global financial crisis, the fund kept a larger-than-normal cash position. Because short-term rates were so low, the yield differential contributed to a lower absolute performance. This tradeoff was justified to preserve capital in highly uncertain times.

The biggest change in the Fund came from reducing its cash position over the past fiscal year. The Fund was only one year old and growing in March of 2009. In the last six months of the prior fiscal year, markets imploded during the global financial crisis. As a result, we believed it prudent to carry a sizable cash position during the crisis. As the crisis peaked and began to abate, we steadily put that cash to work in bonds, resulting in a much lower cash position thus far into 2010 than during 2009.

Optimism prevails, but uncertainties still linger

In spite of the market's optimistic outlook, we believe the economy is still not out of the doldrums. Furthermore, it is still uncertain whether inflationary or deflationary forces have the upper hand. Most investors focus on the potential for inflation in the expansion of the Fed's balance sheet and the growing deficits and debt of the Federal government. However, the enormous excess capacity in the labor and industrial markets and the decline in consumer wealth and income imply a potential for continued deflationary pressure.

Another big question for the markets is the crisis in sovereign debt – investors are becoming concerned about the viability of countries from Greece and Ireland to the United Kingdom and the United States. While short-term policy rates set by the central banks remain low, reflecting the concern over the weakness in the economies, long-term government rates set in the market have started to rise in 2010, reflecting the difficult fiscal situations many countries find themselves in today in the aftermath of the global financial crisis.

Given this view, and the fact that bond and equity markets have rallied strongly over the past year – and on a number of measures are in a state of overvaluation – we remain cautious. We continue to focus on finding strong corporate bond issuers around the globe that should be able to weather a number of economic environments. We maintain a short duration on the Fund's bonds in order to have better visibility in these highly uncertain times. We continue to have a portfolio that has a high percentage exposure to the U.S. dollar, because the dollar has demonstrated it has been the place to be when risk and uncertainty are high.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

International investing involves additional risks including currency fluctuations, political or economic conditions affecting the foreign country, and differences in accounting standards and foreign regulations.

Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise.

These and other risks are more fully described in the Fund's prospectus.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government. However, other U.S. government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB) are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

On Sept. 7, 2008, the Federal Housing Finance Agency (FHFA), an agency of the U.S. government, placed Fannie Mae and Freddie Mac into conservatorship, a statutory process with the objective of returning the entities to normal business operations. FHFA will act as the conservator to operate Fannie Mae and Freddie Mac until they are stabilized. It is unclear what effect this conservatorship will have on the securities issued or guaranteed by Fannie Mae or Freddie Mac.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Global Bond Fund.

PORTFOLIO HIGHLIGHTS

Ivy Global Bond Fund

ALL DATA IS AS OF MARCH 31, 2010 (UNAUDITED)

Asset Allocation

Bonds	95.16%
Corporate Debt Securities	70.89%
United States Government and Government Agency Obligations	21.16%
Other Government Securities	3.11%
Cash and Cash Equivalents	4.84%

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Global Bond Fund

(UNAUDITED)

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment.

(2) The value of the investment in the Fund is impacted by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

(3) Because the Fund commenced operations on a date other than at the end of a month, and partial month calculations of the performance of the indexes (including income) are not available, investment in the indexes was effected as of March 31, 2008.

Average Annual Total Return ⁽⁴⁾	Class A	Class B	Class C	Class I	Class Y
1-year period ended 3-31-10	6.36%	8.01%	12.01%	13.13%	12.84%
5-year period ended 3-31-10	—	—	—	—	—
10-year period ended 3-31-10	—	—	—	—	—
Since inception of Class ⁽⁵⁾ through 3-31-10	1.40%	1.70%	3.66%	4.72%	4.46%

(4) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(5) 4-4-08 for Class A, Class B, Class C, Class I and Class Y shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

ILLUSTRATION OF FUND EXPENSES

Ivy Global Bond Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,044.20	0.99%	\$5.01
Class B	\$1,000	\$1,039.30	1.74%	\$8.87
Class C	\$1,000	\$1,039.30	1.74%	\$8.87
Class I	\$1,000	\$1,045.60	0.74%	\$3.78
Class Y	\$1,000	\$1,044.20	0.99%	\$5.01
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,020.00	0.99%	\$4.95
Class B	\$1,000	\$1,016.26	1.74%	\$8.77
Class C	\$1,000	\$1,016.26	1.74%	\$8.77
Class I	\$1,000	\$1,021.24	0.74%	\$3.74
Class Y	\$1,000	\$1,020.00	0.99%	\$4.95

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

(A) Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be illiquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$15,684 or 10.09% of net assets.

(B) Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$10,398 or 6.69% of net assets.

(C) Zero coupon bond.

(D) Principal amounts are denominated in the indicated foreign currency, where applicable (BRL – Brazilian Real, CNY – Chinese Yuan Renminbi, EUR – Euro, HKD – Hong Kong Dollar, NOK – Norwegian Krone and RUB – Russian Ruble).

(E) Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010.

(F) Amount shown in principal column represents notional amount for computation of interest.

(G) Rate shown is the yield to maturity at March 31, 2010.

The following acronyms are used throughout this schedule:

CMO = Collateralized Mortgage Obligation

REMIC = Real Estate Mortgage Investment Conduit

David W. Land

Christopher R. Sebald

Ivy Mortgage Securities Fund is subadvised by Advantus Capital Management, Inc.

Below, David W. Land, CFA, and Christopher R. Sebald, CFA, portfolio managers of the Ivy Mortgage Securities Fund, discuss positioning, performance and results for the fiscal year ended March 31, 2010. Mr. Land has managed the Fund for six years and has 19 years of industry experience. Mr. Sebald has managed the Fund for seven years and has 21 years of industry experience.

Fiscal year performance

For the 12 Months Ended March 31, 2010

Ivy Mortgage Securities Fund (Class A shares at net asset value)	12.37%
Benchmark(s) and/or Lipper Category	
Barclays Capital Mortgage-Backed Securities Index (generally reflects the performance of securities representing the mortgage-backed securities market)	5.21%
Lipper U.S. Mortgage Funds Universe Average (generally reflects the performance of the universe of funds with similar investment objectives)	8.88%

Please note that Fund returns include applicable fees and expenses while index returns do not include any such fees.

The U.S. economy, while certainly not showing a strong cyclical rebound in the first calendar quarter of 2010, has begun to grow again. A year ago, the situation was quite different as investors expected a very severe and prolonged recession. At that time, the U.S. unemployment rate was rising rapidly, credit markets were frozen and the housing market was in a state of free fall as foreclosures mounted. The situation began to stabilize in the late spring and early summer of 2009 as a result of massive federal intervention. Still, job growth remains lackluster as businesses remain wary that consumer spending will be weak as people struggle under large debts and lost housing wealth. Housing prices may have bounced off the bottom, but recent national surveys suggest they may turn down again once government stimulus programs expire. A huge overhang of delinquent loans would only increase the prospect for more distressed sales while foreclosures are permitted to pick up, further pressuring prices, in our view. Meanwhile, the U.S. government continued to implement various measures aimed at stemming the tide of foreclosures. To date, such efforts have had only limited success, yet each new program appears to us to be bolder in scope.

Investor optimism fuels performance

The Fund's strong performance during the fiscal year ended March 31, 2010, was attributable to its exposure to a diverse mix of mortgage-related securities, including collateralized mortgage obligations (CMOs), asset-backed securities (ABS) and commercial mortgage-backed securities (CMBS). The Fund's CMO holdings contributed the most to the Fund's results during the fiscal year. ABS and CMBS securities also performed well as the markets anticipated that global and U.S. recessions would end and a recovery would ensue. Investors also became more

comfortable with the notion that defaults would lessen due to the Federal Reserve's significant liquidity programs and, subsequently, prices of these securities rose substantially.

During the second half of the fiscal year, commercial real estate bonds, CMBS and real estate investment trust bonds were among the best performers in the sector. Investors appear to be reaching for yield despite deteriorating fundamentals in these sectors and prospects for a phase out of government support programs and Fed efforts to maintain liquidity.

The Fund was adversely impacted by longer-term U.S. Treasury yields, which rose more than 1 percent and negatively impacted bond prices, particularly early in the fiscal year. The 10-year Treasury yield rose noticeably in the first quarter of the fiscal year as the economy began to show early signs it might recover.

Meanwhile, we increased the Fund's exposure to agency pass-throughs during the fiscal year. We funded these purchases by reducing the Fund's exposure to CMOs, which appeared to have a continuing high risk of default given the still relatively weak dynamics of the U.S. job and housing markets.

Our outlook

We feel that budget crunches ahead for states and municipalities likely will be a big drag on the U.S. economy for an extended period. In addition, we do not believe interest rates will increase much for the balance of calendar year 2010. The U.S. business cycle is not that strong and near-term inflation pressures remain low, and may even be fading. Housing activity, most non-energy commodity prices and money supply growth at their current levels all point to lower inflation. As such, we believe the Fed will be pressured to maintain rates, given the prospect of stubbornly high unemployment and signs of moderating inflation. This may prompt investors to reach for yield in lower-quality issues, considering the absence of any yield in the money market universe. Slow economic growth ahead could weaken stocks while supporting bond prices. This is the environment we believe will unfold as 2011 approaches.

The Fund's performance noted above is at net asset value (NAV), and does not include the effect of any applicable sales charges. If reflected, the sales charge would reduce the performance noted.

As with any mutual fund, the value of the Fund's shares will change, and you could lose money on your investment.

The risks incurred by mortgage securities include, but are not limited to, reinvestment of pre-paid loans at lower rates of return. In addition, the net asset value of mortgage securities may fluctuate in response to changes in interest rates and are not guaranteed. Fixed-income securities are subject to interest rate risk and, as such, the Fund's net asset value may fall as interest rates rise. These and other risks are more fully described in the Fund's prospectus.

Certain U.S. government securities in which the Fund may invest, such as Treasury securities and securities issued by the Government National Mortgage Association (Ginnie Mae), are backed by the full faith and credit of the U.S. government. However, other U.S. government securities in which the Fund may invest, such as securities issued by the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac) and the Federal Home Loan Banks (FHLB) are not backed by the full faith and credit of the U.S. government, are not insured or guaranteed by the U.S. government and, instead, may be supported only by the right of the issuer to borrow from the U.S. Treasury or by the credit of the issuer.

On Sept. 7, 2008, the Federal Housing Finance Agency (FHFA), an agency of the U.S. government, placed Fannie Mae and Freddie Mac into conservatorship, a statutory process with the objective of returning the entities to normal business operations. FHFA will act as the conservator to operate Fannie Mae and Freddie Mac until they are stabilized. It is unclear what effect this conservatorship will have on the securities issued or guaranteed by Fannie Mae or Freddie Mac.

The opinions expressed in this report are those of the portfolio managers and are current only through the end of the period of the report as stated on the cover. The managers' views are subject to change at any time based on market and other conditions, and no forecasts can be guaranteed.

The index (indexes) noted are unmanaged and include reinvested dividends. One cannot invest directly in an index, nor is an index representative of the Ivy Mortgage Securities Fund.

COMPARISON OF CHANGE IN VALUE OF \$10,000 INVESTMENT

Ivy Mortgage Securities Fund

(UNAUDITED)

Please note that the performance of the Fund's other share classes will be greater or less than the performance shown above for Class A based on the differences in loads and fees paid by shareholders investing in the different classes.

(1) The value of the investment in the Fund is impacted by the sales load at the time of the investment and by the ongoing expenses of the Fund and assumes reinvestment of dividends and distributions.

Average Annual Total Return ⁽²⁾	Class A	Class B	Class C	Class E	Class I	Class Y
1-year period ended 3-31-10	5.91%	7.14%	11.58%	6.20%	13.00%	12.76%
5-year period ended 3-31-10	-1.38%	-1.42%	-0.98%	—	—	-0.03%
10-year period ended 3-31-10	2.81%	—	—	—	—	—
Since inception of Class ⁽³⁾ through 3-31-10	—	-0.49%	-0.25%	-5.14%	-2.57%	0.69%

(2) Data quoted is past performance and is based on deduction of the maximum applicable sales load for each of the periods. Current performance may be lower or higher. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Please visit www.ivyfund.com for the Fund's most recent month-end performance. Class A and Class E shares carry a maximum front-end sales load of 5.75%. Class B and Class C shares carry maximum contingent deferred sales charges (CDSC) of 5% and 1%, respectively. (Accordingly, the Class C shares reflect no CDSC since it only applies to Class C shares redeemed within twelve months after purchase.) Class I and Class Y shares are not subject to sales charges.

(3) 12-8-03 for Class B, Class C and Class Y shares and 4-2-07 for Class E and Class I shares (the date on which shares were first acquired by shareholders).

Past performance is not necessarily indicative of future performance. Indexes are unmanaged. The performance graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares.

The Advantus Mortgage Securities Fund merged into the Ivy Mortgage Securities Fund on December 8, 2003. The performance shown for periods prior to this date is that of the Advantus Mortgage Securities Fund Class A shares, restated to reflect current sales charges applicable to Ivy Mortgage Securities Fund Class A shares. Performance has not been restated to reflect the fees and expenses applicable to the Ivy Mortgage Securities Fund. If these expenses were reflected, performance shown would differ.

ILLUSTRATION OF FUND EXPENSES

Ivy Mortgage Securities Fund

(UNAUDITED)

For the Six Months Ended March 31, 2010	Beginning Account Value 9-30-09	Ending Account Value 3-31-10	Annualized Expense Ratio Based on the Six-Month Period	Expenses Paid During Period*
Based on Actual Fund Return⁽¹⁾				
Class A	\$1,000	\$1,047.00	1.32%	\$ 6.76
Class B	\$1,000	\$1,041.50	2.39%	\$ 12.15
Class C	\$1,000	\$1,043.20	2.06%	\$ 10.52
Class E	\$1,000	\$1,048.00	1.14%	\$ 5.84
Class I	\$1,000	\$1,049.70	0.82%	\$ 4.20
Class Y	\$1,000	\$1,048.20	1.07%	\$ 5.43
Based on 5% Return⁽²⁾				
Class A	\$1,000	\$1,018.37	1.32%	\$ 6.66
Class B	\$1,000	\$1,013.03	2.39%	\$ 11.98
Class C	\$1,000	\$1,014.67	2.06%	\$ 10.38
Class E	\$1,000	\$1,019.25	1.14%	\$ 5.75
Class I	\$1,000	\$1,020.86	0.82%	\$ 4.14
Class Y	\$1,000	\$1,019.61	1.07%	\$ 5.35

*Fund expenses for each share class are equal to the Fund's annualized expense ratio for each share class (provided in the table), multiplied by the average account value over the period, multiplied by 182 days in the six-month period ended March 31, 2010, and divided by 365.

(1) This section uses the Fund's actual total return and actual Fund expenses. It is a guide to the actual expenses paid by the Fund in the period. The "Ending Account Value" shown is computed using the Fund's actual return and the "Expenses Paid During Period" column shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. A shareholder may use the information here, together with the dollar amount invested, to estimate the expenses that were paid over the period. For every thousand dollars a shareholder has invested, the expenses are listed in the last column.

(2) This section uses a hypothetical five percent annual return and actual Fund expenses. It helps to compare the Fund's ongoing costs with other mutual funds. A shareholder can compare the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

The above illustrations are based on ongoing costs only and do not include any transactional costs, such as sales loads, redemption fees or exchange fees.

See "Disclosure of Expenses" on page 8 for further information on how expenses were calculated.

Notes to Schedule of Investments

*Not shown due to rounding.

(A)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be illiquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$8,155 or 5.75% of net assets.

(B)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010.

(C)Securities were purchased pursuant to Rule 144A under the Securities Act of 1933 and may be resold in transactions exempt from registration, normally to qualified institutional buyers. These securities have been determined to be liquid under guidelines established by the Board of Trustees. At March 31, 2010, the total value of these securities amounted to \$5,130 or 3.62% of net assets.

(D)Amount shown in principal column represents notional amount for computation of interest.

(E)Zero coupon bond.

(F)Securities serve as collateral for the following open futures contracts at March 31, 2010:

Description	Type	Expiration Date	Number of Contracts	Market Value	Unrealized Depreciation
U.S. 10 Year Treasury Note	Short	6–21–10	—*	\$ (1,628)	\$ (7)
U.S. 30 Year Treasury Bond	Short	6–30–10	—*	(2,206)	(27)
				<u>\$ (3,834)</u>	<u>\$ (34)</u>

(G)Rate shown is the yield to maturity at March 31, 2010.

(H)Variable rate security. Interest rate disclosed is that which is in effect at March 31, 2010. Date shown represents the date that the variable rate resets.

The following acronyms are used throughout this schedule:

CMO = Collateralized Mortgage Obligation

REMIC = Real Estate Mortgage Investment Conduit

TBA = To Be Announced

Industry classifications are unaudited.

See Accompanying Notes to Financial Statements.

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Ivy Funds (the Trust) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company. The Trust issues 18 series of capital shares; each series represents ownership of a separate mutual fund (Fund). The investment objective(s), policies and risk factors of each Fund are described more fully in that Fund's prospectus and Statement of Additional Information. The Trust's investment manager is Ivy Investment Management Company (IICO or the Manager).

Each Fund offers Class A, Class B, Class C, Class I and Class Y shares. Certain Funds may offer Class E and/or Class R shares. Class A and Class E shares are sold at their offering price, which is normally net asset value plus a front-end sales charge. Class B and Class C shares are sold without a front-end sales charge but may be subject to a contingent deferred sales charge (CDSC). Class I, Class R and Class Y shares are sold without either a front-end sales charge or a CDSC. Advisor Class shares were formerly offered by certain Funds, but are no longer available for sale. All classes of shares have identical rights and voting privileges with respect to the Fund in general and exclusive voting rights on matters that affect that class alone. Net investment income, net assets and net asset value per share may differ due to each class having its own expenses, such as transfer agent and shareholder servicing fees, directly attributable to that class. Class A, B, C, E, R and Y have separate distribution and/or service plans. No such plan has been adopted for Class I or Advisor Class shares. Class B shares will automatically convert to Class A shares 96 months after the date of purchase.

The following is a summary of significant accounting policies consistently followed by each Fund.

Securities Valuation. Each Fund calculates the net asset value of its shares as of the close of the New York Stock Exchange (the NYSE), normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading.

Securities traded on U.S. or foreign securities exchanges or included in a national market system are valued at the official closing price at the close of each business day unless otherwise stated below. Over-the-counter securities and listed securities for which no price is readily available are valued at the average of the last bid and asked prices. Security prices are based on quotes that are obtained from an independent pricing service approved by the Board of Trustees.

To determine values of fixed-income securities, the independent pricing service utilizes such factors as current quotations by broker/dealers, coupon, maturity, quality, type of issue, trading characteristics, and other yield and risk factors it deems relevant in determining valuations. Securities which cannot be valued by the independent pricing service are valued using valuations obtained from dealers that make markets in the securities.

Options and swaps are valued by the independent pricing service unless the price is unavailable, in which case they are valued at either the mean between the last bid and asked price or using a valuation obtained from a dealer in that security. Futures contracts traded on an exchange are generally valued at the settlement price. Mutual funds, including investment funds, are typically valued at the net asset value reported at the close of each business day.

Forward foreign currency contracts are valued daily based upon the closing prices of the forward currency rates determined at the close of the NYSE as provided by a bank, dealer or independent pricing service.

Senior loans are valued using a composite price from more than one broker or dealer as obtained from an independent pricing service.

Short-term securities with maturities of 60 days or less are valued on the basis of amortized cost (which approximates market value), whereby a portfolio security is valued at its cost initially, and thereafter valued to reflect a constant amortization to maturity of any discount or premium.

Because many foreign markets close before the NYSE, events may occur between the close of the foreign market and the close of the NYSE that could have a material impact on the valuation of foreign securities. The Funds, under the supervision of the Board of Trustees, evaluate the impact of these events and may adjust the valuation of foreign securities to reflect the fair value as of the close of the NYSE. In addition, all securities for which market values are not readily available or are deemed unreliable are appraised at fair value as determined in good faith under the direction of the Board of Trustees. As of March 31, 2010, the following had aggregate investments valued at fair value as shown:

Fund Name	Total Amount of Fair Valued Securities	Percent of Net Assets
Ivy Cundill Global Value Fund	\$12,261	3.60%
Ivy Global Natural Resources Fund	28,253	0.49%
Ivy Bond Fund	21	0.01%

Security Transactions and Related Investment Income.

Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses are calculated on the identified cost basis. Interest income is recorded on the accrual basis and includes paydown gain (loss) and accretion of discounts and amortization of premiums. Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed, which are recorded as soon as the Fund is informed of the ex-dividend date. Upon notification from issuers, some of the distributions received from a real estate investment trust or publicly traded partnership may be redesignated as a reduction of cost of the related investment and/or realized gain.

Securities on a When-Issued or Delayed Delivery Basis.

Certain Funds may purchase securities on a “when-issued” basis, and may purchase or sell securities on a “delayed delivery” basis. “When-issued” or “delayed delivery” refers to securities whose terms and indenture are available and for which a market exists, but which are not available for immediate delivery. Delivery and payment for securities that have been purchased by a Fund on a when-issued basis normally take place within six months and possibly as long as two years or more after the trade date. During this period, such securities do not earn interest, are subject to market fluctuation and may increase or decrease in value prior to their delivery. The purchase of securities on a when-issued basis may increase the volatility of a Fund’s net asset value to the extent the Fund executes such transactions while remaining substantially fully invested. When a Fund engages in when-issued or delayed delivery transactions, it relies on the buyer or seller, as the case may be, to complete the transaction. Their failure to do so may cause the Fund to lose the opportunity to obtain or dispose of the security at a price and yield it considers advantageous. The Fund maintains internally designated assets with a market value equal to or greater than the amount of its purchase commitments. The Fund may also sell securities that it purchased on a when-issued or delayed-delivery basis prior to settlement of the original purchase.

Senior Loans. A Fund invests in senior secured corporate loans (senior loans) either as an original lender or as a purchaser of a loan assignment or a participation interest in a loan. Senior loans are generally made to U.S. and foreign borrowers that are corporations, partnerships, or other business entities. Senior loans are generally readily marketable, but some loans may be illiquid or may be subject to some restrictions on resale.

Certain senior loans contain provisions that obligate a Fund to fund future commitments at the borrower’s discretion. At March 31, 2010, there were no such unfunded commitments.

Mortgage Dollar Roll Transactions. Certain Funds enter into dollar roll transactions on securities issued or to be issued by the Government National Mortgage Association, Federal National Mortgage Association and Federal Home Loan Mortgage Corporation, in which the Fund sells mortgage securities and simultaneously agrees to repurchase similar (same type, coupon and maturity) securities at a later date at an agreed upon price. During the period between the sale and repurchase, the Fund forgoes principal and interest paid on the mortgage securities sold. The Fund is compensated from negotiated fees paid by brokers offered as an inducement to the Fund to “roll over” their purchase commitments. These fees are recognized over the roll period and are included in Interest and amortization in the Statement of Operations.

Interest Only Obligations. These securities entitle the owner to receive only the interest portion from a bond, Treasury note or pool of mortgages. These securities are generally created by a third party separating a bond or pool of mortgages into distinct interest-only and principal-only securities. As the principal (par) amount of a bond or pool of mortgages is paid down, the

amount of interest income earned by the owner will decline as well.

Credit Risk. Certain Funds may hold high-yield and/or non-investment-grade bonds, which may be subject to a greater degree of credit risk. Credit risk relates to the ability of the issuer to meet interest or principal payments or both as they become due. The Fund may acquire securities in default, and is not obligated to dispose of securities whose issuers subsequently default.

Foreign Currency Translation. Each Fund’s accounting records are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars daily, using foreign exchange rates obtained from an independent pricing service authorized by the Board of Trustees. Purchases and sales of investment securities and accruals of income and expenses are translated at the rate of exchange prevailing on the date of the transaction. For assets and liabilities other than investments in securities, net realized and unrealized gains and losses from foreign currency translation arise from changes in currency exchange rates. Each Fund combines fluctuations from currency exchange rates and fluctuations in market value when computing net realized gain (loss) and net change in unrealized appreciation (depreciation) on investments. Foreign exchange rates are valued as of the close of the NYSE, normally 4:00 P.M. Eastern time, on each day the NYSE is open for trading, primarily using an independent pricing service authorized by the Board of Trustees.

Repurchase Agreements. Each Fund may purchase securities subject to repurchase agreements, which are instruments under which the Fund purchases a security and the seller (normally a commercial bank or broker-dealer) agrees, at the time of purchase, that it will repurchase the security at a specified time and price. Repurchase agreements are collateralized by the value of the resold securities which, during the entire period of the agreement, generally remains at least equal to the value of the agreement, including accrued interest thereon. The collateral for the repurchase agreement is held by a custodian bank.

Investments with Off-Balance Sheet Risk. Certain Funds may enter into financial instrument transactions (such as swaps, futures, options and other derivatives) that may have off-balance sheet market risk. Off-balance sheet market risk exists when the maximum potential loss on a particular financial instrument is greater than the value of such financial instrument, as reflected in the Statement of Assets and Liabilities.

Segregation and Collateralization. In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (SEC) require that a Fund either delivers collateral or segregates assets in connection with certain investments (e.g., dollar rolls, financial futures contracts, foreign currency exchange contracts, options written, securities with extended settlement periods and swaps), the Fund will segregate collateral or designate on its books and records cash or other liquid securities having a market value at least equal to the amount that

is required to be physically segregated for the benefit of the counterparty. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, each party has requirements to deliver/deposit cash or securities as collateral for certain investments.

Allocation of Income, Expenses, Gains and Losses. Income, expenses (other than those attributable to a specific class), gains and losses are allocated on a daily basis to each class of shares based upon the relative proportion of net assets represented by such class. Operating expenses directly attributable to a specific class are charged against the operations of that class.

Income Taxes. It is the policy of each Fund to distribute all of its taxable income and capital gains to its shareholders and otherwise qualify as a regulated investment company under Subchapter M of the Internal Revenue Code. In addition, each Fund intends to pay distributions as required to avoid imposition of excise tax. Accordingly, no provision has been made for Federal income taxes. Management of the Trust periodically reviews all tax positions to assess that it is more likely than not that the position would be sustained upon examination by the relevant tax authority based on the technical merits of each position. As of and for the fiscal year ended March 31, 2010, management believes that under this standard no liability for unrecognized tax positions is required. The Funds are subject to examination by U.S. federal and state authorities for returns filed for tax years after 2006.

Dividends and Distributions to Shareholders. Dividends and distributions to shareholders are recorded by each Fund on the business day following record date. Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America.

Custodian Fees. “Custodian fees” in the Statement of Operations may include interest expense incurred by a Fund on any cash overdrafts of its custodian account during the period. Such cash overdrafts may result from the effects of failed trades in portfolio securities and from cash outflows resulting from unanticipated shareholder redemption activity. A Fund pays interest to its custodian on such cash overdrafts, to the extent they are not offset by positive cash balances maintained by that Fund, at a rate equal to the custodian’s prime rate less 150 basis points. The “Earnings credit” line item, if shown, represents earnings on cash balances maintained by that Fund during the

period. Such interest expense and other custodian fees may be paid with these earnings.

Trustees and Chief Compliance Officer Fees. Fees paid to the Trustees can be paid in cash or deferred to a later date, at the election of each Trustee according to the Deferred Fee Agreement entered into between the Trust and the Trustee(s). Each Fund records its portion of the deferred fees as a liability on the Statement of Assets and Liabilities. All fees paid in cash plus any appreciation (depreciation) in the underlying deferred plan are shown on the Statement of Operations. Additionally, fees paid to the office of the Chief Compliance Officer of the Funds are shown on the Statement of Operations.

Indemnifications. The Trust’s organizational documents provide current and former Trustees and Officers with a limited indemnification against liabilities arising in connection with the performance of their duties to the Trust. In the normal course of business, the Trust may also enter into contracts that provide general indemnifications. The Trust’s maximum exposure under these arrangements is unknown and is dependent on future claims that may be made against the Trust. The risk of material loss from such claims is considered remote.

Concentration of Risk. Certain Funds may have a concentration of risk which includes, but is not limited to, investing in international securities. International investing involves additional risks including, but not limited to, currency fluctuations, political or economic conditions affecting the foreign country and differences in accounting standards and foreign regulations.

Other. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. Management has performed a review for subsequent events through the date this report was issued.

2. INVESTMENT MANAGEMENT AND PAYMENTS TO AFFILIATED PERSONS

Management Fees. IICO, a wholly owned subsidiary of Waddell & Reed Financial, Inc. (WDR), serves as the Trust’s investment manager. IICO provides investment advice, for which services it is paid a fee. The fee is payable by each Fund at the following annual rates and is accrued and paid monthly:

Fund	Net Asset Breakpoints	Annual Rate
Ivy Dividend Opportunities Fund	Up to \$1 Billion	0.70%
	Over \$1 Billion up to \$2 Billion	0.65%
	Over \$2 Billion up to \$3 Billion	0.60%
	Over \$3 Billion	0.55%
Ivy Micro Cap Growth Fund	Up to \$1 Billion	0.95%
	Over \$1 Billion up to \$2 Billion	0.93%
	Over \$2 Billion up to \$3 Billion	0.90%
	Over \$3 Billion	0.86%

Effective August 26, 2009, the fee is payable at the following annual rates for Ivy European Opportunities Fund:

Up to \$250 Million	0.90%
Over \$250 Million up to \$500 Million	0.85%
Over \$500 Million	0.75%

IICO has entered into Subadvisory Agreements with the following entities on behalf of certain Funds.

Under an agreement between IICO and Mackenzie Financial Corporation (Mackenzie), Mackenzie serves as subadvisor to Ivy Global Natural Resources Fund. Under an agreement between IICO and Mackenzie, Mackenzie also serves as subadvisor to Ivy Cundill Global Value Fund. Mackenzie Cundill Investment Management Ltd. (Cundill) is one of the companies that comprises The Cundill Division of Mackenzie and, under a Memorandum of Understanding with Mackenzie, serves as the investment subadvisor to, and as such provides investment advice to, and generally conducts the investment management program for, Ivy Cundill Global Value Fund. Wall Street Associates serves as subadvisor to Ivy Micro Cap Growth Fund. Advantus Capital Management, Inc. serves as subadvisor to Ivy Real Estate Securities Fund, Ivy Bond Fund and Ivy Mortgage Securities Fund. Each subadvisor makes investment decisions in accordance with the Fund's investment objectives, policies and restrictions under the supervision of IICO and the Board of Trustees. IICO pays all costs associated with retaining the subadvisors. Effective April 15, 2009, IICO serves as investment manager to Ivy International Balanced Fund. Prior to April 15, 2009, Templeton Investment Counsel, LLC (Templeton) served as subadvisor to Ivy International Balanced Fund. Effective July 1, 2009, IICO serves as investment manager to Ivy European Opportunities Fund. Prior to July 1, 2009, Henderson Global Investors (North America) Inc. served as subadvisor to Ivy European Opportunities Fund.

Accounting Services Fees. Pursuant to a Master Fund Accounting Services Agreement, IICO provides certain accounting and pricing services for each Fund. As of March 31, 2003, IICO assigned its responsibilities under the Accounting Services Agreement to Waddell & Reed Services Company, doing business as WI Services Company (WISC), an indirect subsidiary of WDR. WISC acts as the agent in providing bookkeeping and accounting services and assistance to the Trust, including maintenance of Fund records, pricing of Fund shares and preparation of certain shareholder reports. For these services, each Fund, other than Ivy Managed European/Pacific Fund and Ivy Managed International Opportunities Fund (the Ivy Managed Funds), pays WISC a monthly fee of one-twelfth of the annual fee shown in the following table:

Accounting Services Fee		
Average Net Asset Level (in millions)		Annual Fee Rate for Each Level
From \$ 0 to \$ 10		\$ 0
From \$ 10 to \$ 25		\$ 11.5
From \$ 25 to \$ 50		\$ 23.1
From \$ 50 to \$ 100		\$ 35.5
From \$ 100 to \$ 200		\$ 48.4
From \$ 200 to \$ 350		\$ 63.2
From \$ 350 to \$ 550		\$ 82.5
From \$ 550 to \$ 750		\$ 96.3
From \$ 750 to \$ 1,000		\$ 121.6
From \$ 1,000 and Over		\$ 148.5

In addition, for each class of shares in excess of one, each Fund pays WISC a monthly per-class fee equal to 2.5% of the monthly accounting services base fee.

Under the Accounting and Administrative Services Agreement for the Ivy Managed Funds, each Fund pays WISC, for its services, a monthly fee of one-twelfth of the annual fee shown in the following table:

Accounting Services Fee		
Average Net Asset Level (in millions)		Annual Fee Rate for Each Level
From \$ 0 to \$ 10		\$ 0
From \$ 10 to \$ 25		\$ 5.748
From \$ 25 to \$ 50		\$ 11.550
From \$ 50 to \$ 100		\$ 17.748
From \$ 100 to \$ 200		\$ 24.198
From \$ 200 to \$ 350		\$ 31.602
From \$ 350 to \$ 550		\$ 41.250
From \$ 550 to \$ 750		\$ 48.150
From \$ 750 to \$ 1,000		\$ 60.798
From \$ 1,000 and Over		\$ 74.250

In addition, for each class of shares in excess of one, each of the Ivy Managed Funds pays WISC a monthly per-class fee equal to 1.25% of the monthly accounting services base fee.

Administrative Fee. Each Fund also pays WISC a monthly fee at the annual rate of 0.01%, or one basis point, for the first \$1 billion of net assets with no fee charged for net assets in excess of \$1 billion. This fee is voluntarily waived by WISC until a Fund's net assets are at least \$10 million.

Shareholder Servicing. General. Under the Shareholder Servicing Agreement between the Trust and WISC, with respect to Class A, Class B, Class C, Class E and Advisor Class shares, for each shareholder account that was in existence at any time during the prior month, each Fund pays a monthly fee that ranges from \$1.5042 to \$1.6958. For Class R shares, each Fund pays a monthly fee equal to one-twelfth of 0.20 of 1% of the

average daily net assets of the class for the preceding month. For Class I and Class Y shares, each Fund pays a monthly fee equal to one-twelfth of 0.15 of 1% of the average daily net assets of the class for the preceding month. Each Fund also reimburses WISC for certain out-of-pocket costs for all classes.

Non-networked accounts. Each Fund pays WISC an annual fee (payable monthly) for each account of the Fund that is non-networked as shown above; however, WISC has agreed to reduce that fee if the number of total shareholder accounts within the Complex (Waddell & Reed Advisors Funds, Waddell & Reed InvestEd Portfolios, Ivy Funds and Ivy Funds, Inc.) reaches certain levels.

Networked accounts. For certain networked accounts (that is, those accounts whose Fund shares are purchased through certain financial intermediaries), WISC has agreed to reduce its per account fees charged to the Funds to \$0.50 per month per shareholder account. Additional fees may be paid by the Funds to those intermediaries. If the aggregate annual rate of the WISC transfer agent fee and the costs charged by the financial services companies exceeds \$18.00 per account for a Fund, WISC will reimburse the Fund the amount in excess of \$18.00.

Broker accounts. Certain broker-dealers that maintain shareholder accounts with each Fund through an omnibus account provide transfer agent and other shareholder-related services that would otherwise be provided by WISC if the individual accounts that comprise the omnibus account were opened by their beneficial owners directly. Each Fund may pay such broker-dealers a per account fee for each open account within the omnibus account, or a fixed rate fee, based on the average daily net asset value of the omnibus account (or a combination thereof).

Distribution and Service Plan. General. Under a Distribution and Service Plan for Class A, Class B, Class C, Class E, Class R and Class Y shares adopted by the Trust on behalf of each Fund (other than the Ivy Managed Funds) and a Distribution and Service Plan for Class A, Class B, Class C, Class E and Class Y shares adopted by the Trust on behalf of the Ivy Managed Funds, each Fund may pay certain amounts pursuant to Rule 12b-1 under the Investment Company Act of 1940.

Class A Shares. Each Fund may pay a distribution and/or service fee to Ivy Funds Distributors, Inc. (IFDI) in an amount not to exceed 0.25% of the Fund's average annual net assets attributable to that class. The fee is to be paid to reimburse IFDI (or compensate IFDI with respect to the Ivy Managed Funds, Ivy Micro Cap Growth Fund and Ivy Global Bond Fund) for amounts it expends in connection with the distribution of the Class A shares and/or provision of personal services to Fund shareholders and/or maintenance of shareholder accounts of that class.

Class B and Class C Shares. Each Fund may pay IFDI a service fee not to exceed 0.25% of the Fund's average annual net assets attributable to that class. The fee is to be paid to reimburse IFDI (or compensate IFDI with respect to the Ivy Managed

Funds, Ivy Micro Cap Growth Fund and Ivy Global Bond Fund) for amounts it expends in connection with the provision of personal services to Fund shareholders and/or maintenance of shareholder accounts. Each Fund may pay IFDI a distribution fee not to exceed 0.75% of the Fund's average annual net assets attributable to that class to compensate IFDI for its services in connection with the distribution of shares of that class. The Class B Plan and the Class C Plan each permit IFDI to receive compensation, through the distribution fee, for its distribution activities for that class.

Class E Shares. Each Fund may pay IFDI a fee up to 0.25% of the Fund's average annual net assets attributable to that class, paid daily, to compensate IFDI for its costs and expenses in connection with, either directly or through others, the distribution of the Class E shares, the provision of personal services to Class E shareholders and/or maintenance of Class E shareholder accounts.

Class R Shares. Ivy Global Natural Resources Fund and Ivy Real Estate Securities Fund may pay IFDI a fee of up to 0.50%, on an annual basis, of the average daily net assets of the Fund attributable to that class to compensate IFDI for, either directly or through third parties, distributing the Class R shares of that Fund, providing personal service to Class R shareholders and/or maintenance of Class R shareholder accounts.

Class Y Shares. Each Fund may pay IFDI a fee of up to 0.25%, on an annual basis, of the average daily net assets attributable to that class to compensate IFDI for, either directly or through third parties, distributing the Class Y shares of that Fund, providing personal service to Class Y shareholders and/or maintenance of Class Y shareholder accounts.

As described above, the Distribution and Service Plan adopted by each Fund (other than the Ivy Managed Funds, Ivy Micro Cap Growth Fund and Ivy Global Bond Fund) provides for the payment of a fee to IFDI to reimburse IFDI for amounts expended and further provides that expenses for a period not reimbursed due to expense limitations may be carried forward to subsequent periods to be reimbursed.

Effective April 1, 2010, the Trust adopted a new Distribution and Service Plan whereby fees will be paid to compensate IFDI. Under this new plan, unreimbursed amounts from prior periods may not be carried forward to subsequent periods. Accordingly, the Funds have not recorded a liability for any unreimbursed fees that existed at March 31, 2010.

Sales Charges. As principal underwriter for the Trust's shares, IFDI receives sales commissions (which are not an expense of the Trust) for Class A and Class E shares. A contingent deferred sales charge (CDSC) may be assessed against a shareholder's redemption amount of Class B, Class C or certain Class A and Class E shares and is paid to IFDI. During the fiscal year ended March 31, 2010, IFDI received the following amounts in sales commissions and CDSC:

	Gross Sales Commissions	CDSC			
		Class A	Class B	Class C	Class E
Ivy Dividend Opportunities Fund	\$ 249	\$ 3	\$ 10	\$ 8	\$ —
Ivy Micro Cap Growth Fund	175	—*	—*	—*	—
Ivy Small Cap Value Fund	315	1	5	2	—
Ivy Value Fund	51	—*	2	1	—
Ivy Managed European/Pacific Fund	170	—	1	—*	—
Ivy Managed International Opportunities Fund	299	1	3	—*	—
Ivy Cundill Global Value Fund	269	—*	47	1	—
Ivy European Opportunities Fund	291	1	23	—*	—
Ivy International Balanced Fund	310	—*	13	1	—
Ivy International Core Equity Fund	637	1	10	7	—
Ivy International Growth Fund	98	—*	8	1	—
Ivy Pacific Opportunities Fund	1,204	1	13	5	—
Ivy Balanced Fund	121	—	14	13	—
Ivy Global Natural Resources Fund	3,693	14	277	158	—
Ivy Real Estate Securities Fund	290	—*	6	—*	—
Ivy Bond Fund	219	—*	8	3	—
Ivy Global Bond Fund	174	—*	8	5	—
Ivy Mortgage Securities Fund	108	1	9	2	—

*Not shown due to rounding.

With respect to Class A, Class B, Class C and Class E shares, IFDI pays sales commissions and all expenses in connection with the sale of the Trust's shares, except for registration fees and related expenses. During the fiscal year ended March 31, 2010, the following amounts were paid by IFDI:

Ivy Dividend Opportunities Fund	\$ 296
Ivy Micro Cap Growth Fund	153
Ivy Small Cap Value Fund	352
Ivy Value Fund	73
Ivy Managed European/Pacific Fund	171
Ivy Managed International Opportunities Fund	249
Ivy Cundill Global Value Fund	291
Ivy European Opportunities Fund	299
Ivy International Balanced Fund	340
Ivy International Core Equity Fund	1,044
Ivy International Growth Fund	119
Ivy Pacific Opportunities Fund	1,327
Ivy Balanced Fund	221
Ivy Global Natural Resources Fund	5,590
Ivy Real Estate Securities Fund	304
Ivy Bond Fund	238
Ivy Global Bond Fund	323
Ivy Mortgage Securities Fund	113

Expense Reimbursements and/or Waivers. Fund and class expense limitations and related waivers/reimbursements for the fiscal year ended March 31, 2010 are as follows:

Fund Name	Share Class Name	Type of Expense Limit	Commencement Date	End Date	Expense Limit	Amount of Expense Reduction	Expense Reduced
Ivy Dividend Opportunities Fund

Any amounts due to the Funds as a reimbursement but not paid as of March 31, 2010 are shown as a receivable from affiliate on the Statement of Assets and Liabilities.

3. INVESTMENT VALUATIONS

Fair value is defined as the price that each Fund would receive upon selling an asset or would pay upon satisfying a liability in an orderly transaction between market participants at the measurement date. Accounting standards establish a framework for measuring fair value and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the factors that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. An individual investment's fair value measurement is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 – unadjusted quoted prices in active markets for identical securities

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments)

The following tables summarize the valuation of each Fund's investments by the above fair value hierarchy levels as of March 31, 2010:

Transfers from Level 2 to Level 3 occurred generally due to the lack of observable market data due to decreased market activity or information for these securities. Transfers from Level 3 to Level 2 occurred generally due to the increased availability of observable market data due to increased market activity or information. As shown above, transfers in and out of Level 3 represent the value at the later of the beginning of the fiscal period or the purchase date of the security.

Net realized gain (loss) and net unrealized appreciation (depreciation), shown on the reconciliation of Level 3 investments if applicable, are included on the Statement of Operations in net realized gain (loss) on investments in unaffiliated securities and in net change in unrealized appreciation (depreciation) on investments in unaffiliated securities, respectively. Additionally, the net change in unrealized appreciation for all Level 3 investments still held as of March 31, 2010, if applicable, is included on the Statement of Operations in net change in unrealized appreciation (depreciation) on investments in unaffiliated securities.

As shown above, the Funds may own different types of assets that are classified as Level 2 or Level 3. Assets classified as Level 2 can have a variety of observable inputs, including, but not limited to, benchmark yields, reported trades, broker quotes, benchmark securities, and bid/offer quotations. These observable inputs are collected and utilized, primarily by an independent pricing service, in different evaluated pricing approaches depending upon the specific asset to determine a value.

Securities' values included in the reconciliations above have been primarily determined through the use of a single quote (or multiple quotes) from dealer(s) in the securities using proprietary valuation models. These quotes involve significant unobservable inputs, and thus the related securities are classified as Level 3 investments.

4. INVESTMENT SECURITIES TRANSACTIONS

For the fiscal year ended March 31, 2010, the cost of purchases and the proceeds from maturities and sales of investment securities, other than U.S. Government and short-term securities, were as follows:

	Purchases	Sales
Ivy Dividend Opportunities Fund	\$ 102,428	\$ 104,834
Ivy Micro Cap Growth Fund	30,997	14,380
Ivy Small Cap Value Fund	203,799	166,145
Ivy Value Fund	45,566	39,056
Ivy Managed European/Pacific Fund	21,005	8,512
Ivy Managed International Opportunities Fund	36,369	12,209
Ivy Cundill Global Value Fund	109,668	178,682
Ivy European Opportunities Fund	226,605	242,017
Ivy International Balanced Fund	301,812	299,525
Ivy International Core Equity Fund	775,551	439,133
Ivy International Growth Fund	145,460	127,805
Ivy Pacific Opportunities Fund	553,043	437,977
Ivy Balanced Fund	89,030	103,898
Ivy Global Natural Resources Fund	5,405,024	4,795,189
Ivy Real Estate Securities Fund	166,055	168,063
Ivy Bond Fund	134,916	96,129
Ivy Global Bond Fund	81,816	15,655
Ivy Mortgage Securities Fund	3,791	32,713

Purchases of and proceeds from maturities and sales of U.S. Government securities were as follows:

	Purchases	Sales
Ivy Balanced Fund	\$ —	\$ 1,361
Ivy Bond Fund	508,386	484,578
Ivy Global Bond Fund	31,037	826
Ivy Mortgage Securities Fund	363,439	353,637

5. FEDERAL INCOME TAX MATTERS

For Federal income tax purposes, cost of investments owned at March 31, 2010 and the related unrealized appreciation (depreciation) were as follows:

Fund	Cost of investments	Gross appreciation	Gross depreciation	Net unrealized appreciation (depreciation)
Ivy Dividend Opportunities Fund	\$ 214,728	\$ 39,328	\$ 679	\$ 38,649
Ivy Micro Cap Growth Fund	23,922	5,175	387	4,788

Internal Revenue Code regulations permit each Fund to defer into its next fiscal year net capital losses or net long-term capital losses and currency losses incurred between each November 1 and the end of its fiscal year (post-October losses). Distributions shown above may be reported differently to individual shareholders.

Capital loss carryovers are available to offset future net realized gains incurred in the eight taxable years succeeding the loss year for Federal income tax purposes. The following tables show the totals by year in which the capital loss carryovers will expire if not utilized.

	Ivy Dividend Opportunities Fund	Ivy Small Cap Value Fund	Ivy Value Fund	Ivy Managed European/ Pacific Fund	Ivy Managed International Opportunities Fund	Ivy Cundill Global Value Fund

Net investment income dividends and capital gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences are due to differing treatments for items such as deferral of wash sales and post-October losses, foreign currency transactions, net operating losses and expiring capital loss carryovers.

At March 31, 2010, the following reclassifications were made: Ivy Dividend Opportunities Fund reclassified permanent differences relating to differing treatments of partnership transactions; Ivy Micro Cap Growth Fund reclassified permanent differences relating to differing treatments of PFIC transactions; Ivy Small Cap Value Fund reclassified permanent differences relating to differing treatments of net operating losses and partnership transactions; Ivy Value Fund reclassified permanent

differences relating to differing treatments of partnership transactions and return of capital; Ivy Managed European/Pacific Fund reclassified permanent differences relating to differing treatments of net operating losses and return of capital; Ivy Managed International Opportunities Fund reclassified permanent differences relating to differing treatments of return of capital; Ivy Cundill Global Value Fund reclassified permanent differences relating to differing treatments of return of capital; Ivy European Opportunities Fund reclassified permanent differences relating to differing treatments of PFIC transactions; Ivy International Balanced Fund reclassified permanent differences relating to differing treatments of net operating losses, foreign currency gains and losses and settlement payments received; Ivy International Core Equity Fund reclassified permanent differences relating to differing treatments

of settlement payments received; Ivy International Growth Fund reclassified permanent differences relating to differing treatments of expired capital loss carryovers and settlement payments received; Ivy Pacific Opportunities Fund reclassified permanent differences relating to differing treatments of net operating losses, expired capital loss carryovers, settlement payments received and PFIC transactions; Ivy Balanced Fund reclassified permanent differences relating to differing treatments of partnership transactions and mortgage-backed security paydowns; Ivy Global Natural Resources Fund reclassified

permanent differences relating to differing treatments of net operating losses, partnership transactions, expired capital loss carryovers and PFIC transactions; Ivy Bond Fund reclassified permanent differences relating to differing treatments of mortgage-backed security paydowns; Ivy Global Bond Fund reclassified permanent differences relating to differing treatments of mortgage-backed security paydowns and foreign currency gains and losses; and Ivy Mortgage Securities Fund reclassified permanent differences relating to differing treatments of mortgage-backed security paydowns.

6. MULTICLASS OPERATIONS

The Trust has authorized an unlimited number of no par value shares of beneficial interest of each class. Transactions in shares of beneficial interest were as follows:

7. DERIVATIVE INSTRUMENTS

During the fiscal year ended March 31, 2010, each Fund adopted an accounting standard that amended and expanded disclosures about derivative instruments and hedging activities. This standard requires qualitative disclosures about the objectives and strategies of derivative instruments, quantitative disclosures about the fair value amounts of and gains and losses on derivative instruments, and disclosures of credit-risk-related contingent features in hedging activities.

Forward Foreign Currency Contracts. Certain Funds may enter into forward foreign currency contracts (forward contracts) for the purchase or sale of a foreign currency at a negotiated rate at a future date. Forward contracts are reported on a schedule following the Schedule of Investments. Forward contracts will be valued daily based upon the closing prices of the forward currency rates determined at the close of the NYSE as provided by a bank, dealer or independent pricing service. The resulting unrealized appreciation and depreciation is reported in the Statement of Assets and Liabilities as a receivable or payable and in the Statement of Operations within the change in unrealized appreciation (depreciation). At contract close, the difference between the original cost of the contract and the value at the close date is recorded as a realized gain (loss) in the Statement of Operations.

Risks to a Fund include both market and credit risk. Market risk is the risk that the value of the forward contract will depreciate due to unfavorable changes in the exchange rates. Credit risk arises from the possibility that the counterparty will default. If the counterparty defaults, a Fund's loss will consist of the net amount of contractual payments that the Fund has not yet received.

Futures Contracts. Certain Funds may engage in buying and selling futures contracts. Upon entering into a futures contract, the Fund is required to deposit, in a segregated account, an amount equal to a varying specified percentage of the contract amount. This amount is known as the initial margin. Subsequent payments (variation margins) are made or received by the Fund each day, dependent on the daily fluctuations in the value of the underlying debt security or index.

Futures contracts are reported on a schedule following the Schedule of Investments. Securities held in collateralized accounts to cover initial margin requirements on open futures contracts are identified in the Schedule of Investments. Cash held by the broker to cover initial margin requirements on open futures contracts and the receivable and/or payable for the daily mark to market for the variation margin are noted in the Statement of Assets and Liabilities. The net change in unrealized appreciation (depreciation) is reported in the Statement of Operations. Realized gains (losses) are reported in the Statement of Operations at the closing or expiration of futures contracts.

Risks of entering into futures contracts include the possibility of loss of securities or cash held as collateral, that there may be an illiquid market where the Fund is unable to close the contract or enter into an offsetting position and, if used for hedging purposes, the risk that the price of the contract will correlate imperfectly with the prices of the Fund's securities.

Swap Agreements. Certain Funds may invest in swap agreements.

Credit default swaps involve the exchange of a fixed rate premium for protection against the loss in value of an underlying security in the event of a defined credit event, such as payment default or bankruptcy. Under a credit default swap one party acts as a guarantor by receiving the fixed periodic payment in exchange for the commitment to purchase the underlying security at par if the defined credit event occurs. A Fund may enter into credit default swaps in which either it or its counterparty act as the guarantor.

Total return swaps involve a commitment to pay periodic interest payments in exchange for a market-linked return based on a security or a basket of securities representing a variety of securities or a particular index. To the extent the total return of the security, index or other financial measure underlying the transaction exceeds or falls short of the offsetting interest rate obligation, the Fund will receive a payment from or make a payment to the counterparty.

Variance swaps involve a contract in which two parties agree to exchange cash flows based on the measured variance of a specified underlying security or index during a certain time period. On the trade date, the two parties agree on the strike price of the contract (the reference level against which cash flows are exchanged), as well as the number of units in the transaction and the length of the contract. Like an option contract, the value of a variance swap is influenced by both realized and implied volatility, as well as the passage of time. A Fund may enter into variance swaps to manage volatility risk.

The creditworthiness of firms with which a Fund enters into a swap agreement is monitored by IICO. If a firm's creditworthiness declines, the value of the agreement would likely decline, potentially resulting in losses. If a default occurs by the counterparty to such a transaction, the Fund will have contractual remedies pursuant to the agreement related to the transaction.

Option Contracts. Options purchased by a Fund are accounted for in the same manner as marketable portfolio securities. The cost of portfolio securities acquired through the exercise of call options is increased by the premium paid to purchase the call. The proceeds from securities sold through the exercise of put options are decreased by the premium paid to purchase the put.

When a Fund writes (sells) an option, an amount equal to the premium received by the Fund is recorded as a liability. The amount of the liability is subsequently adjusted to reflect the current market value of the option written. The current market value of an option is the last sales price on the principal exchange on which the option is traded or, in the absence of transactions, the mean between the bid and asked prices or at a value supplied by a broker-dealer. When an option expires on its stipulated expiration date or a Fund enters into a closing

purchase transaction, the Fund realizes a gain (or loss if the cost of a closing purchase transaction exceeds the premium received when the call option was sold) and the liability related to such option is extinguished. When a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether a Fund has realized a gain or loss. For each Fund, when a written put is exercised, the cost basis of the securities purchased by a Fund is reduced by the amount of the premium received.

Investments in options, whether purchased or written, involve certain risks. Writing put options and purchasing call options may increase a Fund's exposure to the underlying security (or basket of securities). With written options, there may be times when a Fund will be required to purchase or sell securities to meet its obligation under the option contract where the required action is not beneficial to the Fund, due to unfavorable movement of the market price of the underlying security (or basket of securities). Additionally, to the extent a Fund enters into over-the-counter (OTC) option transactions with counterparties, the Fund will be exposed to the risk that counterparties to these OTC transactions will be unable to meet their obligations under the terms of the transaction.

Collateral. The Fund may mitigate counterparty risk through credit support annexes (CSA) included with an International Swaps and Derivatives Association, Inc. (ISDA) Master Agreement which is the standard contract governing most derivative transactions between the Fund and each of its counterparties. The CSA allows the Fund to offset with its counterparty certain derivative financial instruments' payables and/or receivables with collateral, which is generally held by the Fund's custodian. The amount of collateral moved to/from applicable counterparties is based upon minimum transfer amounts specified in the CSA. To the extent amounts due to the Fund from its counterparties are not fully collateralized contractually or otherwise, the Fund bears the risk of loss from counterparty non-performance. See Note 1 "Segregation and Collateralization" for additional information with respect to collateral practices.

Objectives and Strategies

Ivy Small Cap Value Fund. The Fund's objective in using derivatives during the period was to gain exposure to certain market sectors that it cannot get through the purchase of equity securities. To achieve this objective, the Fund utilized options, both written and purchased, on an index in the sector it wished to gain exposure to.

There were no open derivative instruments as of March 31, 2010.

The effect of derivative instruments on the Statement of Operations for fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Equity	Net realized gain (loss) on investments in unaffiliated securities and written options	\$9	\$0

During the fiscal year ended March 31, 2010, the Fund's average number of purchased option contracts and written option contracts outstanding was less than 1.

Ivy Value Fund. The Fund's objective in using derivatives during the period was to generate additional income from written option premiums. To achieve these objectives, the Fund had primarily written put and call options on equity securities the Fund owned.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Equity	N/A	\$0	Written options at market value	\$77

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Equity	Net realized gain (loss) on written options/ Net change in unrealized appreciation depreciation on written options	\$341	\$(1)

During the fiscal year ended March 31, 2010, the Fund's average number of written option contracts outstanding was 2.

Ivy Cundill Global Value Fund. The Fund's objective in using derivatives during the period was to hedge the exposure to foreign currencies of securities held in the Fund. To achieve this objective, the Fund utilized forward contracts.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Foreign currency	Unrealized appreciation on forward foreign currency contracts	\$5,780	Unrealized depreciation on forward foreign currency contracts	\$578

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	\$(16,700)	\$7,755

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding for short forward contracts and long forward contracts was \$137,739 and \$134,951, respectively.

Ivy European Opportunities Fund. The Fund's objective in using derivatives during the period was to manage the exposure to various foreign currencies. To achieve this objective, the Fund utilized forward contracts to either increase or decrease exposure to a given currency.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Foreign currency	Unrealized appreciation on forward foreign currency contracts	\$586	Unrealized depreciation on forward foreign currency contracts	\$404

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	\$(309)	\$182

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding for short forward contracts and long forward contracts was \$9,195 and \$9,193, respectively.

Ivy International Balanced Fund. The Fund's objective in using derivatives during the period was to manage the exposure to various foreign currencies. To achieve this objective, the Fund utilized forward contracts to either increase or decrease exposure to a given currency.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Foreign currency	Unrealized appreciation on forward foreign currency contracts	\$538	N/A	\$0

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	\$(905)	\$2,140

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding for short forward contracts and long forward contracts was \$10,349 and \$10,340, respectively.

Ivy International Core Equity Fund. The Fund's objective in using derivatives during the period was to manage the exposure to various foreign currencies. To achieve this objective, the Fund utilized forward contracts to either increase or decrease exposure to a given currency.

There were no open derivative instruments as of March 31, 2010.

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	\$658	\$(382)

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding for short forward contracts and long forward contracts was \$1,352 and \$1,416, respectively.

Ivy International Growth Fund. The Fund's objective in using derivatives during the period was to manage the exposure to various foreign currencies. To achieve this objective, the Fund utilized forward contracts to either increase or decrease exposure to a given currency.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Foreign currency	Unrealized appreciation on forward foreign currency contracts	\$1,554	N/A	\$0

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	\$(532)	\$1,794

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding for short forward contracts and long forward contracts was \$13,387 and \$13,561, respectively.

Ivy Pacific Opportunities Fund. The Fund's objectives in using derivatives during the period included hedging market risk on equity securities, managing exposure to various foreign currencies, and generating additional income from written option premiums. To achieve the objective of hedging market risk on equity securities, the Fund utilized futures and total return swaps on foreign equity indices. To manage foreign currency exposure, the Fund utilized forward contracts to decrease exposure to a given currency. To generate income, the Fund had primarily written put and call options on securities the Fund owned.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Foreign currency	Unrealized appreciation on forward foreign currency contracts	\$1,751	N/A	\$0

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Equity	Net realized gain (loss) on investments in unaffiliated securities, written options, futures contracts and swap agreements/Net change in unrealized appreciation (depreciation) on written options and futures contracts	\$ (8,914)	\$ (130)
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	(737)	1,469
Total		<u>\$ (9,651)</u>	<u>\$ 1,339</u>

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding and market value outstanding for forward contracts and futures contracts, respectively, were as follows: short forward contracts – \$22,081, long forward contracts – \$21,920, short futures contracts – \$2,364. Additionally, the Fund's average number of purchased option contracts and written option contracts outstanding was 1 and 3,655, respectively.

Ivy Global Natural Resources Fund. The Fund's objectives in using derivatives during the period were to hedge market risk on equity securities, increase exposure to specific sectors or companies, and manage exposure to various foreign currencies. To achieve the objective of hedging market risk and increasing exposure to equity markets, the Fund utilized futures on equity indices and purchased option contracts on individual equity securities. To manage foreign currency exposure, the Fund utilized forward contracts to either increase or decrease exposure to a given currency.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Equity	Investments in unaffiliated securities	\$ 323,700	N/A	\$ 0
Foreign currency	Unrealized appreciation on forward foreign currency contracts	2,039	Unrealized depreciation on forward foreign currency contracts	5,468
Total		<u>\$ 325,739</u>		<u>\$ 5,468</u>

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Equity	Net realized gain (loss) on investments in unaffiliated securities and futures contracts/ Net change in unrealized appreciation (depreciation) on investments in unaffiliated securities	\$(85,137)	\$34,861
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	(11,239)	(1,347)
Total		<u>\$(96,376)</u>	<u>\$33,514</u>

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding and market value outstanding for forward contracts and futures contracts, respectively, were as follows: short forward contracts – \$136,226, long forward contracts – \$135,829, short futures contracts – \$237,372. Additionally, the Fund's average number of purchased option contracts outstanding was 228.

Ivy Bond Fund. The Fund's objective in using derivatives during the period was to adjust the overall duration of the portfolio. To achieve this objective, the Fund primarily utilized Treasury futures contracts of varying lengths to either shorten or lengthen, as determined by the Fund's manager, the duration of the Fund.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Interest rate	Variation margin receivable	\$42	Variation margin payable	\$41

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Interest rate	Net realized gain (loss) on futures contracts/ Net change in unrealized appreciation (depreciation) on futures contracts	\$618	\$(200)

During the fiscal year ended March 31, 2010, the Fund's average market value outstanding for short futures contracts and long futures contracts was \$12,225 and \$12,736, respectively.

Ivy Global Bond Fund. The Fund's objective in using derivatives during the period was to manage the exposure to various foreign currencies. To achieve this objective, the Fund utilized forward contracts to either hedge a position held by the Fund or to gain exposure to a currency where a foreign bond is not available.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Foreign currency	Unrealized appreciation on forward foreign currency contracts	\$24	Unrealized depreciation on forward foreign currency contracts	\$286

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Foreign currency	Net realized gain (loss) on forward foreign currency contracts/Net change in unrealized appreciation (depreciation) on forward foreign currency contracts	\$(145)	\$(860)

During the fiscal year ended March 31, 2010, the Fund's average principal amount outstanding for short forward contracts and long forward contracts was \$10,009 and \$9,817, respectively.

Ivy Mortgage Securities Fund. The Fund's objective in using derivatives during the period was to adjust the overall duration of the portfolio. To achieve this objective, the Fund primarily utilized Treasury futures contracts of varying lengths to either shorten or lengthen, as determined by the Fund's subadvisor, the duration of the Fund.

Fair values of derivative instruments as of March 31, 2010:

Type of Derivative	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Interest rate	N/A	\$0	Variation margin payable	\$13

The effect of derivative instruments on the Statement of Operations for the fiscal year ended March 31, 2010:

Type of Derivative	Location of Gain (Loss) on Derivatives Recognized in Income	Realized Gain (Loss) on Derivatives Recognized in Income	Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized in Income
Interest rate	Net realized gain (loss) on futures contracts/ Net change in unrealized appreciation (depreciation) on futures contracts	\$285	\$502

During the fiscal year ended March 31, 2010, the Fund's average market value outstanding for short futures contracts was \$15,182.

8. COMMITMENT

In connection with Ivy Pacific Opportunities Fund's investment in Vietnam Azalea Fund Limited (VAF), the Fund is contractually committed to provide additional capital of up to \$1,696 if and when VAF requests such contributions or draw downs. The total commitment is limited to \$5,000. At March 31, 2010, Ivy Pacific Opportunities Fund had made a total contribution of \$3,304. No public market currently exists for the shares of VAF nor are the shares listed on any securities exchange. VAF intends to become listed within one year after the final commitment has been drawn down. VAF's investment strategy is to make minority investments in future blue-chip Vietnamese companies that are already listed or intend to be listed in the next 24 months.

Outstanding at March 31, 2010	—	\$ —

11. REGULATORY AND LITIGATION MATTERS

Ivy International Growth Fund received \$616 during the fiscal year ended March 31, 2010 as a result of the distribution of funds relating to the settlement from third party late trading and market timing activities related to the Fund. This amount is included on the Statement of Operations in net realized gain (loss) on investments in unaffiliated securities.

12. SUBSEQUENT EVENT

On April 1, 2010, each series of Ivy Funds was reorganized into a corresponding new series of Ivy Funds, a Delaware statutory trust. These Ivy Funds reorganizations were approved by the shareholders of each series of Ivy Funds at joint shareholder meetings held on January 15, 2009. Additionally, on April 1, 2010, all Advisor class shares were converted to Class I shares.

To the Shareholders and Board of Trustees of Ivy Funds:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Ivy Dividend Opportunities Fund, Ivy Small Cap Value Fund, Ivy Value Fund, Ivy Managed European/Pacific Fund, Ivy Managed International Opportunities Fund, Ivy Cundill Global Value Fund, Ivy European Opportunities Fund, Ivy International Balanced Fund, Ivy International Core Equity Fund, Ivy International Growth Fund, Ivy Pacific Opportunities Fund, Ivy Balanced Fund, Ivy Global Natural Resources Fund, Ivy Real Estate Securities Fund, Ivy Bond Fund, and Ivy Mortgage Securities Fund, sixteen of the funds constituting Ivy Funds (the "Trust"), as of March 31, 2010, and the related statements of operations for the fiscal year then ended, the statements of changes in net assets for each of the two fiscal years in the period then ended, and the financial highlights for each of the fiscal periods presented. We have also audited the accompanying statements of assets and liabilities, including the schedules of investments, of Ivy Micro Cap Growth Fund and Ivy Global Bond, two of the funds constituting the Trust, as of March 31, 2010, and the related statements of operations for the fiscal year then ended, and the statements of changes in net assets and the financial highlights for the fiscal year then ended and for the fiscal periods from February 17, 2009 (commencement of operations) through March 31, 2009 for Ivy Micro Cap Growth Fund and from April 4, 2008 (commencement of operations) through March 31, 2009 for Ivy Global Bond Fund. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Trust is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2010, by correspondence with the custodian, brokers, and transfer agent; where replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the portfolios constituting Ivy Funds as of March 31, 2010, the results of their operations for the fiscal year then ended, the changes in their net assets for each of the fiscal periods presented, and the financial highlights for each of the fiscal periods presented, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

Ivy Balanced Fund	—	—
Ivy Global Natural Resources Fund	3,451,474	34,726,979
Ivy Real Estate Securities Fund	—	—
Ivy Bond Fund	—	—
Ivy Global Bond Fund	—	—
Ivy Mortgage Securities Fund	—	—

The tax status of dividends paid and the pass-through of foreign taxes paid will be reported to you on Form 1099-DIV after the close of the applicable calendar year.

BOARD OF TRUSTEES AND OFFICERS

Ivy Funds

The Trust is governed by the Board of Trustees (the Board). A majority of the Board members are not “interested persons” as defined in Section 2(a)(19) of the 1940 Act and therefore qualify as Disinterested Trustees. The Board elects the officers who are responsible for administering the Funds’ day-to-day operations. The members of the Board are also Directors for, and similarly oversee the operations of, each of the 14 funds in Ivy Funds, Inc. which, together with the 18 Funds in the Ivy Funds comprise the Ivy Family of Funds. The Waddell & Reed Fund Complex (Fund Complex) is comprised of the Ivy Family of Funds and the Advisors Fund Complex, which is comprised of each of the funds in the Waddell & Reed Advisors Funds (20 funds), Ivy Funds Variable Insurance Portfolios (24 funds) and Waddell & Reed InvestEd Portfolios (3 funds). Jarold W. Boettcher, Joseph Harroz, Jr., Henry J. Herrmann and Eleanor B. Schwartz also

serve as trustees of each of the funds in the Advisors Fund Complex.

Joseph Harroz, Jr. serves as Independent Chair of the Trust’s Board and of the Board of Directors of Ivy Funds, Inc.

A trustee serves until his or her successor is elected and qualified or until his or her earlier death, resignation or removal. The Board appoints officers and delegates to them the management of the day-to-day operations of each of the Funds, based on policies reviewed and approved by the Board, with general oversight by the Board.

The Statement of Additional Information (SAI) for the Trust includes additional information about the Trust’s Trustees. The SAI is available without charge, upon request by calling 1.800.777.6472. It is also available on the Ivy Funds website, www.ivyfund.com.

ANNUAL PRIVACY NOTICE

Ivy Funds

The following privacy notice is issued by Ivy Funds (the Funds), Ivy Investment Management Company (IICO) and Ivy Funds Distributor, Inc. (IFDI).

Information Collected

We collect nonpublic personal information about you from your account application and other forms that you may deliver to us, and from your transactions with us and our affiliates. This is information that regulators consider necessary for the proper servicing of your account. In order to effect your transactions and service your account properly, we may disclose all of the information that we collect, as described above, to firms that assist us in servicing your account, such as our transfer agent.

Confidentiality of Information Collected

All records containing your nonpublic personal information are kept at our various service providers. These entities include IICO, IFDI and our transfer agent and administrative services provider. We require these affiliates, and any non-affiliated service providers, to protect the confidentiality of your information and to use the information only for the purposes for which disclosure to them is made. The Funds, IICO, IFDI and other service providers restrict access to nonpublic personal information about you to those employees who need to know that information to provide products and services to you and maintain physical, electronic, and procedural safeguards that comply with federal standards to maintain the security of your nonpublic personal information.

Disclosure of Information in Limited Circumstances

We do not disclose nonpublic personal information about present or former customers to nonaffiliated third parties, except as permitted or required by law. In connection with servicing your account, your nonpublic personal information may be shared among the entities named in this notice, their affiliates, and non-affiliates, including a transfer agent or other service companies. We will adhere to the policies and practices above for both current and former customers.

PROXY VOTING INFORMATION

Ivy Funds

Proxy Voting Guidelines

A description of the policies and procedures Ivy Funds uses to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling 800.777.6472 and (ii) on the Securities and Exchange Commission's (SEC) website at www.sec.gov.

Proxy Voting Records

Information regarding how Ivy Funds voted proxies relating to portfolio securities during the most recent 12 month period ending June 30 is available on Form N-PX through the Ivy Funds' website at www.ivyfund.com and on the SEC's website at www.sec.gov.

QUARTERLY PORTFOLIO SCHEDULE INFORMATION

Ivy Funds

A complete schedule of portfolio holdings for the first and third quarters of each fiscal year is filed with the Securities and Exchange Commission (SEC) on the Trust's Form N-Q. This form may be obtained in the following ways:

- On the SEC's website at www.sec.gov.
- For review and copy at the SEC's Public Reference Room in Washington, DC. Information on the operations of the Public Reference Room may be obtained by calling 1.800.SEC.0330.
- On the Ivy Funds' website at www.ivyfund.com.

HOUSEHOLDING NOTICE

Ivy Funds

If you currently receive one copy of the shareholder reports and prospectus for your household (even if more than one person in your household owns shares of the Trust) and you would prefer to receive separate shareholder reports and prospectuses for each account holder living at your address, you can do either of the following:

Fax your request to 800.532.2749.

Write to us at the address listed on the back cover.

Please list each account for which you would like to receive separate shareholder reports and prospectus mailings. We will resume sending separate documents within 30 days of receiving your request.

TO ALL TRADITIONAL IRA PLANHOLDERS

Ivy Funds

As required by law, we are hereby providing notice to you that income tax may be withheld automatically from any distribution or withdrawal from a traditional IRA. A Fund is generally required to withhold taxes unless you make a written election not to have taxes withheld. The election may be made on the distribution/withdrawal form provided by Waddell & Reed, Inc. which can be obtained from your Waddell & Reed representative or by submitting Internal Revenue Service Form W-4P. Once made, an election can be revoked by providing written notice to Waddell & Reed, Inc. If you elect not to have tax withheld you may be required to make payments of estimated tax. Penalties may be imposed by the IRS if withholding and estimated tax payments are not adequate.
