## THE DREYFUS/LAUREL FUNDS TRUST

### DREYFUS TAX MANAGED BALANCED FUND

#### STATEMENT OF ADDITIONAL INFORMATION JANUARY 1, 2007

---

This Statement of Additional Information ("SAI"), which is not a prospectus, supplements and should be read in conjunction with the current Prospectus of Dreyfus Tax Managed Balanced Fund (the "Fund"), dated January 1, 2007, as it may be revised from time to time. The Fund is a separate portfolio of The Dreyfus/Laurel Funds Trust (the "Trust"), an open-end management investment company, known as a mutual fund, that is registered with the Securities and Exchange Commission ("SEC"). To obtain a copy of the Fund's Prospectus, please call your financial adviser, write to the Fund at 144 Glenn Curtiss Boulevard, Uniondale, New York 11556-0144, visit [www.dreyfus.com](http://www.dreyfus.com), or call one of the following numbers:

## DESCRIPTION OF THE TRUST AND FUND

The Trust was organized as a business trust under the laws of the Commonwealth of Massachusetts on March 30, 1979. The Trust is an open-end management investment company comprised of separate portfolios, including the Fund, each of which is treated as a separate fund.

The Dreyfus Corporation (the "Manager" or "Dreyfus") serves as the Fund's investment adviser. The Manager has engaged Fayez Sarofim & Co. (the "Sub-Adviser"), to serve as the Fund's sub-investment adviser with respect to the equity portion of the Fund's portfolio and to provide day-to-day management of the Fund's equity investments, subject to the supervision of the Manager. The Manager and Sub-Adviser are referred to collectively as the "Advisers."

Dreyfus Service Corporation (the "Distributor") is the distributor of the Fund's shares.

### Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund's Prospectus.

Municipal Bonds. The Fund normally invests the majority of its assets in debt obligations issued by states, territories and possessions of the United States and the District of Columbia and their political subdivisions, agencies and instrumentalities, or multistate agencies or authorities, and certain other specified securities, the interest from which is, in the opinion of bond counsel to the issuer, exempt from Federal income tax ("Municipal Bonds"). Municipal Bonds generally include debt obligations issued to obtain funds for various public purposes as well as certain industrial development bonds issued by or on behalf of public authorities. Municipal Bonds are classified as general obligation bonds, revenue bonds and notes. General obligation bonds are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue bonds are payable from the revenue derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source, but not from the general taxing power. Tax exempt industrial development bonds, in most cases, are revenue bonds that do not carry the pledge of the credit of the issuing municipality, but generally are guaranteed by the corporate entity on whose behalf they are issued. Notes are short-term instruments which are obligations of the issuing municipalities or agencies and are sold in anticipation of a bond sale, collection of taxes or receipt of other revenues. Municipal Bonds include municipal lease/purchase agreements, which are similar to installment purchase contracts for property or equipment issued by municipalities. Municipal Bonds bear fixed, floating or variable rates of interest, which are determined in some instances by formulas under which the securities' interest rate will change directly or inversely to changes in interest rates or an index, or multiples thereof, in many cases subject to a maximum and minimum. Certain Municipal Bonds are subject to redemption at a date earlier than their stated maturity pursuant to call options, which may be separated from the related security and purchased and sold separately.

The yields on Municipal Bonds are dependent on a variety of factors, including general economic and monetary conditions, money market factors, conditions in the Municipal Bond market, size of a particular offering, maturity of the obligation and rating of the issue.

Municipal Bonds include certain private activity bonds (a type of revenue bond), the income from which is subject to the Federal alternative minimum tax (AMT). While the Fund is permitted to invest in such Municipal Bonds, the Fund currently is managed so that income paid by the Fund from its portfolio of Municipal Bonds will not be subject to the Federal AMT.

Certain Tax Exempt Obligations. The Fund may purchase floating and variable rate demand notes and bonds, which are tax exempt obligations ordinarily having stated maturities in excess of one year, but which permit the holder to demand payment of principal at any time or at specified intervals. Variable rate demand notes include master demand notes, which are obligations that permit the Fund to invest fluctuating amounts, at varying rates of interest, pursuant to direct arrangements between the Fund, as lender, and the borrower. These obligations permit daily changes in the amount borrowed. Because these obligations are direct lending arrangements between the lender and borrower, it is not contemplated that such instruments generally will be traded, and there generally is no established secondary market for these obligations, although they are redeemable at face value, plus accrued interest. Accordingly, where these obligations are not secured by letters of credit or other credit support arrangements, the Fund's right to redeem is dependent on the ability of the borrower to pay principal and interest on demand. Each obligation purchased by the Fund will meet the quality criteria established for the purchase of Municipal Bonds.

Tax Exempt Participation Interests. The Fund may purchase from financial institutions participation interests in Municipal Bonds (such as industrial development bonds and municipal lease/purchase agreements). A participation interest gives the Fund an undivided interest in the Municipal Bond in the proportion that the Fund's participation interest bears to the total principal amount of the Municipal Bond. These instruments may have fixed, floating or variable rates of interest. If the participation interest is unrated, it will be backed by an irrevocable letter of credit or guarantee of a bank that the Manager has determined meets prescribed quality standards for banks, or the payment obligation otherwise will be collateralized by U.S. Government securities. For certain participation interests, the Fund will have the right to demand payment, on not more than seven days' notice, for all or any part of the Fund's participation interest in the Municipal Bond, plus accrued interest. As to these instruments, the Fund intends to exercise its right to demand payment only upon a default under the terms of the Municipal Bond, as needed to provide liquidity to meet redemptions, or to maintain or improve the quality of its investment portfolio.

Municipal lease obligations or installment purchase contract obligations (collectively, "lease obligations") have special risks not ordinarily associated with Municipal Bonds. Although lease obligations do not constitute general obligations of the municipality for which the municipality's taxing power is pledged, a lease obligation ordinarily is backed by the municipality's covenant to budget for, appropriate and make the payments due under the lease obligation. However, certain lease obligations in which the Fund may invest may contain "non-appropriation" clauses, which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. Although "non-appropriation" lease obligations are secured by the leased property, disposition of the property in the event of foreclosure might prove difficult. Certain lease obligations may be considered illiquid. Determination as to the liquidity of such securities is made in accordance with guidelines established by the Trust's Board. Pursuant to such guidelines, the Board has directed the Manager to monitor carefully the Fund's investment in such securities with particular regard to: (1) the

frequency of trades and quotes for the lease obligation; (2) the number of dealers willing to purchase or sell the lease obligation and the number of other potential buyers; (3) the willingness of dealers to undertake to make a market in the lease obligation; (4) the nature of the marketplace trades, including the time needed to dispose of the lease obligation, the method of soliciting offers and the mechanics of transfer; and (5) such other factors concerning the trading market for the lease obligation as the Manager may deem relevant. In addition, in evaluating the liquidity and credit quality of a lease obligation that is unrated, the Trust's Board has directed the Manager to consider: (a) whether the lease can be canceled; (b) what assurance there is that the assets represented by the lease can be sold; (c) the strength of the lessee's general credit (e.g., its debt, administrative, economic, and financial characteristics); (d) the likelihood that the municipality will discontinue appropriating funding for the leased property because the property is no longer deemed essential to the operations of the municipality (e.g., the potential for an "event of nonappropriation"); (e) the legal recourse in the event of failure to appropriate; and (f) such other factors concerning credit quality as the Manager may deem relevant. The Fund will not invest more than 15% of the value of its net assets at the time of purchase in lease obligations that are illiquid and in other illiquid securities.

Tender Option Bonds. The Fund may purchase tender option bonds. A tender option bond is a Municipal Bond (generally held pursuant to a custodial arrangement) having a relatively long maturity and bearing interest at a fixed rate substantially higher than prevailing short-term tax exempt rates, that has been coupled with the agreement of a third party, such as a bank, broker-dealer or other financial institution, pursuant to which such institution grants the security holders the option, at periodic intervals, to tender their securities to the institution and receive the face value thereof. As consideration for providing the option, the financial institution receives periodic fees equal to the difference between the Municipal Bond's fixed coupon rate and the rate, as determined by a remarketing or similar agent at or near the commencement of such period, that would cause the securities, coupled with the tender option, to trade at par on the date of such determination. Thus, after payment of this fee, the security holder effectively holds a demand obligation that bears interest at the prevailing short-term tax exempt rate. The Manager, on behalf of the Fund, will consider on an ongoing basis the creditworthiness of the issuer of the underlying Municipal Bond, of any custodian and of the third party provider of the tender option. In certain instances and for certain tender option bonds, the option may be terminable in the event of a default in payment of principal or interest on the underlying Municipal Bond and for other reasons.

The Fund will purchase tender option bonds only when the Manager is satisfied that the custodial and tender option arrangements, including the fee payment arrangements, will not adversely affect the tax exempt status of the underlying Municipal Bonds and that payment of any tender fees will not have the effect of creating taxable income for the Fund. Based on the tender option bond agreement, the Fund expects to be able to value the tender option bond at par; however, the value of the instrument will be monitored to assure that it is valued at fair value.

Custodial Receipts. The Fund may purchase custodial receipts representing the right to receive certain future principal and interest payments on Municipal Bonds which underlie the custodial receipts. A number of different arrangements are possible. In a typical custodial receipt arrangement, an issuer or a third party owner of Municipal Bonds deposits such obligations with a custodian in exchange for two classes of custodial receipts. The two classes have different characteristics, but, in each case, payments on the two classes are based on payments received on

the underlying Municipal Bonds. One class has the characteristics of a typical auction rate security, where at specified intervals its interest rate is adjusted, and ownership changes, based on an auction mechanism. The interest rate on this class generally is expected to be below the coupon rate of the underlying Municipal Bonds and generally is at a level comparable to that of a Municipal Bond of similar quality and having a maturity equal to the period between interest rate adjustments. The second class bears interest at a rate that exceeds the interest rate typically borne by a security of comparable quality and maturity; this rate also is adjusted, but in this case inversely to changes in the rate of interest of the first class. The aggregate interest paid with respect to the two classes will not exceed the interest paid by the underlying Municipal Bonds. The value of the second class and similar securities should be expected to fluctuate more than the value of a Municipal Bond of comparable quality and maturity, which would increase the volatility of the Fund's net asset value. These custodial receipts are sold in private placements. The Fund also may purchase directly from issuers, and not in a private placement, Municipal Bonds having characteristics similar to custodial receipts. These securities may be issued as part of a multi-class offering and the interest rate on certain classes may be subject to a cap or floor.

Inverse Floaters. The Fund may invest in residual interest Municipal Bonds whose interest rates bear an inverse relationship to the interest rate on another security or the value of an index ("inverse floaters"). An investment in inverse floaters may involve greater risk than an investment in a fixed-rate Municipal Bond. Because changes in the interest rate on the other security or index inversely affect the residual interest paid on the inverse floater, the value of an inverse floater is generally more volatile than that of a fixed-rate Municipal Bond. Inverse floaters have interest rate adjustment formulas which generally reduce or, in the extreme, eliminate the interest paid to the Fund when short-term interest rates rise, and increase the interest paid to the Fund when short-term interest rates fall. Although volatile, inverse floaters typically offer the potential for yields exceeding the yields available on fixed-rate Municipal Bonds with comparable credit quality, coupon, call provisions and maturity. These securities usually permit the investor to convert the floating rate to a fixed rate (normally adjusted downward), and this optional conversion feature may provide a partial hedge against rising rates if exercised at an opportune time.

Pre-Refunded Municipal Bonds. The Fund may invest in pre-refunded Municipal Bonds. The principal and interest on pre-refunded Municipal Bonds are no longer paid from the original revenue source for the securities. Instead, the source of such payments is typically an escrow fund consisting of U.S. government securities. The assets in the escrow fund are derived from the proceeds of refunding bonds issued by the same issuer as the pre-refunded Municipal Bonds. Issuers of Municipal Bonds use this advance refunding technique to obtain more favorable terms with respect to bonds that are not yet subject to call or redemption by the issuer. For example, advance refunding enables the issuer to refinance debt at lower market interest rates, restructure debt to improve cash flow or eliminate restrictive covenants in the indenture or other governing instrument for the pre-refunded Municipal Bonds. However, except for a change in the revenue source from which principal and interest payments are made, the pre-refunded Municipal Bonds remain outstanding on their original terms until they mature or are redeemed by the issuer.

Mortgage-Backed Municipal Securities. The Fund may invest in Municipal Bonds of issuers that derive revenues from mortgage loans on multiple family residences, retirement housing or housing projects for low- to moderate-income families. Certain of such housing bonds may be single family mortgage revenue bonds issued for the purpose of acquiring from originating financial institutions

notes secured by mortgages on residences located within the issuer's boundaries. Mortgage loans are generally partially or completely prepaid prior to their final maturities as a result of events such as sale of the mortgaged premises, default, condemnation or casualty loss. Because these bonds are subject to extraordinary mandatory redemption in whole or in part from such prepayments of mortgage loans, a substantial portion of such bonds will probably be redeemed prior to their scheduled maturities or even prior to their ordinary call dates. Extraordinary mandatory redemption without premium could also result from the failure of the originating financial institutions to make mortgage loans in sufficient amounts within a specified time period. The ability of these issuers to make payments on bonds depends on such factors as rental income, occupancy levels, operating expenses, mortgage default rates, taxes, government regulations and appropriation of subsidies.

Special Taxing Districts. The Fund may invest in Municipal Bonds issued in connection with special taxing districts. Special taxing districts are organized to plan and finance infrastructure development to induce residential, commercial and industrial growth and redevelopment. The bond financing methods such as tax increment finance, tax assessment, special services district and Mello-Roos bonds, generally are payable solely from taxes or other revenues attributable to the specific projects financed by the bonds without recourse to the credit or taxing power of related or overlapping municipalities. They often are exposed to real estate development-related risks and can have more taxpayer concentration risk than general tax-supported bonds, such as general obligation bonds. Further, the fees, special taxes, or tax allocations and other revenues that are established to secure such financings generally are limited as to the rate or amount that may be levied or assessed and are not subject to increase pursuant to rate covenants or municipal or corporate guarantees. The bonds could default if development failed to progress as anticipated or if larger taxpayers failed to pay the assessments, fees and taxes as provided in the financing plans of the districts.

Collateralized Debt Obligations. The Fund may invest in collateralized debt obligations ("CDOs"), which are securitized interests in pools of - generally non-mortgage - assets. Assets called collateral usually comprise loans or debt instruments. A CDO may be called a collateralized loan obligation (CLO) or collateralized bond obligation (CBO) if it holds only loans or bonds, respectively. Investors bear the credit risk of the collateral. Multiple tranches of securities are issued by the CDO, offering investors various maturity and credit risk characteristics. Tranches are categorized as senior, mezzanine, and subordinated/equity, according to their degree of credit risk. If there are defaults or the CDO's collateral otherwise underperforms, scheduled payments to senior tranches take precedence over those of mezzanine tranches, and scheduled payments to mezzanine tranches take precedence over those to subordinated/equity tranches. Senior and mezzanine tranches are typically rated, with the former receiving ratings of A to AAA/Aaa and the latter receiving ratings of B to BBB/Baa. The ratings reflect both the credit quality of underlying collateral as well as how much protection a given tranche is afforded by tranches that are subordinate to it.

Auction Rate Securities. The Fund may invest in auction rate securities, including auction rate Municipal Bonds and auction rate preferred securities issued by closed-end investment companies that invest primarily in Municipal Bonds (collectively, "auction rate securities"). Provided that the auction mechanism is successful, auction rate securities usually permit the holder to sell the securities in an auction at par value at specified intervals. The dividend is reset by a "Dutch" auction in which bids are made by broker-dealers and other institutions for a certain amount of securities at a specified minimum yield. The dividend rate set by the auction is the lowest interest or dividend rate that covers all securities offered for sale. While this process is designed to permit

auction rate securities to be traded at par value, there is some risk that an auction will fail due to insufficient demand for the securities. The Fund will take the time remaining until the next scheduled auction date into account for the purpose of determining the securities' duration. The Fund's investments in auction rate securities of closed-end funds are subject to the limitations on investments in other investment companies prescribed by the Investment Company Act of 1940, as amended (the "1940 Act"). See "Investment Companies" below. Dividends received by the Fund on such auction rate Municipal Bonds will not be eligible for treatment as tax-qualified dividends.

Credit Enhancement. The Fund may invest in securities that have credit enhancement. Credit enhancement consists of an arrangement in which a company agrees to pay amounts due on a fixed income security if the issuer defaults. In some cases, the company providing credit enhancement makes all payments directly to the security holders and receives reimbursement from the issuer. Normally, the credit enhancer has greater financial resources and liquidity than the issuer. For this reason, the Manager usually evaluates the credit risk of a fixed income security with credit enhancement based solely upon its credit enhancement.

Ratings of Municipal Bonds. The Fund will only invest in Municipal Bonds rated at least Baa by Moody's Investors Service, Inc. ("Moody's") or BBB by Standard & Poor's Ratings Services ("S&P") or Fitch Ratings ("Fitch" and, together with Moody's and S&P, the "Rating Agencies"). The Fund also may invest in Municipal Bonds which, while not rated, are determined by the Manager to be of comparable quality to the rated Municipal Bonds in which the Fund may invest. The Fund seeks to maintain a minimum average credit quality of "AA/Aa" with respect to its portfolio of Municipal Bonds.

Subsequent to its purchase by the Fund, an issue of rated Municipal Bonds may cease to be rated or its rating may be reduced below the minimum required for purchase by the Fund. Neither event will require the sale of such Municipal Bonds by the Fund, but the Manager will consider such event in determining whether the Fund should continue to hold the Municipal Bonds. To the extent that the ratings given by the Rating Agencies for Municipal Bonds may change as a result of changes in such organizations or their rating systems, the Fund will attempt to use comparable ratings as standards for its investments in accordance with the investment policies described in the Prospectus and this SAI. The ratings of the Rating Agencies represent their opinions as to the quality of the Municipal Bonds which they undertake to rate. It should be emphasized, however, that ratings are relative and subjective and are not absolute standards of quality. Although these ratings may be an initial criterion for selection of portfolio investments, the Manager also will evaluate these securities and the creditworthiness of the issuers of such securities.

Equity Securities. The Fund will invest the balance of its assets primarily in equity securities, including common stock, preferred stock, convertible securities and warrants. The Fund focuses its equity investments on "blue chip" companies with market capitalizations exceeding \$5 billion at the time of purchase, including multinational companies.

Common and Preferred Stocks. Stocks represent shares of ownership in a company. Generally, preferred stock has a specified dividend and ranks after bonds and before common stocks in its claim on income for dividend payments and on assets should the company be liquidated. After other claims are satisfied, common stockholders participate in company profits on a pro-rata basis; profits may be paid out in dividends or reinvested in the company to help it grow. Increases and

decreases in earnings are usually reflected in a company's stock price, so common stocks generally have the greatest appreciation and depreciation potential of all corporate securities. While most preferred stocks pay a dividend, the Fund may purchase preferred stock where the issuer has omitted, or is in danger of omitting, payment of its dividend. Such investments would be made primarily for their capital appreciation potential. The Fund may purchase trust preferred securities which are preferred stocks issued by a special purpose trust subsidiary backed by subordinated debt of the corporate parent. These securities typically bear a market rate coupon comparable to interest rates available on debt of a similarly rated company. Holders of the trust preferred securities have limited voting rights to control the activities of the trust and no voting rights with respect to the parent company.

Convertible Securities. Convertible securities may be converted at either a stated price or stated rate into underlying shares of common stock. Convertible securities have characteristics similar to both fixed-income and equity securities. Convertible securities generally are subordinated to other similar but non-convertible securities of the same issuer, although convertible bonds, as corporate debt obligations, enjoy seniority in right of payment to all equity securities, and convertible preferred stock is senior to common stock, of the same issuer. Because of the subordination feature, however, convertible securities typically have lower ratings than similar non-convertible securities.

Although to a lesser extent than with fixed-income securities, the market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stock. A unique feature of convertible securities is that as the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis, and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the prices of the convertible securities tend to rise as a reflection of the value of the underlying common stock. While no securities investments are without risk, investments in convertible securities generally entail less risk than investments in common stock of the same issuer.

Convertible securities provide for a stable stream of income with generally higher yields than common stocks, but there can be no assurance of current income because the issuers of the convertible securities may default on their obligations. A convertible security, in addition to providing fixed income, offers the potential for capital appreciation through the conversion feature, which enables the holder to benefit from increases in the market price of the underlying common stock. There can be no assurance of capital appreciation, however, because securities prices fluctuate. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality because of the potential for capital appreciation.

The Fund may invest in so-called "synthetic convertible securities," which are comprised of two or more different securities, each with its own market value, whose investment characteristics, taken together, resemble those of convertible securities. For example, the Fund may purchase a non-convertible debt security and a warrant or option. The "market value" of a synthetic convertible is the sum of the values of its fixed income component and its convertible component. For this reason, the values of a synthetic convertible and a true convertible security may respond differently to market fluctuations.

Warrants. A warrant is a form of derivative that gives the holder the right to subscribe to a specified amount of the issuing corporation's capital stock at a set price for a specified period of time. The Fund may invest up to 5% of its net assets in warrants, except that this limitation does not apply to warrants purchased by the Fund that are sold in units with, or attached to, other securities.

Depository Receipts and New York Shares. The Fund may invest in the securities of foreign issuers in the form of American Depositary Receipts and American Depositary Shares (collectively, "ADRs") and Global Depositary Receipts and Global Depositary Shares (collectively, "GDRs") and other forms of depository receipts and New York Shares. These securities may not necessarily be denominated in the same currency as the securities into which they may be converted. ADRs are receipts typically issued by a United States bank or trust company which evidence ownership of underlying securities issued by a foreign corporation. GDRs are receipts issued outside the United States typically by non-United States banks and trust companies that evidence ownership of either foreign or domestic securities. Generally, ADRs in registered form are designed for use in the United States securities markets and GDRs in bearer form are designed for use outside the United States. New York Shares are securities of foreign companies that are issued for trading in the United States. New York Shares are traded in the United States on national securities exchanges or in the over-the-counter market.

These securities may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository. A depository may establish an unsponsored facility without participation by the issuer of the deposited security. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts in respect of the deposited securities.

Investment Companies. The Fund may invest in securities issued by registered and unregistered investment companies, including exchange-traded funds described below. Under the 1940 Act, the Fund's investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund's total assets with respect to any one investment company and (iii) 10% of the Fund's total assets in the aggregate. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. The Fund also may invest its uninvested cash reserves or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund's securities lending program, in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above, except that the Fund's aggregate investment of uninvested cash reserves in such money market funds may not exceed 25% of its total assets. See "Lending Portfolio Securities."

Exchange-Traded Funds. The Fund may invest in shares of exchange-traded funds (collectively, "ETFs"), which are designed to provide investment results corresponding to a securities index. These may include Standard & Poor's Depositary Receipts ("SPDRs"), DIAMONDS, Nasdaq-100 Index Tracking Stock (also referred to as "Nasdaq 100 Shares") and iShares exchange-traded funds ("iShares"), such as iShares Russell 2000 Growth Index Fund. ETFs usually are units of beneficial

interest in an investment trust or represent undivided ownership interests in a portfolio of securities, in each case with respect to a portfolio of all or substantially all of the component securities of, and in substantially the same weighting as, the relevant benchmark index. The benchmark indices of SPDRs, DIAMONDS and Nasdaq-100 Shares are the Standard & Poor's 500 Stock Index, the Dow Jones Industrial Average and the Nasdaq-100 Index, respectively. The benchmark index for iShares varies, generally corresponding to the name of the particular iShares fund. ETFs are designed to provide investment results that generally correspond to the price and yield performance of the component securities of the benchmark index. ETFs are listed on an exchange and trade in the secondary market on a per-share basis.

The values of ETFs are subject to change as the values of their respective component securities fluctuate according to market volatility. Investments in ETFs that are designed to correspond to an equity index, for example, involve certain inherent risks generally associated with investments in a broadly based portfolio of common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of ETFs invested in by the Fund. Moreover, the Fund's investments in ETFs may not exactly match the performance of a direct investment in the respective indices to which they are intended to correspond due to the temporary unavailability of certain index securities in the secondary market or other extraordinary circumstances, such as discrepancies with respect to the weighting of securities.

Foreign Securities; Foreign Government Obligations; Securities of Supranational Entities. The Fund may purchase securities of foreign issuers and may invest in obligations of foreign branches of domestic banks and domestic branches of foreign banks. The Fund also may invest in obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions, agencies or instrumentalities that the Sub-Adviser determines to be of comparable quality to the other obligations in which the Fund may invest. Such securities also include debt obligations of supranational entities. Supranational entities include international organizations designated or supported by governmental entities to promote economic reconstruction or development and international banking institutions and related government agencies. Examples include the International Bank for Reconstruction and Development (the World Bank), the European Coal and Steel Community, the Asian Development Bank and the InterAmerican Development Bank.

Zero Coupon, Pay-In-Kind and Step-Up Securities. The Fund may invest in zero coupon securities, which are debt securities issued or sold at a discount from their face value that do not entitle the holder to any periodic payment of interest prior to maturity or a specified redemption date or cash payment date; pay-in-kind bonds, which are debt securities that generally pay interest through the issuance of additional bonds; and step-up bonds, which are debt securities that typically do not pay interest for a specified period of time and then pay interest at a series of different rates. The amount of the discount varies depending on the time remaining until maturity or cash payment date, prevailing interest rates, liquidity of the security and perceived credit quality of the issuer. Zero coupon securities also may take the form of debt securities that have been stripped of their unmatured interest coupons, the coupons themselves and receipts or certificates representing interests in such stripped debt obligations and coupons. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of securities that pay cash interest periodically having similar maturities and credit qualities. In addition, unlike bonds which pay cash interest throughout the period to maturity,

the Fund will realize no cash until the cash payment date unless a portion of such securities is sold and, if the issuer defaults, the Fund may obtain no return at all on its investment. Federal income tax law requires the holder of a zero coupon security or of certain pay-in-kind or step-up bonds to accrue income with respect to these securities prior to the receipt of cash payments. To maintain its qualification as a regulated investment company and avoid liability for Federal income taxes, the Fund may be required to distribute such income accrued with respect to these securities and may have to dispose of portfolio securities under disadvantageous circumstances in order to generate cash to satisfy these distribution requirements. See "Dividends, Other Distributions and Taxes."

**Illiquid Securities.** The Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund's investment objective. These securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, repurchase agreements providing for settlement in more than seven days after notice and certain privately negotiated, non-exchange traded options and securities used to cover such options. As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

**Money Market Instruments.** When the Advisers determine that adverse market conditions exist, the Fund may adopt a temporary defensive position and invest up to 100% of its assets in money market instruments, including U.S. Government securities, repurchase agreements, bank obligations and commercial paper. The Fund also may purchase money market instruments when it has cash reserves or in anticipation of taking a market position.

**Repurchase Agreements.** For the purposes of maintaining liquidity and achieving income, the Fund may enter into repurchase agreements with domestic commercial banks or registered broker-dealers. A repurchase agreement is a contract under which the Fund would acquire a security for a relatively short period (usually not more than one week) subject to the obligation of the seller to repurchase and the Fund to resell such security at a fixed time and price (representing the Fund's cost plus interest). In the case of repurchase agreements with broker-dealers, the value of the underlying securities (or collateral) will be at least equal at all times to the total amount of the repurchase obligation, including the interest factor. The Fund bears a risk of loss if the other party to a repurchase agreement defaults on its obligations and the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities. This risk includes the risk of procedural costs or delays in addition to a loss on the securities if their value should fall below their repurchase price. Income derived from repurchase agreements will be taxable.

### **Investment Techniques**

The following information supplements and should be read in conjunction with the Fund's Prospectus. The Fund's use of certain of the investment techniques described below may give rise to taxable income.

**Borrowing Money.** The Fund is permitted to borrow to the extent permitted under the 1940 Act, which permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. Such borrowings may be for temporary or emergency purposes or for leveraging as

described below. While borrowings for temporary or emergency purposes exceed 5% of the Fund's total assets, the Fund will not make any additional investments. The Fund also may borrow for investment purposes on a secured basis through entering into reverse repurchase agreements, as described below.

Leverage. Leveraging (buying securities using borrowed money) exaggerates the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio. These borrowings will be subject to interest costs that may or may not be recovered by appreciation of the securities purchased; in certain cases, interest costs may exceed the return received on the securities purchased. For borrowings for investment purposes, the 1940 Act requires the Fund to maintain continuous asset coverage (total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed. If the required coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the amount of its borrowings and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time. The Fund also may be required to maintain minimum average balances in connection with such borrowing or pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate. Generally, the Fund will only borrow money for investment purposes in connection with maintaining the Fund's holdings of Municipal Bonds to above 50% of the Fund's assets.

Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements with banks, broker/dealers or other financial institutions. This form of borrowing involves the transfer by the Fund of an underlying debt instrument in return for cash proceeds based on a percentage of the value of the security. The Fund retains the right to receive interest and principal payments on the security. At an agreed upon future date, the Fund repurchases the security at principal plus accrued interest. As a result of these transactions, the Fund is exposed to greater potential fluctuations in the value of its assets and its net asset value per share. To the extent the Fund enters into a reverse repurchase agreement, the Fund will segregate permissible liquid assets at least equal to the aggregate amount of its reverse repurchase obligations, plus accrued interest, in certain cases, in accordance with releases promulgated by the SEC. The SEC views reverse repurchase transactions as collateralized borrowings by the Fund. Except for these transactions, the Fund's borrowings generally will be unsecured.

Lending Portfolio Securities. The Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund's investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund's total assets (including the value of all assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on

the investment. The Fund may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Derivatives. The Fund may invest in, or enter into, derivatives for a variety of reasons, including to hedge certain market or interest rate risks, to provide a substitute for purchasing or selling particular securities or to increase potential income gain. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, and related indexes. Examples of derivative instruments the Fund may use (in addition to inverse floaters) include options contracts, futures contracts, options on futures contracts, swap agreements and credit derivatives. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to invest than "traditional" securities would. The Fund's portfolio managers may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by the Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit a Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance.

If the Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund's return or result in a loss. The Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency that is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. In contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Advisers will consider the creditworthiness of counterparties to over-the-counter derivatives in the

same manner as they would review the credit quality of a security to be purchased by the Fund. Over-the-counter derivatives are less liquid than exchange-traded derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

Some derivatives the Fund uses involve leverage (e.g., an instrument linked to the value of a securities index may return income calculated as a multiple of the price movement of the underlying index). This economic leverage will increase the volatility of these instruments as they may increase or decrease in value more quickly than the underlying security, index, futures contract, currency or other economic variable. Pursuant to regulations and/or published positions of the SEC, the Fund may be required to segregate permissible liquid assets, or engage in other measures approved by the SEC or its staff, to “cover” the Fund’s obligations relating to its transactions in derivatives. For example, in the case of futures contracts or forward contracts that are not contractually required to cash settle, the Fund must set aside liquid assets equal to such contracts’ full notional value (generally, the total numerical value of the asset underlying a future or forward contract at the time of valuation) while the positions are open. With respect to futures contracts or forward contracts that are contractually required to cash settle, however, the Fund is permitted to set aside liquid assets in an amount equal to the Fund’s daily marked-to-market net obligation (i.e., the Fund’s daily net liability) under the contracts, if any, rather than such contracts’ full notional value. By setting aside assets equal to only its net obligations under cash-settled futures and forwards contracts, the Fund may employ leverage to a greater extent than if the Fund were required to segregate assets equal to the full notional value of such contracts.

Neither the Trust nor the Fund will be a commodity pool. The Trust has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility as a registered investment company for an exclusion from the definition of commodity pool operator and that neither the Trust nor the Fund is subject to registration or regulation as a pool operator under the Commodity Exchange Act.

Futures Transactions—In General. A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. These contracts are traded on exchanges, so that, in most cases, either party can close out its position on the exchange for cash, without delivering the security. An option on a futures contract gives the holder of the option the right to buy from or sell to the writer of the option a position in a futures contract at a specified price on or before a specified expiration date. The Fund may invest in futures contracts and options on futures contracts, including those with respect to interest rates, commodities, and security or commodity indexes. To the extent the Fund may invest in foreign currency-denominated securities, it also may invest in foreign currency futures contracts and options thereon.

Although some futures contracts call for making or taking delivery of the underlying securities, generally these obligations are closed out before delivery by offsetting purchases or sales of matching futures contracts (same exchange, underlying security or index, and delivery month). Closing out a futures contract sale is effected by purchasing a futures contract for the same aggregate amount of the specific type of financial instrument with the same delivery date. If an offsetting purchase price is less than the original sale price, the Fund realizes a capital gain, or if it is more, the Fund realizes a capital loss. Conversely, if an offsetting sale price is more than the

original purchase price, the Fund realizes a capital gain, or if it is less, the Fund realizes a capital loss. Transaction costs also are included in these calculations.

The Fund may enter into futures contracts in U.S. domestic markets or on exchanges located outside the United States. Foreign markets may offer advantages such as trading opportunities or arbitrage possibilities not available in the United States. Foreign markets, however, may have greater risk potential than domestic markets. For example, some foreign exchanges are principal markets so that no common clearing facility exists and an investor may look only to the broker for performance of the contract. In addition, any profits that the Fund might realize in trading could be eliminated by adverse changes in the currency exchange rate, or the Fund could incur losses as a result of those changes. Transactions on foreign exchanges may include commodities which are traded on domestic exchanges or those which are not. Unlike trading on domestic commodity exchanges, trading on foreign commodity exchanges is not regulated by the Commodity Futures Trading Commission.

Engaging in these transactions involves risk of loss to the Fund which could adversely affect the value of the Fund's net assets. Although the Fund intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures by the Fund also is subject to the Advisers' ability to predict correctly movements in the direction of the relevant market and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Specific Futures Transactions. The Fund may purchase and sell stock index futures contracts. A stock index future obligates the Fund to pay or receive an amount of cash equal to a fixed dollar amount specified in the futures contract multiplied by the difference between the settlement price of the contract on the contract's last trading day and the value of the index based on the stock prices of the securities that comprise it at the opening of trading in such securities on the next business day.

The Fund also may enter into futures contracts for the purchase or sale of debt securities and futures contracts on securities indexes.

The Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

Options—In General. The Fund may purchase call and put options and write (i.e., sell) covered call and put option contracts. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by the Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction such as by segregating permissible liquid assets. A put option written by the Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken or otherwise covers the transaction. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Specific Options Transactions. The Fund may purchase and sell call and put options in respect of specific securities (or groups or "baskets" of specific securities) or indices listed on national securities exchanges or traded in the over-the-counter market. An option on an index is similar to an option in respect of specific securities, except that settlement does not occur by delivery of the securities comprising the index. Instead, the option holder receives an amount of cash if the closing level of the index upon which the option is based is greater than in the case of a call, or less than in the case of a put, the exercise price of the option. Thus, the effectiveness of purchasing or writing index options will depend upon price movements in the level of the index rather than the price of a particular security.

The Fund may purchase cash-settled options on interest rate swaps and equity index swaps in pursuit of its investment objective. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (for example, an exchange

of floating-rate payments for fixed-rate payments) denominated in U.S. dollars or foreign currency. Equity index swaps involve the exchange by the Fund with another party of cash flows based upon the performance of an index or a portion of an index of securities which usually includes dividends. A cash-settled option on a swap gives the purchaser the right, but not the obligation, in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms.

Successful use by the Fund of options and options on futures will be subject to the Advisers' ability to predict correctly movements in the prices of individual stocks, the stock market generally, foreign currencies or interest rates. To the extent the Advisers' predictions are incorrect, the Fund may incur losses.

Swap Transactions and Other Credit Derivatives. The Fund may engage in swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, credit default swaps, and index swap agreements and other credit derivative products, to seek to mitigate risk, manage maturity and duration, reduce portfolio turnover, or obtain a particular desired return at a lower cost to the Fund than if the Fund had invested directly in an instrument that yielded the desired return. The Fund also may enter into options on swaps, sometimes called “swaptions.”

Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or “swapped” between the parties are generally calculated with respect to a “notional amount,” i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, or in a “basket” of credit default swaps or securities representing a particular index. The “notional amount” of the swap agreement is only used as a basis upon which to calculate the obligations that the parties to a swap agreement have agreed to exchange.

Most swap agreements entered into by the Fund are cash settled and calculate the obligations of the parties to the agreement on a “net basis.” Thus, the Fund’s current obligations (or rights) under a swap agreement generally will be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the “net amount”). The Fund’s current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the segregation of permissible liquid assets of the Fund.

A swap option is a contract that gives a counterparty the right (but not the obligation) in return for payment of a premium, to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. A cash-settled option on a swap gives the purchaser the right in return for the premium paid, to receive an amount of cash equal to the value of the underlying swap as of the exercise date. These options typically are purchased in privately negotiated transactions from financial institutions, including securities brokerage firms. Depending on the terms of the particular option agreement, the Fund generally will incur a greater degree of risk when it writes a swap option than

it will incur when it purchases a swap option. When the Fund purchases a swap option, it risks losing only the amount of the premium it has paid should it decide to let the option expire unexercised. However, when the Fund writes a swap option, upon exercise of the option the Fund will become obligated according to the terms of the underlying agreement.

Interest rate swaps are over-the-counter contracts in which each party agrees to make a periodic interest payment based on an index or the value of an asset in return for a periodic payment from the other party based on a different index or asset. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index rises above a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. Interest rate collars involve selling a cap and purchasing a floor or vice versa to protect the Fund against interest rate movements exceeding given minimum or maximum levels.

The Fund may enter into credit default swap agreements and similar agreements, which may have as reference obligations securities that are or are not currently held by the Fund. The protection “buyer” in a credit default contract may be obligated to pay the protection “seller” an up front payment or a periodic stream of payments over the term of the contract provided generally that no credit event on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the “par value” (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. The Fund may be either the buyer or seller in the transaction. If the Fund is a buyer and no credit event occurs, the Fund recovers nothing if the swap is held through its termination date. However, if a credit event occurs, the Fund may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. As a seller, the Fund generally receives an up front payment or a fixed rate of income throughout the term of the swap, which typically is between six months and three years, provided that there is no credit event. If a credit event occurs, generally the seller must pay the buyer the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity that may have little or no value. Credit default swaps and similar instruments involve greater risks than if the Fund had invested in the reference obligation directly, since, in addition to general market risks, they are subject to illiquidity risk, counterparty risk and credit risk.

The Fund may invest in credit linked securities issued by a limited purpose trust or other vehicle that, in turn, invests in a derivative instrument or basket of derivative instruments, such as credit default swaps or interest rate swaps, to obtain exposure to certain fixed income markets or to remain fully invested when more traditional income producing securities are not available. Like an investment in a bond, an investment in these credit linked securities represents the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the security. However, these payments are conditioned on the issuer’s receipt of payments from, and the issuer’s potential obligations to, the counterparties to certain derivative instruments entered into by the issuer of the credit linked security. For example, the issuer may sell one or more credit default swaps entitling the issuer to receive a stream of payments over the term of the swap

agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par (or other agreed upon value) of the referenced debt obligation.

The use of credit derivatives is a highly specialized activity which involves strategies and risks different from those associated with ordinary portfolio security transactions. If the Manager is incorrect in its forecasts of default risks, market spreads or other applicable factors, or a counterparty defaults, the investment performance of the Fund would diminish compared with what it would have been if these techniques were not used. In addition, it is possible that developments in the credit derivatives market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap or other credit derivative agreements or to realize amounts to be received under such agreements.

The Fund will enter into swap and other credit derivatives transactions only when the Manager believes it would be in the best interests of the Fund to do so. In addition, the Fund will enter into swap and other credit derivative agreements only with counterparties that meet certain standards of creditworthiness (generally, such counterparties would have to be eligible counterparties under the terms of the Fund's repurchase agreement guidelines).

Future Developments. The Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in its Prospectus or this SAI.

Short-Selling. In these transactions, the Fund sells a security it does not own in anticipation of a decline in the market value of the security. The Fund may make short-sales to hedge positions, for duration and risk management, to maintain portfolio flexibility or to enhance returns. To complete a short-sale transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is obligated to replace the security borrowed by purchasing it subsequently at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund, which would result in a loss or gain, respectively.

Equity securities will not be sold short if, after effect is given to any such short sale, the total market value of all securities sold short would exceed 25% of the value of the Fund's net assets invested in equity securities.

The Fund also may make short sales "against the box," in which the Fund enters into a short sale of a security it owns or has the immediate and unconditional right to acquire at no additional cost at the time of the sale. At no time will more than 15% of the value of the Fund's net assets invested in equity securities be in deposits on short sales against the box.

Until the Fund closes its short position or replaces the borrowed security, the Fund will: (a) segregate permissible liquid assets in an amount that, together with the amount provided as

collateral, always equals the current value of the security sold short; or (b) otherwise cover its short position.

Stand-By Commitments. The Fund may acquire "stand-by commitments" with respect to Municipal Bonds held in its portfolio. Under a stand-by commitment, the Fund obligates a broker, dealer or bank to repurchase, at the Fund's option, specified securities at a specified price and, in this respect, stand-by commitments are comparable to put options. The exercise of a stand-by commitment, therefore, is subject to the ability of the seller to make payment on demand. The Fund will acquire stand-by commitments solely to facilitate its portfolio liquidity and does not intend to exercise its rights thereunder for trading purposes. The Fund may pay for stand-by commitments if such action is deemed necessary, thus increasing to a degree the cost of the underlying Municipal Bond and similarly decreasing such security's yield to investors. Gains realized in connection with stand-by commitments will be taxable. The Fund also may acquire call options on specific Municipal Bonds. The Fund generally would purchase these call options to protect the Fund from the issuer of the related Municipal Bond redeeming, or other holder of the call option from calling away, the Municipal Bond before maturity. The sale by the Fund of a call option that it owns on a specific Municipal Bond could result in the receipt of taxable income by the Fund.

Forward Commitments. The Fund may purchase or sell securities on a forward commitment, when-issued or delayed-delivery basis, which means that delivery and payment take place a number of days after the date of the commitment to purchase or sell the securities at a predetermined price and/or yield. Typically, no interest accrues to the purchaser until the security is delivered. When purchasing a security on a forward commitment basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its net asset value. Because the Fund is not required to pay for these securities until the delivery date, these risks are in addition to the risks associated with the Fund's other investments. If the Fund is fully or almost fully invested when forward commitment purchases are outstanding, such purchases may result in a form of leverage. The Fund would engage in forward commitments to increase its portfolio's financial exposure to the types of securities in which it invests. Leveraging the portfolio in this manner will increase the Fund's exposure to changes in interest rates and will increase the volatility of its returns. The Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Securities purchased on a forward commitment, when-issued or delayed-delivery basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities purchased on a forward commitment, when-issued or delayed-delivery basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a when-issued or delayed-delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed-delivery basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share.

## Certain Investment Considerations and Risks

Investing in Municipal Bonds. The Fund may invest more than 25% of the value of its total assets in Municipal Bonds which are related in such a way that an economic, business or political development or change affecting one such security also would affect the other securities; for example, securities the interest upon which is paid from revenues of similar types of projects, or securities whose issuers are located in the same state. As a result, the Fund may be subject to greater risk as compared to a municipal bond fund that does not follow this practice.

Certain provisions in the Internal Revenue Code of 1986, as amended (the "Code"), relating to the issuance of Municipal Bonds may reduce the volume of Municipal Bonds qualifying for Federal tax exemption. One effect of these provisions could be to increase the cost of the Municipal Bonds available for purchase by the Fund and thus reduce available yield. Shareholders should consult their tax advisers concerning the effect of these provisions on an investment in the Fund. Proposals that may restrict or eliminate the income tax exemption for interest on Municipal Bonds may be introduced in the future. If any such proposal were enacted that would reduce the availability of Municipal Bonds for investment by the Fund so as to adversely affect Fund shareholders, the Fund would reevaluate its investment objective and policies and submit possible changes in the Fund's structure to shareholders for their consideration.

In addition, at least 50% of the Fund's assets must be invested in Municipal Bonds as of the end of each quarter of the Fund's tax year in order to provide shareholders income derived from the Fund's investments in Municipal Bonds that is exempt from Federal income tax. Although the Manager will monitor on a regular basis the percentage of the Fund's assets invested in Municipal Bonds, if at the end of any quarter of the Fund's tax year the Fund holds less than 50% of its assets in Municipal Bonds, the income derived from the Fund's investments during the year will be taxable to shareholders.

Equity Securities. Equity securities, including common stock, and certain preferred stock, convertible securities and warrants, fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be pronounced. Changes in the value of the Fund's investments will result in changes in the value of its shares and thus the Fund's total return to investors.

Although the Fund focuses its equity investments on "blue chip", including multinational, companies, it may invest in securities issued by companies in the technology sector, which has been among the most volatile sectors of the stock market. Technology companies involve greater risk because their revenues and earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain technology companies may have limited product lines, markets or financial resources, or may depend on a limited management group. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of technology stocks than it does in other sectors. Fund investments made in anticipation of future products and services may decline dramatically in value if the anticipated products or services are delayed or canceled.

The Fund may purchase securities of companies in initial public offerings ("IPOs") or shortly thereafter. An IPO is a corporation's first offering of stock to the public. Shares are given a market value reflecting expectations for the corporation's future growth. Special rules of the National Association of Securities Dealers, Inc. ("NASD") apply to the distribution of IPOs. Corporations offering stock in IPOs generally have limited operating histories and may involve greater investment risk. The prices of these companies' securities may be very volatile, rising and falling rapidly, sometimes based solely on investor perceptions rather than economic reasons.

Foreign Securities. Foreign securities markets generally are not as developed or efficient as those in the United States. Securities of some foreign issuers are less liquid and more volatile than securities of comparable U.S. issuers. Similarly, volume and liquidity in most foreign securities markets are less than in the United States and, at times, volatility of price can be greater than in the United States.

Because evidences of ownership of foreign securities usually are held outside the United States, the Fund's investments in such securities will be subject to additional risks, which include possible adverse political and economic developments, seizure or nationalization of foreign deposits and adoption of governmental restrictions that might adversely affect or restrict the payment of principal and interest on the foreign securities to investors located outside the country of the issuer, whether from currency blockage or otherwise. Foreign securities held by the Fund may trade on days when the Fund does not calculate its net asset value and thus may affect the Fund's net asset value on days when investors have no access to the Fund.

Developing countries have economic structures that are generally less diverse and mature, and political systems that are less stable, than those of developed countries. The markets of developing countries may be more volatile than the markets of more mature economies; however, such markets may provide higher rates of return to investors. Many developing countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have adverse effects on the economies and securities markets of certain of these countries.

Since foreign securities often are purchased with and payable in currencies of foreign countries, the value of these assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in currency rates and exchange control regulations.

Simultaneous Investments. Investment decisions for the Fund are made independently from those of other investment companies advised by the Advisers. If, however, such other investment companies desire to invest in, or dispose of, the same securities as the Fund, the Advisers will ordinarily seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one investment company or account and available investments or opportunities for sales will be allocated equitably to each investment company. In some cases, this procedure may adversely affect the size of the position obtained for or disposed of by the Fund or the price paid or received by the Fund. The Fund, together with other investment companies advised by the Advisers and their affiliates, may own significant positions in portfolio companies that, depending on market conditions, may affect adversely the Fund's ability to dispose of some or all of its positions should it desire to do so.

Certain Investments. From time to time, to the extent consistent with its investment objective, policies and restrictions, the Fund may invest in securities of companies with which Mellon Bank, N.A., an affiliate of Dreyfus, has a lending relationship.

### Investment Restrictions

*Fundamental.* The Fund has adopted the following restrictions as fundamental policies, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. The Fund may not:

1. Invest more than 25% of the value of its total assets in the securities of issuers in any single industry, provided that there shall be no limitation on the purchase of Municipal Bonds (other than Municipal Bonds backed only by assets and revenues of non-governmental issuers) and obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

2. Invest in physical commodities or commodities contracts, except that the Fund may purchase and sell options, forward contracts, futures contracts, including those related to indices, and options on futures contracts or indices and enter into swap agreements and other derivative instruments.

3. Purchase, hold or deal in real estate, or oil, gas or other mineral leases or exploration or development programs, but the Fund may purchase and sell securities that are secured by real estate or issued by companies that invest or deal in real estate or real estate investment trusts and may acquire and hold real estate or interests therein through exercising rights or remedies with regard to such securities.

4. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowing to no more than 33-1/3% of the value of the Fund's total assets).

5. Lend any securities or make loans to others, except to the extent permitted under the 1940 Act (which currently limits such loans to no more than 33-1/3% of the value of the Fund's total assets) or as otherwise permitted by the SEC. For purposes of this Investment Restriction, the purchase of debt obligations (including acquisitions of loans, loan participations or other forms of debt instruments) and the entry into repurchase agreements shall not constitute loans by the Fund. Any loans of portfolio securities will be made according to guidelines established by the SEC and the Trust's Board.

6. Act as an underwriter of securities of other issuers, except that the Fund may bid separately or as part of a group for the purchase of Municipal Bonds directly from an issuer for its own portfolio to take advantage of the lower purchase price available, and except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.

7. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except insofar as the Fund may be deemed to have issued a senior security by reason of borrowing money in accordance with the Fund's borrowing policies. For purposes of this Investment Restriction, collateral, escrow, or margin or other deposits with respect to the making of short sales, the purchase or sale of futures contracts or options, purchase or sale of forward foreign

currency contracts, and the writing of options on securities are not deemed to be an issuance of senior security.

*Non-fundamental.* The Fund has adopted the following additional non-fundamental investment restrictions. These non-fundamental restrictions, and the Fund's investment objective, may be changed without shareholder approval, in compliance with applicable law and regulatory policy.

1. Purchase securities on margin, except for use of short-term credit necessary for clearance of purchases and sales of portfolio securities, but the Fund may make margin deposits in connection with transactions in options, forward contracts, futures contracts, and options on futures contracts, and except that effecting short sales will be deemed not to constitute a margin purchase for purposes of this Investment Restriction.

2. Invest in the securities of a company for the purpose of exercising management or control, but the Fund will vote the securities it owns in its portfolio as a shareholder in accordance with its views.

3. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities that are illiquid, if, in the aggregate, more than 15% of the value of the Fund's net assets would be so invested.

4. Purchase securities of other investment companies, except to the extent permitted under the 1940 Act.

5. Pledge, mortgage or hypothecate its assets, except to the extent necessary to secure permitted borrowings and to the extent related to the purchase of securities on a when-issued, forward commitment or delayed-delivery basis and the deposit of assets in escrow in connection with writing covered put and call options and collateral and initial or variation margin arrangements with respect to permitted transactions.

If a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values or assets will not constitute a violation of such restriction. With respect to Fundamental Investment Restriction No. 4, however, if borrowings exceed 33-1/3% of the value of the Fund's total assets as a result of changes in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

The Trust and the Manager have received an exemptive order from the SEC, which, among other things, permits the Fund to use cash collateral received in connection with lending the Fund's securities and other uninvested cash to purchase shares of one or more registered money market funds advised by the Manager in excess of limitations imposed by the 1940 Act.

If the Fund's investment objective, policies, restrictions, practices or procedures change, shareholders should consider whether the Fund remains an appropriate investment in light of the shareholder's then-current position and needs.

## MANAGEMENT OF THE TRUST AND FUND

The Trust's Board is responsible for the management and supervision of the Fund, and approves all significant agreements with those companies that furnish services to the Fund. These companies are as follows:

The Dreyfus Corporation .....	Investment Adviser
Fayez Sarofim & Co. ....	Sub-Adviser
Dreyfus Service Corporation .....	Distributor
Dreyfus Transfer, Inc. ....	Transfer Agent
Mellon Bank, N.A. ....	Custodian

### Board Members of the Trust<sup>1</sup>

Trustees of the Trust, together with information as to their positions with the Trust, principal occupations and other board memberships and affiliations, are shown below. Each of the Trust's Trustees also serves as a Board Member of The Dreyfus/Laurel Funds, Inc. and The Dreyfus/Laurel Tax-Free Municipal Funds (collectively, with the Trust, the "Dreyfus/Laurel Funds") and Dreyfus High Yield Strategies Fund.

<u>Name (Age) Position with Trust (Since)</u>	<u>Principal Occupation During Past 5 Years</u>	<u>Other Board Memberships and Affiliations</u>
Joseph S. DiMartino (63) Chairman of the Board (1999)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i> Sunair Services Corporation, engages in the design, manufacture and sale of high frequency systems for long-range voice and data communications, and provides certain outdoor- related services to homes and businesses, <i>Director</i>
James M. Fitzgibbons (72) Board Member (1994)	Chairman of the Board, Davidson Cotton Company (1998-2002)	Bill Barrett Company, an oil and gas exploration company, <i>Director</i>
J. Tomlinson Fort (78) Board Member (1994)	Retired; Of Counsel, Reed Smith LLP (1998-2005)	Allegheny College, <i>Emeritus Trustee</i> Pittsburgh Ballet Theatre, <i>Trustee</i> American College of Trial Lawyers, <i>Fellow</i>

<sup>1</sup> None of the Board members are "interested persons" of the Trust, as defined in the 1940 Act.

Name (Age) Position with Trust (Since)	Principal Occupation During Past 5 Years	Other Board Memberships and Affiliations
Kenneth A. Himmel (60) Board Member (1988)	President and CEO, Related Urban Development, a real estate development company (1996-present)  President and CEO, Himmel & Company, a real estate development company (1980- present)  CEO, American Food Management, a restaurant company (1983-present)	None
Stephen J. Lockwood (59) Board Member (1993)	Chairman of the Board, Stephen J. Lockwood and Company LLC, an investment company (2000-present)	None
Roslyn Watson (57) Board Member (1992)	Principal, Watson Ventures, Inc., a real estate investment company (1993-present)	American Express Centurion Bank, <i>Director</i> The Hyams Foundation Inc., a Massachusetts Charitable Foundation, <i>Trustee</i> National Osteoporosis Foundation, <i>Trustee</i>

Board members are elected to serve for an indefinite term. The Trust has standing audit and nominating committees, each comprised of its Board members who are not "interested persons" of the Trust, as defined in the 1940 Act. The function of the audit committee is (i) to oversee the Trust's accounting and financial reporting processes and the audits of the Fund's financial statements and (ii) to assist in the Board's oversight of the integrity of the Fund's financial statements, the Fund's compliance with legal and regulatory requirements and the independent registered public accounting firm's qualifications, independence and performance. The Trust's nominating committee, among other things, is responsible for selecting and nominating persons as members of the Board for election or appointment by the Board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the

committee takes into consideration various factors listed in the nominating committee charter, including character and integrity, business and professional experience, and whether the committee believes the person has the ability to apply sound and independent business judgment and would act in the interest of the Fund and its shareholders. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Trust, c/o The Dreyfus Corporation Legal Department, 200 Park Avenue, 8th Floor East, New York, New York 10166, which includes information regarding the recommended nominee as specified in the nominating committee charter. The Trust also has a standing compensation committee comprised of Ms. Watson (Chair), Messrs. Fitzgibbons and Fort and Ms. Wiley. The function of the compensation committee is to establish the appropriate compensation for serving on the Board. The Trust also has a standing pricing committee comprised of any one Board member. The function of the pricing committee is to assist in valuing the Fund's investments. The audit committee met three times and the pricing and compensation committees each met once during the fiscal year ended August 31, 2006. The nominating committee did not meet during the last fiscal year.

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2005.

	<u>Joseph S. DiMartino</u>	<u>James M. Fitzgibbons</u>	<u>J. Tomlinson Fort</u>	<u>Kenneth A. Himmel</u>	<u>Stephen J. Lockwood</u>	<u>Roslyn M. Watson</u>	<u>Benaree Pratt Wiley</u>
Fund	None	None	None	None	None	None	None
Aggregate Holdings of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member	Over \$100,000	Over \$100,000	\$50,001-\$100,000	\$50,001-\$100,000	None	None	None

As of December 31, 2005, none of the Trustees or their immediate family members owned securities of the Manager, the Sub-Adviser, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager, the Sub-Adviser or the Distributor.

#### Officers of the Trust

J. DAVID OFFICER, President since January 2007. Chief Operating Officer, Vice Chair and a director of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 58 years old, and has been an employee of the Manager since April 1998.

MARK N. JACOBS, Vice President since March 2000. Executive Vice President, Secretary and General Counsel of the Manager, and an officer of 91 investment companies (comprised of

206 portfolios) managed by the Manager. He is 60 years old and has been an employee of the Manager since June 1977.

JAMES WINDELS, Treasurer since November 2001. Director-Mutual Fund Accounting of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 48 years old and has been an employee of the Manager since April 1985.

MICHAEL A. ROSENBERG, Vice President and Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 46 years old and has been an employee of the Manager since October 1991.

JAMES BITETTO, Vice President and Assistant Secretary since August 2005. Associate General Counsel and Assistant Secretary of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 40 years old and has been an employee of the Manager since December 1996.

JONI LACKS CHARATAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. She is 51 years old and has been an employee of the Manager since October 1988.

JOSEPH M. CHIOFFI, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since June 2000.

JANETTE E. FARRAGHER, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. She is 44 years old and has been an employee of the Manager since February 1984.

JOHN B. HAMMALIAN, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 43 years old and has been an employee of the Manager since February 1991.

ROBERT R. MULLERY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 54 years old and has been an employee of the Manager since May 1986.

JEFF PRUSNOFSKY, Vice President and Assistant Secretary since August 2005. Associate General Counsel of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since October 1990.

ERIK D. NAVILOFF, Assistant Treasurer since December 2002. Senior Accounting Manager – Taxable Fixed Income Funds of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 38 years old and has been an employee of the Manager since November 1990.

GAVIN C. REILLY, Assistant Treasurer since December 2005. Tax Manager of the Investment Accounting and Support Department of Dreyfus, and an officer of 91 investment companies (comprised of 206 portfolios) managed by Dreyfus. He is 38 years old and has been an employee of Dreyfus since April 1991.

ROBERT S. ROBOL, Assistant Treasurer since December 2002. Senior Accounting Manager – Money Market and Municipal Bond Funds of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 42 years old and has been an employee of the Manager since October 1988.

ROBERT SVAGNA, Assistant Treasurer since December 2002. Senior Accounting Manager – Equity Funds of the Manager, and an officer of 91 investment companies (comprised of 206 portfolios) managed by the Manager. He is 39 years old and has been an employee of the Manager since November 1990.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since July 2002. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 87 investment companies (comprised of 202 portfolios) managed by the Manager. He is 36 years old and has been an employee of the Distributor since October 1998.

JOSEPH W. CONNOLLY, Chief Compliance Officer since October 2004. Chief Compliance Officer of the Manager and The Dreyfus Family of Funds (91 investment companies, comprised of 206 portfolios). From November 2001 through March 2004, Mr. Connolly was first Vice-President, Mutual Fund Servicing for Mellon Global Securities Services. In that capacity, Mr. Connolly was responsible for managing Mellon's Custody, Fund Accounting and Fund Administration services to third-party mutual fund clients. He is 49 years old and has served in various capacities with the Manager since 1980, including manager of the firm's Fund Accounting Department from 1997 through October 2001.

The address of each Board member and officer of the Trust is 200 Park Avenue, New York, New York 10166.

No officer or employee of the Manager or the Distributor (or of any parent, subsidiary or affiliate thereof) receives any compensation from the Trust for serving as an officer or Trustee of the Trust. Effective October 1, 2005, the Dreyfus/Laurel Funds pay each Director/Trustee who is not an "interested person" of the Trust (as defined in the 1940 Act) \$45,000 per annum, plus \$6,000 per joint Dreyfus/Laurel Funds Board meeting attended, \$2,000 for separate in-person committee meetings attended which are not held in conjunction with a regularly scheduled Board meeting and \$1,500 for Board meetings and separate committee meetings attended that are conducted by telephone. The Dreyfus/Laurel Funds also reimburse each Director/Trustee who is not an "interested person" of the Trust (as defined in the 1940 Act) for travel and out-of-pocket expenses.

With respect to Board meetings, the Chairman of the Board receives an additional 25% of such compensation (with the exception of reimbursable amounts). With respect to compensation committee meetings, the Chair of the compensation committee receives \$900 per meeting and, with respect to audit committee meetings, the Chair of the audit committee receives \$1,350 per meeting. In the event that there is an in-person joint committee meeting or a joint telephone meeting of the Dreyfus/Laurel Funds and Dreyfus High Yield Strategies Fund, the \$2,000 or \$1,500 fee, as applicable, will be allocated between the Dreyfus/Laurel Funds and Dreyfus High Yield Strategies Fund.

In addition, the Trust currently has one Emeritus Board member who is entitled to receive an annual retainer and a per meeting fee of one-half the amount paid to him as a Board member.

Based on the Trust's compensation structure in effect prior to, and after, October 1, 2005, the aggregate amount of fees and expenses received by each current Trustee from the Trust for the fiscal year ended August 31, 2006, and from all other funds in the Dreyfus Family of Funds for which such person was a Board member (the number of portfolios of such funds is set forth in parentheses next to each Board member's total compensation) during the year ended December 31, 2005 were as follows:

<u>Name of Board Member</u>	<u>Aggregate Compensation From the Trust</u> <sup>*</sup>	<u>Total Compensation From the Trust and Fund Complex Paid To Board Member</u> <sup>(**)</sup>
Joseph S. DiMartino	\$37,288	\$833,262 (190)
James Fitzgibbons	\$30,030	\$97,750 (25)
J. Tomlinson Fort	\$31,530	\$97,900 (25)
Kenneth A. Himmel	\$30,030	\$95,750 (25)
Stephen J. Lockwood	\$24,863	\$91,750 (25)
Roslyn M. Watson	\$31,030	\$96,250 (25)
Benaree Pratt Wiley	\$30,030	\$97,750 (25)

\* Amounts required to be paid by the Trust directly to the non-interested Trustees, that would be applied to offset a portion of the management fee payable to the Manager, are paid directly by the Manager to the non-interested Trustees. Amount does not include the cost of office space, secretarial services and health benefits for the Chairman and expenses reimbursed to Board members for attending Board meetings, which in the aggregate amounted to \$1,167.

\*\* Represents the number of separate portfolios comprising the investment companies in the Fund Complex, not including the Fund, for which the Trustees served.

The officers and Trustees of the Trust as a group owned beneficially less than 1% of the total shares of the Fund outstanding as of December 3, 2006.

Principal Shareholders. Trustees and officers as a group owned less than 1% of the Fund's voting securities outstanding on December 3, 2006. As of December 3, 2006, the following shareholders were known by the Fund to own of record 5% or more of the Fund's outstanding shares. A

shareholder who beneficially owns, directly or indirectly, more than 25% of the Fund's voting securities may be deemed a "control person" (as defined in the 1940 Act) of the Fund.

## MANAGEMENT ARRANGEMENTS

The following information supplements and should be read in conjunction with the sections in the Fund's Prospectus entitled "Expenses" and "Management."

Investment Adviser. The Manager is a wholly-owned subsidiary of Mellon Financial Corporation ("Mellon"). Mellon is a global financial holding company incorporated under Pennsylvania law in 1971 and registered under the Federal Bank Holding Company Act of 1956, as amended. Mellon provides a comprehensive range of financial products and services in domestic and selected international markets.

Management Agreement. The Manager serves as the investment adviser for the Fund pursuant to an Investment Management Agreement (the "Management Agreement") between the Manager and the Trust, subject to the overall authority of the Board of Trustees in accordance with Massachusetts law. As investment adviser, the Manager manages the Fund by making investment decisions based on the Fund's investment objective, policies and restrictions.

The Management Agreement will continue until April 4, 2007 and thereafter is subject to annual approval by (i) the Trust's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Trust's Board members who are not "interested persons" (as defined in the 1940 Act) of the Trust or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. The Management Agreement is terminable without penalty, on not more than 60 days' notice, by the Trust's Board or by vote of the holders of a majority of the Fund's outstanding voting shares, or, upon not less than 90 days' notice, by the Manager. The Management Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

The following persons are officers and/or directors of the Manager: Jonathan Little, Chair of the Board; Thomas F. Eggers, President, Chief Executive Officer and a director; Jonathan Baum, Vice Chair – Distribution and a director; J. Charles Cardona, Vice Chair and a director; Diane P. Durnin, Vice Chair and a director; Phillip N. Maisano, Chief Investment Officer, Vice Chair and a director; J. David Officer, Chief Operating Officer, Vice Chair and a director; Mark N. Jacobs,

Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President - Corporate Communications; Jill Gill, Vice President - Human Resources; Anthony Mayo, Vice President - Information Systems; Theodore A. Schachar, Vice President - Tax; Alex G. Sciulli, Vice President; Wendy H. Strutt, Vice President; Gary Pierce, Controller; Joseph W. Connolly, Chief Compliance Officer; James Bitetto, Assistant Secretary; and Steven G. Elliott, Robert P. Kelly, David F. Lamere and Ronald P. O'Hanley III, directors.

Mellon and its affiliates may have deposit, loan and commercial banking or other relationships with the issuers of securities purchased by the Fund. The Manager has informed the Trust that in making its investment decisions it does not obtain or use material inside information that Mellon or its affiliates may possess with respect to such issuers.

The Manager maintains office facilities on behalf of the Fund, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Trust. The Manager may pay the Distributor for shareholder services from the Manager's own assets, including past profits but not including the management fee paid by the Fund. The Distributor may use part or all of such payments to pay certain financial institutions (which may include banks), securities dealers and other industry professionals (collectively, "Service Agents") in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

Sub-Investment Adviser. The Sub-Adviser provides investment advisory assistance and day-to-day management of the equity portion of the Fund's portfolio pursuant to the Sub-Investment Advisory Agreement (the "Sub-Advisory Agreement") between the Sub-Adviser and the Manager. The Sub-Advisory Agreement will continue until April 4, 2007 and thereafter is subject to annual approval by (i) the Trust's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Trust's Board members who are not "interested persons" (as defined in the 1940 Act) of the Trust or the Advisers, by vote cast in person at a meeting called for the purpose of voting on such approval. The Sub-Advisory Agreement is terminable without penalty (i) by the Manager on 60 days' notice, (ii) by the Trust's Board or by vote of the holders of a majority of the Fund's shares on 60 days' notice, or (iii) by the Sub-Adviser on not less than 90 days' notice. The Sub-Advisory Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act) or upon the termination of the Management Agreement for any reason.

The following persons are officers and/or directors of the Sub-Adviser: Fayez S. Sarofim, Chairman of the Board and President; Raye G. White, Executive Vice President, Secretary, Treasurer and a director; William K. McGee, Jr., Charles E. Sheedy and Ralph B. Thomas, Senior Vice Presidents; and Satish K. Gupta, Alice M. Youngblood, Christopher B. Sarofim, Mary L. Porter, Catherine P. Crain, David L. Pesikoff, Reynaldo Reza, Elizabeth S. Robison, Manisha A. Thakor and William G. Lee, Jr., Vice Presidents; and Robert M. Hopson, Vice President and Assistant Secretary.

Portfolio Management. The Advisers provide day-to-day management of the Fund's portfolio of investments in accordance with the stated policies of the Fund, subject to, in the case of

the Sub-Adviser, the supervision of the Manager, and the approval of the Trust's Board. The Advisers are responsible for investment decisions, and provide the Fund with portfolio managers who are authorized by the Trust's Board to execute purchases and sales of securities. The portfolio managers for the Municipal Bond portion of the Fund's portfolio are Joseph P. Darcy, A. Paul Disdier, Douglas J. Gaylor, Joseph A. Irace, Colleen Meehan, W. Michael Petty, Bill Vasiliou, James Welch and Monica S. Wieboldt. The portfolio managers for the equity portion of the Fund's portfolio are Fayez S. Sarofim, Charles E. Sheedy, Christopher B. Sarofim and Catherine P. Crain. The Manager and the Sub-Adviser also maintain research departments with professional staffs of portfolio managers and securities analysts who provide research services for the Fund and other funds advised by the Manager and the Sub-Adviser.

The Trust, the Manager, the Sub-Adviser and the Distributor each have adopted a Code of Ethics that permits its personnel, subject to such respective Code of Ethics, to invest in securities that may be purchased or held by the Fund. The Manager's Code of Ethics subjects its employees' personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics and are also subject to the oversight of Mellon's Investment Ethics Committee (the "Committee"). Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

Portfolio Manager Compensation--Dreyfus. With respect to the portfolio managers who are employed by Dreyfus, compensation is comprised primarily of a market-based salary and an incentive compensation plan. The Fund's portfolio managers are compensated by Dreyfus or its affiliates and not by the Fund. The incentive compensation plan is comprised of three components: portfolio performance (approximately 60%), individual qualitative performance (approximately 20%) and Dreyfus' financial performance as measured by Dreyfus' pre-tax net income (approximately 20%). Up to 10% of the incentive plan compensation may be paid in Mellon restricted stock.

Portfolio performance is measured by a combination of yield (35%) and total return (65%) relative to the appropriate Lipper peer group. 1-year performance in each category is weighted at 40% and 3-year performance at 60%. The portfolio manager's performance is measured on either a straight average (each account weighted equally) or a combination of straight average and asset-weighted average. Generally, if the asset-weighted average is higher, then that is used to measure performance. If the straight average is higher, then typically an average of the two is used to measure performance.

Individual qualitative performance is based on Dreyfus' Chief Investment Officer's evaluation of the portfolio manager's performance based on any combination of the following: marketing contributions; new product development; performance on special assignments; people development; methodology enhancements; fund growth/gain in market; and support to colleagues. The Chief Investment Officer may consider additional factors at his discretion.

Portfolio managers are also eligible for Dreyfus' Long Term Incentive Plan. Under that plan, cash and/or Mellon restricted stock is awarded at the discretion of the Chief Investment Officer based on individual performance and contributions to the Investment Management Department and the Mellon organization.

Portfolio Manager Compensation--Sub-Adviser. With respect to the portfolio managers employed by the Sub-Adviser, the portfolio managers are compensated through (i) payment of a fixed annual salary and discretionary annual bonuses and (ii) the possible issuance of stock options and incentive stock options. The fixed annual salary amounts and the discretionary annual bonus amounts constitute the largest component of the portfolio manager's compensation, and these amounts are determined annually through a comprehensive review process pursuant to which executive officers and the members of the Sub-Adviser's Board of Directors review and consider the accomplishments and development of each portfolio manager, especially with respect to those client accounts involving the portfolio manager. A lesser component of the portfolio manager's compensation results from the possible issuance of stock options and incentive stock options. Portfolio managers are sometimes granted stock options and incentive stock options to acquire shares of the capital stock of The Sarofim Group, Inc., the ultimate corporate parent of the Sub-Adviser. The decisions as to whether to issue such options and to whom the options are to be issued are made in conjunction with the annual salary and bonus review process, and the options are issued pursuant to a stock option plan adopted by The Sarofim Group, Inc. The options are not based on the particular performance or asset value of any particular client account or of all client accounts as a group, but rather the performance and accomplishments of the individual to whom the option is to be granted. There are various aspects of the review process that are designed to provide objectivity, but, in the final analysis, the evaluation is a subjective one that is based upon a collective overall assessment. There are, however, no specified formulas or benchmarks tied to the particular performance or asset value of any particular client account or of all client accounts as a group.

Additional Information About the Portfolio Managers. The following table lists the number and types of other accounts advised by the Fund's primary portfolio managers and assets under management in those accounts as of the end of the Fund's fiscal year:

<u>Portfolio Manager</u>	<u>Registered Investment Company Accounts</u>	<u>Assets Managed</u>	<u>Pooled Accounts</u>	<u>Assets Managed</u>	<u>Other Accounts</u>	<u>Assets Managed</u>
Joseph P. Darcy	4	\$2,600,000,000	0	0	0	0
Fayez Sarofim	6	\$6,123,480,460	20	\$5,187,138,237	572	\$20,757,740,976

None of the funds or accounts are subject to a performance-based advisory fee.

The dollar range of Fund shares beneficially owned by the primary portfolio manager is as follows as of the end of the Fund's fiscal year:

<b><u>Portfolio Manager</u></b>	<b><u>Fund Name</u></b>	<b><u>Dollar Range of Fund Shares Beneficially Owned</u></b>
Joseph P. Darcy	Dreyfus Tax Managed Balanced Fund	None
Fayez Sarofim	Dreyfus Tax Managed Balanced Fund	None

Portfolio managers may manage multiple accounts for a diverse client base, including mutual funds, separate accounts (assets managed on behalf of institutions such as pension funds, insurance companies and foundations), bank common trust accounts and wrap fee programs ("Other Accounts").

Potential conflicts of interest may arise because of the Advisers' management of the Fund and Other Accounts, as applicable. For example, conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Dreyfus or the Sub-Adviser, as the case may be, may be perceived as causing accounts it manages to participate in an offering to increase Dreyfus' or the Sub-Adviser's, as the case may be, overall allocation of securities in that offering, or to increase Dreyfus' or the Sub-Adviser's, as the case may be, ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as Dreyfus or the Sub-Adviser, as the case may be, may have an incentive to allocate securities that are expected to increase in value to preferred accounts. IPOs, in particular, are frequently of very limited availability. Additionally, portfolio managers may be perceived to have a conflict of interest if there are a large number of Other Accounts, in addition to the Fund, that they are managing on behalf of Dreyfus or the Sub-Adviser, as the case may be. Dreyfus or the Sub-Adviser, as the case may be, periodically reviews each portfolio manager's overall responsibilities to ensure that they are able to allocate the necessary time and resources to effectively manage the Fund. In addition, Dreyfus or the Sub-Adviser, as the case may be, could be viewed as having a conflict of interest to the extent that Dreyfus or the Sub-Adviser, as the case may be or its affiliates and/or portfolio managers have a materially larger investment in Other Accounts than their investment in the Fund.

Other Accounts may have investment objectives, strategies and risks that differ from those of the Fund. For these or other reasons, the portfolio managers may purchase different securities for the Fund and the Other Accounts, and the performance of securities purchased for the Fund may vary from the performance of securities purchased for Other Accounts. The portfolio managers may place transactions on behalf of Other Accounts that are directly or indirectly contrary to investment decisions made for the Fund, which could have the potential to adversely impact the Fund, depending on market conditions.

A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in another account, such as when a purchase increases the value of securities previously purchase by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Dreyfus' and the Sub-Adviser's respective goal is to provide high quality investment services to all clients, while meeting Dreyfus' and the Sub-Adviser's respective fiduciary obligation to treat all clients fairly. Each of Dreyfus and the Sub-Adviser has adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that it believes address the conflicts associated with managing multiple accounts for multiple clients. In addition, Dreyfus monitors a variety of areas, including compliance with Fund guidelines, the allocation of IPOs, and compliance with Dreyfus' Code of Ethics. Furthermore, senior investment and business personnel at Dreyfus periodically review the performance of the portfolio managers for Dreyfus-managed funds.

Expenses. All expenses incurred in the operation of the Fund are borne by the Trust, except to the extent specifically assumed by the Manager or Sub-Adviser. The expenses borne by the Trust include, without limitation: taxes, interest, loan commitment fees, interest and distributions paid on securities sold short, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager or Sub-Adviser or their affiliates, SEC fees and state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of independent pricing services, costs of maintaining the Trust's existence, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders, costs of shareholders' reports and meetings, and any extraordinary expenses. Expenses attributable to the Fund are charged against the assets of the Fund; other expenses of the Trust are allocated among the Fund and the Trust's other series on the basis determined by the Trust's Board, including, but not limited to, proportionately in relation to the net assets of each.

As compensation for the Manager's services, the Trust has agreed to pay the Manager a monthly management fee at the annual rate of 0.65% of the value of the Fund's average daily net assets. For the period from September 30, 2005 (commencement of operations) through August 31, 2006, the management fee payable by the Fund to the Manager amounted to \$23,744, which was reduced by \$23,744 pursuant to an undertaking by the Manager, resulting in a net management fee of \$0.

Under the Sub-Advisory Agreement, the Manager has agreed to pay the Sub-Adviser, out of the fee the Manager receives from the Fund, an annual fee of 0.251% of the value of the Fund's average daily net assets representing the equity portion of the Fund's portfolio, as compensation for its sub-investment advisory services to the Fund. For the period from September 30, 2005 (commencement of operations) through August 31, 2006, the sub-investment advisory fees payable by the Manager to the Sub-Adviser amounted to \$6,047, which was reduced by \$6,047, resulting in a sub-advisory fee of \$0.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of a Fund's net assets increases.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager located at 200 Park Avenue, New York, New York 10166, serves as the Fund's distributor on a best efforts basis pursuant to an agreement with the Fund which is renewable annually.

The Manager or the Distributor may provide cash payments out of its own resources to financial intermediaries that sell shares of the Fund or provide other services. Such payments are in addition to any 12b-1 fee or other expenses paid by the Fund. These additional payments may be made to certain Service Agents, including affiliates, that provide shareholder servicing, sub-administration, recordkeeping and/or sub-transfer agency services, marketing support and/or access to sales meetings, sales representatives and management representatives of the Service Agent. Cash compensation also may be paid to Service Agents for inclusion of the Fund on a sales list, including a preferred or select sales list or in other sales programs. These payments sometimes are referred to as "revenue sharing." In some cases, these payments may create an incentive for a Service Agent to recommend or sell shares of the Fund to you. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

From time to time, the Manager or the Distributor also may provide cash or non-cash compensation to Service Agents in the form of: occasional gifts; occasional meals, tickets or other entertainment; support for due diligence trips; educational conference sponsorship; support for recognition programs; and other form of cash or non-cash compensation permissible under broker-dealer regulations, as periodically amended.

Transfer and Dividend Disbursing Agent and Custodian. Dreyfus Transfer, Inc. (the "Transfer Agent"), a wholly-owned subsidiary of the Manager, 200 Park Avenue, New York, New York 10166, is the Fund's transfer and dividend disbursing agent. Under a transfer agency agreement with the Trust, the Transfer Agent arranges for the maintenance of shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by the Fund. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses.

Mellon Bank, N.A., located at One Mellon Bank Center, Pittsburgh, Pennsylvania 15258 (the "Custodian"), acts as the custodian of the Fund's investments. The Custodian has no part in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund. Under a custody agreement with the Trust, the Custodian holds the Fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of the Fund's assets held in custody and receives certain securities transaction charges.

## HOW TO BUY SHARES

The following information supplements and should be read in conjunction with the sections in the Fund's Prospectus entitled "Account Policies," "Services for Fund Investors," and "Instructions for Regular Accounts."

General. Fund shares may be purchased through the Distributor or Service Agents that have entered into service agreements with the Distributor. Fund shares are sold without a sales charge. You may be charged a fee if you effect transactions in Fund shares through a Service Agent. You will be charged a fee if an investment check is returned unpayable. Share certificates are issued only upon your written request. It is not recommended that the Fund be used as a vehicle for Keogh, IRA or other qualified plans. No certificates are issued for fractional shares.

The Fund reserves the right to reject any purchase order. The Fund will not establish an account for a "foreign financial institution," as that term is defined in Department of the Treasury rules implementing section 312 of the USA PATRIOT Act of 2001. Foreign financial institutions include: foreign banks (including foreign branches of U.S. depository institutions); foreign offices of U.S. securities broker-dealers, futures commission merchants, and mutual funds; non-U.S. entities that, if they were located in the United States, would be securities broker-dealers, futures commission merchants or mutual funds; and non-U.S. entities engaged in the business of a currency dealer or exchanger or a money transmitter.

The minimum initial investment is \$2,500, or \$1,000 if you are a client of a Service Agent which maintains an omnibus account in the Fund and has made an aggregate minimum initial purchase for its customers of \$2,500. Subsequent investments must be at least \$100. The initial investment must be accompanied by the Account Application. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Trust's Board, or the spouse or minor child of any of the foregoing, the minimum initial investment is \$1,000. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. Fund shares are offered without regard to the minimum initial investment requirements to Board members of a fund advised by the Manager, including members of the Trust's Board, who elect to have all or a portion of their compensation for serving in that capacity automatically invested in the Fund. Fund shares are offered without regard to the minimum subsequent investment requirements to shareholders purchasing Fund shares through Dreyfus Managed Assets Program or through other wrap account programs. The Fund reserves the right to vary the initial and subsequent investment minimum requirements at any time.

Fund shares also are offered without regard to the minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan pursuant to the Dreyfus Step Program described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect an investor against loss in a declining market.

Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this SAI, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. As discussed under "Management Arrangements-Distributor," Service Agents may receive revenue sharing payments from the Manager or the Distributor. The receipt of such payments could create an incentive for a Service Agent to recommend or sell shares of the Fund instead of other mutual funds where such payments are not received. Please contact your Service Agent for details about any payments it may receive in connection with the sale of Fund shares or the provision of services to the Fund.

Shares are sold on a continuous basis at the net asset value per share next determined after an order in proper form is received by the Transfer Agent or other entity authorized to receive orders on behalf of the Fund. Net asset value per share is determined as of the close of trading on the floor of the New York Stock Exchange ("NYSE") (usually 4:00 p.m., Eastern time) on each day the NYSE is open for regular business. For purposes of computing net asset value per share, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the NYSE. Net asset value per share is computed by dividing the value of the Fund's net assets (i.e., the value of its assets less liabilities) by the total number of shares outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

Dreyfus TeleTransfer Privilege. You may purchase shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds will be transferred between the bank account designated in one of these documents and your Fund account. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern Time, on any day that the Transfer Agent and the NYSE are open for regular business, Fund shares will be purchased at the share price determined on that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the NYSE are open for regular business, or made on Saturday, Sunday or any Fund holiday (e.g., when the NYSE is not open for business), Fund shares will be purchased at the share price determined on the next bank business day following such purchase order. To qualify to use Dreyfus TeleTransfer Privilege, the initial payment for purchase of shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares--Dreyfus TeleTransfer Privilege."

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

## SERVICE PLAN

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus entitled "Expenses."

Rule 12b-1 (the "Rule") adopted by the SEC under the 1940 Act provides, among other things, that an investment company may bear expenses of distributing its shares only pursuant to a plan adopted in accordance with the Rule. The Trust's Board has adopted such a plan (the "Service Plan") pursuant to which the Fund reimburses the Distributor for expenses in connection with distributing the Fund's shares, servicing shareholder accounts and advertising and marketing relating to the Fund, at an aggregate annual rate of up to 0.25% of the value of the Fund's average daily net assets. The Distributor may pay one or more Service Agents a fee in respect of these services and determines the amount, if any, to be paid to Service Agents and the basis on which such payments are to be made. The Trust's Board believes that there is a reasonable likelihood that the Service Plan will benefit the Fund and its shareholders.

A quarterly report of the amounts expended under the Service Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, the Service Plan provides that it may not be amended to increase materially the costs which the Fund may bear pursuant to the Service Plan without shareholder approval and that other material amendments of the Service Plan must be approved by the Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund or the Manager and have no direct or indirect financial interest in the operation of the Service Plan or in the related service agreements, by vote cast in person at a meeting called for the purpose of considering such amendments. The Service Plan and the related service agreements are subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Service Plan. The Service Plan is terminable at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Service Plan or in any of the related service agreements or by vote of a majority of the Fund's shares.

For the period from September 30, 2005 (commencement of operations) through August 31, 2006, the Fund paid the Distributor \$8,090 pursuant to the Service Plan.

## HOW TO REDEEM SHARES

The following information supplements and should be read in conjunction with the sections in the Fund's Prospectus entitled "Account Policies," "Services for Fund Investors," and "Instructions for Regular Accounts."

**General.** The Fund ordinarily will make a payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the rules of the SEC. However, if you have purchased Fund shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder<sup>®</sup> and subsequently submit a written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Fund will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus

TeleTransfer Privilege for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder® order against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares may not be redeemed until the Transfer Agent has received your Account Application.

Redemption Fee. The Fund will deduct a redemption fee equal to 1% of the net asset value of Fund shares redeemed (including redemptions through the use of the Fund Exchanges service) less than 30 days following the issuance of such shares. The redemption fee will be deducted from the redemption proceeds and retained by the Fund.

No redemption fee will be charged on the redemption or exchange of shares (1) through the Fund's Automatic Withdrawal Plan or Dreyfus Auto-Exchange Privilege, (2) through accounts that are reflected on the records of the Transfer Agent as omnibus accounts approved by the Distributor, (3) through accounts established by Service Agents approved by the Distributor that utilize the National Securities Clearing Corporation's networking system, or (4) acquired through the reinvestment of dividends or distributions. The Fund's redemption fee will also be waived on investments made through Dreyfus Managed Assets Program or through other wrap account programs. The redemption fee may be waived, modified or terminated at any time.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you and reasonably believed by the Transfer Agent to be genuine. Ordinarily, the Fund will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt by the Transfer Agent of a redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Share Certificates; Signatures."

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. See "How to Buy Shares--Dreyfus TeleTransfer Privilege."

Share Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. A fee may be imposed to replace lost or stolen certificates, or certificates that were never received. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the NYSE Medallion Signature Program, the Securities Transfer Agents Medallion Program ("STAMP") and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and "Signature-Guaranteed" must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians and may accept other suitable verification arrangements from foreign investors, such as consular verification. For more information with respect to signature-guarantees, please call one of the telephone numbers listed on the cover.

Redemption Commitment. The Trust has committed itself to pay in cash all redemption requests by any shareholder of record, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of the Fund's net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the SEC. In the case of requests for redemption in excess of such amount, the Trust's Board reserves the right to make payments in whole or in part in securities or other assets of the Fund in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Fund's portfolio is valued. If the recipient sells such securities, brokerage charges might be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the NYSE is closed (other than customary weekend and holiday closings), (b) when trading in the markets the Fund ordinarily utilizes is restricted, or when an emergency exists as determined by the SEC so that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods as the SEC by order may permit to protect the Fund's shareholders.

## SHAREHOLDER SERVICES

The following information supplements and should be read in conjunction with the sections in the Fund's Prospectus entitled "Account Policies" and "Services for Fund Investors."

Fund Exchanges. You may purchase, in exchange for shares of the Fund, shares of certain other funds managed or administered by the Manager or shares of certain funds advised by Founders Asset Management LLC ("Founders"), an indirect subsidiary of the Manager, to the extent such shares are offered for sale in your state of residence. The Fund will deduct a redemption fee equal to 1% of the net asset value of Fund shares exchanged where the exchange is made less than 30 days after the issuance of such shares. Shares of other funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.

To accomplish an exchange under item D above, you must notify the Transfer Agent of your prior ownership of fund shares and your account number.

To request an exchange, you or your Service Agent acting on your behalf must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone or online is given to all Fund shareholders automatically, unless you check the applicable "No" box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic and online instructions (including over the Dreyfus Express<sup>®</sup> voice response telephone system) from any person representing himself or herself to be you, and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form are not eligible for telephone or online exchange. No fees currently are charged shareholders directly in connection with exchanges, although the Fund reserves the right, upon not less than 60 days' written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the SEC.

During times of drastic economic or market conditions, the Fund may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate components--redemption orders with a simultaneous request to purchase the other fund's shares. In such a case, the redemption request would be processed at the Fund's next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of the Fund, shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. This Privilege is available only for existing accounts.

Shares will be exchanged on the basis of relative net asset value as described above under "Fund Exchanges." Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by the investor. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-645-6561, or visiting [www.dreyfus.com](http://www.dreyfus.com). The Fund reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus-Automatic Asset Builder®. Dreyfus-Automatic Asset Builder permits you to purchase Fund shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Fund shares (minimum of \$100 and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the U.S. Government automatically deposited into your fund account.

Dreyfus Payroll Savings Plan. Dreyfus Payroll Savings Plan permits you to purchase Fund shares (minimum of \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the ACH system at each pay period. To establish a Dreyfus Payroll Savings Plan account, you must file an authorization form with your employer's payroll department. It is the sole responsibility of your employer to arrange for transactions under the Dreyfus Payroll Savings Plan.

Dreyfus Step Program. Dreyfus Step Program enables you to purchase Fund shares without regard to the Fund's minimum initial investment requirements through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan. To establish a Dreyfus Step Program account, you must supply the necessary information on the Account Application and file the required authorization form(s) with the Transfer Agent. For more information concerning this Program, or to request the necessary authorization form(s), please call toll free 1-800-782-6620. You may terminate your participation in this Program at any time by discontinuing your participation in Dreyfus-Automatic Asset Builder, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan, as the case may be, as provided under the terms of such Privilege(s). The Fund may modify or terminate this Program at any time.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from the Fund in shares of another fund in the Dreyfus Family of Funds or shares of certain funds advised by Founders of which you are a shareholder. Shares of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund that does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that impose a contingent deferred sales charge ("CDSC") and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from the Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. The Automatic Withdrawal Plan may be established by filing an Automatic Withdrawal Plan application with the Transfer Agent or by oral request from any of the authorized signatories on the account by calling 1-800-645-6561. Automatic Withdrawal may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

## DETERMINATION OF NET ASSET VALUE

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus entitled "Account Policies."

Valuation of Portfolio Securities. Substantially all of the Fund's investments in Municipal Bonds (excluding short-term investments) are valued by one or more independent pricing services (the "Service") approved by the Trust's Board. Securities valued by the Service for which quoted bid prices in the judgment of the Service are readily available and are representative of the bid side of the market are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other investments in Municipal Bonds is determined by the Service based on methods which include consideration of: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers;

and general market conditions. The Service may employ electronic data processing techniques and/or a matrix system to determine valuations. The Service's procedures are reviewed by the Trust's officers under the general supervision of the Trust's Board. These procedures need not be used to determine the value of securities held by the Fund if, in the opinion of a committee appointed by the Trust's Board, some other method would more accurately reflect the fair value of such securities. The Fund's equity investments generally are valued on the basis of market quotations or official closing prices. The Fund's portfolio of equity securities (and covered call options written by the Fund) are valued at the last sale price on the securities exchange or national securities market on which such securities primarily are traded. Securities listed on the Nasdaq National Market System for which market quotations are available are valued at the official closing price or, if there is no official closing price on that day, at the last sale price. Securities not listed on an exchange or national securities market, or securities in which there were no transactions, are valued at the average of the most recent bid and asked prices, except that open short positions are valued at the asked price. Bid price is used when no asked price is available. Any securities or other assets for which recent market quotations are not readily available are valued at fair value as determined in good faith by the Board. Any assets or liabilities initially expressed in terms of foreign currency will be translated into U.S. dollars at the midpoint of the New York interbank market spot exchange rate as quoted on the day of such translation by the Federal Reserve Bank of New York or if no such rate is quoted on such date, at the exchange rate previously quoted by the Federal Reserve Bank of New York, or at such other quoted market exchange rate as may be determined to be appropriate by the Advisers. Forward currency contracts will be valued at the current cost of offsetting the contract. If the Fund has to obtain prices as of the close of trading on various exchanges throughout the world, the calculation of net asset value may not take place contemporaneously with the determination of prices of certain of the Fund's portfolio securities. Short-term investments may be carried at amortized cost, which approximates value. Expenses and fees, including the management fee and fees pursuant to the Service Plan, are accrued daily and taken into account for the purpose of determining the net asset value of the Fund shares.

Restricted securities, as well as securities or other assets for which recent market quotations or official closing prices are not readily available or are determined by the Trust not to reflect accurately fair value (such as when the value of a security has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded (for example, a foreign exchange or market) but before the Fund calculated its NAV), or which are not valued by the Service, are valued at fair value as determined in good faith based on procedures approved by the Trust's Board. Fair value of investments may be determined by the Trust's Board, its pricing committee or its valuation committee in good faith using such information as it deems appropriate. The factors that may be considered when fair valuing a security include fundamental analytical data, the nature and duration of restrictions on disposition, an evaluation of the forces that influence the market in which the securities are purchased or sold, and public trading in similar securities of the issuer or comparable issuers. Fair value of foreign equity securities may be determined with the assistance of a pricing service using correlations between the movement of prices of foreign securities and indices of domestic securities and other appropriate indicators, such as closing market prices of relevant ADRs and futures contracts. The valuation of a security based on fair value procedures may differ from the security's most recent closing price, and from the prices used by other mutual funds to calculate their net asset values. Foreign securities held by the Fund may trade on days the Fund is not open for business, thus affecting the value of the Fund's assets on days when Fund investors have no access to the Fund. Restricted securities that are, or are

convertible into, securities of the same class of other securities for which a public market exists usually will be valued at the market value of such securities less the same percentage discount at which the restricted securities were purchased. This discount will be revised periodically by the Board if the Board members believe that it no longer reflects the value of the restricted securities. Restricted securities not of the same class as securities for which a public market exists usually will be valued initially at cost. Any subsequent adjustment from cost will be based upon considerations deemed relevant by the Trust's Board.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

## DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus entitled "Distributions and Taxes."

It is expected that the Fund will qualify as a regulated investment company under the Code. The Fund intends to continue to so qualify if such qualification is in the best interests of its shareholders. As a regulated investment company, the Fund will pay no Federal income tax on net investment income and net realized capital gains to the extent that such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment company, the Fund must distribute at least 90% of its net income (consisting of net investment income from tax exempt obligations and taxable obligations, if any, and net short-term capital gain) to its shareholders and meet certain asset diversification and other requirements. If the Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

The Fund ordinarily declares and pays dividends from its net investment income from Municipal Bonds monthly. Tax exempt dividends are automatically reinvested in additional Fund shares at net asset value or, at your option, paid in cash. Taxable dividends and distributions from net realized capital gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis to comply with the distribution requirements of the Code, in all events in a manner consistent with the provisions of the 1940 Act.

If you elect to receive dividends and distributions in cash, and your dividend or distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividends or distributions and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

If, at the close of each quarter of its taxable year, at least 50% of the value of the Fund's total assets consists of Federal tax exempt obligations, the Fund may designate and pay Federal exempt-interest dividends from interest earned on all such tax exempt obligations. Such exempt-interest dividends may be excluded by shareholders of the Fund from their gross income for

Federal income tax purposes. Dividends derived from taxable investments, together with distributions from any net realized short-term securities gains, generally are taxable as ordinary income for Federal income tax purposes whether or not reinvested. Distributions from net realized long-term securities gains generally are taxable as long-term capital gains to a shareholder who is a citizen or resident of the United States, whether or not reinvested and regardless of the length of time the shareholder has held his or her shares.

Any dividend or distribution paid shortly after an investor's purchase of Fund shares may have the effect of reducing the aggregate net asset value of the shares below the cost of the investment. Such a dividend or distribution would be a return of capital in an economic sense, although taxable as described in the Fund's Prospectus. In addition, the Code provides that if a shareholder holds Fund shares for six months or less and has received a capital gain distribution or an exempt-interest dividend with respect to such shares, any loss incurred on the sale of such shares will be treated as a long-term capital loss to the extent of the capital gain distribution received or disallowed to the extent of the exempt-interest dividend received, respectively.

In general, dividends (other than capital gain dividends) paid by the Fund to U.S. individual shareholders from the Fund's investments in equity securities may be eligible for the 15% preferential maximum tax rate to the extent that the Fund's income consists of dividends paid by U.S. corporations and certain foreign corporations on shares that have been held by the Fund for at least 61 days during the 121-day period commencing 60 days before the shares become ex-dividend. In order to be eligible for the preferential rate, the investor in the Fund must have held his or her shares in the Fund for at least 61 days during the 121-day period commencing 60 days before the Fund shares become ex-dividend. Additional restrictions on an investor's qualification for the preferential rate may apply.

In general, dividends (other than capital gain dividends) paid by the Fund to U.S. corporate shareholders from the Fund's investments in equity securities may be eligible for the dividends received deduction to the extent that the Fund's income consists of dividends paid by U.S. corporations on shares that have been held by the Fund for at least 46 days during the 91-day period commencing 45 days before the shares become ex-dividend. In order to claim the dividends received deduction, the investor in the Fund must have held its shares in the Fund for at least 46 days during the 91-day period commencing 45 days before the Fund shares become ex-dividend. Additional restrictions on an investor's ability to claim the dividends received deduction may apply.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gains and losses. However, a portion of the gain or loss realized from the disposition of foreign currencies (including foreign currency denominated bank deposits) and non-U.S. dollar denominated securities (including debt instruments and certain futures or forward contracts and options) may be treated as ordinary income or loss. In addition, all or a portion of any gains realized from the sale or other disposition of certain market discount bonds will be treated as ordinary income. Finally, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by the Fund from certain financial futures or forward contracts and options transactions ("Section 1256 contracts") will be treated as 60% long-term capital gain or

loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing transactions. In addition, any Section 1256 contracts remaining unexercised at the end of the Fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund characterized in the manner described above.

Offsetting positions held by the Fund involving certain financial futures or forward contracts or options transactions with respect to actively traded personal property may be considered, for tax purposes, to constitute "straddles." To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by the Fund may constitute "mixed straddles." The Fund may make one or more elections with respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If the Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial position") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") with respect to the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Fund generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively.

If the Fund enters into certain derivatives (including forward contracts, long positions under notional principal contracts, and related puts and calls) with respect to equity interests in certain pass-thru entities (including other regulated investment companies, real estate investment trusts, partnerships, real estate mortgage investment conduits and certain trusts and foreign corporations), long-term capital gain with respect to the derivative may be recharacterized as ordinary income to the extent it exceeds the long-term capital gain that would have been realized had the interest in the pass-thru entity been held directly by the Fund during the term of the derivative contract. Any gain recharacterized as ordinary income will be treated as accruing at a constant rate over the term of the derivative contract and may be subject to an interest charge. The Treasury has authority to issue regulations expanding the application of these rules to derivatives with respect to debt instruments and/or stock in corporations that are not pass-thru entities.

If the Fund invests in an entity that is classified as a "passive foreign investment company" ("PFIC") for Federal income tax purposes, the operation of certain provisions of the Code applying to PFICs could result in the imposition of certain Federal income taxes on the Fund. In addition, gain realized from the sale or other disposition of PFIC securities may be treated as ordinary income.

Investment by the Fund in securities issued or acquired at a discount, or providing for deferred interest or for payment of interest in the form of additional obligations, could, under

special tax rules, affect the amount, timing and character of distributions to shareholders by causing the Fund to recognize income prior to the receipt of cash payments. For example, the Fund could be required each year to accrue a portion of the discount (or deemed discount) at which the securities were issued and to distribute such income in order to maintain its qualification as a regulated investment company. In such case, the Fund may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy the distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Trust could subject you to a \$50 penalty imposed by the Internal Revenue Service.

## PORTFOLIO TRANSACTIONS

The following information supplements and should be read in conjunction with the section in the Fund's Prospectus entitled "The Fund."

General. The Manager assumes general supervision over the placement of securities purchase and sale orders on behalf of the funds it manages. Funds managed by dual employees of the Manager and an affiliated entity, and funds that employ a sub-investment adviser, execute portfolio transactions through the trading desk of the affiliated entity or sub-investment adviser, as applicable (the "Trading Desk"). Those funds use the research facilities, and are subject to the internal policies and procedures, of applicable affiliated entity or sub-investment adviser.

The Trading Desk generally has the authority to select brokers (for equity securities) or dealers (for fixed income securities) and the commission rates or spreads to be paid. Allocation of brokerage transactions is made in the best judgment of the Trading Desk and in a manner deemed fair and reasonable. In choosing brokers or dealers, the Trading Desk evaluates the ability of the broker or dealer to execute the transaction at the best combination of price and quality of execution.

In general, brokers or dealers involved in the execution of portfolio transactions on behalf of a fund are selected on the basis of their professional capability and the value and quality of their services. The Trading Desk attempts to obtain best execution for the funds by choosing brokers or dealers to execute transactions based on a variety of factors, which may include, but are not limited to, the following: (i) price; (ii) liquidity; (iii) the nature and character of the relevant market for the security to be purchased or sold; (iv) the quality and efficiency of the broker's or dealer's execution; (v) the broker's or dealer's willingness to commit capital; (vi) the reliability of the broker or dealer in trade settlement and clearance; (vii) the level of counter-party risk (*i.e.*, the broker's or dealer's financial condition); (viii) the commission rate or the spread; (ix) the value of research provided; (x) the availability of electronic trade entry and reporting links; and (xi) the size and type of order (*e.g.*, foreign or domestic security, large block, illiquid security). In selecting brokers or dealers no factor is necessarily determinative; however, at various times and for various reasons, certain factors will be more important than others in determining which broker or dealer to use. Seeking to obtain best execution for all trades takes precedence over all other considerations.

Investment decisions for one fund or account are made independently from those for other funds or accounts managed by the portfolio managers. Under the Trading Desk's procedures, portfolio managers and their corresponding Trading Desks may seek to aggregate (or "bunch") orders that are placed or received concurrently for more than one fund or account. In some cases, this policy may adversely affect the price paid or received by a fund or an account, or the size of the position obtained or liquidated. As noted above, certain brokers or dealers may be selected because of their ability to handle special executions such as those involving large block trades or broad distributions, provided that the primary consideration of best execution is met. Generally, when trades are aggregated, each fund or account within the block will receive the same price and commission. However, random allocations of aggregate transactions may be made to minimize custodial transaction costs. In addition, at the close of the trading day, when reasonable and practicable, the completed securities of partially filled orders will generally be allocated to each participating fund and account in the proportion that each order bears to the total of all orders (subject to rounding to "round lot" amounts and other relevant factors).

Portfolio turnover may vary from year to year as well as within a year. In periods in which extraordinary market conditions prevail, the portfolio managers will not be deterred from changing a Fund's investment strategy as rapidly as needed, in which case higher turnover rates can be anticipated which would result in greater brokerage expenses. The overall reasonableness of brokerage commissions paid is evaluated by the Trading Desk based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Higher portfolio turnover rates usually generate additional brokerage commissions and transaction costs, and any short-term gains realized from these transactions are taxable to shareholders as ordinary income.

To the extent that a fund invests in foreign securities, certain of such fund's transactions in those securities may not benefit from the negotiated commission rates available to funds for transactions in securities of domestic issuers. For funds that permit foreign exchange transactions, such transactions are made with banks or institutions in the interbank market at prices reflecting a mark-up or mark-down and/or commission.

The portfolio managers may deem it appropriate for one fund or account they manage to sell a security while another fund or account they manage is purchasing the same security. Under such circumstances, the portfolio managers may arrange to have the purchase and sale transactions effected directly between the funds and/or accounts ("cross transactions"). Cross transactions will be effected in accordance with procedures adopted pursuant to Rule 17a-7 under the 1940 Act.

Funds and accounts managed by the Manager, an affiliated entity or a sub-investment adviser may own significant positions in portfolio companies which, depending on market conditions, may affect adversely the ability to dispose of some or all of such positions.

Municipal Bonds ordinarily are purchased from and sold to parties acting either as principal or agent. Newly-issued securities ordinarily are purchased directly from the issuer or from an underwriter; other purchases and sales usually are placed with those dealers from which it appears that the best price or execution will be obtained. Usually no brokerage commissions, as such, are paid by the fund for such purchases and sales, although the price paid usually includes an

undisclosed compensation to the dealer acting as agent. The prices paid to underwriters of newly-issued Municipal Bonds usually include a concession paid by the issuer to the underwriter, and purchases of after-market securities from dealers ordinarily are executed at a price between the bid and asked price.

When transactions are executed in the over-the-counter market (*i.e.*, with dealers), the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) will typically deal with the primary market makers unless a more favorable price or execution otherwise is obtainable.

IPO Allocations. Certain funds advised by the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) may participate in IPOs. In deciding whether to purchase an IPO, the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) generally considers the capitalization characteristics of the security, as well as other characteristics of the security, and identifies funds and accounts with investment objectives and strategies consistent with such a purchase. Generally, as more IPOs involve small- and mid-cap companies, the funds and accounts with a small- and mid-cap focus may participate in more IPOs than funds and accounts with a large-cap focus. The Manager (and where applicable, a sub-adviser or Dreyfus affiliate), when consistent with the fund's and/or account's investment guidelines, generally will allocate shares of an IPO on a pro rata basis. In the case of "hot" IPOs, where the Manager (and if applicable, a sub-adviser or Dreyfus affiliate) only receives a partial allocation of the total amount requested, those shares will be distributed fairly and equitably among participating funds or accounts managed by the Manager (or where applicable, a sub-adviser or Dreyfus affiliate). "Hot" IPOs raise special allocation concerns because opportunities to invest in such issues are limited as they are often oversubscribed. The distribution of the partial allocation among funds and/or accounts will be based on relevant net asset values. Shares will be allocated on a pro rata basis to all appropriate funds and accounts, subject to a minimum allocation based on trading, custody, and other associated costs. International hot IPOs may not be allocated on a pro rata basis due transaction costs, market liquidity and other factors unique to international markets.

Soft Dollars. The term "soft dollars" is commonly understood to refer to arrangements where an investment adviser uses client (or fund) brokerage commissions to pay for research and other services to be used by the investment adviser. Section 28(e) of the Securities Exchange Act of 1934 provides a "safe harbor" that permits investment advisers to enter into soft dollar arrangements if the investment adviser determines in good faith that the amount of the commission is reasonable in relation to the value of the brokerage and research services provided. Eligible products and services under Section 28(e) include those that provide lawful and appropriate assistance to the investment adviser in the performance of its investment decision-making responsibilities.

Subject to the policy of seeking best execution, Dreyfus-managed funds may execute transactions with brokerage firms that provide research services and products, as defined in Section 28(e). Any and all research products and services received in connection with brokerage commissions will be used to assist the applicable affiliated entity or sub-investment adviser in its investment decision-making responsibilities, as contemplated under Section 28(e). Under certain conditions, higher brokerage commissions may be paid in connection with certain transactions in return for research products and services.

The products and services provided under these arrangements permit the Trading Desk to supplement its own research and analysis activities, and provide it with information from individuals and research staffs of many securities firms. Such services and products may include, but are not limited to the following: fundamental research reports (which may discuss, among other things, the value of securities, or the advisability of investing in, purchasing or selling securities, or the availability of securities or the purchasers or sellers of securities, or issuers, industries, economic factors and trends, portfolio strategy and performance); current market data and news; technical and portfolio analyses; economic forecasting and interest rate projections; and historical information on securities and companies. The Trading Desk also may defray the costs of certain services and communication systems that facilitate trade execution (such as on-line quotation systems, direct data feeds from stock exchanges and on-line trading systems with brokerage commissions generated by client transactions) or functions related thereto (such as clearance and settlement). Some of the research products or services received by the Trading Desk may have both a research function and a non-research administrative function (a “mixed use”). If the Trading Desk determines that any research product or service has a mixed use, the Trading Desk will allocate in good faith the cost of such service or product accordingly. The portion of the product or service that the Trading Desk determines will assist it in the investment decision-making process may be paid for in soft dollars. The non-research portion is paid for by the Trading Desk in hard dollars.

The Trading Desk generally considers the amount and nature of research, execution and other services provided by brokerage firms, as well as the extent to which such services are relied on, and attempts to allocate a portion of the brokerage business of its clients on the basis of that consideration. Neither the services nor the amount of brokerage given to a particular brokerage firm are made pursuant to any agreement or commitment with any of the selected firms that would bind the Trading Desk to compensate the selected brokerage firm for research provided. The Trading Desk endeavors, but is not legally obligated, to direct sufficient commissions to broker/dealers that have provided it with research and other services to ensure continued receipt of research the Trading Desk believes is useful. Actual commissions received by a brokerage firm may be more or less than the suggested allocations.

There may be no correlation between the amount of brokerage commissions generated by a particular fund or client and the indirect benefits received by that fund or client. The affiliated entity or sub-investment adviser may receive a benefit from the research services and products that is not passed on to a fund in the form of a direct monetary benefit. Further, research services and products may be useful to the affiliated entity or sub-investment adviser in providing investment advice to any of the funds or clients it advises. Likewise, information made available to the affiliated entity or sub-investment adviser from brokerage firms effecting securities transactions for a fund may be utilized on behalf of another fund or client. Information so received is in addition to, and not in lieu of, services required to be performed by the affiliated entity or sub-investment adviser and fees are not reduced as a consequence of the receipt of such supplemental information. Although the receipt of such research services does not reduce the normal independent research activities of the affiliated entity or sub-investment adviser, it enables them to avoid the additional expenses that might otherwise be incurred if it were to attempt to develop comparable information through its own staff.

There were no transactions conducted on an agency basis through a broker, for among other things, research services for the period from September 30, 2005 (commencement of operations) through August 31, 2006.

Brokerage Commissions. The Trust contemplates that, consistent with the policy of obtaining the most favorable net price, brokerage transactions may be conducted through the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) or their affiliates. The Trust's Board has adopted procedures in conformity with Rule 17e-1 under the 1940 Act to ensure that all brokerage commissions paid to the Manager (and where applicable, a sub-adviser or Dreyfus affiliate) are reasonable and fair.

For the period from September 30, 2005 (commencement of operations) through August 31, 2006, the Fund paid brokerage commissions of \$1,687, none of which was paid to the Distributor. There were no gross spreads and concessions on principal transactions for the Fund.

Regular Broker-Dealers. The Fund may acquire securities issued by its "regular brokers or dealers," as defined in Rule 10b-1 under the 1940 Act. Rule 10b-1 provides that a "regular broker or dealer" is one of the ten brokers or dealers that, during the Fund's most recent fiscal year (i) received the greatest dollar amount of brokerage commissions from participating, either directly or indirectly, in the Fund's portfolio transactions, (ii) engaged as principal in the largest dollar amount of the Fund's portfolio transactions or (iii) sold the largest dollar amount of the Fund's securities. For the period from September 30, 2005 (commencement of operations) through August 31, 2006, the Fund acquired securities issued by its regular brokers or dealers. The following is a list of the issuers of the securities and the aggregate value per issuer, as of August 31, 2006, of such securities:

<u>Name of Regular Broker or Dealer</u>	<u>Aggregate Value Per Issuer</u>
Merrill Lynch, Pierce, Fenner & Smith Inc.	\$ 51,000
Citigroup Global Markets Inc.	\$ 74,000

Disclosure of Portfolio Holdings. It is the policy of the Trust to protect the confidentiality of the Fund's portfolio holdings and prevent the selective disclosure of non-public information about such holdings. The Fund will publicly disclose its holdings in accordance with regulatory requirements, such as periodic portfolio disclosure in filings with the SEC. The Fund will publicly disclose its complete schedule of portfolio holdings, as reported on a month-end basis, at <http://www.dreyfus.com>. The information will be posted with a one-month lag and will remain accessible until the Trust files a report on Form N-Q or Form N-CSR for the period that includes the date as of which the information was current. In addition, fifteen days following the end of each calendar quarter, the Fund will publicly disclose on the website its complete schedule of portfolio holdings as of the end of such quarter.

If the Fund's portfolio holdings are released pursuant to an ongoing arrangement with any party, the Fund must have a legitimate business purpose for doing so, and neither the Fund, nor the Advisers or their affiliates may receive any compensation in connection with an arrangement to make available information about the Fund's portfolio holdings. The Fund may distribute its portfolio holdings to mutual fund evaluation services such as Standard & Poor's, Morningstar or

Lipper Analytical Services; due diligence departments of broker-dealers and wirehouses that regularly analyze the portfolio holdings of mutual funds before their public disclosure; and broker-dealers provided that: (a) the recipient does not distribute the portfolio holdings to persons who are likely to use the information for purposes of purchasing or selling Fund shares or Fund portfolio holdings before the portfolio holdings become public information; and (b) the recipient signs a written confidentiality agreement.

The Fund may also disclose any and all portfolio information to its service providers and others who generally need access to such information in the performance of their contractual duties and responsibilities and are subject to duties of confidentiality, including a duty not to trade on non-public information, imposed by law and/or contract. These service providers include the Fund's custodian, auditors, investment advisers, administrator, and each of their respective affiliates and advisers.

Disclosure of the Fund's portfolio holdings may be authorized only by the Trust's Chief Compliance Officer, and any exceptions to this policy are reported quarterly to the Trust's Board.

#### SUMMARY OF THE PROXY VOTING POLICY, PROCEDURES AND GUIDELINES OF THE DREYFUS FAMILY OF FUNDS

The Board of each fund in the Dreyfus Family of Funds has delegated to the Manager the authority to vote proxies of companies held in the fund's portfolio. The Manager, through its participation on the Mellon Proxy Policy Committee (the "MPPC"), applies Mellon's Proxy Voting Policy, related procedures, and voting guidelines when voting proxies on behalf of the funds.

The Manager recognizes that an investment adviser is a fiduciary that owes its clients, including funds it manages, a duty of utmost good faith and full and fair disclosure of all material facts. An investment adviser's duty of loyalty requires an adviser to vote proxies in a manner consistent with the best interest of its clients and precludes the adviser from subrogating the clients' interests to its own. In addition, an investment adviser voting proxies on behalf of a fund must do so in a manner consistent with the best interests of the fund and its shareholders.

The Manager seeks to avoid material conflicts of interest by participating in the MPPC, which applies detailed, pre-determined written proxy voting guidelines (the "Voting Guidelines") in an objective and consistent manner across client accounts, based on internal and external research and recommendations provided by a third party vendor, and without consideration of any client relationship factors. Further, the MPPC engages a third party as an independent fiduciary to vote all proxies of funds managed by Mellon or its affiliates (including the Dreyfus Family of Funds), and may engage an independent fiduciary to vote proxies of other issuers at its discretion.

All proxies received by the funds are reviewed, categorized, analyzed and voted in accordance with the Voting Guidelines. The guidelines are reviewed periodically and updated as necessary to reflect new issues and any changes in Mellon's or the Manager's policies on specific issues. Items that can be categorized under the Voting Guidelines are voted in accordance with any applicable guidelines or referred to the MPPC, if the applicable guidelines so require. Proposals that cannot be categorized under the Voting Guidelines are referred to the MPPC for discussion and vote. Additionally, the MPPC reviews proposals where it has identified a particular company,

industry or issue for special scrutiny. With regard to voting proxies of foreign companies, the MPPC weighs the cost of voting and potential inability to sell the securities (which may occur during the voting process) against the benefit of voting the proxies to determine whether or not to vote. With respect to securities lending transactions, the MPPC seeks to balance the economic benefits of continuing to participate in an open securities lending transaction against the inability to vote proxies.

When evaluating proposals, the MPPC recognizes that the management of a publicly-held company may need protection from the market's frequent focus on short-term considerations, so as to be able to concentrate on such long-term goals as productivity and development of competitive products and services. In addition, the MPPC generally supports proposals designed to provide management with short-term insulation from outside influences so as to enable them to bargain effectively with potential suitors to the extent such proposals are discrete and not bundled with other proposals. The MPPC believes that a shareholder's role in the governance of a publicly-held company is generally limited to monitoring the performance of the company and its management and voting on matters which properly come to a shareholder vote. However, the MPPC generally opposes proposals designed to insulate an issuer's management unnecessarily from the wishes of a majority of shareholders. Accordingly, the MPPC generally votes in accordance with management on issues that the MPPC believes neither unduly limit the rights and privileges of shareholders nor adversely affect the value of the investment.

On questions of social responsibility where economic performance does not appear to be an issue, the MPPC attempts to ensure that management reasonably responds to the social issues. Responsiveness will be measured by management's efforts to address the particular social issue including, where appropriate, assessment of the implications of the proposal to the ongoing operations of the company. The MPPC will pay particular attention to repeat issues where management has failed in its commitment in the intervening period to take actions on issues.

In evaluating proposals regarding incentive plans and restricted stock plans, the MPPC typically employs a shareholder value transfer model. This model seeks to assess the amount of shareholder equity flowing out of the company to executives as options are exercised. After determining the cost of the plan, the MPPC evaluates whether the cost is reasonable based on a number of factors, including industry classification and historical performance information. The MPPC generally votes against proposals that permit or are silent on the repricing or replacement of stock options without shareholder approval.

Information regarding how the Manager voted proxies for the Fund is available at <http://www.dreyfus.com> and on the SEC's website at <http://www.sec.gov> on the Fund's Form N-PX filed with the SEC.

## INFORMATION ABOUT THE TRUST AND FUND

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and non-assessable. Fund shares are of one class and have equal rights as to dividends and in liquidation. Fund shares are without par value, have no preemptive or subscription rights and are freely transferable. The Fund is one of six portfolios of the Trust.

The Trust is organized as an unincorporated business trust under the laws of the Commonwealth of Massachusetts. Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Trust. However, the Trust's Agreement and Declaration of Trust disclaims shareholder liability for acts or obligations of the Trust and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by the Trust or a Trustee. The Agreement and Declaration of Trust provides for indemnification from the Fund's property for all losses and expenses of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund itself would be unable to meet its obligations, a possibility which management believes is remote. Upon payment of any liability incurred by the Fund, the shareholder paying such liability will be entitled to reimbursement from the general assets of the Fund. The Trust intends to conduct its operations in such a way so as to avoid, as far as possible, ultimate liability of the shareholders for liabilities of the Fund.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Trust to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of an independent registered public accounting firm. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Trust to hold a special meeting of shareholders for purposes of removing a Board member from office. Shareholders may remove a Board member by the affirmative vote of 66-2/3% of the Trust's outstanding voting shares entitled to vote thereon. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Trust is a "series fund," which is a mutual fund divided into separate portfolios, each of which is treated as a separate entity for certain matters under the 1940 Act and for other purposes. A shareholder of one portfolio is not deemed to be a shareholder of any other portfolio. For certain matters shareholders vote together as a group; as to others they vote separately by portfolio, or, where matters affect different classes of a portfolio differently, by class.

Rule 18f-2 under the 1940 Act provides that any matter required to be submitted under the provisions of the 1940 Act or applicable state law or otherwise to the holders of the outstanding voting securities of an investment company, such as the Trust, will not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding shares of each series affected by such matter. Rule 18f-2 further provides that a series shall be deemed to be affected by a matter unless it is clear that the interests of each series in the matter are identical or that the matter does not affect any interest of such series. The Rule exempts the selection of the independent registered public accounting firm and the election of Board members from the separate voting requirements of the Rule.

The Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may

be barred from purchasing other funds in the Dreyfus Family of Funds. Accounts under common ownership or control may be considered as one account for purposes of determining a pattern of excessive or abusive trading. In addition, each Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Trust will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Trust will take reasonable steps to prevent excessive short term trading deemed to be harmful to the Fund, it may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

The Fund sends annual and semi-annual financial statements to all its shareholders.

#### COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Kirkpatrick & Lockhart Nicholson Graham LLP, 1601 K Street, N.W., Washington D.C. 20006-1600, has passed upon the legality of the shares offered by the Prospectus and this SAI.

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, serves as counsel to the non-interested Trustees of the Trust.

KPMG LLP, 345 Park Avenue, New York, New York 10154, an independent registered public accounting firm, was appointed by the Trustees to serve as the Fund's independent registered public accounting firm for the year ending August 31, 2007, providing audit and other services including (1) examination of the annual financial statements, (2) review and consultation in connection with SEC filings and (3) review of the annual federal income tax return filed on behalf of the Fund.

## APPENDIX

### RATING AGENCY RATINGS OF MUNICIPAL BONDS

Description of certain S&P, Moody's and Fitch ratings:

#### **S&P**

##### Municipal Issue Ratings Definitions

An S&P issue credit rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program. It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation. The issue credit rating is not a recommendation to purchase, sell, or hold a financial obligation, inasmuch as it does not comment as to market price or suitability for a particular investor.

Issue credit ratings are based on current information furnished by the obligors or obtained by S&P from other sources it considers reliable. S&P does not perform an audit in connection with any credit rating and may, on occasion, rely on unaudited financial information. Credit ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days—including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. The result is a dual rating, in which the short-term ratings address the put feature, in addition to the usual long-term rating. Medium-term notes are assigned long-term ratings.

##### *Long-Term Issue Credit Ratings*

Issue credit ratings are based in varying degrees, on the following considerations:

- Likelihood of payment—capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation; and
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

The issue ratings definitions are expressed in terms of default risk. As such, they pertain to senior obligations of an entity. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above.

## *AAA*

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

## *AA*

An obligation rated 'AA' differs from the highest-rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

## *A*

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

## *BBB*

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

## *BB, B, CCC, CC, and C*

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

## *BB*

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

## *B*

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

## *CCC*

An obligation rated 'CCC' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on

the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

## *CC*

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

## *C*

The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action has been taken, but payments on this obligation are being continued.

## *D*

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

## *Plus (+) or minus (-)*

The ratings from 'AA' to 'CCC' may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

## *c*

The 'c' subscript is used to provide additional information to investors that the bank may-terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer is below an investment grade level and/or the issuer's bonds are deemed taxable.

## *P*

The letter 'p' indicates that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of or the risk of default upon failure of such completion. The investor should exercise his own judgment with respect to such likelihood and risk.

## *\**

Continuance of the ratings is contingent upon S&P receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows.

*r*

The 'r' highlights derivative, hybrid, and certain other obligations that S&P believes may experience high volatility or high variability in expected returns as a result of noncredit risks. Examples of such obligations are securities with principal or interest return indexed to equities, commodities, or currencies; certain swaps and options; and interest-only and principal-only mortgage securities. The absence of an 'r' symbol should not be taken as an indication that an obligation will exhibit no volatility or variability in total return.

*N.R.*

Not rated.

Debt obligations of issuers outside the United States and its territories are rated on the same basis as domestic corporate and municipal issues. The ratings measure the creditworthiness of the obligor but do not take into account currency exchange and related uncertainties.

#### *Bond Investment Quality Standards*

Under present commercial bank regulations issued by the Comptroller of the Currency, bonds rated in the top four categories ('AAA', 'AA', 'A', 'BBB', commonly known as investment grade ratings) generally are regarded as eligible for bank investment. Also, the laws of various states governing legal investments impose certain rating or other standards for obligations eligible for investment by savings banks, trust companies, insurance companies, and fiduciaries in general.

#### *Short-Term Issue Credit Ratings*

##### *Notes*

An S&P note ratings reflects the liquidity factors and market access risks unique to notes. Notes due in three years or less will likely receive a note rating. Notes maturing beyond three years will most likely receive a long-term debt rating. The following criteria will be used in making that assessment:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

##### *SP-1*

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

## *SP-2*

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the-term of the notes.

## *SP-3*

Speculative capacity to pay principal and interest.

### Issuer Credit Rating Definitions

An S&P Issuer Credit Rating is a current opinion of an obligor's overall financial capacity (its creditworthiness) to pay its financial obligations. This opinion focuses on the obligor's capacity and willingness to meet its financial commitments as they come due. It does not apply to any specific financial obligation, as it does not take into account the nature of and provisions of the obligation, its standing in bankruptcy or liquidation, statutory preferences, or the legality and enforceability of the obligation. In addition, it does not take into account the creditworthiness of the guarantors, insurers, or other forms of credit enhancement on the obligation. The Issuer Credit Rating is not a recommendation to purchase, sell or hold a financial obligation issued by an obligor, as it does not comment on market price or suitability for a particular investor.

### *CreditWatch And Rating Outlooks*

An S&P rating evaluates default risk over the life of a debt issue, incorporating an assessment of all future events to the extent they are known or considered likely. But S&P also recognizes the potential for future performance to differ from initial expectations. Rating outlooks and CreditWatch listings address this possibility by focusing on the scenarios that could result in a rating change.

CreditWatch highlights potential changes in ratings of bonds, short-term, and other fixed-income securities. Issues appear on CreditWatch when an event or deviation from an expected trend has occurred or is expected and additional information is necessary to take a rating action. Such rating reviews normally are completed within 90 days, unless the outcome of a specific event is pending. A listing does not mean a rating change is inevitable. However, in some cases, it is certain that a rating change will occur and only the magnitude of the change is unclear.

Wherever possible, a range of alternative ratings that could result is shown. CreditWatch is not intended to include all issues under review, and rating changes will occur without the issue appearing on CreditWatch. An issuer cannot automatically appeal a CreditWatch listing, but analysts are sensitive to issuer concerns and the fairness of the process.

A rating outlook is assigned to all long-term debt issues—except for structured finance—and also assesses potential for change. Outlooks have a longer time frame than CreditWatch listings and incorporate trends or risks with less certain implications for credit quality. An outlook is not necessarily a precursor of a rating change or a CreditWatch listing.

CreditWatch designations and outlooks may be "positive," which indicates a rating may be raised, or "negative," which indicates a rating may be lowered. "Developing" is used for those unusual

situations in which future events are so unclear that the rating potentially may be raised or lowered. "Stable" is the outlook assigned when ratings are not likely to be changed, but should not be confused with expected stability of the company's financial performance.

### *Commercial Paper*

An S&P commercial paper rating is a current assessment of the likelihood of timely payment of debt having an original maturity of no more than 365 days. Ratings are graded into several categories, ranging from 'A' for the highest-quality obligations to 'D' for the lowest. These categories are as follows:

#### *A-1*

This designation indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

#### *A-2*

Capacity for timely payment on issues with this designation is satisfactory. However, the relative degree of safety is not as high as for issues designated 'A-1'.

#### *A-3*

Issues carrying this designation have an adequate capacity for timely payment. They are, however, more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designations.

#### *B*

Issues rated 'B' are regarded as having only speculative capacity for timely payment.

#### *C*

This rating is assigned to short-term debt obligations with a doubtful capacity for payment.

#### *D*

Debt rated 'D' is in payment default. The 'D' rating category is used when interest payments of principal payments are not made on the date due, even if the applicable grace period has not expired, unless S&P believes such payments will be made during such grace period.

### *Variable-Rate Demand Bonds*

S&P assigns "dual" ratings to all debt issues that have a put option or demand feature as part of their structure.

The first rating addresses the likelihood of repayment of principal and interest as due, and the second rating addresses only the demand feature. The long-term debt rating symbols are used for

bonds to denote the long-term maturity and the commercial paper rating symbols for the put option (for example, 'AAA/A-1+'). With short-term demand debt, note rating symbols are used with the commercial paper rating symbols (for example, 'SP-1+/A-1+').

## **Moody's**

### Municipal Bond Ratings

#### Aaa

Bonds rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edge." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

#### Aa

Bonds rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what generally are known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities.

#### A

Bonds rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

#### Baa

Bonds rated Baa are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

#### Ba

Bonds rated Ba are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate, and therefore not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

## B

Bonds rated B generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

## Caa

Bonds rated Caa are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

## Ca

Bonds rated Ca present obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

## C

Bonds rated C are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Moody's applies the numerical modifiers 1, 2 and 3 to show relative standing within the major rating categories, except in the Aaa category and in the categories below B. The modifier 1 indicates a ranking for the security in the higher end of a rating category; the modifier 2 indicates a mid range ranking; and the modifier 3 indicates a ranking in the lower end of a rating category.

### Municipal Note Ratings

Moody's ratings for state municipal notes and other short-term loans are designated Moody's Investment Grade (MIG). Such ratings recognize the differences between short-term credit risk and long-term risk. Factors affecting the liquidity of the borrower and short-term cyclical elements are critical in short-term ratings, while other factors of major importance in bond risk, long-term secular trends for example, may be less important over the short run.

A short-term rating may also be assigned on an issue having a demand feature. Such ratings will be designated as VMIG or, if the demand feature is not rated, as NR. Short-term ratings on issues with demand features are differentiated by the use of the VMIG symbol to reflect such characteristics as payment upon periodic demand rather than fixed maturity dates and payment relying on external liquidity. Additionally, investors should be alert to the fact that the source of payment may be limited to the external liquidity with no or limited legal recourse to the issuer in the event the demand is not met.

Moody's short-term ratings are designated Moody's Investment Grade as MIG 1 or VMIG 1 through MIG 4 or VMIG 4. As the name implies, when Moody's assigns a MIG or VMIG rating, all categories define an investment grade situation.

## **MIG 1/VMIG 1**

This designation denotes best quality. There is present strong protection by established cash flows, superior liquidity support or demonstrated broad based access to the market for refinancing.

## **MIG 2/VMIG 2**

This designation denotes high quality. Margins of protection are ample although not so large as in the preceding group.

### **Commercial Paper Ratings**

The rating Prime 1 (P 1) is the highest commercial paper rating assigned by Moody's. Issuers of P 1 paper must have a superior capacity for repayment of short-term promissory obligations, and ordinarily will be evidenced by leading market positions in well established industries, high rates of return on funds employed, conservative capitalization structures with moderate reliance on debt and ample asset protection, broad margins in earnings coverage of fixed financial charges and high internal cash generation, and well established access to a wide range of financial markets and assured sources of alternative liquidity.

Issuers (or related supporting institutions) rated Prime 2 (P 2) have a strong capacity for repayment of short-term promissory obligations. This ordinarily will be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, will be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

## **Fitch**

### **Municipal Bond Ratings**

The ratings represent Fitch's assessment of the issuer's ability to meet the obligations of a specific debt issue or class of debt. The ratings take into consideration special features of the issue, its relationship to other obligations of the issuer, the current financial condition and operative performance of the issuer and of any guarantor, as well as the political and economic environment that might affect the issuer's future financial strength and credit quality.

## **AAA**

Bonds rated AAA are considered to be investment grade and of the highest credit quality. The obligor has an exceptionally strong ability to pay interest and repay principal, which is unlikely to be affected by reasonably foreseeable events.

## **AA**

Bonds rated AA are considered to be investment grade and of very high credit quality. The obligor's ability to pay interest and repay principal is very strong, although not quite as strong as bonds rated AAA. Because bonds rated in the AAA and AA categories are not significantly

vulnerable to foreseeable future developments, short-term debt of these issuers is generally rated F-1+.

## A

Bonds rated A are considered to be investment grade and of high credit quality. The obligor's ability to pay interest and repay principal is considered to be strong, but may be more vulnerable to adverse changes in economic conditions and circumstances than bonds with higher ratings.

## BBB

Bonds rated BBB are considered to be investment grade and of satisfactory credit quality. The obligor's ability to pay interest and repay principal is considered to be adequate. Adverse changes in economic conditions and circumstances, however, are more likely to have adverse impact on these bonds and, therefore, impair timely payment. The likelihood that the ratings of these bonds will fall below investment grade is higher than for bonds with higher ratings.

## BB

Bonds rated BB are considered speculative. The obligor's ability to pay interest and repay principal may be affected over time by adverse economic changes. However, business and financial alternatives can be identified which could assist the obligor in satisfying its debt service requirements.

## B

Bonds rated B are considered highly speculative. While bonds in this class are currently meeting debt service requirements, the probability of continued timely payment of principal and interest reflects the obligor's limited margin of safety and the need for reasonable business and economic activity throughout the life of the issue.

## CCC

Bonds rated CCC have certain identifiable characteristics, which, if not remedied, may lead to default. The ability to meet obligations requires an advantageous business and economic environment.

## CC

Bonds rated CC are minimally protected. Default in payment of interest and/or principal seems probable over time.

## C

Bonds rated C are in imminent default in payment of interest or principal.

Plus (+) and minus (-) signs are used with a rating symbol to indicate the relative position of a credit within the rating category. Plus and minus signs, however, are not used in the AAA category covering 12-36 months.

### Short-Term Ratings

Fitch's short-term ratings apply to debt obligations that are payable on demand or have original maturities of up to three years, including commercial paper, certificates of deposit, medium-term notes, and municipal and investment notes.

Although the credit analysis is similar to Fitch's bond rating analysis, the short-term rating places greater emphasis than bond ratings on the existence of liquidity necessary to meet the issuer's obligations in a timely manner.

#### F-1+

Exceptionally Strong Credit Quality. Issues assigned this rating are regarded as having the strongest degree of assurance for timely payment.

#### F-1

Very Strong Credit Quality. Issues assigned this rating reflect an assurance of timely payment only slightly less in degree than issues rated F-1+.

#### F-2

Good Credit Quality. Issues carrying this rating have a satisfactory degree of assurance for timely payments, but the margin of safety is not as great as the F-1+ and F-1 categories.
