NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. CONSOLIDATED FINANCIAL STATEMENTS -- BASIS OF PRESENTATION

The consolidated balance sheet at September 28, 2003, the related consolidated statements of operations for the three months ended September 28, 2003 and September 29, 2002, and the consolidated statements of cash flows for the three months ended September 28, 2003 and September 29, 2002, have been prepared by LaBarge, Inc. (the "Company") without audit. In the opinion of management, adjustments, all of a normal and recurring nature, necessary to present fairly the financial position and the results of operations and cash flows for the aforementioned periods, have been made. Certain prior year amounts have been reclassified to conform with the current year's presentation.

Certain information and footnote disclosures normally included in consolidated financial statements prepared in conformity with generally accepted accounting principles have been condensed or omitted. These consolidated financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's Annual Report on Form 10-K/A for the fiscal year ended June 29, 2003.

In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation – Transition and Disclosure, an Amendment of FASB Statement 123," to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The Company previously adopted the disclosure-only provisions of SFAS 123. Under APB 25, no compensation cost was recognized for the Company's stock option plans. The following table illustrates the effect on net earnings and net earnings per share if the Company had applied the fair value recognition provisions of SFAS 123 to stock-based employee compensation.

New Accounting Standards

In November 2002, the FASB issued Interpretation No. 45 ("FIN No. 45," "Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others"). FIN No. 45 expands on the accounting guidance of Statements No. 5, 57, and 107 and incorporates without change the provisions of FASB Interpretation No. 34, which is being superseded. FIN No. 45 affects leasing transactions involving residual guarantees, vendor and manufacturer guarantees, and tax and environmental indemnities. All such guarantees will need to be disclosed in the notes to the financial statements starting with the period ending after December 15, 2002. For guarantees issued after December 31, 2002, the fair value of

the obligation must be reported on the balance sheet. Existing guarantees will be grandfathered and will not be recognized on the balance sheet. Management does not believe adoption of this interpretation will have a material impact on the Company's financial statements.

In January 2003, the FASB issued FIN No. 46, "Consolidation of Variable Interest Entities," which provide guidance on when certain entities should be consolidated or the interest in those entities should be disclosed by enterprises that do not control them through majority voting interest. Management does not believe adoption of this interpretation will have a material impact on the Company's financial statements.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity." SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. SFAS No. 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. Management does not believe adoption of this statement will have a material impact on the Company's financial statements.

This compares with \$3.4 million (22%), \$2.3 million (15%) and \$1.7 million (11%) at June 29, 2003. The Company does not believe that concentration of accounts receivable is a significant credit risk due to the financial strength of the account debtors and collection experience. LaBarge, Inc. ("LaBarge" or the "Company") is a Delaware corporation. The Company is engaged in the following business activities:

The Company's electronics manufacturing services business has been its principal business since 1985. The Company designs, engineers and produces sophisticated electronic systems and devices, and complex interconnect systems on a contract basis for its customers.

The Company markets its services to companies in technology-driven industries desiring an engineering and manufacturing partner capable of developing and providing high-reliability electronic equipment, including products capable of performing in harsh environmental conditions, such as high and low temperature, and severe shock and vibration. Customers are served in a variety of markets with significant revenues from customers in the defense government systems, aerospace, oil and gas, and other commercial markets. Engineering and manufacturing facilities are located in Arkansas, Missouri, Oklahoma and Texas.

The backlog of unshipped orders at September 28, 2003 was \$109.7 million down from the record \$123.6 million at June 29, 2003, and up from \$94.6 million at September 29, 2002. The decrease in backlog from June 29, 2003 is the result of lower bookings of new business combined with the high level of shipments during the quarter. Based on our current rate of bookings and bid activity, we expect bookings to be stronger in the second fiscal quarter, compared with first quarter levels.

On August 7, 2003, the Company sold the remainder of its ScadaNET Network™ business for \$225,000 cash. The Company recorded a \$20,000 pre-tax gain on the transaction. This sale completes the Company's exit from the ScadaNET Network™ business.

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying consolidated financial statements. In preparing these financial statements, management has made its best estimates and judgments of certain amounts included in the financial statements. The Company believes there is a likelihood that materially different amounts would be reported under different conditions or using different assumptions related to the accounting policies described below. Application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. The Company's senior management discusses the accounting policies described below with the audit committee of the Company's Board of Directors on a periodic basis.

The following discussion of critical accounting policies is intended to bring to the attention of readers those accounting policies that we believe are critical to our consolidated financial statements and other financial

disclosures. It is not intended to be a comprehensive list of all of our significant accounting policies that are more fully described in Note 1 of the Notes to the Consolidated Financial Statements included in our 2003 Annual Report on Form 10-K/A.

Revenue Recognition and Cost of Sales

Revenue on production contracts is recorded when specific contract terms are fulfilled, usually upon delivery (the delivery method). Under long-term contracts for which the delivery method is an inappropriate measure of performance, revenue is recognized on the percentage-of-completion method based upon incurred costs compared with total estimated costs under the contract. The percentage-of-completion method gives effect to the most recent contract value and estimates of cost at completion. When appropriate, contract prices are adjusted for increased scope and other changes ordered or caused by the customer.

Management estimates of material, labor and overhead costs on long-term contracts are critical to the Company. Since some contracts extend over a long period of time, revisions in cost and contract price during the progress of work have the effect of adjusting current period earnings applicable to performance in prior periods. When the current contract cost estimate indicates a loss, provision is made for the total anticipated loss.

Accounts Receivable

Accounts receivables have been reduced by an allowance for amounts that may become uncollectable in the future. This estimated allowance is based primarily on management's evaluation of the financial condition of the Company's customers.

The Company does not believe that concentration of accounts receivable is a significant credit risk due to the financial strength of the account debtors and collection experience.

Inventories

Inventories are valued at the lower of cost or market and have been reduced by an allowance for excess and obsolete inventories. The Company adjusts the value of its allowance based upon assumptions of future usage and market conditions. If actual demand or market conditions are less favorable than those projected by management, additional inventory write-downs may be required.

The Company procures materials and manufactures products to customer requirements. Raw materials are stated at the lower of cost or market as determined by the weighted average cost method.

Work in process consists of actual production costs, including factory overhead and tooling costs, reduced by costs attributable to units for which sales have been recognized. Such costs under contracts are determined by the average cost method based on the estimated average cost of all units expected to be produced under the contract. Amounts relating to long-term contracts are classified as current assets although a portion of these amounts is not expected to be realized within one year. Revenues to be realized on delivery of products against existing unfilled orders, contract modifications and estimated additional orders will be sufficient to absorb inventoried costs.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. The Company has considered future taxable income analyses and feasible tax planning strategies in assessing the need for the valuation allowance. Should the Company determine that it would not be able to recognize all or part of its net deferred tax assets in the future, an adjustment to the carrying value of the deferred tax assets would be charged to income in the period in which such determination is made.

Goodwill and Other Long-Lived Assets

The Company has adopted the provisions of SFAS No. 142 on July 2, 2001, and has reassessed the useful lives and residual values of all recorded intangible assets. Goodwill is reviewed by management for impairment annually or whenever events or changes in circumstance indicate the carrying amount may not be recoverable. If indicators of impairment are present, the determination of the amount of impairment is based on the Company's judgment as to the future operating cash flows to be generated from these assets throughout their estimated useful lives.

New Accounting Standards

In November 2002, the FASB issued Interpretation No. 45 ("FIN No. 45," "Guarantor's Accounting and Disclosure Requirements for Guarantees, including Indirect Guarantees of Indebtedness of Others"). FIN No. 45 expands on the accounting guidance of Statements No. 5, 57, and 107 and incorporates without change the provisions of FASB Interpretation No. 34, which is being superseded. FIN No. 45 affects leasing transactions involving residual guarantees, vendor and manufacturer guarantees, and tax and environmental indemnities. All such guarantees will need to be disclosed in the notes to the financial statements starting with the period ending after December 15, 2002. For guarantees issued after December 31, 2002, the fair value of the obligation must be reported on the balance sheet. Existing guarantees will be grandfathered and will not be recognized on the balance sheet. Management does not believe adoption of this interpretation will have a material impact on the Company's financial statements.

In January 2003, the FASB issued FIN No. 46, "Consolidation of Variable Interest Entities," which provide guidance on when certain entities should be consolidated or the interest in those entities should be disclosed by enterprises that do not control them through majority voting interest. Management does not believe adoption of this interpretation will have a material impact on the Company's financial statements.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity." SFAS No. 150 establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. SFAS No. 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning of the first interim period beginning after June 15, 2003. Management does not believe adoption of this statement will have a material impact on the Company's financial statements.
