## **Notes to Consolidated Financial Statements**

### ***BASIS OF PRESENTATION:***

The unaudited financial statements have been prepared by HuntMountain Resources (the Company), pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted pursuant to such SEC rules and regulations. These financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-KSB for the year ended December 31, 2005, which was filed March 30, 2006. In the opinion of management of the Company, the foregoing statements contain all adjustments necessary to present fairly the financial position of the Company as of September 30, 2006, and its results of operations for the nine month periods ended September 30, 2006 and 2005, and its cash flows for the nine-month periods ended September 30, 2006 and 2005. The interim results reflected in the foregoing financial statements are not considered indicative of the results expected for the full fiscal year.

### ***STOCK OPTION PLAN:***

At September 30, 2006, there were 1,045,000 stock options granted to directors, employees, and consultants, of which 725,000 are vested as of September 30, 2006. The fair value of each option is estimated on the issue date using the Black-Scholes Option Price Calculation. The following assumptions were made in estimating fair value of the options that became vested during the quarter ended September 30, 2006: risk free interest rate of 4.77%; volatility of 75%; expected dividend rate of -0-% and expected life of two years. An expense of \$21,800 for 60,000 Non-Qualified Stock Options issued to three consultants and vested during the quarter was recorded in the third quarter of 2006. Also, an expense for \$21,500 for 50,000 Incentive Stock Options issued to employees and vested during the quarter was recorded in the third quarter of 2006. Expenses for the remaining options will be recorded as they vest in the remainder of 2006 through 2008. The following table summarizes the terms of the options outstanding at September 30, 2006:

**HuntMountain Resources and Subsidiary**  
**(A Development Stage Enterprise)**  
**Notes to Consolidated Financial Statements**

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Number of Exercisable Options at Sept. 30, 2006
	10,000	\$0.15	3.49	10,000
	90,000	\$0.20	4.93	40,000
	700,000	\$0.25	4.60	550,000

	25,000	\$0.58	4.74	25,000
<b>TOTALS</b>	<b>1,045,000</b>	<b>\$0.27</b>	<b>4.66</b>	<b>725,000</b>

***WARRANTS OUTSTANDING:***

There are no warrants for shares of the Company's common stock outstanding as of September 30, 2006.

***COMMITMENTS:***

As of the quarter ended September 30, 2006, the Company has agreements to pay advance royalty and lease payments on exploration properties. The commitments are as follows:

**DUN GLEN PROPERTY – PERSHING COUNTY, NEVADA**

The Company has a lease for the Dun Glen property with an option to purchase a 100% interest in the claims. Lease payments are considered advance royalty payments. The term of the lease is 10 years, renewable at the Company's option for an additional ten years. The Company paid \$30,000 in advance royalty payments during the quarter ended March 31, 2006 for this property. Future annual advance royalty payments begin at \$37,500 per year in 2007 and escalate to \$72,500 per year at the end of the fifth year of the lease and for every year beyond that, until the lease is terminated or the purchase option is exercised. The Company has also agreed to keep the claims in good standing until the lease is terminated or the purchase option is exercised.

# **HuntMountain Resources and Subsidiary**

## **(A Development Stage Enterprise)**

### **Notes to Consolidated Financial Statements**

#### **ABITIBI PROPERTIES – QUEBEC, CANADA**

During the quarter ended June 30, 2006, the Company entered into a definitive Option Agreement for the acquisition of a 100% interest in two properties in the Abitibi region of Quebec. This Agreement followed up a letter agreement with substantially the same terms that had been entered into during the first quarter of 2006. Pursuant to the terms of the Option Agreement, the Company paid \$70,000 (\$35,000 for each of the two properties) in cash to the property owner. The Company has also agreed to explore these properties and drill at least three exploration drill holes in each. The payments and drilling of exploration drill holes will earn the Company a 100% interest in each of these properties and give the Company the option to acquire additional properties from the same property owner at similar terms. The Company has also agreed to keep the claims in good standing until the agreement is terminated.

#### ***SUBSEQUENT EVENTS:***

On October 9, 2006, the Company announced the commencement of an 8,000-foot HQ diamond core drilling program at its Dun Glen Gold Project in northern Nevada. The drill plan consists of seven to ten holes, of which at least half will target high-grade gold shows adjacent to or beneath workings of the Auld Lang Syne, Black Hole, and Monroe mines. The remaining holes will test conceptual targets with greater disseminated bulk tonnage potential that were generated through detailed mapping, geochemical sampling, and a magnetic geophysical survey.

In October 2006, the Company, through its Argentine subsidiary, Cerro Cazador S.A., filed for the exclusive rights to explore an additional land concession (“cateo”) in Santa Cruz, Argentina, and to retain 100% interest in any mineral deposit found therein. The “El Tordillo” cateo is contiguous to the Company’s “El Alazan” and “El Overo” cateos which are located 220 kilometers NW of the port town of Puerto San Julian and 100 kilometers North of the town of Gobernador Gregores. The “El Tordillo” cateo covers a 100 square kilometer area.

## **Item 2. Management's Discussion and Analysis and Plan of Operation**

We had no revenues from operations during the recently completed quarter. Our only income has been derived from interest and dividends on our cash and cash investments. Interest and dividend income for the three-month period ended September 30, 2006 increased to \$12,753 from \$5,044 for the same period ended September 30, 2005. This increase is due to the fact that the Company had more cash on hand and interest rates were more favorable during the quarter ended September 30, 2006 than during the same period ended September 30, 2005. The increase in cash is due primarily to the exercise of warrants during the second quarter of 2006. For the nine-month period ended September 30, 2006, interest and dividend income increased to \$31,912 from \$11,415 for the same period ending September 30, 2005. This increase is also due to the fact that the Company had more cash on hand during the nine-month period ended September 30, 2006 than during the same period ended September 30, 2005 and to more favorable interest rates earned on cash reserves. The increase in cash is due primarily to having funds received from the exercise of warrants during the second quarter of 2006, and because the stock purchase and private placement that provided over \$650,000 to the Company in 2005 was not completed until the latter part of March 2005.

We had a net loss of \$441,316 during the three-month period ended September 30, 2006. This compares to net loss of \$115,757 during the three-month period ended September 30, 2005. The increase in our net loss was due to the significantly increased level of exploration and marketing activity in the company, partially offset by lower professional and consulting fees and administrative office expenses. For the quarter ended September 30, 2006, the Company incurred non-cash expenses for stock options granted to consultants of \$21,800 compared to a non-cash expense for stock options granted to a consultant in the third quarter of 2005 of \$900. This increase is due to the Company's use of stock option compensation to consultants in the exploration of its properties. In the quarter ended September 30, 2006, the Company incurred a non-cash expense of \$21,500 related to the vesting of 50,000 stock options previously granted to employees. During this most recently completed quarter, the Company primarily focused its exploration expenditures on its Dun Glen property in Nevada, but also renewed exploration in Argentina following the close of the winter season there and continued evaluating exploration opportunities on its properties in Quebec, Canada. Due to these exploration programs, during the three-month period ended September 30, 2006 we had significantly higher exploration expenses than during the three-month period ended September 30, 2005. In addition to exploration, expenses relating to marketing, travel and payroll were also higher during the quarter ended September 30, 2006 than during the quarter ended September 30, 2005, partially offset by lower professional and consulting fees and administrative and office expenses. We had a net loss of \$1,043,423 during the nine-month period ended September 30, 2006. This compares to a net loss of \$170,198 during the nine-month period ended September 30, 2005. The increase in our net loss was due to the significantly increased level of exploration activity in the Company. Marketing, travel, payroll, and other administrative expenses were all higher during the 2006 period. Expenditures made in the acquisition and exploration of our properties make up the primary increase in expenditures between 2005 and 2006. During this nine-month period in 2006, the Company also made required property payments of \$70,000 for our properties in Quebec, and continued our exploration programs on properties in the Santa Cruz province of Argentina, Nevada, and in Canada. For the nine-month period ended September 30, 2006, the Company incurred non-cash expenses for stock options granted to members of the Board of Directors and to consultants of \$160,550. Stock option expense for the nine-month period ended September 30, 2005 was \$900. This non-cash expense represents nearly 15.9% of the Company's net loss for the first nine months of 2006.

We anticipate continuing net losses until such time as we sufficiently develop properties for production or subsequent acquisition by another company. Our ongoing expenses consist of payroll and marketing; accounting, legal, and consulting expenses related to complying with reporting requirements of the Securities Exchange Act of 1934; expenses incurred in the search for exploration properties that meet our acquisition criteria; and exploration expenses on the properties that we have acquired.

### **Plan of Operation**

The Company intends to continue the exploration, development, and if warranted, the mining of properties containing silver, gold, and associated base metals and other opportunities within the mineral industry throughout North and South America. At this time, the Company has interests in the Dun Glen Gold Project in Pershing County Nevada, four exploration properties in the Santa Cruz province of Argentina, and two exploration properties in the Abitibi region of Quebec, Canada. The Company intends to conduct mineral exploration on each of these properties. In addition, the Company is actively evaluating properties in order to identify additional projects that meet the Company's acquisition criteria. The Company has engaged the services of consultants to assist in our exploration programs and in the identification of mineral properties for possible acquisition.

The Company currently has four full-time employees. In addition to the services provided by those employees, we anticipate utilizing the services of consultants to accomplish our plans of operation in the near term.

### **Dun Glen Gold Project - Nevada**

The Dun Glen Gold Project consists of 94 contiguous unpatented lode mining claims covering approximately 1,700 acres within the Sierra Mining District, an area with historic published production of at least 250,000 ounces of gold from both lode and placer sources. From 1862 to 1880, and throughout the early 20<sup>th</sup> century, gold production occurred within the project area at a number of small underground mines. The Company has engaged the services of a senior geologist with extensive experience in the Great Basin to implement the Dun Glen field exploration program which has included surface geochemical sampling, geophysical survey and detailed geologic mapping aimed at delineating drill targets. A ground magnetic survey took place in July 2006, and an estimated 8,000-foot exploratory core drilling program is taking place during the fourth quarter of 2006.

### **Santa Cruz - Argentina**

The Company owns the mineral exploration rights to four property positions in the highly prospective Santa Cruz Province of Argentina totaling approximately 100,000 acres (400 sq. km). The properties, El Alazan, El Overo, El Gateado, and El Tordillo are located within the same geological setting as the Cerro Vanguardia gold mine operated by AngloGold Ashanti and Coeur d'Alene Mines' Mina Martha silver project. The region also hosts several other advanced stage precious metal deposits including San Jose, Manantial Espejo, and La Josefina. The Company has engaged the services of an Argentine senior geologist with extensive experience in Santa Cruz to implement the field exploration program that includes detailed geologic mapping, trenching, and geochemical sampling. Channel samples taken from the El Gateado property have indicated sufficient mineralization to merit further exploration. Additional sampling and drill target identification will take place in the fall of 2006 leading up to a drilling program planned for late 2006 or early 2007.

### **Quebec - Canada**

During the quarter ended June 30, 2006, the Company finalized a definitive agreement and made the initial property payments for an option to acquire a 100 percent interest in two prospective gold properties in the prominent Chibougamau and Abitibi regions of northwestern Quebec. The Lac à l'Eau Jaune property is 35 kilometers south of Chibougamau, and the Malartic Surimau property is 40 kilometers west of Val d'Or. Together, these projects consist of 46 claims covering approximately 6,500 acres of terrain known to host high-grade gold mineralization within regions that have collectively produced approximately 180 million ounces of gold. The Company expects to be conducting exploration mapping, sampling, and drilling within each project area, and it has engaged the services of a Canadian senior geologist with extensive experience in the Abitibi and Chibougamau regions of Quebec to prepare a comprehensive exploration plan for the two properties. The current owner of the properties will assist the Company in preliminary target identification through the use of its comprehensive Artificial Intelligence software application, CARDS.

### **Liquidity**

It is anticipated that expenditures will continue to increase as we move forward with our exploration programs on our current properties and seek additional opportunities with other properties. While we have sufficient resources to meet our financial obligations for the next twelve months, we are planning to raise funds through an equity offering to expand our exploration programs and acquire additional properties.

### **Forward Looking Statements**

Some information contained in or incorporated by reference into this report may contain forward looking statements. The use of any of the words "development", "anticipate", "continue", "estimate", "expect", "may", "project", "believe", and similar expressions are intended to identify uncertainties. We believe the expectations reflected in those forward looking statements are reasonable. However, we cannot assure that the expectations will prove to be correct. Actual results could differ dramatically from those anticipated in these forward looking statements as a result of the factors set forth below and other factors set forth and incorporated by reference into this report:

- Worldwide economic and political events affecting the supply of and demand for gold, silver, copper, and other base and precious metals
- Volatility in the market price for gold, silver, copper, and other base and precious metals
- Financial market conditions and the availability of financing on terms acceptable to the Company
- Uncertainties associated with the development of exploration properties in certain geographical locations
- Geological, technical, permitting, mining, and processing problems
- The availability, terms, conditions, and timing of require governmental permits and approvals
- Uncertainty regarding future changes in applicable law or implementation of existing law
- The availability of experienced employees
- The factors discussed under "Risk Factors" in our Form 10KSB for the period ending December 31, 2005

### **Item 3. Controls and Procedures**

Within the 90 days prior to the date of this report, the company carried out an evaluation, under the supervision and with the participation of the company's management, including the company's principal executive officer and principal financial officer, of the effectiveness of the design and operation of the

company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the principal executive officer and principal financial officer concluded that the company's disclosure controls and procedures are effective in timely alerting them to material information relating to the company required to be included in the company's periodic SEC filings.

#### **Item 4. Quantitative and Qualitative Disclosures About Market Risk and Hedging Activities**

All of our cash balances are held in U.S. dollars in local and national banking institutions. We manage the timing of our cash requirements for exploration and general corporate purposes by maintaining liquidity in our money market account.

### **PART II OTHER INFORMATION**

Items deleted are not applicable.

#### **Item 5. Other Information**

On July 6, 2006, the Company registered with the Securities and Exchange Commission 3,000,000 shares of common stock underlying the 2005 HuntMountain Resources Stock Plan.

On July 12, 2006, the Company's number of Directors was increased to four (4) following the appointment of Mr. Alastair H. Summers to the Board. Mr. Summers has over 45 years experience in mine development and production in North and South America. His current term as a director will expire at the Company's subsequent annual meeting of shareholders.

On September 28, 2006, the Company appointed Randal L. Hardy as President and Ronald E. Schutz as Chief Financial Officer. Mr. Hardy has been the Company's Chief Financial Officer and Treasurer since August 2005, and for the previous eight years was the President & CEO of Sunshine Minting Company, a Coeur d'Alene, Idaho custom precious metals manufacturing firm. Mr. Schutz has over 30 years experience in commercial banking and finance, and is the former Director of Finance & Risk Management for Spokane, Washington-based Huntwood Industries. Tim Hunt will remain Chairman of the Board and Chief Executive Officer of the Company.

**Certification required by Rule 13a-14(a) or Rule 15d-14(a)**

I, Tim Hunt, certify that:

1. I have reviewed this quarterly report on Form 10-QSB of HuntMountain Resources.
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the small business issuer as of, and for, the periods presented in this quarterly report;
4. The small business issuer's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) and internal controls over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) for the small business issuer and we have:
  - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the small business issuer, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
  - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) evaluated the effectiveness of the small business issuer's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) disclosed in this quarterly report any change in the small business issuer's internal control over financial reporting that occurred during the small business issuer's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the small business issuer's internal control over financial reporting;
5. The small business issuer's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the small business issuer's auditors and the audit committee of the small business issuer's board of directors (or persons performing the equivalent functions):
  - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the small business issuer's ability to record, process, summarize and report financial information; and
  - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the small business owner's internal controls over financial reporting.
