Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

The following financial review presents an analysis of the assets and liability structure of the Corporation and a discussion of the results of operations for each of the periods presented in this quarterly report of liquidity, capital and credit quality. Certain statements in this report that relate to Farmers National Banc Corp.'s plans, objectives, or future performance may be deemed to be forward-looking statements within the Private Securities Litigation Reform Act of 1995. Such statements are based on management's current expectations. Actual strategies and results in future periods may differ materially from those currently expected because of various risks and uncertainties.

Among the important factors that could cause actual results to differ materially are interest rates, changes in the mix of the company's business, competitive pressures, general economic conditions and the risk factors detailed in the company's other periodic reports and registration statements filed with the Securities and Exchange Commission.

Results of Operations

The Corporation's net income for the first three months of 2001 was \$1.681 million, or \$.14 per share, which is a 20.5% increase compared with the \$1.395 million, or \$.12 per share earned during the same period last year. Return on average assets and return on average equity for the first three months of 2001 were 1.09% and 9.54% respectively, compared to .93% and 8.49% for the same period in 2000.

The increase in net income for the first three months of 2001 was primarily the result of an increase in total interest income. The Corporation's total interest income increased \$363 thousand, or 3.26% from \$11.129 million for 2000 to \$11.492 million for the same period in 2001. Most of this increase is a result of the growth in loans outstanding. Increasing demand in the Corporation's installment loan products has increased average balances in the total loan portfolio by 3.89% over the past twelve months. This growth has contributed to the increase in loan income of \$311 thousand or 3.41%. Funds not used for loan growth have been used to purchase investment securities. The corporation's average balance of investment securities has increased 2.84% from March, 2000 to March, 2001. This growth has increased income on securities by \$52 thousand or 2.57% over the same time period. Interest expense on deposits and borrowings is 9.45% higher for the first three months of 2001 compared to the first three months of 2000. This is mainly the result of an increase of \$297 thousand in interest expense on borrowings as the bank continues to increase its' borrowings from the Federal Home Loan Bank to fund some of the increase in interest-earning assets. The bank has also experienced an increase in the average rate paid on time deposits, from 5.43% in 2000 to 5.93% in 2001.

Other income increased 14.24% from \$632 thousand in 2000 to \$722 thousand in 2001. Most of this growth is the result of an increase in service charges and fees related to deposit accounts. The Corporation's total other expenses for the first three months of 2001 decreased 6.95% from \$4.329 million in 2000 to \$4.028 million in 2001. The decrease in other operating expenses is due primarily to the acquisition of Security Financial Corporation. This merger provided cost savings though the consolidation of operations. Management will continue to closely monitor and keep the increases in noninterest expenses to a minimum.

Results of Operations (Continued)

On November 30, 2000, Security financial Corp. merged with and into Farmers National Banc Corp. The merger was accounted for under the pooling-of-interests method. The consolidated financial statements for 2000 have been reclassified to conform with the presentation for 2001. Such reclassifications had no effect on net results from operations.

Liquidity

The Corporation maintains, in the opinion of management, liquidity sufficient to satisfy depositors' requirements and meet the credit needs of customers. The Corporation depends on its ability to maintain its market share of deposits as well as acquiring new funds. The Corporation's ability to attract deposits and borrow funds depends in large measure on its profitability, capitalization and overall financial condition.

Principal sources of liquidity for the Corporation include assets considered relatively liquid such as short-term investment securities, federal funds sold and cash and due from banks.

Cash flows generated from operating activities increased to \$3.023 million compared to \$2.354 million for the same period in 2000. This increase of \$669 thousand is mainly the result of an increase in net interest received. Net cash flows provided by investing activities amounted to \$4.049 million in 2001 compared to \$5.481 million used in investing activities for the same period in 2000. Most of this increase came from repayments of loans made to customers.

Net cash flows provided by financing activities were \$9.595 million in 2001 compared to \$2.468 million in 2000. In 2001, \$23.699 million was generated from increases in deposits. During the first three months of 2001, \$15.614 million was used to repay Federal Home Loan Bank borrowings.

Capital Resources

The capital management function is a continuous process which consists of providing capital for both the current financial position and the anticipated future growth of the Corporation. As of March 31, 2001, the corporation's total risk-based capital ratio stood at 17.40%, and the Tier I risk-based capital ratio and Tier I leverage ratio were at 16.14% and 11.36%, respectively. Regulations established by the Federal Deposit Insurance Corporation Improvement Act require that for a bank to be considered well capitalized, it must have a total risk-based capital ratio of 10%, a Tier I risk-based capital ratio of 6% and a Tier I leverage ratio of 5%.

Loan Portfolio

The following shows the composition of loans at the dates indicated:

	(In Thousand	(In Thousands of Dollars)	
	March 31, 2001	Dec. 31, 2000	
Commercial, financial and agricultural	18,756	17,916

Loans accounted for on a nonaccrual basis	775	664
Loans contractually past due 90 days or more as to interest or principal payments (not included in nonaccrual loans above)	654	669
Loans considered troubled debt restructurings (not included in nonaccrual or contractually past due above)	0	0

Management knows of no loans not included in the table above where serious doubt exists as to the ability of the borrower to comply with the current loan repayment terms.

The following shows the amounts of contracted interest income and interest income reflected in income on loans accounted for on a nonaccrual basis and loans considered troubled debt restructuring for the periods indicated:

	(In Thousands of Dollars)	
	March 31, 2001	Dec. 31, 2000
Gross interest that would have been recorded if the loans had been current in accordance with their original terms	14	107
Interest income included in income on the loans	3	4

Risk Elements (Continued)

A loan is placed on a nonaccrual basis whenever sufficient information is received to question the collectibility of the loan. Generally, once a loan is placed on a nonaccrual basis, interest that may be accrued and not collected on the loan is charged against earnings.

As of March 31, 2001, there were no concentrations of loans exceeding 10% of total loans which are not disclosed as a category of loans. As of that date also, there are no other interest-earning assets that are either nonaccrual, past due or restructured.

Summary of Credit Loss Experience

The following is an analysis of the allowance for credit losses for the periods indicated:

	(In Thousands of Dollars)		
	Three Months	Year

Ratio of net credit losses to average net loans outstanding	.06%	.12%	

Summary of Credit Loss Experience (cont'd)

(1) The provision for possible credit losses charged to operating expense is based on management's judgment after taking into consideration all factors connected with the collectibility of the existing loan portfolio. Management evaluates the loan portfolio in light of economic conditions, changes in the nature and volume of the loan portfolio, industry standards and other relevant factors. Specific factors considered by management in determining the amounts charged to operating expenses include previous credit loss experience, the status of past due interest and principal payments, the quality of financial information supplied by loan customers and the general condition of the industries in the community to which loans have been made.

The allowance for possible credit losses has been allocated according to the amount deemed to be reasonably necessary to provide for the possibility of losses being incurred within the following categories of loans as of the dates indicated.

	(In Thousands of Dollars)	
	March 31,	Dec. 31,
Types of Loans	2001	2000
Commercial, financial & agricultural	1,721	549
Real estate — mortgage	1,897	2,878
Installment	2,703	2,688
Total	6,321	6,115

The allocation of the allowance as shown above should not be interpreted as an indication that charge-offs in 2001 will occur in the same proportions or that the allocation indicates future charge-off trends. Furthermore, the portion allocated to each loan category is not the total amount available for future losses that might occur within such categories since the total allowance is a general allowance applicable to the entire portfolio.

The percentage of loans in each category to total loans is summarized as follows:

March 31,	Dec. 31,
	2000
4.2%	4.0%
59.3%	59.3%
36.5%	36.7%
100.0%	100.0%
	2001 4.2% 59.3% 36.5%

A Form 8-K was filed by the Corporation on January 16, 2001. The item reported was classified as Item 5, Other Events, and read as follows:

Farmers National Banc Corp. (the "Company") acquired Security Financial Corp. through consummation of a merger on November 30, 2000. Following the acquisition, the Company owned two (2) subsidiary banks, those being Farmers National Bank of Canfield, Canfield, Ohio and Security Dollar Bank, Niles Ohio. On December 31, 2000 the Company merged Security Dollar Bank with and into Farmers National Bank of Canfield, resulting in Farmers National Bank of Canfield being the only subsidiary bank of the Company.

Farmers National Bank of Canfield will operate the facilities of the former Security Dollar Bank under the name "Security Dollar Bank" until such time as all signage, documentation relating to operations of the former bank and general operations can be amended or converted to Farmers National Bank of Canfield. The amendment and conversion of the signage, documentation and operations is anticipated to be complete on or about March 31, 2001, at which time all operations of Farmers National Bank of Canfield will be operated under its name.
