COMPANY PROFILE: Thunder Mountain Gold, Inc. (OTCBB: THMG) is a Nevada Corporation, originally incorporated in Idaho in 1935. We are an exploration company focused on the goal of generating precious and base metal projects in the Western United States, Mexico, and Alaska. We perform our own natural resource exploration by aggressively seeking out high-grade, high-quality precious and base metal resources in politically stable mining regions. We strive to conduct our business in an environmentally responsible and cost-effective manner.

We are organized and managed into three segments that encompass our exploration interests.

PRIMARY ASSETS: The sole asset of South Mountain Mines, Inc. consists of 100% ownership of seventeen patented mining claims that total approximately 326 acres of land in the South Mountain Mining District, located in Owyhee County, Idaho (“South Mountain Mine”).

Thunder Mountain Resources has leased three parcels totaling 489 acres of private land with mineral rights, adjacent to the South Mountain Mine patented mining claims; and has staked approximately 420 acres on 21 unpatented mining claims, for a total land package of approximately 1,235 acres.

Thunder Mountain Resources also owns 60 lode mining claims staked on the Trout Creek target in the Reese River Valley area south of Battle Mountain, located in Lander County, Nevada (“Trout Creek”); and two Arizona properties totaling 39 unpatented claims in the Parker and Salome areas.

Thunder Mountain Gold has staked the following: (1) eight unpatented lode mining claims totaling approximately 160 acres located in the Tonopah Mining district of Esmeralda County, Nevada (“West Tonopah”); and (2) the Clover Mountain claim group that consists of 40 unpatented lode mining claims totaling approximately 800 acres.

RISK FACTORS:

An investment in our Securities should be considered highly speculative and involve certain risk factors that may have a material and adverse effect on us. You and your advisors should consider these risks, including the risks discussed below, before making an important decision. You may incur a loss in your investment.

We face inherent risks and hazards commonly faced in the exploration and development of mining properties that may adversely impact our growth strategy. These risks and hazards include but are not limited to the following: very limited finances; competition from other more mature and better financed mining companies; we are underfinanced to develop properties; a substantial or extended decline in metals prices would have a material adverse effect on us; our accounting and other estimates may be imprecise; our development of new orebodies and other capital costs may cost more and provide less return than we estimated; our mineralization estimates may be imprecise; we are not in production; and we are a “designated security”.
