DREYFUS PREMIER CALIFORNIA TAX EXEMPT BOND FUND, INC.  
*CLASS A, CLASS B, CLASS C AND CLASS Z SHARES*

STATEMENT OF ADDITIONAL INFORMATION

OCTOBER 1, 2004

AS REVISED NOVEMBER 2, 2004

---

This Statement of Additional Information, which is not a prospectus, supplements and should be read in conjunction with the current Prospectus of Dreyfus Premier California Tax Exempt Bond Fund, Inc. (the "Fund"), dated October 1, 2004, as it may be revised from time to time. To obtain a copy of the Fund's Prospectus, please call your financial adviser, write to the Fund at 144 Glenn Curtiss Boulevard, Uniondale, New York 11556-0144, visit the Dreyfus.com website, or call 1-800-554-4611 (holders of Class Z shares should call 1-800-645-6561).

The Fund's most recent Annual Report and Semi-Annual Report to Shareholders are separate documents supplied with this Statement of Additional Information, and the financial statements, accompanying notes and report of independent auditors appearing in the Annual Report are incorporated by reference into this Statement of Additional Information.

## DESCRIPTION OF THE FUND

The Fund is a Maryland corporation incorporated on May 3, 1983. The Fund is an open-end management investment company, known as a municipal bond fund. As a municipal bond fund, the Fund invests in debt obligations issued by states, territories and possessions of the United States and the District of Columbia and their political subdivisions, agencies and instrumentalities, or multistate agencies or authorities, and certain other specified securities, the interest from which is, in the opinion of bond counsel to the issuer, exempt from Federal income tax ("Municipal Bonds").

The Dreyfus Corporation (the "Manager") serves as the Fund's investment adviser.

Dreyfus Service Corporation (the "Distributor") is the distributor of the Fund's shares.

### Certain Portfolio Securities

The following information supplements and should be read in conjunction with the Fund's Prospectus.

California Municipal Bonds. As a fundamental policy, the Fund normally invests at least 80% of the value of its net assets (plus any borrowings for investment purposes) in Municipal Bonds of the State of California, its political subdivisions, authorities and corporations, and certain other specified securities, that provide income exempt from Federal and State of California personal income taxes (collectively, "California Municipal Bonds"). To the extent acceptable California Municipal Bonds are at any time unavailable for investment by the Fund, the Fund will invest temporarily in other Municipal Bonds the interest from which is, in the opinion of bond counsel to the issuer, exempt from Federal, but not State of California, personal income tax. Municipal Bonds generally include debt obligations issued to obtain funds for various public purposes as well as certain industrial development bonds issued by or on behalf of public authorities. Municipal Bonds are classified as general obligation bonds, revenue bonds and notes. General obligation bonds are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue bonds are payable from the revenue derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source, but not from the general taxing power. Tax exempt industrial development bonds, in most cases, are revenue bonds that do not carry the pledge of the credit of the issuing municipality, but generally are guaranteed by the corporate entity on whose behalf they are issued. Notes are short-term instruments which are obligations of the issuing municipalities or agencies and are sold in anticipation of a bond sale, collection of taxes or receipt of other revenues. Municipal Bonds include municipal lease/purchase agreements which are similar to installment purchase contracts for property or equipment issued by municipalities. Municipal Bonds bear fixed, floating or variable rates of interest, which are determined in some instances by formulas under which the securities' interest rate will change directly or inversely to changes in interest rates or an index, or multiples thereof, in many cases subject to a maximum and minimum. Certain Municipal Bonds are subject to redemption at a date earlier than their stated maturity pursuant to call options, which may be separated from the related Municipal Bond and purchased and sold separately.

The yields on Municipal Bonds are dependent on a variety of factors, including general economic and monetary conditions, money market factors, conditions in the Municipal Bond market, size of a particular offering, maturity of the obligation and rating of the issue.

Municipal Bonds include certain private activity bonds (a type of revenue bond), the income from which is subject to the alternative minimum tax (AMT). The Fund may invest up to 20% of the value of its net assets in such Municipal Bonds and, except for temporary defensive purposes, in other investments subject to Federal income tax.

Certain Tax Exempt Obligations. The Fund may purchase floating and variable rate demand notes and bonds, which are tax exempt obligations ordinarily having stated maturities in excess of one year, but which permit the holder to demand payment of principal at any time or at specified intervals. Variable rate demand notes include master demand notes which are obligations that permit the Fund to invest fluctuating amounts, at varying rates of interest, pursuant to direct arrangements between the Fund, as lender, and the borrower. These obligations permit daily changes in the amount borrowed. Because these obligations are direct lending arrangements between the lender and borrower, it is not contemplated that such instruments generally will be traded, and there generally is no established secondary market for these obligations, although they are redeemable at face value, plus accrued interest. Accordingly, where these obligations are not secured by letters of credit or other credit support arrangements, the Fund's right to redeem is dependent on the ability of the borrower to pay principal and interest on demand. Each obligation purchased by the Fund will meet the quality criteria established for the purchase of Municipal Bonds.

Tax Exempt Participation Interests. The Fund may purchase from financial institutions participation interests in Municipal Bonds (such as industrial development bonds and municipal lease/purchase agreements). A participation interest gives the Fund an undivided interest in the Municipal Bond in the proportion that the Fund's participation interest bears to the total principal amount of the Municipal Bond. These instruments may have fixed, floating or variable rates of interest. If the participation interest is unrated, it will be backed by an irrevocable letter of credit or guarantee of a bank that the Fund's Board has determined meets prescribed quality standards for banks, or the payment obligation otherwise will be collateralized by U.S. Government securities. For certain participation interests, the Fund will have the right to demand payment, on not more than seven days' notice, for all or any part of the Fund's participation interest in the Municipal Bond, plus accrued interest. As to these instruments, the Fund intends to exercise its right to demand payment only upon a default under the terms of the Municipal Bond, as needed to provide liquidity to meet redemptions, or to maintain or improve the quality of its investment portfolio.

Municipal lease obligations or installment purchase contract obligations (collectively, "lease obligations") have special risks not ordinarily associated with Municipal Bonds. Although lease obligations do not constitute general obligations of the municipality for which the municipality's taxing power is pledged, a lease obligation ordinarily is backed by the municipality's covenant to budget for, appropriate and make the payments due under the lease obligation. However, certain lease obligations in which the Fund may invest may contain "non-appropriation" clauses which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. Although "non-appropriation" lease obligations are secured by the leased

property, disposition of the property in the event of foreclosure might prove difficult. Certain lease obligations may be considered illiquid. Determination as to the liquidity of such securities is made in accordance with guidelines established by the Fund's Board. Pursuant to such guidelines, the Board has directed the Manager to monitor carefully the Fund's investment in such securities with particular regard to: (1) the frequency of trades and quotes for the lease obligation; (2) the number of dealers willing to purchase or sell the lease obligation and the number of other potential buyers; (3) the willingness of dealers to undertake to make a market in the lease obligation; (4) the nature of the marketplace trades, including the time needed to dispose of the lease obligation, the method of soliciting offers and the mechanics of transfer; and (5) such other factors concerning the trading market for the lease obligation as the Manager may deem relevant. In addition, in evaluating the liquidity and credit quality of a lease obligation that is unrated, the Fund's Board has directed the Manager to consider: (a) whether the lease can be canceled; (b) what assurance there is that the assets represented by the lease can be sold; (c) the strength of the lessee's general credit (e.g., its debt, administrative, economic, and financial characteristics); (d) the likelihood that the municipality will discontinue appropriating funding for the leased property because the property is no longer deemed essential to the operations of the municipality (e.g., the potential for an "event of nonappropriation"); (e) the legal recourse in the event of failure to appropriate; and (f) such other factors concerning credit quality as the Manager may deem relevant.

Tender Option Bonds. The Fund may purchase tender option bonds. A tender option bond is a Municipal Bond (generally held pursuant to a custodial arrangement) having a relatively long maturity and bearing interest at a fixed rate substantially higher than prevailing short-term tax exempt rates, that has been coupled with the agreement of a third party, such as a bank, broker-dealer or other financial institution, pursuant to which such institution grants the security holders the option, at periodic intervals, to tender their securities to the institution and receive the face value thereof. As consideration for providing the option, the financial institution receives periodic fees equal to the difference between the Municipal Bond's fixed coupon rate and the rate, as determined by a remarketing or similar agent at or near the commencement of such period, that would cause the securities, coupled with the tender option, to trade at par on the date of such determination. Thus, after payment of this fee, the security holder effectively holds a demand obligation that bears interest at the prevailing short-term tax exempt rate. The Manager, on behalf of the Fund, will consider on an ongoing basis the creditworthiness of the issuer of the underlying Municipal Bond, of any custodian and of the third party provider of the tender option. In certain instances and for certain tender option bonds, the option may be terminable in the event of a default in payment of principal or interest on the underlying Municipal Bond and for other reasons.

The Fund will purchase tender option bonds only when the Manager is satisfied that the custodial and tender option arrangements, including the fee payment arrangements, will not adversely affect the tax exempt status of the underlying Municipal Bonds and that payment of any tender fees will not have the effect of creating taxable income for the Fund. Based on the tender option bond agreement, the Fund expects to be able to value the tender option bond at par; however, the value of the instrument will be monitored to assure that it is valued at fair value.

Custodial Receipts. The Fund may purchase custodial receipts representing the right to receive certain future principal and interest payments on Municipal Bonds which underlie the custodial receipts. A number of different arrangements are possible. In a typical custodial receipt

arrangement, an issuer or a third party owner of Municipal Bonds deposits such obligations with a custodian in exchange for two classes of custodial receipts. The two classes have different characteristics, but, in each case, payments on the two classes are based on payments received on the underlying Municipal Bonds. One class has the characteristics of a typical auction rate security, where at specified intervals its interest rate is adjusted, and ownership changes, based on an auction mechanism. The interest rate on this class generally is expected to be below the coupon rate of the underlying Municipal Bonds and generally is at a level comparable to that of a Municipal Bond of similar quality and having a maturity equal to the period between interest rate adjustments. The second class bears interest at a rate that exceeds the interest rate typically borne by a security of comparable quality and maturity; this rate also is adjusted, but in this case inversely to changes in the rate of interest of the first class. The aggregate interest paid with respect to the two classes will not exceed the interest paid by the underlying Municipal Bonds. The value of the second class and similar securities should be expected to fluctuate more than the value of a Municipal Bond of comparable quality and maturity, which would increase the volatility of the Fund's net asset value. These custodial receipts are sold in private placements. The Fund also may purchase directly from issuers, and not in a private placement, Municipal Bonds having characteristics similar to custodial receipts. These securities may be issued as part of a multi-class offering and the interest rate on certain classes may be subject to a cap or floor.

Ratings of Municipal Bonds. The Fund will invest at least 80% of the value of its net assets in securities which, in the case of Municipal Bonds, are rated no lower than Baa by Moody's Investors Service, Inc. ("Moody's") or BBB by Standard & Poor's Ratings Services ("S&P") or Fitch Ratings ("Fitch" and, together with Moody's and S&P, the "Rating Agencies"). The Fund may invest up to 20% of the value of its net assets in securities which, in the case of Municipal Bonds, are rated lower than Baa by Moody's and BBB by S&P and Fitch and as low as the lowest rating assigned by the Rating Agencies, but it currently is the intention of the Fund that this portion of the Fund's portfolio be invested primarily in Municipal Bonds rated no lower than Baa by Moody's or BBB by S&P or Fitch. Municipal Bonds rated BBB by S&P and Fitch are regarded as having adequate capacity to pay principal and interest, while those rated Baa by Moody's are considered medium grade obligations which lack outstanding investment characteristics and have speculative characteristics. The Fund may invest in short-term Municipal Bonds which are rated in the two highest rating categories by a Rating Agency. The Fund also may invest in securities which, while not rated, are determined by the Manager to be of comparable quality to the rated securities in which the Fund may invest; for purposes of the 80% requirement described in this paragraph, such unrated securities will be considered to have the rating so determined.

The average distribution of Fund investments (at value) in Municipal Bonds (including notes) by ratings for the fiscal year ended May 31, 2004, computed on a monthly basis, was as follows:

<u>Fitch</u>	or	<u>Moody's</u>	or	<u>S&amp;P</u>	<u>Percentage of Value</u>
AAA		Aaa		AAA	67.4%
AA		Aa		AA	9.3%
A		A		A	9.9%
BBB		Baa		BBB	6.9%
BB		Ba		BB	1.3%
F-1		VMIG 1/MIG 1/P-1		SP-1/A-1	5.1% <sup>(1)</sup>
Not Rated		Not Rated		Not Rated	0.1% <sup>(2)</sup>
					<u>100.0%</u>

Subsequent to its purchase by the Fund, an issue of rated Municipal Bonds may cease to be rated or its rating may be reduced below the minimum required for purchase by the Fund. Neither event will require the sale of such Municipal Bonds by the Fund, but the Manager will consider such event in determining whether the Fund should continue to hold the Municipal Bonds. To the extent that the ratings given by a Rating Agency for Municipal Bonds may change as a result of changes in such organization or its rating system, the Fund will attempt to use comparable ratings as standards for its investments in accordance with the investment policies described in the Prospectus and this Statement of Additional Information. The ratings of the Rating Agencies represent their opinions as to the quality of the Municipal Bonds which they undertake to rate. It should be emphasized, however, that ratings are relative and subjective and are not absolute standards of quality. Although these ratings may be an initial criterion for selection of portfolio investments, the Manager also will evaluate these securities and the creditworthiness of the issuers of such securities.

Stand-By Commitments. The Fund may acquire "stand-by commitments" with respect to Municipal Bonds held in its portfolio. Under a stand-by commitment, the Fund obligates a broker, dealer or bank to repurchase, at the Fund's option, specified securities at a specified price and, in this respect, stand-by commitments are comparable to put options. The exercise of a stand-by commitment, therefore, is subject to the ability of the seller to make payment on demand. The Fund will acquire stand-by commitments solely to facilitate its portfolio liquidity and does not intend to exercise its rights thereunder for trading purposes. The Fund may pay for stand-by commitments if such action is deemed necessary, thus increasing to a degree the cost of the underlying Municipal Bond and similarly decreasing such security's yield to investors. Gains realized in connection with stand-by commitments will be taxable. The Fund also may acquire call options on specific Municipal Bonds. The Fund generally would purchase these call options to protect the Fund from the issuer of the related Municipal Bond redeeming, or other holder of

- 1 Included in these categories are tax exempt notes rated within the two highest grades by a Rating Agency. These securities, together with Municipal Bonds rated Baa or better by Moody's or BBB or better by S&P or Fitch, are taken into account at the time of purchase for purposes of determining that the Fund's portfolio meets the 80% minimum quality standard discussed above.
- 2 Those securities which are not rated have been determined by the Manager to be of comparable quality to securities in the Ba/BB rating category.

the call option from calling away, the Municipal Bond before maturity. The sale by the Fund of a call option that it owns on a specific Municipal Bond could result in the receipt of taxable income by the Fund.

Zero Coupon, Pay-In-Kind and Step-Up Securities. The Fund may invest in zero coupon securities which are debt securities issued or sold at a discount from their face value which do not entitle the holder to any periodic payment of interest prior to maturity or a specified redemption date (or cash payment date). The Fund may invest in pay-in-kind bonds which are debt securities which generally pay interest through the issuance of additional bonds. The Fund may invest in step-up coupon bonds which are debt securities that typically do not pay interest for a specified period of time and then pay interest at a series of different rates. The market prices of these securities generally are more volatile and are likely to respond to a greater degree to changes in interest rates than the market prices of securities that pay cash interest periodically having similar maturities and credit qualities. In addition, unlike bonds which pay cash interest throughout the period to maturity, the Fund will realize no cash until the cash payment or maturity date unless a portion of such securities are sold and, if the issuer defaults, the Fund may obtain no return at all on its investment. Federal income tax law requires the holder of a zero coupon security or of certain pay-in-kind or step-up bonds to accrue income with respect to these securities prior to the receipt of cash payments. To maintain its qualification as a regulated investment company and avoid liability for Federal income taxes, the Fund may be required to distribute such income accrued with respect to these securities and may have to dispose of portfolio securities under disadvantageous circumstances in order to generate cash to satisfy these distribution requirements. See "Dividends, Distributions and Taxes."

Investment Companies. The Fund may invest in securities issued by other investment companies. Under the Investment Company Act of 1940, as amended (the "1940 Act"), the Fund's investment in such securities, subject to certain exceptions, currently is limited to (i) 3% of the total voting stock of any one investment company, (ii) 5% of the Fund's total assets with respect to any one investment company and (iii) 10% of the Fund's total assets in the aggregate. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory fees and other expenses that the Fund bears directly in connection with its own operations. The Fund also may invest its uninvested cash reserves, or cash it receives as collateral from borrowers of its portfolio securities in connection with the Fund's securities lending program, in shares of one or more money market funds advised by the Manager. Such investments will not be subject to the limitations described above, except that the Fund's aggregate investment of uninvested cash reserves in such money market funds may not exceed 25% of its total assets. See "Lending Portfolio Securities."

Illiquid Securities. The Fund may invest up to 15% of the value of its net assets in securities as to which a liquid trading market does not exist, provided such investments are consistent with the Fund's investment objective. Such securities may include securities that are not readily marketable, such as securities that are subject to legal or contractual restrictions on resale, and repurchase agreements providing for settlement in more than seven days after notice. As to these securities, the Fund is subject to a risk that should the Fund desire to sell them when a ready buyer is not available at a price the Fund deems representative of their value, the value of the Fund's net assets could be adversely affected.

**Taxable Investments.** From time to time, on a temporary basis other than for temporary defensive purposes (but not to exceed 20% of the value of the Fund's net assets) or for temporary defensive purposes, the Fund may invest in taxable short-term investments ("Taxable Investments") consisting of: notes of issuers having, at the time of purchase, a quality rating within the two highest grades of a Rating Agency; obligations of the U.S. Government, its agencies or instrumentalities; commercial paper rated not lower than P-1 by Moody's, A-1 by S&P or F-1 by Fitch; certificates of deposit of U.S. domestic banks, including foreign branches of domestic banks, with assets of \$1 billion or more; time deposits; bankers' acceptances and other short-term bank obligations; and repurchase agreements in respect of any of the foregoing. Dividends paid by the Fund that are attributable to income earned by the Fund from Taxable Investments will be taxable to investors. See "Dividends, Distributions and Taxes." Except for temporary defensive purposes, at no time will more than 20% of the value of the Fund's net assets be invested in Taxable Investments and Municipal Bonds the interest from which gives rise to a preference item for the purpose of the alternate minimum tax. When the Fund has adopted a temporary defensive position, including when acceptable California Municipal Bonds are unavailable for investment by the Fund, in excess of 20% of the Fund's assets may be invested in securities that are not exempt from California personal income tax. Under normal market conditions, the Fund anticipates that not more than 5% of the value of its total assets will be invested in any one category of Taxable Investments.

#### **Investment Techniques**

The following information supplements and should be read in conjunction with the Fund's Prospectus. The Fund's use of certain of the investment techniques described below may give rise to taxable income.

**Borrowing Money.** The Fund is permitted to borrow to the extent permitted under the 1940 Act, which permits an investment company to borrow in an amount up to 33-1/3% of the value of its total assets. The Fund currently intends to borrow money only for temporary or emergency (not leveraging) purposes in an amount up to 15% of the value of its total assets (including the amount borrowed) valued at the lesser of cost or market, less liabilities (not including the amount borrowed) at the time the borrowing is made. While such borrowings exceed 5% of the Fund's total assets, the Fund will not make any additional investments.

**Lending Portfolio Securities.** The Fund may lend securities from its portfolio to brokers, dealers and other financial institutions needing to borrow securities to complete certain transactions. In connection with such loans, the Fund remains the owner of the loaned securities and continues to be entitled to payments in amounts equal to the interest or other distributions payable on the loaned securities. The Fund also has the right to terminate a loan at any time. The Fund may call the loan to vote proxies if a material issue affecting the Fund's investment is to be voted upon. Loans of portfolio securities may not exceed 33-1/3% of the value of the Fund's total assets (including the value of assets received as collateral for the loan). The Fund will receive collateral consisting of cash, U.S. Government securities or irrevocable letters of credit which will be maintained at all times in an amount equal to at least 100% of the current market value of the loaned securities. If the collateral consists of a letter of credit or securities, the borrower will pay the Fund a loan premium fee. If the collateral consists of cash, the Fund will reinvest the cash and pay the borrower a pre-negotiated fee or "rebate" from any return earned on the investment. The Fund may participate in a securities lending program operated by Mellon Bank, N.A., as lending agent (the "Lending Agent"). The Lending Agent will receive a percentage of

the total earnings of the Fund derived from lending its portfolio securities. Should the borrower of the securities fail financially, the Fund may experience delays in recovering the loaned securities or exercising its rights in the collateral. Loans are made only to borrowers that are deemed by the Manager to be of good financial standing. In a loan transaction, the Fund will also bear the risk of any decline in value of securities acquired with cash collateral. The Fund will minimize this risk by limiting the investment of cash collateral to money market funds advised by the Manager, repurchase agreements or other high quality instruments with short maturities.

Derivatives. The Fund may invest in, or enter into, derivatives for a variety of reasons, including to hedge certain market or interest rate risks, to provide a substitute for purchasing or selling particular securities or to increase potential income gain. Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, and related indexes. Derivatives may provide a cheaper, quicker or more specifically focused way for the Fund to invest than "traditional" securities would. Examples of derivative instruments that the Fund may use include options contracts, futures contracts, options on futures contracts, and swap agreements. The Fund's portfolio manager may decide not to employ any of these strategies and there is no assurance that any derivatives strategy used by the Fund will succeed.

Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative and the portfolio as a whole. Derivatives permit the Fund to increase or decrease the level of risk, or change the character of the risk, to which its portfolio is exposed in much the same way as the Fund can increase or decrease the level of risk, or change the character of the risk, of its portfolio by making investments in specific securities. However, derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on the Fund's performance.

If the Fund invests in derivatives at inopportune times or judges market conditions incorrectly, such investments may lower the Fund's return or result in a loss. The Fund also could experience losses if its derivatives were poorly correlated with its other investments, or if the Fund were unable to liquidate its position because of an illiquid secondary market. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives.

Derivatives may be purchased on established exchanges or through privately negotiated transactions referred to as over-the-counter derivatives. Exchange-traded derivatives generally are guaranteed by the clearing agency which is the issuer or counterparty to such derivatives. This guarantee usually is supported by a daily variation margin system operated by the clearing agency in order to reduce overall credit risk. As a result, unless the clearing agency defaults, there is relatively little counterparty credit risk associated with derivatives purchased on an exchange. By contrast, no clearing agency guarantees over-the-counter derivatives. Therefore, each party to an over-the-counter derivative bears the risk that the counterparty will default. Accordingly, the Manager will consider the creditworthiness of counterparties to over-the-counter derivatives in the same manner as it would review the credit quality of a security to be purchased by the Fund. Over-the-counter derivatives are less liquid than exchange-traded

derivatives since the other party to the transaction may be the only investor with sufficient understanding of the derivative to be interested in bidding for it.

The Fund will not be a commodity pool. In addition, as a registered investment company, the Fund has filed notice with the Commodity Futures Trading Commission and National Futures Association of its eligibility for an exclusion from the definition of commodity pool operator and, therefore, the Fund is not subject to registration or regulation as a commodity pool operator under the Commodity Exchange Act.

Futures Transactions--In General. The Fund may enter into futures contracts in U.S. domestic markets. Engaging in these transactions involves risk of loss to the Fund which could adversely affect the value of the Fund's net assets. Although the Fund intends to purchase or sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the trading day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses.

Successful use of futures and options with respect thereto by the Fund also is subject to the Manager's ability to predict correctly movements in the direction of the relevant market, and, to the extent the transaction is entered into for hedging purposes, to ascertain the appropriate correlation between the securities being hedged and the price movements of the futures contract. For example, if the Fund uses futures to hedge against the possibility of a decline in the market value of securities held in its portfolio and the prices of such securities instead increase, the Fund will lose part or all of the benefit of the increased value of securities which it has hedged because it will have offsetting losses in its futures positions. Furthermore, if in such circumstances the Fund has insufficient cash, it may have to sell securities to meet daily variation margin requirements. The Fund may have to sell such securities at a time when it may be disadvantageous to do so.

Pursuant to regulations and/or published positions of the Securities and Exchange Commission, the Fund may be required to segregate permissible liquid assets to cover its obligations relating to its transactions in derivatives. To maintain this required cover, the Fund may have to sell portfolio securities at disadvantageous prices or times since it may not be possible to liquidate a derivative position at a reasonable price. In addition, the segregation of such assets will have the effect of limiting the Fund's ability otherwise to invest those assets.

Specific Futures Transactions. The Fund may purchase and sell interest rate futures contracts. An interest rate future obligates the Fund to purchase or sell an amount of a specific debt security at a future date at a specific price.

Swap Transactions. The Fund may engage in swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors to mitigate risk, manage duration and reduce portfolio turnover. Swap transactions, including interest rate swaps, interest rate locks, caps, collars and floors, may be individually negotiated and include exposure to a variety of different interest rates. Swaps involve two parties exchanging a series of cash flows at specified intervals. In the

case of an interest rate swap, the parties exchange interest payments based upon an agreed upon principal amount (referred to as the "notional principal amount"). Under the most basic scenario, Party A would pay a fixed rate on the notional principal amount to Party B, which would pay a floating rate on the same notional principal amount to Party A. Swap agreements can take many forms and are known by a variety of names.

In a typical cap or floor agreement, one party agrees to make payments only under specified circumstances, usually in return for payment of a fee by the other party. For example, the buyer of an interest rate cap obtains the right to receive payments to the extent that a specified interest rate exceeds an agreed-upon level, while the seller of an interest rate floor is obligated to make payments to the extent that a specified interest rate falls below an agreed-upon level. An interest rate collar combines elements of buying a cap and selling a floor.

In a typical interest rate lock transaction, if Party A desires to lock in a particular interest rate on a given date it may enter into an agreement to pay, or receive a payment from, Party B based on the yield of a reference index or security, such as a Municipal Bond or U.S. Treasury security. At the maturity of the term of the agreement, one party makes a payment to the other party as determined by the relative change in the yield of the reference security or index. An interest rate lock transaction may be terminated prior to its stated maturity date by calculating the payment due as of the termination date, which generally differs from the make-whole provisions for an early termination of an interest rate swap transaction in which the party terminating the swap early is required to give its counterparty the economic benefit of the transaction.

The Fund will set aside cash or permissible liquid assets to cover its current obligations under swap transactions. If the Fund enters into a swap agreement on a net basis (that is, the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments), the Fund will maintain cash or permissible liquid assets with a daily value at least equal to the excess, if any, of the Fund's accrued obligations under the swap agreement over the accrued amount the Fund is entitled to receive under the agreement.

The most important factor in the performance of a swap agreement is the change in the specific interest rate or other factor(s) that determine the amounts of payments due to and from the Fund. If a swap agreement called for payments by the Fund, the Fund must be prepared to make such payments when due. In addition, if the counterparty's creditworthiness declines, the value of a swap agreement could decline, potentially resulting in losses.

The Fund will enter into swaps, interest rate locks, caps, collars and floors only with banks and recognized securities dealers believed by the Manager to present minimal credit risks. If there were a default by the other party to such transaction, the Fund would have to rely on its contractual remedies (which may be limited by bankruptcy, insolvency or similar laws) pursuant to the agreement relating to the transaction.

The use of interest rate swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio security transactions. If the Manager is incorrect in its forecasts of market values, interest rates and other applicable factors, the investment performance of the Fund would diminish compared with what it would have been if these investment techniques were not used. Moreover, even if the Manager is correct in its forecasts, there is a risk that the swap position may correlate imperfectly with the price of the asset or liability being hedged.

The Fund will enter into swap transactions only when the Manager believes it would be in the best interests of the Fund's shareholders to do so. Depending on the circumstances, gains from a swap transaction can be treated either as taxable ordinary income or as short- or long-term capital gains.

Options--In General. The Fund may invest up to 5% of its assets, represented by the premium paid, in the purchase of call and put options with respect to specific securities or futures contracts. The Fund may write (i.e., sell) covered call and put option contracts to the extent of 20% of the value of its net assets at the time such option contracts are written. A call option gives the purchaser of the option the right to buy, and obligates the writer to sell, the underlying security or securities at the exercise price at any time during the option period, or at a specific date. Conversely, a put option gives the purchaser of the option the right to sell, and obligates the writer to buy, the underlying security or securities at the exercise price at any time during the option period, or at a specific date.

A covered call option written by the Fund is a call option with respect to which the Fund owns the underlying security or otherwise covers the transaction by segregating permissible liquid assets. A put option written by the Fund is covered when, among other things, the Fund segregates permissible liquid assets having a value equal to or greater than the exercise price of the option to fulfill the obligation undertaken. The principal reason for writing covered call and put options is to realize, through the receipt of premiums, a greater return than would be realized on the underlying securities alone. The Fund receives a premium from writing covered call or put options which it retains whether or not the option is exercised.

There is no assurance that sufficient trading interest to create a liquid secondary market on a securities exchange will exist for any particular option or at any particular time, and for some options no such secondary market may exist. A liquid secondary market in an option may cease to exist for a variety of reasons. In the past, for example, higher than anticipated trading activity or order flow, or other unforeseen events, at times have rendered certain of the clearing facilities inadequate and resulted in the institution of special procedures, such as trading rotations, restrictions on certain types of orders or trading halts or suspensions in one or more options. There can be no assurance that similar events, or events that may otherwise interfere with the timely execution of customers' orders, will not recur. In such event, it might not be possible to effect closing transactions in particular options. If, as a covered call option writer, the Fund is unable to effect a closing purchase transaction in a secondary market, it will not be able to sell the underlying security until the option expires or it delivers the underlying security upon exercise or it otherwise covers its position.

Successful use by the Fund of options will be subject to the Manager's ability to predict correctly movements in interest rates. To the extent the Manager's predictions are incorrect, the Fund may incur losses.

Future Developments. The Fund may take advantage of opportunities in options and futures contracts and options on futures contracts and any other derivatives which are not presently contemplated for use by the Fund or which are not currently available but which may be developed, to the extent such opportunities are both consistent with the Fund's investment objective and legally permissible for the Fund. Before entering into such transactions or making any such investment, the Fund will provide appropriate disclosure in the Prospectus or this Statement of Additional Information.

Forward Commitments. The Fund may purchase Municipal Bonds and other securities on a forward commitment, when-issued or delayed-delivery basis, which means that delivery and payment take place a number of days after the date of the commitment to purchase. The payment obligation and the interest rate receivable on a forward commitment, when-issued or delayed-delivery security are fixed when the Fund enters into the commitment, but the Fund does not make payment until it receives delivery from the counterparty. The Fund will commit to purchase such securities only with the intention of actually acquiring the securities, but the Fund may sell these securities before the settlement date if it is deemed advisable. The Fund will segregate permissible liquid assets at least equal at all times to the amount of the Fund's purchase commitments.

Municipal Bonds and other securities purchased on a forward commitment, when-issued or delayed-delivery basis are subject to changes in value (generally changing in the same way, i.e., appreciating when interest rates decline and depreciating when interest rates rise) based upon the public's perception of the creditworthiness of the issuer and changes, real or anticipated, in the level of interest rates. Securities purchased on a forward commitment, when-issued or delayed-delivery basis may expose the Fund to risks because they may experience such fluctuations prior to their actual delivery. Purchasing securities on a forward commitment, when-issued or delayed delivery basis can involve the additional risk that the yield available in the market when the delivery takes place actually may be higher than that obtained in the transaction itself. Purchasing securities on a forward commitment, when-issued or delayed-delivery basis when the Fund is fully or almost fully invested may result in greater potential fluctuation in the value of the Fund's net assets and its net asset value per share.

#### Certain Investment Considerations and Risks

Investing in Municipal Bonds. The Fund may invest more than 25% of the value of its total assets in Municipal Bonds which are related in such a way that an economic, business or political development or change affecting one such security also would affect the other securities; for example, securities the interest upon which is paid from revenues of similar types of projects. As a result, the Fund may be subject to greater risk as compared to a municipal bond fund that does not follow this practice.

Certain provisions in the Internal Revenue Code of 1986, as amended (the "Code"), relating to the issuance of Municipal Bonds may reduce the volume of Municipal Bonds qualifying for Federal tax exemption. One effect of these provisions could be to increase the cost of the Municipal Bonds available for purchase by the Fund and thus reduce available yield. Shareholders should consult their tax advisers concerning the effect of these provisions on an investment in the Fund. Proposals that may restrict or eliminate the income tax exemption for interest on Municipal Bonds may be introduced in the future. If any such proposal were enacted that would reduce the availability of Municipal Bonds for investment by the Fund so as to adversely affect Fund shareholders, the Fund would reevaluate its investment objective and policies and submit possible changes in the Fund's structure to shareholders for their consideration. If legislation were enacted that would treat a type of Municipal Bond as taxable, the Fund would treat such security as a permissible Taxable Investment within the applicable limits set forth herein.

Investing in California Municipal Bonds. Since the Fund is concentrated in securities issued by California or entities within California, an investment in the Fund may involve greater

risk than investments in certain other types of municipal bond funds. You should consider carefully the special risks inherent in the Fund's investment in California Municipal Bonds. You should review the information in "Appendix A," which provides a brief summary of special investment considerations and risk factors relating to investing in California Municipal Bonds.

Lower Rated Bonds. The Fund may invest up to 20% of the value of its net assets in higher yielding (and, therefore, higher risk) debt securities rated below investment grade by the Rating Agencies (commonly known as "high yield" or "junk" bonds). They may be subject to greater risks with respect to the issuing entity and to greater market fluctuations than certain lower yielding, higher rated municipal securities. See "Appendix B" for a general description of the Rating Agencies' ratings of municipal securities. Although ratings may be useful in evaluating the safety of interest and principal payments, they do not evaluate the market value risk of these bonds. The Fund will rely on the Manager's judgment, analysis and experience in evaluating the creditworthiness of an issuer.

The market values of many of these bonds tend to be more sensitive to economic conditions than are higher rated securities. These bonds generally are considered by the Rating Agencies to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation and generally will involve more credit risk than securities in the higher rating categories.

Because there is no established retail secondary market for many of these securities, the Fund anticipates that such securities could be sold only to a limited number of dealers or institutional investors. To the extent a secondary trading market for these bonds does exist, it generally is not as liquid as the secondary market for higher rated securities. The lack of a liquid secondary market may have an adverse impact on market price and yield and the Fund's ability to dispose of particular issues when necessary to meet the Fund's liquidity needs or in response to a specific economic event such as a deterioration in the creditworthiness of the issuer. The lack of a liquid secondary market for certain securities also may make it more difficult for the Fund to obtain accurate market quotations for purposes of valuing the Fund's portfolio and calculating its net asset value. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of these securities. In such cases, judgment may play a greater role in valuation because less reliable objective data may be available.

These bonds may be particularly susceptible to economic downturns. An economic recession could adversely affect the ability of the issuers of lower-rated bonds to repay principal and pay interest thereon which would increase the incidence of default for such securities. It is likely that any economic recession also would disrupt severely the market for such securities and have an adverse impact on their value.

The Fund may acquire these bonds during an initial offering. Such securities may involve special risks because they are new issues. The Fund has no arrangement with any person concerning the acquisition of such securities, and the Manager will review carefully the credit and other characteristics pertinent to such new issues.

The credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon, pay-in-kind and step-up securities, in which the Fund may invest up to 5% of its total

assets. In addition to the risks associated with the credit rating of the issuers, the market price of these securities may be very volatile during the period no interest is paid.

Simultaneous Investments. Investment decisions for the Fund are made independently from those of other investment companies advised by the Manager. The Manager has adopted written trade allocation procedures for its equity and fixed income trading desks. Under the procedures, portfolio managers or the trading desks will ordinarily seek to aggregate (or “bunch”) orders that are placed or received concurrently for more than one investment company or account. In some cases, this procedure may adversely affect the size of the position obtained for or disposed of by the Fund or the price paid or received by the Fund.

### Investment Restrictions

The Fund's investment objective and its policy to normally invest at least 80% of its net assets (plus any borrowings for investment purposes) in California Municipal Bonds (or other instruments with similar economic characteristics) are fundamental policies, which cannot be changed without approval by the holders of a majority (as defined in the 1940 Act) of the Fund's outstanding voting shares. In addition, the Fund has adopted investment restrictions numbered 1 through 7 as fundamental policies. Investment restrictions numbered 8 through 12 are not fundamental policies and may be changed by a vote of a majority of the Fund's Board members at any time. The Fund may not:

1. Invest more than 25% of its assets in the securities of issuers in any single industry; provided that there shall be no limitation on the purchase of Municipal Bonds and, for temporary defensive purposes, securities issued by banks and obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities.
2. Borrow money, except to the extent permitted under the 1940 Act (which currently limits borrowings to no more than 33-1/3% of the Fund's total assets). For purposes of this investment restriction, the entry into options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices shall not constitute borrowing.
3. Purchase or sell real estate, commodities or commodity contracts, or oil and gas interests, but this shall not prevent the Fund from investing in Municipal Bonds secured by real estate or interests therein, or prevent the Fund from purchasing and selling options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.
4. Underwrite the securities of other issuers, except that the Fund may bid separately or as part of a group for the purchase of Municipal Bonds directly from an issuer for its own portfolio to take advantage of the lower purchase price available, and except to the extent the Fund may be deemed an underwriter under the Securities Act of 1933, as amended, by virtue of disposing of portfolio securities.
5. Make loans to others, except through the purchase of debt obligations and the entry into repurchase agreements; however, the Fund may lend its portfolio securities in an amount not to exceed 33-1/3% of the value of its total assets. Any loans of portfolio securities will be made according to guidelines established by the Securities and Exchange Commission

and the Fund's Board.

6. Issue any senior security (as such term is defined in Section 18(f) of the 1940 Act), except to the extent that the activities permitted in Investment Restrictions numbered 2, 3 and 10 may be deemed to give rise to a senior security.

7. Sell securities short or purchase securities on margin, but the Fund may make margin deposits in connection with transactions in options, forward contracts, futures contracts, including those relating to indices, and options on futures contracts or indices.

8. Purchase securities other than Municipal Bonds and Taxable Investments and those arising out of transactions in futures and options or as otherwise provided in the Fund's Prospectus.

9. Invest in securities of other investment companies, except to the extent permitted under the 1940 Act.

10. Pledge, hypothecate, mortgage or otherwise encumber its assets, except to the extent necessary to secure borrowings for temporary or emergency purposes and to the extent related to the deposit of assets in escrow in connection with the purchase of securities on a when-issued or delayed-delivery basis and collateral and initial or variation margin arrangements with respect to options, futures contracts, including those related to indices, and options on futures contracts or indices.

11. Enter into repurchase agreements providing for settlement in more than seven days after notice or purchase securities which are illiquid (which securities could include participation interests (including municipal lease/purchase agreements) that are not subject to the demand feature described in the Fund's Prospectus, floating and variable rate demand obligations as to which the Fund cannot exercise the demand feature described in the Fund's Prospectus on less than seven days' notice and as to which there is no secondary market) if, in the aggregate, more than 15% of its net assets would be so invested.

12. Invest in companies for the purpose of exercising control.

For purposes of Investment Restriction No. 1, industrial development bonds, where the payment of principal and interest is the ultimate responsibility of companies within the same industry, are grouped together as an "industry."

If a percentage restriction is adhered to at the time of investment, a later change in percentage resulting from a change in values or assets will not constitute a violation of such restriction. With respect to Investment Restriction No. 2, however, if borrowings exceed 33-1/3% of the value of the Fund's total assets as a result of a change in values or assets, the Fund must take steps to reduce such borrowings at least to the extent of such excess.

The Fund and the Manager have received an exemptive order from the Securities and Exchange Commission which, among other things, permits the Fund to use cash collateral received in connection with lending the Fund's securities and other uninvested cash to purchase shares of one or more registered money market funds advised by the Manager in excess of the limitations imposed by the 1940 Act.

## MANAGEMENT OF THE FUND

The Fund's Board is responsible for the management and supervision of the Fund and approves all significant agreements with those companies that furnish services to the Fund. These companies are as follows:

The Dreyfus Corporation .....	Investment Adviser
Dreyfus Service Corporation .....	Distributor
Dreyfus Transfer, Inc. ....	Transfer Agent
The Bank of New York .....	Custodian

### Board Members of the Fund<sup>1</sup>

Board members of the Fund, together with information as to their positions with the Fund, principal occupations and other board memberships and affiliations, are shown below.

<u>Name (Age)</u> <u>Position with Fund (Since)</u>	<u>Principal Occupation</u> <u>During Past 5 Years</u>	<u>Other Board Memberships and Affiliations</u>
Joseph S. DiMartino (60) Chairman of the Board (1995)	Corporate Director and Trustee	The Muscular Dystrophy Association, <i>Director</i> Levcor International, Inc., an apparel fabric processor, <i>Director</i> Century Business Services, Inc., a provider of outsourcing functions for small and medium size companies, <i>Director</i> The Newark Group, a provider of a national market of paper recovery facilities, paperboard mills and paperboard converting plants, <i>Director</i>
David W. Burke (68) Board Member (1994)	Corporate Director and Trustee	John F. Kennedy Library Foundation, <i>Director</i> U.S.S. Constitution Museum, <i>Director</i>
Samuel Chase (72) Board Member (1985)	Corporate Director and Trustee	None
Gordon J. Davis (63) Board Member (1995)	Partner in the law firm of LeBoeuf, Lamb, Greene & MacRae, LLP President, Lincoln Center for the Performing Arts, Inc. (2001)	Consolidated Edison, Inc., a utility company, <i>Director</i> Phoenix Companies, Inc., a life insurance company, <i>Director</i> Board Member/Trustee for several not-for-profit groups
Joni Evans (62) Board Member (1983)	Senior Vice President of the William Morris Agency	None
Arnold S. Hiatt (77) Board Member (1983)	Chairman of The Stride Rite Charitable Foundation	Isabella Stewart Gardner Museum, <i>Trustee</i> John Merck Fund, a charitable trust, <i>Trustee</i> Business for Social Responsibility, <i>Chairman</i>

---

<sup>1</sup> None of the Board members are "interested persons" of the Fund, as defined in the 1940 Act.

Burton N. Wallack (53) Board Member (1991)	President and co-owner of Wallack Management Company, a real estate management company	None
--	--	------

Board members are elected to serve for an indefinite term. The Fund has standing audit, nominating and compensation committees, each comprised of its Board members who are not "interested persons" of the Fund, as defined in the 1940 Act. The function of the audit committee is (i) to oversee the Fund's accounting and financial reporting processes and the audits of the Fund's financial statements and (ii) to assist in the Board's oversight of the integrity of the Fund's financial statements, the Fund's compliance with legal and regulatory requirements and the independent auditors' qualifications, independence and performance. The Fund's nominating committee is responsible for selecting and nominating persons as members of the Board for election or appointment by the Board and for election by shareholders. In evaluating potential nominees, including any nominees recommended by shareholders, the committee takes into consideration various factors listed in the Nominating Committee Charter, including character and integrity, business and professional experience, and whether the committee believes the person has the ability to apply sound and independent business judgment and would act in the interest of the Fund and its shareholders. The nominating committee will consider recommendations for nominees from shareholders submitted to the Secretary of the Fund, c/o The Dreyfus Corporation Legal Department, 200 Park Avenue, 8<sup>th</sup> Floor West, New York, New York 10166, which includes information regarding the recommended nominee as specified in the Nominating Committee Charter. The function of the compensation committee is to establish the appropriate compensation for serving on the Board. The Fund also has a standing pricing committee comprised of any one Board member. The function of the pricing committee is to assist in valuing the Fund's investments. The Fund's audit committee met four times and its nominating and compensation committees each met once during the fiscal year ended May 31, 2004. The pricing committee did not meet during the last fiscal year.

The table below indicates the dollar range of each Board member's ownership of Fund shares and shares of other funds in the Dreyfus Family of Funds for which he or she is a Board member, in each case as of December 31, 2004.

<u>Name of Board Member</u>	<u>The Fund</u>	<u>Aggregate Holding of Funds in the Dreyfus Family of Funds for which Responsible as a Board Member</u>
Joseph S. DiMartino	None	Over \$100,000
David W. Burke	None	Over \$100,000
Samuel Chase	None	\$10,001-\$50,000
Gordon J. Davis	None	\$1-\$10,000
Joni Evans	None	\$10,001-\$50,000
Arnold S. Hiatt	None	None
Burton N. Wallack	None	None

As of December 31, 2003, none of the Board members or their immediate family members owned securities of the Manager, the Distributor or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Manager or the Distributor.

The Fund currently pays its Board members its allocated portion of an annual retainer of \$30,000 and a fee of \$4,000 per meeting (with a minimum of \$500 per meeting and per telephone meeting) attended for the Fund and 11 other funds (comprised of 15 portfolios) in the Dreyfus Family of Funds, and reimburses them for their expenses. The Chairman of the Board receives an additional 25% of such compensation. Emeritus Board members, if any, are entitled to receive an annual retainer and a per meeting attended fee of one-half the amount paid to them as Board members. The aggregate amount of compensation paid to each Board member by the Fund for the fiscal year ended May 31, 2004, and by all funds in the Dreyfus Family of Funds for which such person was a Board member (the number of portfolios of such funds is set forth in parenthesis next to each Board member's total compensation) during the year ended December 31, 2003, under the compensation schedule then in effect, was as follows:

<u>Name of Board Member</u>	<u>Aggregate Compensation From the Fund*</u>	<u>Total Compensation From the Fund and Fund Complex Paid to Board Member(**)</u>
Joseph S. DiMartino	\$8,276	\$800,306 (191)
David W. Burke	\$6,618	\$283,744 (84)
Samuel Chase	\$6,618	\$ 48,750 (15)
Gordon J. Davis	\$6,618	\$ 98,750 (26)
Joni Evans	\$6,618	\$ 48,750 (15)
Arnold S. Hiatt	\$6,618	\$ 48,750 (15)
Burton N. Wallack	\$6,618	\$ 48,750 (15)

\* Amount does not include reimbursed expenses for attending Board meetings, which amounted to \$2,685 for all Board members as a group.

\*\* Represents the number of separate portfolios comprising the investment companies in the Fund Complex, including the Fund, for which the Board member serves.

#### Officers of the Fund

STEPHEN E. CANTER, President since March 2000. Chairman of the Board, Chief Executive Officer and Chief Operating Officer of the Manager, and an officer of 97 investment companies (comprised of 190 portfolios) managed by the Manager. Mr. Canter also is a Board member and, where applicable, an Executive Committee Member of other investment management subsidiaries of Mellon Financial Corporation, each of which is an affiliate of the Manager. He is 59 years old and has been an employee of the Manager since May 1995.

STEPHEN R. BYERS, Executive Vice President since November 2002. Chief Investment Officer, Vice Chairman and a director of the Manager, and an officer of 97 investment companies (comprised of 190 portfolios) managed by the Manager. Mr. Byers also is an officer, director or an Executive Committee Member of certain other investment management subsidiaries of Mellon Financial Corporation, each of which is an affiliate of the Manager. He is 50 years old and has been an employee of the Manager since January 2000. Prior to joining the Manager, he served as an Executive Vice President – Capital Markets, Chief Financial Officer and Treasurer at Gruntal & Co., L.L.C.

MARK N. JACOBS, Vice President since March 2000. Executive Vice President, Secretary and General Counsel of the Manager, and an officer of 98 investment companies (comprised of 206 portfolios) managed by the Manager. He is 58 years old and has been an employee of the Manager since June 1977.

JOHN B. HAMMALIAN, Secretary since March 2000. Associate General Counsel of the Manager, and an officer of 37 investment companies (comprised of 46 portfolios) managed by the Manager. He is 41 years old and has been an employee of the Manager since February 1991.

STEVEN F. NEWMAN, Assistant Secretary since March 2000. Associate General Counsel and Assistant Secretary of the Manager, and an officer of 98 investment companies (comprised of 206 portfolios) managed by the Manager. He is 54 years old and has been an employee of the Manager since July 1980.

MICHAEL A. ROSENBERG, Assistant Secretary since March 2000. Associate General Counsel of the Manager, and an officer of 95 investment companies (comprised of 199 portfolios) managed by the Manager. He is 44 years old and has been an employee of the Manager since October 1991.

JAMES WINDELS, Treasurer since November 2001. Director – Mutual Fund Accounting of the Manager, and an officer of 98 investment companies (comprised of 206 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since April 1985.

GREGORY S. GRUBER, Assistant Treasurer since March 2000. Senior Accounting Manager – Municipal Bond Funds of the Manager, and an officer of 30 investment companies (comprised of 59 portfolios) managed by the Manager. He is 45 years old and has been an employee of the Manager since August 1981.

KENNETH J. SANDGREN, Assistant Treasurer since November 2001. Mutual Fund Tax Director of the Manager, and an officer of 98 investment companies (comprised of 206 portfolios) managed by the Manager. He is 49 years old and has been an employee of the Manager since June 1993.

WILLIAM GERMENIS, Anti-Money Laundering Compliance Officer since October 2002. Vice President and Anti-Money Laundering Compliance Officer of the Distributor, and the Anti-Money Laundering Compliance Officer of 93 investment companies (comprised of 201 portfolios) managed by the Manager. He is 33 years old and has been an employee of the Distributor since October 1998.

The address of each Board member and officer of the Fund is 200 Park Avenue, New York, New York 10166.

The Fund's Board members and officers, as a group, owned less than 1% of the Fund's voting securities outstanding on September 3, 2004.

As of September 3, 2004, the following shareholder was known by the Fund to own of record 5% or more of the outstanding voting securities of the Fund: Charles Schwab & Co. Inc., 101 Montgomery Street, San Francisco, CA 94104 (6.88% - Class Z).

## MANAGEMENT ARRANGEMENTS

Investment Adviser. The Manager is a wholly-owned subsidiary of Mellon Financial Corporation ("Mellon"). Mellon is a global financial holding company incorporated under Pennsylvania law in 1971 and registered under the Federal Bank Holding Company Act of 1956, as amended. Mellon provides a comprehensive range of financial products and services in domestic and selected international markets.

The Manager provides management services pursuant to a Management Agreement (the "Agreement") between the Fund and the Manager. The Agreement is subject to annual approval by (i) the Fund's Board or (ii) vote of a majority (as defined in the 1940 Act) of the Fund's outstanding voting securities, provided that in either event the continuance also is approved by a majority of the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund or the Manager, by vote cast in person at a meeting called for the purpose of voting on such approval. The Agreement is terminable without penalty, on 60 days' notice, by the Fund's Board or by vote of the holders of a majority of the Fund's outstanding voting shares, or, upon not less than 90 days' notice, by the Manager. The Agreement will terminate automatically in the event of its assignment (as defined in the 1940 Act).

In approving the current Agreement, the Board considered a number of factors, including the nature and quality of the services provided by the Manager; the investment philosophy and investment approach as applied to the Fund by the Manager; the investment management expertise of the Manager in respect of the Fund's investment strategies; the personnel, resources and experience of the Manager; the Fund's performance history and the management fees paid to the Manager relative to those of mutual funds with similar investment objectives, strategies and restrictions; the Manager's costs of providing services under the Agreement; the relationship between the fees paid to the Manager under the Agreement and the Fund's Distribution Plan and Shareholder Services Plans; and ancillary benefits the Manager may receive from its relationship with the Fund.

The following persons are officers and/or directors of the Manager: Stephen E. Canter, Chairman of the Board, Chief Executive Officer and Chief Operating Officer; Michael G. Millard, President and a director; Stephen R. Byers, Chief Investment Officer, Vice Chairman and a director; J. Charles Cardona, Vice Chairman and a director; J. David Officer, Vice Chairman and a director; Ronald P. O'Hanley III, Vice Chairman and a director; Diane P. Durnin, Executive Vice President; Mark N. Jacobs, Executive Vice President, General Counsel and Secretary; Patrice M. Kozlowski, Senior Vice President--Corporate Communications; Lisa A. Fox, Vice President-Human Resources; Mary Beth Leibig, Vice President--Human Resources; Anthony Mayo, Vice President-Information Systems; Angela E. Price, Vice President; Theodore A. Schachar, Vice President-Tax; Alex G. Sciulli, Vice President; Wendy H. Strutt, Vice President; William H. Maresca, Controller; James Bitetto, Assistant Secretary; Steven F. Newman, Assistant Secretary; and Steven G. Elliott, David F. Lamere, Martin G. McGuinn and Richard W. Sabo, directors.

The Manager manages the Fund's portfolio of investments in accordance with the stated policies of the Fund, subject to the approval of the Fund's Board members. The Manager is responsible for investment decisions and provides the Fund with portfolio managers who are authorized by the Fund's Board to execute purchases and sales of securities. The Fund's portfolio managers are: Joseph P. Darcy, A. Paul Disdier, Douglas J. Gaylor, Joseph Irace,

Colleen Meehan, W. Michael Petty, Scott Sprauer, Bill Vasiliou, James Welch and Monica S. Wieboldt. The Manager also maintains a research department with a professional staff of portfolio managers and securities analysts who provide research services for the Fund and for other funds advised by the Manager.

The Manager's Code of Ethics subjects its employees' personal securities transactions to various restrictions to ensure that such trading does not disadvantage any fund advised by the Manager. In that regard, portfolio managers and other investment personnel of the Manager must preclear and report their personal securities transactions and holdings, which are reviewed for compliance with the Code of Ethics and are also subject to the oversight of Mellon's Investment Ethics Committee. Portfolio managers and other investment personnel of the Manager who comply with the preclearance and disclosure procedures of the Code of Ethics and the requirements of the Committee may be permitted to purchase, sell or hold securities which also may be or are held in fund(s) they manage or for which they otherwise provide investment advice.

All expenses incurred in the operation of the Fund are borne by the Fund, except to the extent specifically assumed by the Manager. The expenses borne by the Fund include, without limitation, the following: taxes, interest, loan commitment fees, interest and distributions paid on securities sold short, brokerage fees and commissions, if any, fees of Board members who are not officers, directors, employees or holders of 5% or more of the outstanding voting securities of the Manager, Securities and Exchange Commission fees, state Blue Sky qualification fees, advisory fees, charges of custodians, transfer and dividend disbursing agents' fees, certain insurance premiums, industry association fees, outside auditing and legal expenses, costs of independent pricing services, costs of maintaining corporate existence, costs attributable to investor services (including, without limitation, telephone and personnel expenses), costs of shareholders' reports and corporate meetings, costs of preparing and printing prospectuses and statements of additional information for regulatory purposes and for distribution to existing shareholders and any extraordinary expenses. In addition, each class of shares bears any class specific expenses allocated to such class, such as expenses related to the distribution and/or shareholder servicing of such class. Shares of each Class are subject to an annual shareholder services fee, and Class B and Class C shares are subject to an annual distribution fee. See "Distribution Plan and Shareholder Services Plans."

The Manager maintains office facilities on behalf of the Fund, and furnishes statistical and research data, clerical help, accounting, data processing, bookkeeping and internal auditing and certain other required services to the Fund. The Manager may pay the Distributor for shareholder services from the Manager's own assets, including past profits but not including the management fee paid by the Fund. The Distributor may use part or all of such payments to pay certain financial institutions (which may include banks) securities dealers and other industry professionals in respect of these services. The Manager also may make such advertising and promotional expenditures, using its own resources, as it from time to time deems appropriate.

As compensation for the Manager's services, the Fund has agreed to pay the Manager a monthly management fee at the annual rate of 0.60% of the value of the Fund's average daily net assets. All fees and expenses are accrued daily and deducted before declaration of dividends to investors. The management fees paid to the Manager for the fiscal years ended May 31, 2002, 2003, and 2004 amounted to \$6,666,099, \$6,673,238, and \$6,369,536, respectively.

The Manager has agreed that if, in any fiscal year, the aggregate expenses of Class Z shares of the Fund, exclusive of taxes, brokerage fees, interest on borrowings and (with the prior written consent of the necessary state securities commissions) extraordinary expenses, but including the management fee, exceed 1-1/2% of the value of the Fund's average net assets attributable to Class Z shares for the fiscal year, the Fund may deduct from the payment to be made to the Manager under the Agreement, or the Manager will bear, such excess expense with respect to Class Z of the Fund. Such deduction or payment, if any, will be estimated daily, and reconciled and effected or paid, as the case may be, on a monthly basis.

The aggregate of the fees payable to the Manager is not subject to reduction as the value of the Fund's net assets increases.

Distributor. The Distributor, a wholly-owned subsidiary of the Manager located at 200 Park Avenue, New York, New York 10166, serves as the Fund's distributor on a best efforts basis pursuant to an agreement with the Fund which is renewable annually.

The Distributor compensates certain financial institutions (which may include banks), securities dealers ("Selected Dealers") and other industry professionals (collectively, "Service Agents") for selling Class A shares subject to a contingent deferred sales charge ("CDSC"), and Class B shares and Class C shares at the time of purchase from its own assets. The proceeds of the CDSC and fees pursuant to the Fund's Distribution Plan (described below), in part, are used to defray these expenses. With respect to Fund shares subject to a CDSC or Distribution Plan issued to shareholders in exchange for shares originally issued by a series of The Bear Stearns Funds (the "Acquired Fund"), the proceeds of any CDSC and fees pursuant to the Distribution Plan are payable to the Acquired Fund's former distributor to defray the expenses it incurred in connection with the sale of such shares when originally issued by the Acquired Fund. For Class C shares, such Distribution Plan fees will be paid to the Acquired Fund's former distributor for a period not to exceed one year from the date the Acquired Fund originally issued the shares exchanged for the Class C shares of the Fund. As the Fund's Class A, Class B and Class C shares are new classes, no information on retained sales loads is available as of the date of this Statement of Additional Information.

The Distributor, at its expense, may provide promotional incentives to dealers that sell shares of funds advised by the Manager which are sold with a sales load, such as the Fund. In some instances, these incentives may be offered only to certain dealers who have sold or may sell significant amounts of shares.

Transfer and Dividend Disbursing Agent and Custodian. Dreyfus Transfer, Inc. (the "Transfer Agent"), a wholly-owned subsidiary of the Manager, 200 Park Avenue, New York, New York 10166, is the Fund's transfer and dividend disbursing agent. Under a transfer agency agreement with the Fund, the Transfer Agent arranges for the maintenance of shareholder account records for the Fund, the handling of certain communications between shareholders and the Fund and the payment of dividends and distributions payable by the Fund. For these services, the Transfer Agent receives a monthly fee computed on the basis of the number of shareholder accounts it maintains for the Fund during the month, and is reimbursed for certain out-of-pocket expenses.

The Bank of New York (the "Custodian"), One Wall Street, New York, New York 10286, is the Fund's custodian. The Custodian has no part in determining the investment policies

of the Fund or which securities are to be purchased or sold by the Fund. Under a custody agreement with the Fund, the Custodian holds the Fund's securities and keeps all necessary accounts and records. For its custody services, the Custodian receives a monthly fee based on the market value of the Fund's assets held in custody and receives certain securities transactions charges.

## HOW TO BUY SHARES

General. Class A, Class B and Class C shares of the Fund may be purchased only by clients of Service Agents, except that full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Fund's Board, or the spouse or minor child of any of the foregoing may purchase Class A shares directly through the Distributor. Subsequent purchases may be sent directly to the Transfer Agent or your Service Agent.

Class Z shares are offered only to shareholders of the Fund with Fund accounts that existed on the date the Fund's shares were classified as Class Z and continue to exist at the time of purchase, and to shareholders who received Class Z shares in exchange for their shares of General California Municipal Bond Fund, Inc. or Dreyfus California Municipal Income, Inc. as a result of the reorganization of such funds. In addition, certain broker-dealers and other financial institutions maintaining accounts with the Fund on the date the Fund's shares were classified as Class Z (or with General California Municipal Bond Fund, Inc. at the time of the reorganization of such fund) may open new accounts in Class Z of the Fund on behalf of qualified retirement plans and "wrap accounts" or similar programs. Class Z shares generally are not available for new accounts.

Share certificates are issued only upon your written request. No certificates are issued for fractional shares. It is not recommended that the Fund be used as a vehicle for Keogh, IRA or other qualified retirement plans. The Fund reserves the right to reject any purchase order.

When purchasing Fund shares, you must specify which Class is being purchased. Your Service Agent can help you choose the share class that is appropriate for your investment. The decision as to which Class of shares is most beneficial to you depends on a number of factors, including the amount and the intended length of your investment in the Fund. You should consider whether, during the anticipated life of your investment in the Fund, the accumulated Distribution Plan fee, Shareholder Services Plan fee and CDSC, if any, on Class B shares or Class C shares would be less than the accumulated Shareholder Services Plan fee and initial sales charge on Class A shares, purchased at the same time, and to what extent, if any, such differential could be offset by the return on Class A shares. Additionally, investors qualifying for reduced initial sales charges who expect to maintain their investment for an extended period of time should consider purchasing Class A shares because the accumulated continuing Distribution Plan and Shareholder Services Plan fees on Class B shares or Class C shares may exceed the accumulated Shareholder Services Plan fee and initial sales charge on Class A shares during the life of the investment. Finally, you should consider the effect of the CDSC period and any conversion rights of the Classes in the context of your own investment time frame. For example, while Class C shares have a shorter CDSC period than Class B shares, Class C shares do not have a conversion feature and, therefore, are subject to ongoing Distribution Plan and Shareholder Services Plan fees.

In many cases, neither the Distributor nor the Transfer Agent will have the information necessary to determine whether a quantity discount or reduced sales charge is applicable to a purchase. You or your Service Agent must notify the Distributor whenever a quantity discount or reduced sales charge is applicable to a purchase and must provide the Distributor with sufficient information at the time of purchase to verify that each purchase qualifies for the privilege or discount.

Service Agents may receive different levels of compensation for selling different Classes of shares. Management understands that some Service Agents may impose certain conditions on their clients which are different from those described in the Fund's Prospectus and this Statement of Additional Information, and, to the extent permitted by applicable regulatory authority, may charge their clients direct fees. Service Agents or other third parties may receive payments from the Manager in connection with their offering of Fund shares to their customers, or for marketing, distribution or other services. The receipt of such payments could create an incentive for the third party to offer the Fund instead of other mutual funds where such payments are not received. You should consult your Service Agent in this regard.

The minimum initial investment is \$1,000. Subsequent investments must be at least \$100. For full-time or part-time employees of the Manager or any of its affiliates or subsidiaries who elect to have a portion of their pay directly deposited into their Fund accounts, the minimum initial investment is \$50. Fund shares are offered without regard to the minimum initial investment requirements to Board members of a fund advised by the Manager, including members of the Fund's Board, who elect to have all or a portion of their compensation for serving in that capacity automatically invested in the Fund. The Fund reserves the right to vary further the initial and subsequent investment minimum requirements at any time.

Fund shares also are offered through Dreyfus-Automatic Asset Builder®, Dreyfus Government Direct Deposit Privilege or Dreyfus Payroll Savings Plan, described under "Shareholder Services." These services enable you to make regularly scheduled investments and may provide you with a convenient way to invest for long-term financial goals. You should be aware, however, that periodic investment plans do not guarantee a profit and will not protect you against loss in a declining market.

Fund shares are sold on a continuous basis. Net asset value per share of each Class is determined as of the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time), on each day the New York Stock Exchange is open for regular business. For purposes of determining net asset value, certain options and futures contracts may be valued 15 minutes after the close of trading on the floor of the New York Stock Exchange. Net asset value per share of each Class is computed by dividing the value of the Fund's net assets represented by such Class (i.e., the value of its assets less liabilities) by the total number of shares of such Class outstanding. For information regarding the methods employed in valuing the Fund's investments, see "Determination of Net Asset Value."

If an order is received in proper form by the Transfer Agent or other entity authorized to receive orders on behalf of the Fund by the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time) on a regular business day, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, Fund shares will be purchased at the public offering price determined as of the close of trading on the floor of the New York Stock Exchange

on the next regular business day, except where shares are purchased through a dealer as provided below.

Orders for the purchase of Fund shares received by dealers by the close of trading on the floor of the New York Stock Exchange on a regular business day and transmitted to the Distributor or its designee by the close of such business day (usually 5:15 p.m., Eastern time) will be based on the public offering price per share determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the orders will be based on the next determined public offering price. It is the dealer's responsibility to transmit orders so that they will be received by the Distributor or its designee before the close of its business day.

**Class A Shares.** The public offering price for Class A shares is the net asset value per share of that Class plus a sales load as shown below:

<b><u>Amount of Transaction</u></b>	<b>Total Sales Load</b>		<b>Dealers' reallocation as a % of offering price</b>
	<b>As a % of offering price per share</b>	<b>As a % of net asset value per share</b>	
Less than \$50,000	4.50	4.70	4.25
\$50,000 to less than \$100,000	4.00	4.20	3.75
\$100,000 to less than \$250,000	3.00	3.10	2.75
\$250,000 to less than \$500,000	2.50	2.60	2.25
\$500,000 to less than \$1,000,000	2.00	2.00	1.75
\$1,000,000 or more	-0-	-0-	-0-

A CDSC of 1% will be assessed at the time of redemption of Class A shares purchased without an initial sales charge as part of an investment of at least \$1,000,000 and redeemed within one year of purchase. The Distributor may pay Service Agents an amount up to 1% of the net asset value of Class A shares purchased by their clients that are subject to a CDSC.

The scale of sales loads applies to purchases of Class A shares made by any "purchaser," which term includes an individual and/or spouse purchasing securities for his, her or their own account or for the account of any minor children, or a trustee or other fiduciary purchasing securities for a single trust estate or a single fiduciary account (including a pension, profit-sharing or other employee benefit trust created pursuant to a plan qualified under Section 401 of the Code) although more than one beneficiary is involved; or a group of accounts established by or on behalf of the employees of an employer or affiliated employers pursuant to an employee benefit plan or other program (including accounts established pursuant to Sections 403(b), 408(k), and 457 of the Code); or an organized group which has been in existence for more than six months, provided that it is not organized for the purpose of buying redeemable securities of a registered investment company and provided that the purchases are made through a central administration or a single dealer, or by other means which result in economy of sales effort or expense.

Set forth below is an example of the method of computing the offering price of the Fund's Class A shares. The example assumes a purchase of Class A shares aggregating less than

\$50,000 subject to the schedule of sales charges set forth above at a price based upon the net asset value of the Fund's shares on May 31, 2004:

NET ASSET VALUE per Share	\$14.39
Per Share Sales Charge - 4.5% of offering price (4.7% of net asset value per share)	<u>\$ .68</u>
Per Share Offering Price to the Public	<u>\$15.07</u>

Full-time employees of NASD member firms and full-time employees of other financial institutions which have entered into an agreement with the Distributor pertaining to the sale of Fund shares (or which otherwise have a brokerage related or clearing arrangement with an NASD member firm or financial institution with respect to the sale of such shares) may purchase Class A shares for themselves directly or pursuant to an employee benefit plan or other program, or for their spouses or minor children, at net asset value, provided they have furnished the Distributor with such information as it may request from time to time in order to verify eligibility for this privilege. This privilege also applies to full-time employees of financial institutions affiliated with NASD member firms whose full-time employees are eligible to purchase Class A shares at net asset value. In addition, Class A shares are offered at net asset value to full-time or part-time employees of the Manager or any of its affiliates or subsidiaries, directors of the Manager, Board members of a fund advised by the Manager, including members of the Fund's Board, or the spouse or minor child of any of the foregoing.

Class A shares may be purchased at net asset value through certain broker-dealers and other financial institutions which have entered into an agreement with the Distributor, which includes a requirement that such shares be sold for the benefit of clients participating in a "wrap account" or a similar program under which such clients pay a fee to such broker-dealer or other financial institution.

Class A shares also may be purchased at net asset value, subject to appropriate documentation, by (i) qualified separate accounts maintained by an insurance company pursuant to the laws of any State or territory of the United States, (ii) a State, county or city or instrumentality thereof, (iii) a charitable organization (as defined in Section 501(c)(3) of the Code) investing \$50,000 or more in Fund shares, and (iv) a charitable remainder trust (as defined in Section 501(c)(3) of the Code).

Class B Shares. The public offering price for Class B shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of purchase. A CDSC is imposed, however, on certain redemptions of Class B shares as described in the Fund's Prospectus and in this Statement of Additional Information under "How to Redeem Shares--Contingent Deferred Sales Charge--Class B Shares."

Approximately six years after the date of purchase, Class B shares automatically will convert to Class A shares, based on the relative net asset values for shares of each such Class. Class B shares that have been acquired through the reinvestment of dividends and distributions will be converted on a pro rata basis together with other Class B shares, in the proportion that a

shareholder's Class B shares converting to Class A shares bears to the total Class B shares not acquired through the reinvestment of dividends and distributions.

Class B shares of the Fund acquired by shareholders in exchange for Class B shares originally issued by the Acquired Fund before December 1, 2003 are subject to different CDSC and conversion to Class A schedules. See "How to Redeem Shares—Contingent Deferred Sales Charge—Class B Shares."

Class C Shares. The public offering price for Class C shares is the net asset value per share of that Class. No initial sales charge is imposed at the time of purchase. A CDSC is imposed, however, on redemptions of Class C shares made within the first year of purchase. See "How to Redeem Shares – Contingent Deferred Sales Charge – Class C Shares."

Class Z Shares. The public offering price for Class Z shares is the net asset value per share of that Class.

Right of Accumulation — Class A Shares. Reduced sales loads apply to any purchase of Class A shares by you and any related "purchaser" as defined above, where the aggregate investment, including such purchase, is \$50,000 or more. If, for example, you previously purchased and still hold shares of the Fund or shares of certain other funds advised by the Manager or Founders Asset Management LLC ("Founders"), an indirect subsidiary of the Manager, that are subject to a front-end sales load or CDSC, or shares acquired by a previous exchange of such shares (hereinafter referred to as "Eligible Funds"), or combination thereof, with an aggregate current market value of \$40,000 and subsequently purchase Class A shares of the Fund having a current value of \$20,000, the sales load applicable to the subsequent purchase would be reduced to 4.0% of the offering price. All present holdings of Eligible Funds may be combined to determine the current offering price of the aggregate investment in ascertaining the sales load applicable to each subsequent purchase.

To qualify for reduced sales loads, at the time of purchase you or your Service Agent must notify the Distributor if orders are made by wire, or the Transfer Agent if orders are made by mail. The reduced sales load is subject to confirmation of your holdings through a check of appropriate records.

Using Federal Funds. The Transfer Agent or the Fund may attempt to notify you upon receipt of checks drawn on banks that are not members of the Federal Reserve System as to the possible delay in conversion into immediately available funds ("Federal Funds") and may attempt to arrange for a better means of transmitting the money. If you are a customer of a Selected Dealer and your order to purchase Fund shares is paid for other than in Federal Funds, the Selected Dealer, acting on your behalf, will complete the conversion into, or itself advance, Federal Funds generally on the business day following receipt of your order. The order is effective only when so converted and received by the Transfer Agent. An order for the purchase of Fund shares placed by you with sufficient Federal Funds or a cash balance in your brokerage account with a Selected Dealer will become effective on the day that the order, including Federal Funds, is received by the Transfer Agent.

Dreyfus TeleTransfer Privilege. You may purchase shares by telephone or online if you have checked the appropriate box and supplied the necessary information on the Account Application or have filed a Shareholder Services Form with the Transfer Agent. The proceeds

will be transferred between the bank account designated in one of these documents and your Fund account, which will subject the purchase order to a processing delay. Only a bank account maintained in a domestic financial institution which is an Automated Clearing House ("ACH") member may be so designated.

Dreyfus TeleTransfer purchase orders may be made at any time. If purchase orders are received by 4:00 p.m., Eastern time, on any day that the Transfer Agent and the New York Stock Exchange are open for regular business, Fund shares will be purchased at the public offering price determined on the that day. If purchase orders are made after 4:00 p.m., Eastern time, on any day the Transfer Agent and the New York Stock Exchange are open for regular business, or made on Saturday, Sunday or any Fund holiday (e.g., when the New York Stock Exchange is not open for business), Fund shares will be purchased at the public offering price determined on the next bank business day following such purchase order. To qualify to use the Dreyfus TeleTransfer Privilege, the initial payment for purchase of shares must be drawn on, and redemption proceeds paid to, the same bank and account as are designated on the Account Application or Shareholder Services Form on file. If the proceeds of a particular redemption are to be sent to an account at any other bank, the request must be in writing and signature-guaranteed. See "How to Redeem Shares--Dreyfus TeleTransfer Privilege."

Reopening an Account. You may reopen an account with a minimum investment of \$100 without filing a new Account Application during the calendar year the account is closed or during the following calendar year, provided the information on the old Account Application is still applicable.

## DISTRIBUTION PLAN AND SHAREHOLDER SERVICES PLANS

Class B and Class C shares are subject to a Distribution Plan, and Class A, Class B, Class C and Class Z shares are subject to a Shareholder Services Plan.

Distribution Plan. Rule 12b-1 (the "Rule"), adopted by the Securities and Exchange Commission under the 1940 Act, provides, among other things, that an investment company may bear expenses of distributing its shares only pursuant to a plan adopted in accordance with the Rule. The Fund's Board has adopted such a plan (the "Distribution Plan") with respect to the Fund's Class B and Class C shares, pursuant to which the Fund pays the Distributor for distributing each such Class of shares a fee at the annual rate of 0.50% of the value of the average daily net assets of Class B and 0.75% of the average daily net assets of Class C. The Distributor may pay one or more Service Agents in respect of advertising, marketing and other distribution services, and determines the amounts, if any, to be paid to Service Agents and the basis on which such payments are made. The Fund's Board believes that there is a reasonable likelihood that the Distribution Plan will benefit the Fund and holders of Class B and Class C shares.

A quarterly report of the amounts expended under the Distribution Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, the Distribution Plan provides that it may not be amended to increase materially the costs which holders of Class B or Class C shares may bear for distribution pursuant to the Distribution Plan without the approval of such shareholders and that other material amendments of the Distribution Plan must be approved by the Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund or the Manager and have no direct or indirect financial interest in the operation of the Distribution Plan, or in any agreements entered into in connection with the Distribution Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. The Distribution Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Distribution Plan. As to each of Class B and Class C, the Distribution Plan may be terminated at any time (i) by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Distribution Plan, or in any agreements entered into in connection with the Distribution Plan or (ii) by vote of the holders of a majority of such Class.

As Class B and Class C shares had not been offered for a fiscal year as of the date of this Statement of Additional Information, no information is provided as to the fees paid by such Classes pursuant to the Distribution Plan.

Shareholder Services Plans. The Fund has adopted separate Shareholder Services Plans, pursuant to which the Fund (i) pays the Distributor for the provision of certain services to the holders of Class A, Class B and Class C shares a fee at the annual rate of 0.25% of the value of the average daily net assets of each such Class, and (ii) reimburses the Distributor for certain allocated expenses of providing personal services and/or maintaining shareholder accounts with respect to Class Z shares an amount not to exceed an annual rate of 0.25% of the value of the average daily net assets of Class Z. The services provided may include personal services relating to shareholder accounts, such as answering shareholder inquiries regarding the Fund and providing reports and other information, and services related to the maintenance of such shareholder accounts. Under the Shareholder Services Plan, with respect to Class A, Class B and

Class C, the Distributor may make payments to certain Service Agents in respect of these services.

A quarterly report of the amounts expended under each Shareholder Services Plan, and the purposes for which such expenditures were incurred, must be made to the Board for its review. In addition, each Shareholder Services Plan provides that material amendments must be approved by the Fund's Board, and by the Board members who are not "interested persons" (as defined in the 1940 Act) of the Fund and have no direct or indirect financial interest in the operation of the Shareholder Services Plan, or in any agreements entered into in connection with the Shareholder Services Plan, by vote cast in person at a meeting called for the purpose of considering such amendments. Each Shareholder Services Plan is subject to annual approval by such vote of the Board members cast in person at a meeting called for the purpose of voting on the Shareholder Services Plan. Each Shareholder Services Plan is terminable at any time by vote of a majority of the Board members who are not "interested persons" and have no direct or indirect financial interest in the operation of the Shareholder Services Plan, or in any agreements entered into in connection with the Shareholder Services Plan.

For the fiscal year ended May 31, 2004, the Fund paid the Distributor \$405,777 under the Shareholder Services Plan with respect to Class Z shares. As Class A, Class B and Class C shares of the Fund had not been offered for a fiscal year as of the date of this Statement of Additional Information, no information is provided as to the fees paid by such Classes pursuant to the Shareholder Services Plan.

## HOW TO REDEEM SHARES

General. If you hold more than one Class of Fund shares, any request for redemption must specify the Class of shares being redeemed. If you fail to specify the Class of shares to be redeemed or if you own fewer shares of the Class than specified to be redeemed, the redemption request may be delayed until the Transfer Agent receives further instructions from you or your Service Agent.

The Fund ordinarily will make payment for all shares redeemed within seven days after receipt by the Transfer Agent of a redemption request in proper form, except as provided by the rules of the Securities and Exchange Commission. However, if you have purchased Fund shares by check, by Dreyfus TeleTransfer Privilege or through Dreyfus-Automatic Asset Builder<sup>®</sup> and subsequently submit a written redemption request to the Transfer Agent, the Fund may delay sending the redemption proceeds for up to eight business days after the purchase of such shares. In addition, the Fund will not honor redemption checks under the Checkwriting Privilege, and will reject requests to redeem shares by wire or telephone, online or pursuant to the Dreyfus TeleTransfer Privilege, for a period of up to eight business days after receipt by the Transfer Agent of the purchase check, the Dreyfus TeleTransfer purchase or the Dreyfus-Automatic Asset Builder order against which such redemption is requested. These procedures will not apply if your shares were purchased by wire payment, or if you otherwise have a sufficient collected balance in your account to cover the redemption request. Fund shares may not be redeemed until the Transfer Agent has received your Account Application.

Redemption Fee – Class Z Shares. The Fund will deduct a redemption fee equal to 0.10% of the net asset value of Class Z shares redeemed (including redemptions through the use

of the Fund Exchanges service) less than 30 days following the issuance of such Class Z shares. The redemption fee will be deducted from the redemption proceeds and retained by the Fund. For the fiscal year ended May 31, 2004, the Fund retained \$48,546 in redemption fees with respect to Class Z.

No redemption fee will be charged on the redemption or exchange of Class Z shares (1) through the Fund's Checkwriting Privilege, Automatic Withdrawal Plan, or Dreyfus Auto-Exchange Privilege, (2) through accounts that are reflected on the records of the Transfer Agent as omnibus accounts approved by the Distributor, (3) through accounts established by securities dealers, banks or other financial institutions approved by the Distributor that utilize the National Securities Clearing Corporation's networking system, or (4) acquired through the reinvestment of dividends or capital gains distributions. The redemption fee may be waived, modified or terminated at any time, or from time to time.

Contingent Deferred Sales Charge--Class B Shares. A CDSC payable to the Distributor is imposed on any redemption of Class B shares which reduces the current net asset value of your Class B shares to an amount which is lower than the dollar amount of all payments by you for the purchase of Class B shares of the Fund held by you at the time of redemption. No CDSC will be imposed to the extent that the net asset value of the Class B shares redeemed does not exceed (i) the current net asset value of the Class B shares acquired through reinvestment of dividends or capital gain distributions, plus (ii) increases in the net asset value of your Class B shares above the dollar amount of all your payments for the purchase of Class B shares held by you at the time of redemption.

If the aggregate value of Class B shares redeemed has declined below their original cost as a result of the Fund's performance, a CDSC may be applied to the then-current net asset value rather than the purchase price.

In circumstances where the CDSC is imposed, the amount of the charge will depend on the number of years from the time you purchased the Class B shares until the time of redemption of such shares. Solely for purposes of determining the number of years from the time of any payment for the purchase of Class B shares, all payments during a month will be aggregated and deemed to have been made on the first day of the month.

The following table sets forth the rates of the CDSC for Class B shares, except for certain Class B shares issued in exchange for shares originally issued by the Acquired Fund described below:

<u>Year Since Purchase Payment Was Made</u>	<u>CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less)</u>
First.....	4.00
Second .....	4.00
Third .....	3.00
Fourth .....	3.00
Fifth .....	2.00
Sixth.....	1.00

The following table sets forth the rates of the CDSC payable to the Acquired Fund's former distributor and the conversion to Class A schedule for Class B shares of the Fund issued in exchange for Class B shares originally issued by the Acquired Fund before December 1, 2003:

<u>Year Since Purchase Payment Was Made</u>	<u>CDSC as a % of Amount Invested or Redemption Proceeds (whichever is less)</u>
First .....	5.00
Second .....	4.00
Third .....	3.00
Fourth .....	3.00
Fifth .....	2.00
Sixth .....	1.00
Seventh.....	0.00
Eighth.....	0.00*

---

\* These Class B shares will automatically convert into Class A shares at the end of the calendar quarter that is eight years after the initial purchase of the Class B shares of the Acquired Fund (applies to such Class B shares originally issued by the Acquired Fund before December 1, 2003).

In determining whether a CDSC is applicable to a redemption, the calculation will be made in a manner that results in the lowest possible rate. It will be assumed that the redemption is made first of amounts representing shares acquired pursuant to the reinvestment of dividends and distributions; then of amounts representing the increase in net asset value of Class B shares above the total amount of payments for the purchase of Class B shares made during the preceding six years (eight years for certain shares issued in exchange for shares originally issued by the Acquired Fund); and finally, of amounts representing the cost of shares held for the longest period.

For example, assume an investor purchased 100 shares at \$10 per share for a cost of \$1,000. Subsequently, the shareholder acquired five additional shares through dividend reinvestment. During the second year after the purchase the investor decided to redeem \$500 of the investment. Assuming at the time of the redemption the net asset value had appreciated to \$12 per share, the value of the investor's shares would be \$1,260 (105 shares at \$12 per share). The CDSC would not be applied to the value of the reinvested dividend shares and the amount which represents appreciation (\$260). Therefore, \$240 of the \$500 redemption proceeds (\$500 minus \$260) would be charged at a rate of 4% (the applicable rate in the second year after purchase) for a total CDSC of \$9.60.

Contingent Deferred Sales Charge--Class C Shares. A CDSC of 1% payable to the Distributor is imposed on any redemption of Class C shares within one year of the date of purchase. The basis for calculating the payment of any such CDSC will be the method used in calculating the CDSC for Class B shares. See "Contingent Deferred Sales Charge--Class B Shares" above.

Waiver of CDSC. The CDSC will be waived in connection with (a) redemptions made within one year after the death or disability, as defined in Section 72(m)(7) of the Code, of the shareholder, (b) redemptions by employees participating in qualified or non-qualified employee benefit plans or other programs, (c) redemptions as a result of a combination of any investment company with the Fund by merger, acquisition of assets or otherwise, (d) a distribution following retirement under a tax-deferred retirement plan or upon attaining age 70½ in the case of an IRA or Keogh plan or custodial account pursuant to Section 403(b) of the Code, and (e) redemptions pursuant to the Automatic Withdrawal Plan, as described below. If the Fund's Board determines to discontinue the waiver of the CDSC, the disclosure herein will be revised appropriately. Any Fund shares subject to a CDSC which were purchased prior to the termination of such waiver will have the CDSC waived as provided in the Fund's Prospectus or this Statement of Additional Information at the time of the purchase of such shares.

To qualify for a waiver of the CDSC, at the time of redemption you must notify the Transfer Agent or your Service Agent must notify the Distributor. Any such qualification is subject to confirmation of your entitlement.

Checkwriting Privilege--Class A and Class Z Only. The Fund provides redemption checks ("Checks") to investors in Class A and Class Z shares automatically upon opening an account, unless you specifically refuse the Checkwriting Privilege by checking the applicable "No" box on the Account Application. Checks will be sent only to the registered owner(s) of the account and only to the address of record. The Checkwriting Privilege may be established for an existing account by a separate signed Shareholder Services Form. The Account Application or Shareholder Services Form must be manually signed by the registered owner(s). Checks are drawn on your Fund account and may be made payable to the order of any person in an amount of \$500 or more. When a Check is presented to the Transfer Agent for payment, the Transfer Agent, as your agent, will cause the Fund to redeem a sufficient number of full and fractional Class A or Class Z shares in your account to cover the amount of the Check. Dividends are earned until the Check clears. After clearance, a copy of the Check will be returned to you. You generally will be subject to the same rules and regulations that apply to checking accounts, although election of this Privilege creates only a shareholder-transfer agent relationship with the Transfer Agent.

You should date your Checks with the current date when you write them. Please do not postdate your Checks. If you do, the Transfer Agent will honor, upon presentment, even if presented before the date of the Check, all postdated Checks which are dated within six months of presentment for payment, if they are otherwise in good order.

Checks are free, but the Transfer Agent will impose a fee for stopping payment of a Check upon your request or if the Transfer Agent cannot honor a Check due to insufficient funds or other valid reason. If the amount of the Check is greater than the value of the Class A or Class Z shares in your account, the Check will be returned marked insufficient funds. Checks should not be used to close an account.

This Privilege will be terminated immediately, without notice, with respect to any account which is, or becomes, subject to backup withholding on redemptions. Any Check written on an account which has become subject to backup withholding on redemptions will not be honored by the Transfer Agent.

Redemption Through a Selected Dealer. If you are a customer of a Selected Dealer, you may make redemption requests to your Selected Dealer. If the Selected Dealer transmits the redemption request so that it is received by the Transfer Agent prior to the close of trading on the floor of the New York Stock Exchange (usually 4:00 p.m., Eastern time), the redemption request will be effective on that day. If a redemption request is received by the Transfer Agent after the close of trading on the floor of the New York Stock Exchange, the redemption request will be effective on the next business day. It is the responsibility of the Selected Dealer to transmit a request so that it is received in a timely manner. The proceeds of the redemption are credited to your account with the Selected Dealer. See "How to Buy Shares" for a discussion of additional conditions or fees that may be imposed upon redemption.

In addition, the Distributor or its designee will accept orders from Selected Dealers with which the Distributor has sales agreements for the repurchase of shares held by shareholders. Repurchase orders received by dealers by the close of trading on the floor of the New York Stock Exchange on any business day and transmitted to the Distributor or its designee prior to the close of its business day (usually 5:15 p.m., Eastern time) are effected at the price determined as of the close of trading on the floor of the New York Stock Exchange on that day. Otherwise, the shares will be redeemed at the next determined net asset value. It is the responsibility of the Selected Dealer to transmit orders on a timely basis. The Selected Dealer may charge the shareholder a fee for executing the order. This repurchase arrangement is discretionary and may be withdrawn at any time.

Reinvestment Privilege. Upon written request, you may reinvest up to the number of Class A or Class B shares you have redeemed, within 45 days of redemption, at the then-prevailing net asset value without a sales load, or reinstate your account for the purpose of exercising Fund Exchanges. Upon reinstatement, with respect to Class B shares, or Class A shares if such shares were subject to a CDSC, your account will be credited with an amount equal to CDSC previously paid upon redemption of the Class A or Class B shares reinvested. The Reinvestment Privilege may be exercised only once.

Wire Redemption Privilege. By using this Privilege, you authorize the Transfer Agent to act on telephone, letter or online redemption instructions from any person representing himself or herself to be you and reasonably believed by the Transfer Agent to be genuine. Ordinarily,

the Fund will initiate payment for shares redeemed pursuant to this Privilege on the next business day after receipt by the Transfer Agent of a redemption request in proper form. Redemption proceeds (\$1,000 minimum) will be transferred by Federal Reserve wire only to the commercial bank account specified by you on the Account Application or Shareholder Services Form, or to a correspondent bank if your bank is not a member of the Federal Reserve System. Fees ordinarily are imposed by such bank and borne by the investor. Immediate notification by the correspondent bank to your bank is necessary to avoid a delay in crediting the funds to your bank account.

To change the commercial bank or account designated to receive redemption proceeds, a written request must be sent to the Transfer Agent. This request must be signed by each shareholder, with each signature guaranteed as described below under "Stock Certificates; Signatures."

Dreyfus TeleTransfer Privilege. You may request by telephone or online that redemption proceeds be transferred between your Fund account and your bank account. Only a bank account maintained in a domestic financial institution which is an ACH member may be designated. Redemption proceeds will be on deposit in your account at an ACH member bank ordinarily two business days after receipt of the redemption request. You should be aware that if you have selected the Dreyfus TeleTransfer Privilege, any request for a Dreyfus TeleTransfer transaction will be effected through the ACH system unless more prompt transmittal specifically is requested. See "How to Buy Shares--Dreyfus TeleTransfer Privilege."

Stock Certificates; Signatures. Any certificates representing Fund shares to be redeemed must be submitted with the redemption request. Written redemption requests must be signed by each shareholder, including each holder of a joint account, and each signature must be guaranteed. Signatures on endorsed certificates submitted for redemption also must be guaranteed. The Transfer Agent has adopted standards and procedures pursuant to which signature-guarantees in proper form generally will be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program, the Securities Transfer Agents Medallion Program ("STAMP") and the Stock Exchanges Medallion Program. Guarantees must be signed by an authorized signatory of the guarantor and "Signature-Guaranteed" must appear with the signature. The Transfer Agent may request additional documentation from corporations, executors, administrators, trustees or guardians and may accept other suitable verification arrangements from foreign investors, such as consular verification.

Redemption Commitment. The Fund has committed itself to pay in cash all redemption requests by any shareholder of record, limited in amount during any 90-day period to the lesser of \$250,000 or 1% of the value of the Fund's net assets at the beginning of such period. Such commitment is irrevocable without the prior approval of the Securities and Exchange Commission. In the case of requests for redemption in excess of such amount, the Fund's Board reserves the right to make payments in whole or in part in securities or other assets of the Fund in case of an emergency or any time a cash distribution would impair the liquidity of the Fund to the detriment of the existing shareholders. In such event, the securities would be valued in the same manner as the Fund's portfolio is valued. If the recipient sells such securities, brokerage charges might be incurred.

Suspension of Redemptions. The right of redemption may be suspended or the date of payment postponed (a) during any period when the New York Stock Exchange is closed (other than customary weekend and holiday closings), (b) when trading in the markets the Fund ordinarily utilizes is restricted, or when an emergency exists as determined by the Securities and Exchange Commission so that disposal of the Fund's investments or determination of its net asset value is not reasonably practicable, or (c) for such other periods as the Securities and Exchange Commission by order may permit to protect the Fund's shareholders.

## SHAREHOLDER SERVICES

Fund Exchanges. Clients of certain Service Agents may purchase, in exchange for shares of the Fund, shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of certain other funds in the Dreyfus Family of Funds, to the extent such shares are offered for sale in your state of residence. With respect to Class Z shares, the Fund will deduct a redemption fee equal to 0.10% of the net asset value of Class Z shares exchanged out of the Fund where the exchange is made less than 30 days after the issuance of such Class Z shares. Shares of such funds purchased by exchange will be purchased on the basis of relative net asset value per share as follows:

- A. Exchanges for shares of funds offered without a sales load will be made without a sales load.
- B. Shares of funds purchased without a sales load may be exchanged for shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Shares of funds purchased with a sales load may be exchanged without a sales load for shares of other funds sold without a sales load.
- D. Shares of funds purchased with a sales load, shares of funds acquired by a previous exchange from shares purchased with a sales load and additional shares acquired through reinvestment of dividends or distributions of any such funds (collectively referred to herein as "Purchased Shares") may be exchanged for shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load that could have been imposed in connection with the Purchased Shares (at the time the Purchased Shares were acquired), without giving effect to any reduced loads, the difference may be deducted.
- E. Shares of funds subject to a CDSC that are exchanged for shares of another fund will be subject to the higher applicable CDSC of the two funds, and, for purposes of calculating CDSC rates and conversion periods, if any, will be deemed to have been held since the date the shares being exchanged were initially purchased.

To accomplish an exchange under item D above, your Service Agent must notify the Transfer Agent of your prior ownership of such Class A shares and your account number.

You also may exchange your Fund shares that are subject to a CDSC for shares of Dreyfus Worldwide Dollar Money Market Fund, Inc. The shares so purchased will be held in a

special account created solely for this purpose ("Exchange Account"). Exchanges of shares for an Exchange Account only can be made into certain other funds managed or administered by the Manager. No CDSC is charged when an investor exchanges into an Exchange Account; however, the applicable CDSC will be imposed when shares are redeemed from an Exchange Account or other applicable Fund account. Upon redemption, the applicable CDSC will be calculated, except for Fund shares issued in exchange for shares originally issued by the Acquired Fund, without regard to the time such shares were held in an Exchange Account; for Fund shares issued in exchange for shares originally issued by the Acquired Fund, the applicable CDSC will be calculated taking into account the time such shares were held in the Exchange Account. See "How to Redeem Shares." Redemption proceeds for Exchange Account shares are paid by Federal wire or check only. Exchange Account shares also are eligible for the Dreyfus Auto-Exchange Privilege, Dreyfus Dividend Sweep and the Automatic Withdrawal Plan.

To request an exchange, you or your Service Agent acting on your behalf must give exchange instructions to the Transfer Agent in writing, by telephone or online. The ability to issue exchange instructions by telephone or online is given to all shareholders automatically, unless you check the applicable "No" box on the Account Application, indicating that you specifically refuse this privilege. By using this privilege, you authorize the Transfer Agent to act on telephonic and online instructions (including over the Dreyfus Express<sup>®</sup> voice response telephone system) from any person representing himself or herself to be you or a representative of your Service Agent, and reasonably believed by the Transfer Agent to be genuine. Exchanges may be subject to limitations as to the amount involved or the number of exchanges permitted. Shares issued in certificate form are not eligible for telephone or online exchange. No fees currently are charged shareholders directly in connection with exchanges, although the Fund reserves the right, upon not less than 60 days' written notice, to charge shareholders a nominal administrative fee in accordance with rules promulgated by the Securities and Exchange Commission.

During times of drastic economic or market conditions, the Fund may suspend Fund Exchanges temporarily without notice and treat exchange requests based on their separate components -- redemption orders with a simultaneous request to purchase the other fund's shares. In such a case, the redemption request would be processed at the Fund's next determined net asset value but the purchase order would be effective only at the net asset value next determined after the fund being purchased receives the proceeds of the redemption, which may result in the purchase being delayed.

Dreyfus Auto-Exchange Privilege. Dreyfus Auto-Exchange Privilege permits you to purchase (on a semi-monthly, monthly, quarterly or annual basis), in exchange for shares of the Fund, shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders or shares of certain other funds in the Dreyfus Family of Funds of which you are a shareholder. This Privilege is available only for existing accounts. Shares will be exchanged on the basis of relative net asset value as described above under "Fund Exchanges." Enrollment in or modification or cancellation of this Privilege is effective three business days following notification by you. You will be notified if your account falls below the amount designated to be exchanged under this Privilege. In this case, your account will fall to zero unless additional investments are made in excess of the designated amount prior to the next Auto-Exchange transaction.

Shareholder Services Forms and prospectuses of the other funds may be obtained by calling 1-800-554-4611 (holders of Class Z shares should call 1-800-645-6561), or visiting the Dreyfus.com Web site. Fund Exchanges and the Dreyfus Auto-Exchange Privilege are available to shareholders resident in any state in which shares of the fund being acquired may legally be sold. The Fund reserves the right to reject any exchange request in whole or in part. Shares may be exchanged only between accounts having certain identical identifying designations. The Fund Exchanges service or the Dreyfus Auto-Exchange Privilege may be modified or terminated at any time upon notice to shareholders.

Dreyfus-Automatic Asset Builder®. Dreyfus-Automatic Asset Builder permits you to purchase Fund shares (minimum of \$100 and maximum of \$150,000 per transaction) at regular intervals selected by you. Fund shares are purchased by transferring funds from the bank account designated by you.

Dreyfus Government Direct Deposit Privilege. Dreyfus Government Direct Deposit Privilege enables you to purchase Fund shares (minimum of \$100 and maximum of \$50,000 per transaction) by having Federal salary, Social Security, or certain veterans', military or other payments from the U.S. Government automatically deposited into your Fund account.

Dreyfus Payroll Savings Plan—Class Z Only. Dreyfus Payroll Savings Plan permits you to purchase Fund shares (minimum \$100 per transaction) automatically on a regular basis. Depending upon your employer's direct deposit program, you may have part or all of your paycheck transferred to your existing Dreyfus account electronically through the Automated Clearing House system at each pay period.

Dreyfus Dividend Options. Dreyfus Dividend Sweep allows you to invest automatically your dividends or dividends and capital gain distributions, if any, from the Fund in shares of the same Class of another fund in the Dreyfus Premier Family of Funds, shares of the same Class of certain funds advised by Founders, or shares of certain other funds in the Dreyfus Family of Funds of which you are a shareholder. Shares of other funds purchased pursuant to this privilege will be purchased on the basis of relative net asset value per share as follows:

- A. Dividends and distributions paid by a fund may be invested without a sales load in shares of other funds offered without a sales load.
- B. Dividends and distributions paid by a fund that does not charge a sales load may be invested in shares of other funds sold with a sales load, and the applicable sales load will be deducted.
- C. Dividends and distributions paid by a fund that charges a sales load may be invested in shares of other funds sold with a sales load (referred to herein as "Offered Shares"), but if the sales load applicable to the Offered Shares exceeds the maximum sales load charged by the fund from which dividends or distributions are being swept (without giving effect to any reduced loads), the difference may be deducted.
- D. Dividends and distributions paid by a fund may be invested in shares of other funds that impose a CDSC and the applicable CDSC, if any, will be imposed upon redemption of such shares.

Dreyfus Dividend ACH permits you to transfer electronically dividends or dividends and capital gain distributions, if any, from the Fund to a designated bank account. Only an account maintained at a domestic financial institution which is an ACH member may be so designated. Banks may charge a fee for this service.

Automatic Withdrawal Plan. The Automatic Withdrawal Plan permits you to request withdrawal of a specified dollar amount (minimum of \$50) on either a monthly or quarterly basis if you have a \$5,000 minimum account. Withdrawal payments are the proceeds from sales of Fund shares, not the yield on the shares. If withdrawal payments exceed reinvested dividends and distributions, your shares will be reduced and eventually may be depleted. The Automatic Withdrawal may be terminated at any time by you, the Fund or the Transfer Agent. Shares for which certificates have been issued may not be redeemed through the Automatic Withdrawal Plan.

No CDSC with respect to Class B or Class C shares will be imposed on withdrawals made under the Automatic Withdrawal Plan, provided that any amount withdrawn under the plan does not exceed on an annual basis 12% of the greater of (1) the account value at the time of the first withdrawal under the Automatic Withdrawal Plan, or (2) the account value at the time of the subsequent withdrawal. Withdrawals with respect to Class B and Class C shares under the Automatic Withdrawal Plan that exceed such amounts will be subject to a CDSC. Withdrawals of Class A shares subject to a CDSC under the Automatic Withdrawal Plan will be subject to any applicable CDSC. Purchases of additional Class A shares where the sales load is imposed concurrently with withdrawals of Class A shares generally are undesirable.

Letter of Intent--Class A Shares. By signing a Letter of Intent form, you become eligible for the reduced sales load on purchases of Class A shares based on the total number of shares of Eligible Funds purchased by you and any related "purchaser" (as defined above) in a 13-month period pursuant to the terms and conditions set forth in the Letter of Intent. Shares of any Eligible Fund purchased within 90 days prior to the submission of the Letter of Intent may be used to equal or exceed the amount specified in the Letter of Intent. A minimum initial purchase of \$5,000 is required. You can obtain a Letter of Intent form by calling 1-800-554-4611.

Each purchase you make during the 13-month period (which begins on the date you submit the Letter of Intent) will be at the public offering price applicable to a single transaction of the aggregate dollar amount you select in the Letter of Intent. The Transfer Agent will hold in escrow 5% of the amount indicated in the Letter of Intent, which may be used for payment of a higher sales load if you do not purchase the full amount indicated in the Letter of Intent. When you fulfill the terms of the Letter of Intent by purchasing the specified amount, the escrowed amount will be released and additional shares representing such amount credited to your account. If your purchases meet the total minimum investment amount specified in the Letter of Intent within the 13-month period, an adjustment will be made at the conclusion of the 13-month period to reflect any reduced sales load applicable to shares purchased during the 90-day period prior to submission of the Letter of Intent. If your purchases qualify for a further sales load reduction, the sales load will be adjusted to reflect your total purchase at the end of 13 months. If total purchases are less than the amount specified the offering price of the shares you purchased (including shares representing the escrowed amount) during the 13-month period will be adjusted to reflect the sales load applicable to the aggregate purchases you actually made (which will reduce the number of shares in your account), unless you have redeemed the shares

in your account, in which case the Transfer Agent, as attorney-in-fact pursuant to the terms of the Letter of Intent, will redeem an appropriate number of Class A shares of the Fund held in escrow to realize the difference between the sales load actually paid and the sales load applicable to the aggregate purchases actually made and any remaining shares will be credited to your account. Signing a Letter of Intent does not bind you to purchase, or the Fund to sell, the full amount indicated at the sales load in effect at the time of signing, but you must complete the intended purchase to obtain the reduced sales load. At the time you purchase Class A shares, you must indicate your intention to do so under a Letter of Intent. Purchases pursuant to a Letter of Intent will be made at the then-current net asset value plus the applicable sales load in effect at the time such Letter of Intent was submitted.

## DETERMINATION OF NET ASSET VALUE

Valuation of Portfolio Securities. The Fund's investments are valued each business day by an independent pricing service (the "Service") approved by the Fund's Board. When, in the judgment of the Service, quoted bid prices for investments are readily available and are representative of the bid side of the market, these investments are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). The value of other investments is determined by the Service based on methods which include consideration of: yields or prices of municipal bonds of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. The Service may employ electronic data processing techniques and/or a matrix system to determine valuations. The Service's procedures are reviewed by the Fund's officers under the general supervision of the Fund's Board. These procedures need not be used to determine the value of securities held by the Fund if, in the opinion of a committee appointed by the Fund's Board, some other method would more accurately reflect the fair value of such securities. Expenses and fees, including the management fee (reduced by the expense limitation, if any) and fees pursuant to the Shareholder Services Plan and pursuant to the Distribution Plan, with respect to Class B and Class C shares only, are accrued daily and are taken into account for the purpose of determining the net asset value of the relevant Class of shares. Because of the difference in operating expenses incurred by each Class, the per share net asset value of each Class will differ.

New York Stock Exchange Closings. The holidays (as observed) on which the New York Stock Exchange is closed currently are: New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas.

## DIVIDENDS, DISTRIBUTIONS AND TAXES

Management believes that the Fund has qualified for treatment as a "regulated investment company" under the Code for the fiscal year ended May 31, 2004. The Fund intends to continue to so qualify if such qualification is in the best interests of its shareholders. As a regulated investment company, the Fund will pay no Federal income tax on net investment income and net realized capital gains to the extent that such income and gains are distributed to shareholders in accordance with applicable provisions of the Code. To qualify as a regulated investment

company, the Fund must pay-out to its shareholders at least 90% of its net income (consisting of net investment income from tax exempt obligations and taxable obligations, if any, and net short-term capital gains), and must meet certain asset diversification and other requirements. If the Fund does not qualify as a regulated investment company, it will be treated for tax purposes as an ordinary corporation subject to Federal income tax. The term "regulated investment company" does not imply the supervision of management or investment practices or policies by any government agency.

The Fund ordinarily declares dividends from its net investment income on each day the New York Stock Exchange is open for business. Fund shares begin earning dividends on the day following the date of purchase. The Fund's earnings for Saturdays, Sundays and holidays are declared as dividends on the preceding business day. Dividends usually are paid on the last calendar day of each month and are automatically reinvested in additional shares of the same Class at net asset value or, at your option, paid in cash. If you redeem all shares in your account at any time during the month, all dividends to which you are entitled will be paid to you along with the proceeds of the redemption. If you are an omnibus accountholder and indicate in a partial redemption request that a portion of any accrued dividends to which such account is entitled belongs to an underlying accountholder who has redeemed all shares in his or her account, such portion of the accrued dividends will be paid to you along with the proceeds of the redemption. Distributions from net realized securities gains, if any, generally are declared and paid once a year, but the Fund may make distributions on a more frequent basis to comply with the distribution requirements of the Code, in all events in a manner consistent with the provisions of the 1940 Act.

If you elect to receive dividends and distributions in cash and your dividend or distribution check is returned to the Fund as undeliverable or remains uncashed for six months, the Fund reserves the right to reinvest such dividends or distributions and all future dividends and distributions payable to you in additional Fund shares at net asset value. No interest will accrue on amounts represented by uncashed distribution or redemption checks.

If, at the close of each quarter of its taxable year, at least 50% of the value of the Fund's total assets consists of Federal tax exempt obligations, the Fund may designate and pay Federal exempt-interest dividends from interest earned on all such tax exempt obligations. Such exempt-interest dividends may be excluded by shareholders of the Fund from their gross income for Federal income tax purposes. Dividends derived from Taxable Investments, together with distributions from any net realized short-term securities gains, generally are taxable as ordinary income for Federal income tax purposes whether or not reinvested. Distributions from net realized long-term securities gains generally are taxable as long-term capital gains to a shareholder who is a citizen or resident of the United States, whether or not reinvested and regardless of the length of time the shareholder has held his or her shares.

If, at the close of each quarter of its taxable year, at least 50% of the value of the Fund's total assets consists of obligations which, when held by an individual, the interest therefrom is exempt from California personal income tax, and if the Fund qualifies as a management company under the California Revenue and Taxation Code, the Fund will be qualified to pay dividends to its shareholders that are exempt from California personal income tax (but not from California franchise tax). However, the total amount of California exempt-interest dividends paid by the Fund to a non-corporate shareholder with respect to any taxable year cannot exceed such shareholder's pro rata share of interest received by the Fund during such year that is exempt

from California taxation less any expenses and expenditures deemed to have been paid from such interest. In addition, California tax law does not consider any portion of the exempt-interest dividends paid an item of tax preference for the purposes of computing the California alternative minimum tax.

Any dividend or distribution paid shortly after an investor's purchase may have the effect of reducing the aggregate net asset value of the shares below the cost of investment. Such a dividend or distribution would be a return of investment in an economic sense, as described herein. In addition, if a shareholder has not held the shares of a Fund for more than six months and has received a capital gain distribution with respect to such shares, any loss incurred on the sale of such shares will be treated as long-term capital loss to the extent of the capital gain distribution received.

Ordinarily, gains and losses realized from portfolio transactions will be treated as capital gain or loss. However, all or a portion of the gain realized from the disposition of certain market discount bonds will be treated as ordinary income. In addition, all or a portion of the gain realized from engaging in "conversion transactions" (generally including certain transactions designed to convert ordinary income into capital gain) may be treated as ordinary income.

Gain or loss, if any, realized by the Fund from certain financial futures and options transactions ("Section 1256 contracts") will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss will arise upon exercise or lapse of Section 1256 contracts as well as from closing transactions. In addition, any Section 1256 contracts remaining unexercised at the end of the Fund's taxable year will be treated as sold for their then fair market value, resulting in additional gain or loss to the Fund characterized as described above.

Offsetting positions held by the Fund involving certain futures or forward contracts or options transactions with respect to actively traded personal property may constitute "straddles." To the extent the straddle rules apply to positions established by the Fund, losses realized by the Fund may be deferred to the extent of unrealized gain in the offsetting position. In addition, short-term capital loss on straddle positions may be recharacterized as long-term capital loss, and long-term capital gains on straddle positions may be treated as short-term capital gains or ordinary income. Certain of the straddle positions held by a Fund may constitute "mixed straddles." The Fund may make one or more elections with respect to the treatment of "mixed straddles," resulting in different tax consequences. In certain circumstances, the provisions governing the tax treatment of straddles override or modify certain of the provisions discussed above.

If the Fund either (1) holds an appreciated financial position with respect to stock, certain debt obligations, or partnership interests ("appreciated financial positions") and then enters into a short sale, futures, forward, or offsetting notional principal contract (collectively, a "Contract") with respect to the same or substantially identical property or (2) holds an appreciated financial position that is a Contract and then acquires property that is the same as, or substantially identical to, the underlying property, the Fund generally will be taxed as if the appreciated financial position were sold at its fair market value on the date the Fund enters into the financial position or acquires the property, respectively.

Investment by the Fund in securities issued or acquired at a discount, or providing for deferred interest or for payment of interest in the form of additional obligations, such as zero coupon, pay-in-kind or step-up securities could, under special tax rules, affect the amount, timing and character of distributions to shareholders by causing the Fund to recognize income prior to the receipt of cash payment. For example, the Fund could be required to take into account annually a portion of the discount (or deemed discount) at which such securities were issued and to distribute such portion in order to maintain its qualification as a regulated investment company. In that case, the Fund may have to dispose of securities which it might otherwise have continued to hold in order to generate cash to satisfy these distribution requirements.

Federal regulations require that you provide a certified taxpayer identification number ("TIN") upon opening or reopening an account. See the Account Application for further information concerning this requirement. Failure to furnish a certified TIN to the Fund could subject you to a \$50 penalty imposed by the Internal Revenue Service.

## PORTFOLIO TRANSACTIONS

Portfolio securities ordinarily are purchased from and sold to parties acting as principal or agent. Newly-issued securities ordinarily are purchased directly from the issuer or from an underwriter; other purchases and sales usually are placed with those dealers from which it appears that the best price or execution will be obtained. Usually no brokerage commissions, as such, are paid by the Fund for such purchases and sales, although the price paid usually includes an undisclosed compensation to the dealer acting as agent. The prices paid to underwriters of newly-issued securities usually include a concession paid by the issuer to the underwriter, and purchases of after-market securities from dealers ordinarily are executed at a price between the bid and asked price. No brokerage commissions have been paid by the Fund to date.

Transactions are allocated to various dealers by the Fund's portfolio managers in their best judgment. The primary consideration is prompt and effective execution of orders at the most favorable price. Subject to that primary consideration, dealers may be selected for research, statistical or other services to enable the Manager to supplement its own research and analysis with the views and information of other securities firms.

Research services furnished by brokers through which the Fund effects securities transactions may be used by the Manager in advising other funds it advises and, conversely, research services furnished to the Manager by brokers in connection with other funds the Manager advises may be used by the Manager in advising the Fund. Although it is not possible to place a dollar value on these services, it is the Manager's opinion that the receipt and study of such services should not reduce the overall expenses of its research department.

## INFORMATION ABOUT THE FUND

Each Fund share has one vote and, when issued and paid for in accordance with the terms of the offering, is fully paid and nonassessable. Shares have no preemptive or subscription rights and are freely transferable.

In October 2004, the Fund changed its name from "Dreyfus California Tax Exempt Bond Fund, Inc." to its current name, renamed its existing shares "Class Z shares," and commenced offering Class A, Class B and Class C shares.

Unless otherwise required by the 1940 Act, ordinarily it will not be necessary for the Fund to hold annual meetings of shareholders. As a result, Fund shareholders may not consider each year the election of Board members or the appointment of auditors. However, the holders of at least 10% of the shares outstanding and entitled to vote may require the Fund to hold a special meeting of shareholders for purposes of removing a Board member from office. Fund shareholders may remove a Board member by the affirmative vote of a majority of the Fund's outstanding voting shares. In addition, the Board will call a meeting of shareholders for the purpose of electing Board members if, at any time, less than a majority of the Board members then holding office have been elected by shareholders.

The Fund is intended to be a long-term investment vehicle and is not designed to provide investors with a means of speculating on short-term market movements. A pattern of frequent purchases and exchanges can be disruptive to efficient portfolio management and, consequently, can be detrimental to the Fund's performance and its shareholders. If Fund management determines that an investor is following an abusive investment strategy, it may reject any purchase request, or terminate the investor's exchange privilege, with or without prior notice. Such investors also may be barred from purchasing other funds in the Dreyfus Family of Funds. Accounts under common ownership or control will be considered as one account for purposes of determining a pattern of excessive trading. In addition, the Fund may refuse or restrict purchase or exchange requests for Fund shares by any person or group if, in the judgment of the Fund's management, the Fund would be unable to invest the money effectively in accordance with its investment objective and policies or could otherwise be adversely affected or if the Fund receives or anticipates receiving simultaneous orders that may significantly affect the Fund. If an exchange request is refused, the Fund will take no other action with respect to the Fund shares until it receives further instructions from the investor. While the Fund will take reasonable steps to prevent excessive short-term trading deemed to be harmful to the Fund, it may not be able to identify excessive trading conducted through certain financial intermediaries or omnibus accounts.

The Fund sends annual and semi-annual financial statements to all its shareholders.

#### COUNSEL AND INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stroock & Stroock & Lavan LLP, 180 Maiden Lane, New York, New York 10038-4982, as counsel for the Fund, has rendered its opinion as to certain legal matters regarding the due authorization and valid issuance of the shares being sold pursuant to the Fund's Prospectus.

Ernst & Young LLP, 5 Times Square, New York, New York 10036, an independent registered public accounting firm, serves as independent auditors of the Fund.

## APPENDIX A

### RISK FACTORS—INVESTING IN CALIFORNIA MUNICIPAL BONDS

The following information is a summary of special factors affecting investments in California Municipal Obligations. It does not purport to be a complete description and is based on information drawn from official statements relating to securities offerings of the State of California (the "State") available as of the date of this Statement of Additional Information. While the Fund has not independently verified this information, it has no reason to believe that such information is not correct in all material respects.

#### General Information

Economy. California's economy, the nation's largest and one of the largest in the world, has major sectors in high technology, trade, entertainment, agriculture, manufacturing, tourism, construction and services. In early 2001, California's economy slipped into a recession, concentrated in the State's high-tech sector. The economy has since stabilized, with 136,300 jobs gained between July 2003 and June 2004 compared with 341,200 jobs lost between March 2001 and July 2003. The State unemployment rate was 6.2% in April 2004, down from 6.8% a year earlier. The national unemployment rate in April 2004 was 5.6%, down from 6.0% a year earlier.

Both the California economy and the national economy have improved since the second quarter of 2003. Output of the national economy, adjusted for inflation, has grown more strongly, and job growth has turned around recently. From April 2003 to April 2004, nonfarm payroll employment rose by 0.6% in the State and 0.9% in the nation. Personal income growth accelerated in 2003, particularly in the fourth quarter. Total personal income increased by 3.7% in 2003, compared to 3.3% nationally. In addition, personal state income tax withholdings were up 8.8% in 2004.

Population and Labor Force. The State's July 1, 2003 population of over 35 million represented over 12% of the total United States population. California's population is concentrated in metropolitan areas. As of the 2000 census, 97% resided in the 25 major metropolitan statistical areas in the State. As of July 1, 2002, the 5-county Los Angeles area accounted for 49% of the State's population, with over 17.0 million residents, and the 10-county San Francisco Bay Area represented 20%, with a population of over 7.0 million.

The following table shows California's population data for 1994 through 2003.

Population 1994-03\*

Year	California Population	% Increase Over Preceding Year	United States Population	% Increase Over Preceding Year	California as % of United States *
1994	31,523,080	0.7%	263,125,821	1.2%	12.0
1995	31,711,094	0.6	266,278,393	1.2	11.9
1996	31,962,050	0.8	269,394,284	1.2	11.9

Year	California Population	% Increase Over Preceding Year	United States Population	% Increase Over Preceding Year	California as % of United States *
1997	32,451,746	1.5	272,646,925	1.2	11.9
1998	32,861,779	1.3	275,854,104	1.2	11.9
1999	33,417,247	1.7	279,040,168	1.2	12.0
2000	34,040,489	1.9	282,177,754	1.1	12.1
2001	34,726,513	2.0	285,093,813	1.0	12.2
2002	35,336,138	1.8	287,973,924	1.0	12.3
2003	35,933,943	1.7	290,809,777	1.0	12.4

The following table presents civilian labor force data for the resident population, age 16 and over, for the years 1994 through 2003.

#### Labor Force 1994-03

<u>Year</u>	<u>Labor Force Trends</u> (in Thousands)		<u>Unemployment Rate (%)</u>	
	<u>Labor Force</u>	<u>Employment</u>	<u>California</u>	<u>United States</u>
1994	15,294	13,979	8.6	6.1
1995	15,236	14,040	7.8	5.6
1996	15,371	14,261	7.2	5.4
1997	15,786	14,792	6.3	4.9
1998	16,138	15,181	5.9	4.5
1999	16,376	15,522	5.2	4.2
2000	16,892	16,057	4.9	4.0
2001	17,172	16,249	5.4	4.7
2002	17,376	16,215	6.7	5.8
2003	17,460	16,283	6.7	6.0

SOURCE: State of California, Employment Development Department.

Current projections forecast moderate growth in calendar year 2004 and faster growth in calendar year 2005. Unemployment is expected to remain above 6% through the period. Personal income is projected to grow 5.6% in 2004 and 5.9% in 2005, which is slower than has been observed in past recoveries.

#### Recent Developments

State Economy and Finances. In recent years, the State has experienced a decline in revenues attributable in large part to declines in personal income tax receipts, principally due to reduced stock market-related income tax revenues, such as taxes on capital gains realizations and stock option income. The State estimates that stock market-related personal income tax revenue declined from \$17.6 billion in Fiscal Year 2000-01 to \$8.6 billion in Fiscal Year 2001-02, and to

\$5.2 billion in Fiscal Year 2002-03, a total 70% decline. Total personal income tax revenue declined from \$44.6 billion to \$32.7 billion in the same period. The State's economy continued to grow slowly through the end of 2003, but is projected to grow moderately in 2004.

On July 31, 2004, the Governor signed the 2004 Budget Act (the "2004 Budget Act") into law. Two measures intended to address the existing cumulative budget deficit and to implement structural reform were both approved at the March 2, 2004 statewide primary election. The California Economic Recovery Bond Act ("Proposition 57") authorizes the issuance of up to \$15 billion of economic recovery bonds ("ERBs") to finance the negative General Fund reserve balance as of June 30, 2004 and other General Fund obligations undertaken prior to June 30, 2004. The bonds will be issued in lieu of fiscal recovery bonds previously authorized by the California Fiscal Recovery Financing Act. Three first two series of ERBs have been offered, which provided approximately \$11.254 billion of net proceeds to the General Fund. The second measure entitled the Balanced Budget Amendment ("Proposition 58") requires the State to adopt and maintain a balanced budget and establish an additional reserve, and restricts future long-term deficit-related borrowing.

### State Indebtedness

The State Treasurer is responsible for the sale of debt obligations of the State and its various authorities and agencies. The State has always paid the principal of and interest on its general obligation bonds, general obligation commercial paper notes, lease-purchase debt and short-term obligations, including revenue anticipation notes ("RANs") and revenue anticipation warrants ("RAWs"), when due.

### Capital Facilities Financing.

*General Obligation Bonds.* The State Constitution prohibits the creation of general obligation indebtedness of the State unless a bond law is approved by a majority of the electorate voting at a general election or a direct primary. General obligation bond acts provide that debt service on general obligation bonds shall be appropriated annually from the General Fund and all debt service on general obligation bonds is paid from the General Fund. Under the State Constitution, debt service on general obligation bonds is the second charge to the General Fund after the application of monies in the General Fund to the support of the public school system and public institutions of higher education. Certain general obligation bond programs receive revenues from sources other than the sale of bonds or the investment of bond proceeds.

As of August 1, 2004, the State had outstanding approximately \$46 billion aggregate principal amount of long-term general obligation bonds, and unused voter authorizations for the future issuance of approximately \$34.5 billion of long-term general obligation bonds, including up to approximately \$19.9 billion of general obligation bonds authorized to be issued initially as commercial paper notes, and approximately \$14.6 billion of other authorized but unissued general obligation bonds.

General obligation bond law permits the State to issue as variable rate indebtedness up to 20% of the aggregate amount of long-term general obligation bonds outstanding. The State has issued \$5.4 billion of variable rate general obligation bonds, representing 11.7% of the State's total outstanding general obligation bonds as of August 1, 2004. The Legislature has approved approximately \$3.75 billion of potential bond authorizations to be placed on the ballot in

November 2004, and more proposals affecting State finances or for additional bonds may be added.

*Commercial Paper Program.* Pursuant to legislation enacted in 1995, voter-approved general obligation indebtedness may be issued either as long-term bonds or, for some but not all bond issuances, as commercial paper notes. Commercial paper notes may be renewed or may be refunded by the issuance of long-term bonds. The State issues long-term general obligation bonds from time to time to retire its general obligation commercial paper notes. Commercial paper notes are deemed issued upon authorization by the respective finance committees, whether or not such notes are actually issued. Pursuant to the terms of the current bank credit agreement supporting the general obligation commercial paper program, not more than \$1.5 billion in general obligation commercial paper notes may be outstanding at any time. This amount may be increased or decreased in the future. As of August 1, 2004, the finance committees had authorized the issuance of up to approximately \$19.9 billion in such notes, of which \$725 million was issued and outstanding.

*Lease-Purchase Debt.* In addition to general obligation bonds, the State builds and acquires capital facilities through the use of lease-purchase borrowing. Under these arrangements, the State Public Works Board, another State or local agency or a joint powers authority issues bonds to pay for the construction of facilities such as office buildings, university buildings or correctional institutions. These facilities are leased to a State agency or the University of California under a long-term lease that provides the source of payment of the debt service on the lease-purchase bonds. In some cases, there is not a separate bond issue, but a trustee directly creates certificates of participation in the State's lease obligation, which are then marketed to investors. Certain of the lease-purchase financings are supported by special funds rather than the General Fund. The State had approximately \$7.28 billion General Fund-supported lease-purchase obligations outstanding as of August 1, 2004. The State Public Works Board, which is authorized to sell lease revenue bonds, had approximately \$4.0 billion authorized and unissued as of August 1, 2004. In addition, as of that date, certain joint powers authorities were authorized to issue approximately \$81 million of revenue bonds to be secured by State leases.

*Non-Recourse Debt.* Certain State agencies and authorities issue revenue obligations for which the General Fund has no liability. Revenue bonds represent obligations payable from State revenue-producing enterprises and projects, which are not payable from the General Fund, and conduit obligations payable only from revenues paid by private users of facilities financed by the revenue bonds. The enterprises and projects include transportation projects, various public works projects, public and private educational facilities (including the California State University and University of California systems), housing, health facilities and pollution control facilities. There are 17 agencies and authorities authorized to issue revenue obligations (excluding lease-purchase debt). State agencies and authorities had approximately \$40.2 billion aggregate principal amount of revenue bonds and notes that are non-recourse to the General Fund outstanding as of June 30, 2004.

Pension Obligation Bonds. Pursuant to the California Pension Restructuring Bond Act of 2004 (the "Restructuring Bond Act") the Pension Obligation Bond Committee (the "Committee") is authorized to issue bonds to fund the State's employer contributions to the California Public Employees' Retirement System ("CalPERS"), in any two future fiscal years. The Restructuring Bond Act limits the cumulative amount of bonds that may be issued to an amount calculated in

relation to the anticipated reduction in the State's employer contributions to CalPERS resulting from changes in law, as such anticipated reduction is determined by the Director of Finance. The Restructuring Bond Act provides that debt service on any bonds issued pursuant to the Restructuring Bond Act will be payable from the General Fund.

The 2004 Budget Act includes reforms to the State's pension benefits, which the State estimates will reduce pension costs by \$2.9 billion over the next 20 years. The State anticipates that bonds will be issued pursuant to the Restructuring Bond Act on or before April 1, 2005, and that the proceeds of such bonds will be available to fund the April and June 2005 payments of the State's Fiscal Year 2004-05 employer contribution obligation to CalPERS.

It is expected that, if the Committee authorizes the issuance of bonds pursuant to the Restructuring Bond Act, it will initiate a validation action seeking court determination that the bonds will not be in violation of the State's Constitutional debt limit. In 2003 the Committee authorized the issuance of pension obligation bonds to fund the State's Fiscal Year 2003-04 employer contribution obligation to CalPERS. The Committee initiated a validation action, but the trial court rendered a decision which did not validate the bonds. The Committee appealed the trial court's decision. However, the Committee's pending appeal was dismissed in June 2004.

Economic Recovery Bonds. Repayment of the ERBs is secured by a pledge of revenues from a 1/4¢ increase in the State's sales and use tax starting July 1, 2004. Fifty percent of each annual deposit, or up to \$5 billion in the aggregate of future deposits in the reserve fund created by Proposition 58 shall be used to repay the ERBs.

The State has issued ERBs resulting in \$11.254 billion of net proceeds to the General Fund in Fiscal Year 2003-04. The State may issue the remainder of authorized ERBs in the current or future fiscal years.

Cash Flow Borrowings. As part of its cash management program, the State has regularly issued short-term obligations to meet cash flow needs. The State has issued RANs in 19 of the last 20 fiscal years to partially fund timing differences between revenues and expenditures, as the majority of General Fund revenues are received in the last part of the fiscal year. RANs must mature prior to the end of the fiscal year of issuance. If additional external cash flow borrowings are required, the State has issued RAWs, which can mature in a subsequent fiscal year. RANs and RAWs are both payable from any unapplied revenues in the General Fund on their maturity date, subject to the prior application of such money in the General Fund to pay certain priority payments in the general areas of education, general obligation debt service, State employee wages and benefits and other specified General Fund reimbursements.

On June 18, 2003, the State issued \$10.97 billion of RAWs, which matured and were paid in full on June 16, 2004. The State also issued \$3 billion of RANs on October 28, 2003 (the "2003-04 RANs"), which matured and were paid in full on June 23, 2004. The most recent cash flow projections prepared by the Department of Finance anticipate the issuance of \$6 billion of RANs in October 2004, to mature in June 2005.

Ratings. California has always paid the principal of and interest on its general obligation bonds, general obligation commercial paper notes, lease-purchase obligations and short-term obligations, including revenue anticipation notes and revenue anticipation warrants, when due.

In July 2003, Standard & Poor's downgraded the State's general obligation credit rating to "BBB." In December 2003, the State's general obligation credit rating was downgraded to "BBB" by Fitch and "Baa1" by Moody's. In May 2004, Moody's upgraded the State's general obligation bond rating to "A3" with a positive outlook. In August 2004, following the adoption of the 2004 Budget Act, Fitch removed the State's general obligation bonds from its negative credit watch. Also in August 2004, Standard & Poor's raised its rating on the State's general obligation bonds to "A" from "BBB" and removed the State's general obligation bonds from its credit watch.

### State Funds and Expenditures

The Budget and Appropriations Process. The State's fiscal year begins on July 1 and ends on June 30. The State operates on a budget basis, using a modified accrual system of accounting, with revenues credited in the period in which they are measurable and available and expenditures debited in the period in which the corresponding liabilities are incurred. The annual budget is proposed by the Governor by January 10 of each year for the next fiscal year. Under State law, the annual proposed Governor's budget cannot provide for projected expenditures in excess of projected revenues and balances available from prior fiscal years. Following the submission of the proposed budget, the Legislature takes up the proposal. As required by Proposition 58, beginning with Fiscal Year 2004-05, the State must pass an annual balanced budget.

The primary source of the annual expenditure authorizations is the Budget Act as approved by the Legislature and signed by the Governor. The Budget Act must be approved by a two-thirds majority vote of each House of the Legislature. The Governor may reduce or eliminate specific line items in the Budget Act or any other appropriations bill without vetoing the entire bill. Such individual line-item vetoes are subject to override by a two-thirds majority vote of each House of the Legislature.

Appropriations also may be included in legislation other than the Budget Act. Bills containing appropriations (except for K-12 and community college ("K-14") education) must be approved by a two-thirds majority vote in each House of the Legislature and be signed by the Governor. Bills containing K-14 education appropriations require a simple majority vote. Continuing appropriations, available without regard to fiscal year, also may be provided by statute or the State Constitution. There is litigation pending concerning the validity of such continuing appropriations.

The General Fund. The monies of the State are segregated into the General Fund and over 900 special funds, including bond, trust and pension funds. The General Fund consists of revenues received by the State Treasury and not required by law to be credited to any other fund, as well as earnings from the investment of State monies not allocable to another fund. The General Fund is the principal operating fund for the majority of governmental activities and is the depository of most of the major revenue sources of the State. The General Fund may be expended as a consequence of appropriation measures enacted by the Legislature and approved by the Governor, as well as appropriations pursuant to various constitutional authorizations and initiative statutes.

The Special Fund for Economic Uncertainties. The Special Fund for Economic Uncertainties ("SFEU") is funded with General Fund revenues and was established to protect the

State from unforeseen revenue reductions and/or unanticipated expenditure increases. Amounts in the SFEU may be transferred by the State to the General Fund as necessary to meet cash needs of the General Fund. The State is required to return monies so transferred without payment of interest as soon as there are sufficient monies in the General Fund. At the end of each fiscal year, the State is required to transfer from the SFEU to the General Fund any amount necessary to eliminate any deficit in the General Fund. In certain circumstances, monies in the SFEU may be used in connection with disaster relief.

For budgeting and general accounting purposes, any appropriation made from the SFEU is deemed an appropriation from the General Fund. For year-end reporting purposes, the State is required to add the balance in the SFEU to the balance in the General Fund so as to show the total monies then available for General Fund purposes.

Inter-Fund Borrowings. Inter-fund borrowing is used to meet temporary imbalances of receipts and disbursements in the General Fund. If General Fund revenue is or will be exhausted, the State may direct the transfer of all or any part of the monies not needed in special funds to the General Fund. All money so transferred must be returned to the special fund from which it was transferred. As of July 31, 2004, \$3.17 billion of outstanding loans from the SFEU were used to pay expenditures of the General Fund.

Unemployment Insurance Fund. In Fiscal Year 2002-03 the State paid \$8.161 billion in unemployment benefits from the Unemployment Insurance ("UI") Fund. In Fiscal Year 2003-04 the State expected to pay \$7.811 billion in benefits from the UI Fund. The UI Fund (which is not part of the General Fund) is projected to have a \$220 million deficit in calendar year 2004, notwithstanding the automatic unemployment insurance tax rate increase that took effect January 1, 2004. The Employment Development Department ("EDD") has received approval for a loan from the Federal government of up to \$1.2 billion to provide cash flow relief so that unemployment benefits can continue to be paid. The Federal loan will be repaid from increased UI tax revenue. Interest payments on the loan, if incurred, will be paid by the EDD Contingent Fund and not the General Fund. The Administration and the Legislature will have to determine how to resolve the cash flow imbalance in the UI Fund for the long-term. This issue is expected to be addressed by the Legislature sometime in the future.

Investment of Funds. Monies on deposit in the State's Centralized Treasury System are invested by the Treasurer in the Pooled Money Investment Account (the "PMIA"). As of July 31, 2004, the PMIA held approximately \$30.6 billion of State monies and \$21.2 billion of monies invested for about 2,734 local governmental entities.

Pension Trusts. The three principal retirement systems in which the State participates are CalPERS, the California State Teachers' Retirement System ("CalSTRS") and the University of California Retirement System ("UCRS"). The State's contribution to CalPERS and UCRS are actuarially determined each year, while the State's contribution to CalSTRS is established by statute. Due to investment losses and increased retirement benefits, the State contribution to the CalPERS has increased from \$156.7 million in Fiscal Year 2000-01 to \$2.2 billion in Fiscal Year 2003-04 and is estimated at \$2.547 billion in Fiscal Year 2004-05.

According to CalSTRS, its investment portfolio market value as of July 31, 2004 was \$116.2 billion compared to \$100.9 billion as of July 31, 2003. CalPERS reported that its investment portfolio market value as of July 31, 2003 was \$145 billion, compared to \$143.4

billion as of July 31, 2002. Updated portfolio market value figures for CalPERS will not be available until late fall 2004. The excess of actuarial value of assets over actuarial accrued liabilities of CalPERS, CalSTRS and UCRS as of June 30, 2003 was \$(11.935) billion, \$(23.11) billion and \$8.474 billion, respectively.

Welfare Reform. The Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (the "Law") fundamentally reformed the nation's welfare system. The Law included provisions to: (1) convert Aid to Families with Dependent Children ("AFDC") from an entitlement program to a block grant titled Temporary Assistance for Needy Families ("TANF"), with lifetime time limits on TANF recipients, work requirements and other changes; (2) deny certain Federal welfare and public benefits to legal non-citizens (amended by subsequent Federal law), allow states to elect to deny additional benefits (including TANF) to legal non-citizens, and generally deny almost all benefits to illegal immigrants; and (3) make changes in the Food Stamp program, including to reduce maximum benefits and impose work requirements. The block grant formula under the Law is operative through September 30, 2004. For the TANF program to continue, the U.S. Congress must pass, and the President must sign, legislation reauthorizing the program. Current reauthorization legislation would significantly increase the work participation rate requirements. One proposal would increase work participation rate requirements from the current statutory rate of 50% to 70% in Fiscal Year 2008. The State would need to make substantial investments in child care and employment services in order to meet the increased work participation rate requirements if this proposal was adopted. Failure to meet these increased requirements could result in significant Federal penalties.

The California Work Opportunity and Responsibility to Kids ("CalWORKs") replaced the former AFDC and Greater Avenues to Independence programs effective January 1, 1998. Consistent with Federal law, CalWORKs contains time limits on receipt of welfare aid, both lifetime as well as current period. The centerpiece of CalWORKs is the linkage of eligibility to work participation requirements. Caseload under CalWORKs is continuing to flatten after many consecutive years of decline. The revised CalWORKs caseload projections are 474,000 cases in 2003-04 and 473,000 in 2004-05. This represents a major decline in caseload from the rapid growth of the early 1990s, when caseload peaked at 921,000 cases in 1994-95.

In Fiscal Years 2003-04 and 2004-05, California will continue to meet, but not exceed, the Federally-required \$2.7 billion combined State and county maintenance of effort ("MOE") requirement. In an effort to keep program expenditures within the TANF block grant and TANF MOE amounts, the 2004 Budget Act eliminates TANF funding for county juvenile probation services, decreases State funding for tribal TANF programs and delays the 2004-05 CalWORKs cost-of-living adjustment. The 2004 Budget Act includes an augmentation of \$191.9 million in Fiscal Years 2004-05 for employment services to enable recipients to leave aid and become self-sufficient, and includes total CalWORKs-related expenditures of \$6.9 billion for Fiscal Year 2003-04 and \$6.7 billion for Fiscal Year 2004-05, including child care transfer amounts for the Department of Education and the State's general TANF reserve. The 2004 Budget Act also includes a TANF reserve of \$171.1 million, which is available for unanticipated needs in any program for which TANF block grant funds are appropriated, including CalWORKs benefits, employment services, county administration, and child care costs.

Local Governments. The primary units of local government in the State are the counties, ranging in population from 1,200 in Alpine County to approximately 10 million in Los Angeles County. Counties are responsible for the provision of many basic services, including indigent

health care, welfare, jails and public safety in unincorporated areas. There also are 478 incorporated cities and thousands of special districts formed for education, utility and other services. The fiscal condition of local governments has been constrained since the enactment of "Proposition 13" in 1978, which reduced and limited the future growth of property taxes and limited the ability of local governments to impose "special taxes" (those devoted to a specific purpose) without two-thirds voter approval. Counties, in particular, have had fewer options to raise revenues than many other local government entities and have been required to maintain many services.

In the aftermath of Proposition 13, the State provided aid to local governments from the General Fund to make up some of the loss of property tax monies, including taking over the principal responsibility for funding K-14 education. During the recession of the early 1990s, the Legislature eliminated most of the remaining components of post-Proposition 13 aid to local government entities other than K-14 education districts by requiring cities and counties to transfer some of their property tax revenues to school districts. However, the Legislature also provided additional funding sources (such as sales taxes) and reduced certain mandates for local services.

The 2004 Budget Act will reduce the vehicle licensing fee (the "VLF") from 2% to 0.65% of the value of the vehicle. In order to protect local governments, the reduction in VLF revenue to cities and counties from this rate change will be replaced by an increase in the amount of property tax they receive.

Under the proposed agreement, for Fiscal Years 2004-05 and 2005-06 only, the replacement property taxes that cities and counties receive would be reduced by \$700 million. In future years, local governments would receive the full value of the VLF revenue that they would have received under current law. Also for these two fiscal years, the proposed agreement would require redevelopment agencies to shift \$250 million in property tax revenue they would otherwise receive to schools, and special districts would shift \$350 million to schools. As part of the proposed agreement, a Constitutional amendment slated on the November 2004 ballot would protect local governments' property, sales, and VLF revenues in future years. Proposition 65 (as discussed above), has so qualified for the November 2004 ballot.

In Fiscal Year 2004-05, funding was also provided for various programs, including \$100 million for the Citizens' Option for Public Safety program to support local front-line law enforcement, \$100 million for county juvenile justice and crime prevention programs, \$38.2 million for reimbursement of jail booking fees, \$39 million for open space subvention reimbursements to cities and counties, and \$60 million in grants to county assessors to increase and enhance property tax assessment activities. In addition, \$18.5 million will be provided to 37 specified small and rural county sheriff departments. In subsequent years, the booking fee reimbursement will be eliminated and the fees will be reduced by 50%.

*Vehicle License Fee.* A program to offset a portion of the VLF paid by vehicle owners was established in 1998. Beginning January 1, 1999, a permanent offset of 25% of the VLFs became operative. Various pieces of legislation increased the amount of the offset in subsequent years to the existing statutory level of 67.5%. This level of offset was expected to provide tax relief of \$3.95 billion in Fiscal Year 2003-04. Beginning in Fiscal Year 2004-05, the 2004 Budget Act will permanently reduced the VLF rate to 0.65% and the offset program be eliminated.

In June 2003, it was determined that insufficient General Fund monies were available to continue to fund any portion of the VLF offsets. Accordingly, the VLFs paid by taxpayers returned to the pre-1999 level so the State would not be obligated to make any offset payments in Fiscal Year 2003-04. However, the offset suspension was rescinded by Governor Schwarzenegger on November 17, 2003, and offset payments to local governments resumed. Local governments received backfill payments totaling \$3.80 billion in Fiscal Year 2002-03, and payments totaling \$2.65 billion were anticipated to be paid to local governments in Fiscal Year 2003-04. The 2004 Budget Act provided for the repayment in August 2006, of approximately \$1.2 billion that was not received by locals during the time period between the suspension of the offsets and the implementation of higher fees.

*Trial Courts.* Prior to legislation enacted in 1997, local governments provided the majority of funding for the State's trial court system. The legislation consolidated trial court funding at the State level in order to streamline the operation of the courts, provide a dedicated revenue source and relieve fiscal pressure on the counties. This resulted in decreasing the county contribution for court operations by \$415 million and allowed cities to retain \$68 million in fine and penalty revenue previously remitted to the State. The State's trial court system was expected to receive approximately \$1.8 billion in State resources and \$475 million in resource from the counties in Fiscal Year 2003-04, and \$1.7 billion in State resources and \$475 million in resources from the counties in Fiscal Year 2004-05.

Repayment of Energy Loans. The Department of Water Resources (the "DWR") borrowed \$6.1 billion from the General Fund for its power supply program between January and June 2001. DWR has issued approximately \$11.25 billion in revenue bonds and used the net proceeds to repay outstanding loans from banks and commercial lenders in the amount of approximately \$3.5 billion and a loan from the General Fund of \$6.1 billion plus accrued interest of approximately \$500 million.

The loans from the General Fund, banks and commercial lenders financed DWR's power supply program costs during 2001 that exceeded DWR's revenues from the sale of electricity. The power supply program has become self supporting, and no additional loans from the General Fund are authorized. As of January 1, 2003, the DWR's authority to enter into new power purchase contracts terminated, and the major investor owned electric utilities ("IOUs") resumed responsibility for obtaining electricity for their customers. The primary source of money to pay debt service on the DWR revenue bonds is revenues derived from customers of the IOUs resulting from charges set by the California Public Utilities Commission. The DWR revenue bonds are not a debt or liability of the State and do not directly or indirectly or contingently obligate the State to levy or to pledge any form of taxation whatever therefor or to make any appropriation for their payment.

State Appropriations Limit. The State is subject to an annual appropriations limit imposed by the State Constitution (the "Appropriations Limit"). The Appropriations Limit does not restrict appropriations to pay debt service on voter-authorized bonds or appropriations from funds that do not derive their proceeds from taxes. There are other various types of appropriations excluded from the Appropriations Limit. For example, appropriations required to comply with mandates of courts or the Federal government, appropriations for qualified capital outlay projects, appropriations for tax refunds, appropriations of revenues derived from any increase in gasoline taxes and motor vehicle weight fees above January 1, 1990 levels, and

appropriation of certain special taxes imposed by initiative (e.g., cigarette and tobacco taxes) are all excluded. The Appropriations Limit may be exceeded in cases of emergency.

The Appropriations Limit in each year is based on the limit for the prior year, adjusted annually for changes in State per capita personal income and changes in population, and adjusted, when applicable, for any transfer of financial responsibility of providing services to or from another unit of government or any transfer of the financial source for the provisions of services from tax proceeds to non-tax proceeds. The Appropriations Limit is tested over consecutive two-year periods. Any excess of the aggregate "proceeds of taxes" received over such two-year period above the combined Appropriations Limits for those two years is divided equally between transfers to K-14 school districts and refunds to taxpayers.

State law requires an estimate of the Appropriations Limit to be included in the Governor's Budget and thereafter to be subject to the budget process and established in the Budget Act. As of the release of the 2004 Budget Act, the State projected the Appropriations Limit to be \$13.698 billion and \$12.524 billion in Fiscal Years 2003-04 and 2004-05, respectively.

Proposition 98. On November 8, 1988, voters approved Proposition 98, a combined initiative constitutional amendment and statute called the "Classroom Instructional Improvement and Accountability Act." Proposition 98 changed State funding of public education primarily by guaranteeing K-14 schools a minimum share of General Fund revenues. Any amount not funded by local property taxes is funded by the General Fund. Proposition 98 (as modified by Proposition 111, enacted on June 5, 1990), guarantees K-14 schools a certain variable percentage of General Fund revenues, based on certain factors including cost-of-living adjustments, enrollment, and per capita income and revenue growth. Legislation adopted prior to the end of Fiscal Year 1988-89, implementing Proposition 98, determined the K-14 schools' funding guarantee to be 40.3% of the General Fund tax revenues, based on Fiscal Year 1986-87 appropriations. However, that percentage has been adjusted to approximately 35% to account for a subsequent redirection of local property taxes that directly affected the share of General Fund revenues to schools.

Proposition 98 permits the Legislature by two-thirds vote of both Houses, with the Governor's concurrence, to suspend the minimum funding formula for a one-year period. Proposition 98 also contains provisions transferring certain excess State tax revenues to K-14 schools. The State's emphasis on improving education resources has resulted in the increase of K-12 fiscal year spending per pupil of 6.2% above the 2002-03 level in both Fiscal Years 2003-04 and 2004-05. The 2004 Budget Act also reflects Proposition 98 expenditures of \$2.158 billion from 2002-03 to 2003-04, \$1.297 billion from 2003-04 to 2004-05 and \$1.283 billion from 2004-05 to 2005-06.

The 2004 Budget Act suspends the Proposition 98 minimum guarantee by \$2.004 billion. This amount is added to the existing maintenance factor, for a total estimated maintenance factor of \$3.625 billion at the end of Fiscal Year 2004-05. Appropriations for Fiscal Years 2002-03, 2003-04 and 2004-05 are currently estimated to be \$486.7 million, \$481.1 million and \$301.6 million respectively, below the amounts required by Proposition 98 because of increase in State tax revenues above original estimates. Legislation enacted in August 2004 will annually appropriate \$150 million, beginning in Fiscal Year 2006-07, to repay any prior year Proposition

98 obligations, including \$250.8 million owed from Fiscal Years 1995-96 and 1996-97 Fiscal Years, until these obligations are fully repaid.

Constraints on the Budgetary Process. Over the years, a number of laws and Constitutional amendments have been enacted that restrict the use of General Fund or special fund revenues, or otherwise limit the Legislature's and Governor's discretion in enacting budgets.

An initiative statute, called the "After School Education and Safety Program of 2002," was approved by the voters on November 5, 2002, and will require the State to expand funding for before and after school programs in public elementary and middle schools. Beginning with Fiscal Year 2004-05, and in the first year that non-Proposition 98 appropriations exceed the base level by \$1.5 billion, the initiative will require the State to appropriate up to \$550 million annually. The initiative defines the base level as the fiscal year during the period July 1, 2000 through June 30, 2004, for which the State's non-guaranteed General Fund appropriations are the highest as compared to any other fiscal year during that period. Using July 2004 data, Fiscal Year 2000-01 is the base year. Based upon non-Proposition 98 General Fund appropriations as of July 2004, the initiative is unlikely to require implementation of the funding increase until Fiscal Year 2008-09. The 2004 Budget Act includes about \$121.6 million for these programs, \$428.4 million below the amount that the initiative would require if the full funding increase were in effect.

As noted above, Proposition 58 requires the State to enact a balanced budget, establish a special reserve in the General Fund and restricts future borrowing to cover budget deficits. As a result, the State may have to take more immediate actions to correct budgetary shortfalls. Beginning with the budget for Fiscal Year 2004-05, Proposition 58 requires the Legislature to pass a balanced budget and provides for mid-year adjustments in the event that the budget falls out of balance.

Proposition 58 also requires that a special reserve (the Budget Stabilization Account) be established in the General Fund. Beginning with Fiscal Year 2006-07, a portion of estimated annual General Fund revenues would be transferred into the Budget Stabilization Account no later than September 30 of each fiscal year. These transfers would continue until the balance in the Budget Stabilization Account reaches \$8 billion or 5% of the estimated General Fund revenues for that fiscal year, whichever is greater. The annual transfers could be suspended or reduced for a fiscal year by an executive order issued by the Governor no later than June 1 of the preceding fiscal year.

Proposition 58 will also prohibit certain future borrowing to cover budget deficits. This restriction applies to general obligation bonds, revenue bonds, and certain other forms of long-term borrowing. The restriction does not apply to certain other types of borrowing, such as (i) short-term borrowing to cover cash shortfalls in the General Fund (including revenue anticipation notes or revenue anticipation warrants currently used by the State), or (ii) inter-fund borrowings.

Tobacco Litigation. In 1998, the State signed the Master Settlement Agreement (the "MSA") with the four major cigarette manufacturers for payment of approximately \$25 billion (subject to adjustment) over 25 years. Under the MSA, half of the money will be paid to the State and half to local governments. Payments continue in perpetuity, but the specific amount to be received by the State and local governments is subject to adjustment. Details in the MSA

allow reduction of payments for decreases in cigarette shipment volumes by the settling manufacturers, payments owed to certain previously settled states and certain types of offsets for disputed payments, among other things. However, settlement payments are adjusted upward each year by at least 3% for inflation, compounded annually.

State statutory law allows the issuance of revenue bonds secured by MSA revenues beginning in Fiscal Year 2003-04. An initial sale producing \$2 billion in revenue was completed in January 2003. A second sale of the remaining 43.43% of the State's tobacco settlement revenues, which produced \$2.264 billion in revenue, was completed in September 2003.

### Sources of State Revenue

The 2004 Budget Act includes the effect of the following tax related proposals on the General Fund: (i) a two-month personal income, corporation, and sales and use tax amnesty program for tax years prior to 2003 (estimated revenues of \$333 million); (ii) a two year vehicle, vessel, and aircraft use tax if items are used within one-year, with specified exceptions for vessel and aircraft repair (estimated revenues of \$26 million); (iii) Teacher Tax Credit: Two-year suspension of the teacher tax credit (estimated revenues of \$210 million); and (iv) suspension of the natural heritage presentation tax credit for Fiscal Year 2004-05 and extension of the sunset date to June 30, 2008 (estimated revenues of \$10 million).

Personal Income Tax. The California personal income tax, which accounts for a significant portion of General Fund tax revenues, is closely modeled after Federal income tax law. It is imposed on net taxable income (gross income less exclusions and deductions), with rates ranging from 1.0% to 9.3%. Personal, dependent and other credits are allowed against the gross tax liability. In addition, taxpayers may be subject to an alternative minimum tax ("AMT"), which is much like the Federal AMT. The personal income tax structure is highly progressive. For instance, it is estimated that the top 1% of taxpayers paid 36.7% of the total personal income tax in the 2002 tax year.

Taxes on capital gains and stock options, which are largely linked to stock market performance, add a significant dimension of volatility to personal income tax receipts. Capital gains and stock option tax receipts have accounted for as much as 24.7% and as little as 5.6% of General Fund revenues over the last ten years. A proposal to add a 1% surcharge on taxable income over \$1 million is slated to be on the November election ballot.

Sales Tax. The sales tax is imposed upon retailers for the privilege of selling tangible personal property in California. Most retail sales and leases are subject to the tax. However, exemptions have been provided for certain essentials such as food for home consumption, prescription drugs, gas delivered through mains and electricity. Other exemptions provide relief for a variety of sales ranging from custom computer software to aircraft.

Effective July 1, 2004, the breakdown of the base State and local sales tax rate of 7.25% is as follows: 5% is imposed as a General Fund tax; 0.5% is dedicated to local governments for health and welfare program realignment; 0.5% is dedicated to local governments for public safety services; and 1.0% local tax imposed under the Uniform Local Sales and Use Tax Law, with 0.25% dedicated to county transportation purposes and 0.75% for the city and county general-purpose use; and 0.25% deposited into the Fiscal Recovery Fund which will be available for annual appropriation by the Legislature to repay the State's ERBs.

A State Constitutional amendment, which is subject to the approval of the voters in the November 2004 election, would place restrictions on the State from reducing the local sales tax rate. Additionally, "Proposition 65" would reestablish the local sales tax rate at 1.25% upon the payment of the ERBs. Either proposition, if approved by the voters, would restrict the State's ability to reduce or reallocate local sales tax revenues in the future.

Corporation Tax. Corporation tax revenues are derived from the following taxes:

1. The franchise tax and the corporate income tax are levied at an 8.84% rate on profits. The former is imposed on corporations for the privilege of doing business in California, while the latter is imposed on corporations that derive income from California sources but are not sufficiently present to be classified as doing business in the State.
2. Banks and other financial corporations are subject to the franchise tax plus an additional tax at the rate of 2% on their net income. This additional tax is in lieu of personal property taxes and business license taxes.
3. The AMT is similar to that in Federal law. In general, the AMT is based on a higher level of net income computed by adding back certain tax preferences. This tax is imposed at a rate of 6.65%.
4. A minimum franchise tax of up to \$800 is imposed on corporations subject to the franchise tax but not on those subject to the corporate income tax. New corporations are exempted from the minimum franchise tax for the first two years of incorporation.
5. Sub-Chapter S corporations are taxed at 1.5% of profits.

Taxpayers with net operating losses ("NOLs") are allowed to carry forward NOLs for tax purposes and deduct a portion in subsequent years. State law suspended the use of any carryover NOLs for the 2002 and 2003 tax years, but allowed taxpayers to deduct those losses beginning in the 2004 tax year and extended the expiration date for those losses by two years. The percent of a taxpayer's NOLs that can be carried forward also increased from 65% to 100% beginning January 1, 2004, for NOLs generated after that date. About 85% of NOLs are deducted from corporation taxes with the balance deducted from personal income tax.

Insurance Tax. The majority of insurance written in California is subject to a 2.35% gross premium tax. For insurers, this premium tax takes the place of all other state and local taxes except those on real property and motor vehicles. Exceptions to the 2.35% rate are certain pension and profit-sharing plans that are taxed at the lesser rate of 0.5%, surplus lines and nonadmitted insurance at 3% and ocean marine insurers at 5% of underwriting profits.

Other Taxes. Other General Fund major taxes and licenses include: estate, inheritance and gift taxes; cigarette taxes; alcoholic beverage taxes; horse racing license fees and trailer coach license fees.

The California estate tax is based on the State death tax credit allowed against the Federal estate tax, and is designed to pick up the maximum credit allowed against the Federal estate tax return. The Federal Economic Growth and Tax Reconciliation Act of 2001 phases out the Federal estate tax by 2010. It also reduced the State pick-up tax by 25% in 2002, 50% in 2003,

and 75% in 2004 and eliminates it beginning in 2005. These provisions sunset after 2010; at that time, the Federal estate tax will be re-instated along with the State's estate tax, unless future Federal legislation is enacted to make the provisions permanent.

Special Fund Revenues. The State Constitution and statutes specify the uses of certain revenue. Such receipts are accounted for in various special funds. In general, special fund revenues comprise four categories of income: (i) receipts from tax levies, which are allocated to specified functions such as motor vehicle taxes and fees and certain taxes on tobacco products; (ii) charges for special services to specific functions, including such items as business and professional license fees; (iii) rental royalties and other receipts designated for particular purposes (e.g., oil and gas royalties); and (iv) motor vehicle related taxes and fees. Principal sources of this income are motor vehicle fuel taxes, registration and weight fees and VLFs. During Fiscal Year 2002-03, \$7.1 billion was derived from this source, with approximately \$3.0 billion being returned to local governments.

Taxes on Tobacco Products. Proposition 10, approved in 1998, increased the excise tax imposed on distributors selling cigarettes in California to 87¢ per pack effective January 1, 1999. At the same time, this proposition imposed a new excise tax on cigars, chewing tobacco, pipe tobacco and snuff at a rate equivalent to the tax increase on cigarettes. In addition, the higher excise tax on cigarettes automatically triggered an additional increase in the tax on other tobacco products effective July 1, 1999, with the proceeds going to the Cigarette and Tobacco Products Surtax Fund. The State's excise tax proceeds are earmarked for childhood development, education, health, research and other programs.

### State Economy and Finances

Following a severe recession beginning in the early 1990's, the State's financial condition improved markedly during recent fiscal years starting in 1995-96 due to a combination of better than expected revenues, slowdown in growth of social welfare programs, and continued spending restraint based on actions taken in earlier years. The economy grew strongly between 1994 and 2000 and, as a result, for the five fiscal years from 1995-96 to 1999-00, General Fund tax revenues exceeded budget estimates. These additional funds were largely directed to school spending and to fund new program initiatives, including education spending above Proposition 98 minimums, tax reductions, aid to local governments and infrastructure expenditures.

### Financial Results—Fiscal Years 2001-02 and 2002-03.

*2001 Budget Act.* The 2001 Budget Act was signed by the previous Governor on July 26, 2001. The spending plan included General Fund expenditures of \$78.8 billion, a reduction of \$1.3 billion from the prior year. The spending plan, however, utilized more than half of the budget surplus as of June 30, 2001, leaving a projected balance in the SFEU at June 30, 2002, of \$2.6 billion. The 2001 Budget Act assumed that, during the course of the fiscal year, the \$6.2 billion advanced by the General Fund to the DWR for power purchases would be repaid with interest.

The final estimate of Fiscal Year 2001-02 revenues and expenditures, showed an unprecedented drop in revenues compared to the prior year. The final estimate for the three largest tax sources was \$59.7 billion, a drop of over \$13 billion from Fiscal Year 2000-01, the vast bulk of which was attributable to reduced personal income taxes from stock option and

capital gains activity. This revenue shortfall and the delay of the issuance of the power revenue bonds past June 30, 2002 resulted in a substantial budgetary deficit and cash flow difficulties. The State ended the fiscal year with a \$2.1 billion deficit.

*2002 Budget Act.* The 2002-03 proposed budget, released on January 10, 2002, projected a budget gap of approximately \$12.5 billion due, in part, due to a decline in General Fund revenues to the national economic recession combined with the stock market decline that began in mid-2000. Personal income tax receipts, which include stock option and taxes on capital gains, were particularly affected. The May revision to the 2002-03 proposed budget projected further deterioration in revenues and additional costs of \$1.6 billion, increasing the budget gap to \$23.6 billion.

The 2002 Budget Act, signed by the previous Governor on September 5, 2002, addressed the budget gap through a combination of program reductions, loans, fund shifts, accelerations and transfers, and modest tax changes. Within a few months after the 2002 Budget Act was adopted, it became evident that its revenue projections were substantially overstated and that certain program cost savings included in the 2002 Budget Act would not be realized.

In late November 2002, the previous Governor directed State agencies to take immediate action to reduce any non-critical or non-essential activities. The Legislature passed budget adjustment legislation in March and April 2003, totaling about \$10.4 billion in spending reductions, deferrals and funding transfers (\$5.1 billion for Fiscal Year 2002-03 and \$5.3 billion for Fiscal Year 2003-04). The largest part of the reductions (including a \$1.1 billion deferral into Fiscal Year 2003-04) was for K-12 education funding.

State Budget — Fiscal Year 2003-04. The 2003-04 proposed budget projected revenues from the three largest tax sources to be about \$61.7 billion, more than \$6 billion lower than projected in the 2002 Budget Act. The 2003-04 proposed budget projected total revenues and transfers of \$73.1 billion and \$69.2 billion in Fiscal Years 2002-03 and 2003-04, respectively, and projected a \$34.6 billion cumulative budget shortfall through June 30, 2004.

On May 14, 2003, the previous Governor released the May revision to the proposed budget. The May revision reduced the revenue estimate for Fiscal Year 2002-03 to \$70.8 billion from the 2003-04 Budget estimate of \$73.1 billion, primarily from the loss of \$2 billion of revenues due to the delay of the second sale of tobacco securitization bonds. As a result, the May revision estimated the budget gap for Fiscal Years 2002-03 to 2003-04 increased from \$34.6 billion to \$38.2 billion.

*2003 Budget Act.* The 2003 Budget Act was adopted by the Legislature on July 29, 2003, and signed into law by the previous Governor on August 2, 2003. Under the 2003 Budget Act, General Fund revenues were projected to increase 3.3%, from \$70.9 billion in Fiscal Year 2002-03 to \$73.3 billion in Fiscal Year 2003-04. The revenue projections incorporate a 4% increase in State tax revenues (as projected by the Legislative Analysts Office's (the "LAO")), reflecting a correspondingly moderate growth in the State's economy.

The June 30, 2004 reserve was projected in the 2003 Budget Act to be just over \$2 billion. This projection reflected the elimination of the \$10.675 billion accumulated deficit through June 30, 2003 (as estimated in the 2003 Budget Act), through the issuance of the ERBs.

The 2004-05 proposed budget's projection for Fiscal Year 2003-04, projected \$1.274 billion of additional revenues, \$3.879 billion of additional expenditures and \$205 million additional prior year adjustments as compared to the 2003 Budget Act. After accounting for a \$473 million reduction in other reserves, the June 30, 2004 General Fund reserve was projected to be \$290 million, down approximately \$1.9 billion from the 2003 Budget Act

On May 13, 2004, the Governor released the May revision to the 2004-05 proposed budget which provided updated revenue and economic forecasts and revised budget proposals, and projected a \$1.88 billion reserve as of June 30 2004, representing a \$1.597 billion increase compared to previous estimates. The 2004 Budget Act estimated a \$2.198 billion reserve as of June 30, 2004, \$290 million higher than projected in the May Revision.

State Budget — Fiscal Year 2004-05. The 2004-05 Governor's Budget, released on January 9, 2004, reported that, in the absence of corrective actions to change existing policies, operating deficits, estimated at \$14 billion for Fiscal Year 2004-05, would continue to be incurred. The May Revision released on May 13, 2004, projected a June 30, 2005 General Fund reserve of \$998 million, up \$363 million from the 2004-05 Governor's Budget projections. The increase in the reserve was the result of a \$2.229 billion increase in prior year adjustments, a \$245 million increase in revenues (over both Fiscal Years 2003-04 and 2004-05), a \$1 billion reduction in the sale of ERBs and a \$1.112 billion increase in expenditures (over both Fiscal Years 2003-04 and 2004-05).

*2004 Budget Act.* The 2004 Budget Act was adopted by the Legislature on July 29, 2004, and signed by the Governor on July 31, 2004. The 2004 Budget Act largely reflects the proposals contained in the May Revision, including the use of \$2 billion of proceeds of the ERBs issued in Fiscal Year 2003-04.

Under the 2004 Budget Act, General Fund revenues are projected to increase 3.6%, from \$74.6 billion in Fiscal Year 2003-04, to \$77.3 billion in Fiscal Year 2004-05. The revenue projections assume a continuing rebound in California's economy. Excluding the impact of the ERBs, General Fund expenditures are estimated to increase by 6.7%, from \$75.6 billion in Fiscal Year 2003-04, to \$80.7 billion in Fiscal Year 2004-05. The June 30, 2005 reserve is projected to be \$768 million, compared to an estimated June 30, 2004 reserve of \$2.198 billion.

The 2004 Budget Act largely reflects the budget proposals contained in the May Revision. Revenue increases since the May Revision reflected in the 2004 Budget Act total \$542 million. Resources also increased by an additional \$341 million in prior year adjustments. In addition, expenditures increased by \$1.1 billion since the May Revision. In summary, the 2004 Budget Act addressed a projected \$13.9 billion budget shortfall through expenditure cuts (\$4.0 billion or 28.7%), cost avoidance (\$4.4 billion or 31.7%), fund shifts (\$1.6 billion or 11.2%), loans or borrowing (\$2.1 billion or 15.4%), and transfers and other revenue (\$1.8 billion or 13.0%).

The 2004 Budget Act contains the following major components:

1. Rebasing Proposition 98 minimum funding guarantee at a level approximately \$2 billion less than would otherwise be required for Fiscal Year 2004-05.

2. A new fee policy for higher education where future undergraduate and graduate level fee increases are tied to increases in per-capita personal income, with flexibility to increase fees by not more than an average of 10% a year over the next three years. Under the fee policy, graduate fees may increase at rates in excess of undergraduate fees until a 50% differential is achieved. In Fiscal Year 2004-05, fees are increased 14% for undergraduates and 20% for graduate students. The 2004 Budget Act includes \$750 million in various spending reductions for higher education from otherwise mandated levels.

3. The 2004 Budget Act does not include any savings attributed to Medi-Cal redesign, but does include \$992 million in reductions in various social service programs from otherwise mandated levels.

4. The 2004 Budget Act eliminates State contributions to CalPERS on behalf of new State employees for the first two years of employment. In addition, the 2004 Budget Act assumes the issuance of \$929 million pension obligation bonds to cover a portion of the State's required contributions to CalPERS in Fiscal Year 2004-05. Of this amount, \$577 million is reflected as a revenue transfer and \$352 million as savings.

5. The 2004 Budget Act assumes the issuance of \$929 million in pension obligation bonds to pay a portion of the pension obligations in Fiscal Year 2004-05. In addition, approximately \$2 billion of ERB proceeds will be used to offset Fiscal Year 2004-05 General Fund expenditures. In contrast, in Fiscal Year 2003-04, aggregate borrowings to address current expenses and accumulated deficits are estimated at \$11.5 billion, including \$2.3 billion of tobacco securitization proceeds and \$9.2 billion of economic recovery proceeds (representing approximately \$11.254 billion of total bond proceeds, less \$2 billion deposited into the Deficit Recovery Fund).

6. The elimination of the VLF offset program beginning in Fiscal Year 2004-05.

7. The 2004 Budget Act includes \$300 million in additional revenues as a result of the renegotiation of tribal gaming compacts and the negotiation of new compacts with tribes that wish to expand gaming activities. The 2004 Budget Act authorizes the State to sell the revenue stream to be received from payments made by certain Indian tribes to secure up to \$1.5 billion of securities, the proceeds of which will be used by the State to repay prior transportation loans. Issuance of these securities is contingent upon the failure of certain propositions that have qualified for the November 2004 ballot.

8. The 2004 Budget Act includes: (i) \$1.206 billion in savings for the suspension of the Transportation Investment Fund transfer; (ii) \$450 million in savings from deposits of punitive damages awards used to offset General Fund costs in Fiscal Year 2004-05; (iii) \$206 million for spending reduction that would result from changes in the correctional system; and (iv) \$150 million of additional savings.

In its May 17, 2004 Report, the LAO projected that the State would end the fiscal year with a modest reserve of \$870 million. The LAO also stated that a \$6 billion operating shortfall would re-emerge in Fiscal Year 2005-06. Although this shortfall could be substantially offset through accessing carryover reserves and using the remaining Proposition 57 authorization, the State budget would still be modestly out of balance. The LAO further stated that following Fiscal Year 2005-06, the State would again face major budget shortfalls, absent significant

corrective actions. The LAO estimated that the Fiscal Year 2006-07 shortfall would approach \$8 billion, and that annual operating deficits above \$6.5 billion would persist for the forecast period.

Over three dozen cities have filed a petition for writ of mandate (*City of Cerritos et al. v. State Board of Equalization*) seeking to prohibit the State Board of Equalization from implementing a 1/4¢ reduction in the amount of sales and use tax that may be collected by local governments. This reduction was approved by the Legislature in 2003 along with Proposition 57 and a 1/4¢ increase in the State sales and use tax to secure the State's ERBs. Neither the petition filed by the cities nor the cities' briefs filed in this matter challenge the authorization for the issuance of the ERBs or the imposition of the temporary 1/4¢ increase in the State sales and use tax. A hearing on the petition was held May 14, 2004, and on June 3, 2004 the court issued an order denying the cities' petition. The cities have appealed the court's decision and the matter is now pending at the appellate level.

### Litigation

The State is a party to numerous legal proceedings. The following are the most significant pending proceedings, as reported by the Office of the Attorney General.

Although the State estimates that there will be an operating deficit in Fiscal Year 2005-06, the State will continue working with the Legislature to address any remaining operating deficit. Savings, which cannot be determined at this time, are anticipated from various budget reform proposals, which will help reduce the operating deficit in fiscal year 2005-06.

Challenge to Discontinuation of VLF Offset and Related Payments to Local Governments. In June 2003, the previous Administration determined that there were insufficient monies available to be transferred from the General Fund to fund VLF offset payments the State was making to local governments (as described above), and such offsets were discontinued. Correspondingly, the amount of VLFs paid by vehicle owners and mobile home owners increased. Shortly after taking office on November 17, 2003, the new Governor issued an executive order rescinding the previous Governor's action and directing the Department of Motor Vehicles (the "DMV") to reinstate the General Fund offset to the VLF. By subsequent administrative action, the Administration adjusted current year expenditures in order to commence transfers from the General Fund to local government in the amount of the offsets.

On January 30, 2004, *Robert Brooks and David Gautreaux v. Governor Arnold Schwarzenegger* was filed in the Los Angeles County Superior Court. Plaintiffs allege that the adjustments of current year expenditures made by the Administration in order to provide for the transfers to local governments violates the State Constitution, and ask the court to enjoin the Director of Finance and the Controller from making offset-related payments to local governments until an appropriation for that purpose is made by the Legislature. This matter is pending in trial court.

Challenge Seeking Payment to Teacher's Retirement Board. In May 2003, the Legislature statutorily reduced a continuing appropriation to CalSTRS Supplemental Benefit Maintenance Account ("SBMA") for Fiscal Year 2003-04 by \$500 million, and provides that in future fiscal years, the \$500 million may be returned if needed to make the SBMA actuarially sound. In October 2003, CalSTRS petitioned the California Supreme Court (*Teacher's Retirement Board, as Manager of the California State Teachers, Retirement System, et al. v.*

*Steve Peace, Director of California Department of Finance, et al.*) to compel the State Controller to transfer funds from the General Fund to the SBMA in an amount equal to the continuing appropriation as it existed prior to the enactment of the legislation. Summary judgment motions were heard on August 20, 2004, and if not granted, trial is currently scheduled to begin on December 17, 2004.

Actions Seeking Flood-Related Damages. In January 1997, California experienced major flooding with preliminary estimates of property damage of approximately \$1.6 to \$2.0 billion. In *McMahon v. State*, a substantial number of plaintiffs have joined suit against the State, local agencies, and private companies and contractors seeking compensation for the damages they suffered as a result of the flooding. A trial date has been scheduled for October 24, 2004.

*Paterno v. State of California*, is a coordinated action involving 3,000 plaintiffs seeking recovery for damages caused by the Yuba River flood of February 1986. The trial court found liability in inverse condemnation and awarded damages of \$500,000 to a sample of plaintiffs. The State's potential liability to the remaining plaintiffs ranges from \$800 million to \$1.5 billion. In 1992, the State and plaintiffs filed appeals of the decision in the sample plaintiffs' action, and upon remand, plaintiffs' inverse condemnation cause of action was re-tried. The trial court ruled that plaintiffs take nothing from defendants. The outcome of this trial controls with regard to the claims of all other plaintiffs. The appellate court reversed the trial court judgment, remanded the case to the trial court with direction to enter judgment in favor of plaintiffs and ordered the State to pay costs on appeal and costs of suit, including reasonable attorney, appraisal and engineering fees actually incurred. On March 17, 2003, the Supreme Court denied the State's petition for review, thus ending the liability phase of the trial. Damages and expenses are being litigated at the trial court level.

Tax Refund Cases. Six pending cases challenge the Franchise Tax Board's (the "FTB") treatment of receipts from investment of cash in short-term financial instruments, and the resulting impact on the apportionment of corporate income allegedly earned outside of California to the corporation's California tax obligation. In *General Motors Corp. v. Franchise Tax Board*, the appellate court affirmed the trial court's ruling in favor of the FTB on this issue and General Motors has filed a petition for review of this decision with the California Supreme Court. *The Limited Stores, Inc. and Affiliates v. Franchise Tax Board* is pending in appellate court; *Toys "R" Us, Inc. v. Franchise Tax Board* also is pending in appellate court and so is *Microsoft Corporation v. Franchise Tax Board*. The trial courts in *The Limited Stores* and *Toys "R" Us* ruled in favor of the FTB on this issue; in *Microsoft Corporation*, the trial court ruled against the FTB. *Montgomery Ward LLC v. Franchise Tax Board* and *Colgate Palmolive v. Franchise Tax Board* are both pending in trial court. Other taxpayers have raised this same issue in administrative actions. A final decision in favor of any of these plaintiffs could result in tax refunds to similarly situated taxpayers in an amount exceeding \$400 million, with a potential future annual revenue loss of 85 million. The State is vigorously litigating this issue.

In *County of Orange v. Orange County Assessment Appeals Board #3, Bezaire, et. al., Real Parties in Interest*, Orange County has appealed a trial court judgment that the assessor's office received property taxes from two taxpayers in excess of the Constitutional amounts collectable under Proposition 13. The legal claim in this class action lawsuit focuses on the constitutionality of the practice of the Orange County assessor's office to increase or "recapture" the assessed values of real properties that temporarily decline and then increase in value. On July 21, 2004, the State Supreme Court denied plaintiff's petition for review, bringing the case to

a close. However, a similar challenge to which the State is not a party, is pending at the appellate level, and the effect of a final determination that the contested assessment practices are contrary to Proposition 13 could result in an increase in the State General Fund component of the financing guarantee established by Proposition 98 in an amount in excess of several billion dollars.

Environmental Cleanup Matter. In *In the Matter of Leviathan Mine*, Alpine County, California, Regional Water Quality Control Board, Lahontan Region, State of California, the State, as owner of the Leviathan Mine, is a party through the Lahontan Regional Water Quality Control Board (the "Board"), which is the State entity potentially responsible for performing certain environmental remediation at the Leviathan Mine site. Also a party is ARCO, the successor in interest to the mining company that caused certain pollution of the mine site. The Leviathan Mine site is listed on the Environmental Protection Agency (the "EPA") "Superfund" List, and both remediation costs and costs for natural resource damages may be imposed on the State. The Board has undertaken certain remedial action at the mine site, but the EPA's decision on the interim and final remedies are pending. ARCO has filed several state law claims against the State with the California Victim Compensation and Government Claims Board (an administrative agency with which certain claims must be filed as a prerequisite to litigation seeking damages against the State), but litigation on these claims have been tolled by agreement of the parties until at least October, 2004. It is possible these matters could result in a potential loss to the State in excess of \$400 million.

Energy Matters. In *People v. ACN Energy, Inc., et al.*, the court is considering whether and to what extent compensation is due to market participants who have claimed compensation as a result of certain executive orders issued under the California Emergency Service Act "commandeering" power purchase arrangements held by Pacific Gas & Electric Company ("PG&E") and Southern California Edison ("SCE"), referred to as "block forward contracts." In this action, the State seeks a declaration that it is not liable for damages as a result of these orders, nor for compensation for inverse condemnation, and that any damages suffered by any of the defendants is offset by payments made by the DWR for electricity received under the commandeered block forward contracts. Complaints and cross-complaints for inverse condemnation, recovery under the Emergency Services Act and other causes of action brought by various electric utilities and numerous other market participants have been joined. In an administrative proceeding before the Government Claims Board, which was dismissed on procedural grounds, the California Power Exchange stated claims for "commandeering" the "block forward contracts" in the amount of approximately \$1.0 billion.

In *Pacific Gas and Electric Company v. The State of California*, PG&E filed a complaint for breach of contract alleging that statutes enacted in 1996 as part of the restructuring of the electric power industry in California (the "Restructure") established a "regulatory contract" between the State and PG&E that authorized PG&E to sell the output of its retained generation facilities in interstate power markets at regulated prices and to sell the facilities themselves, and that by amending the Restructure in 2001, the State deprived PG&E of the right to such sales and thereby breached that "regulatory contract." PG&E's complaint seeks unspecified damages, but in a previous administrative procedure PG&E sought damages of at least \$4.3 for similar losses. In January 2002, the court dismissed the lawsuit. The plaintiffs have appealed.

Escheated Property Claims. In three pending cases, plaintiffs claim that the State Controller has a constitutional and statutory duty to give notice prior to the time that the

Controller sells property that has escheated to the State: *Lusby-Taylor v. Connell*, *Orfield v. Connell* and *Suever v. Connell*. The plaintiffs seek damages, which certain plaintiffs in the amount of the difference between the amount they were paid for the stock upon its sale, and either the current value of the stock or the highest market value of the stock between the date the stock was sold and the present. All the cases are styled as class actions, though in *Lusby-Taylor* and *Harris*, that issue was not determined prior to the trial court decisions that are being appealed. If one or more of these cases are successful as a class action and the class ultimately prevails on the merits, damages for the class could be in excess of \$500 million. The State has prevailed at the trial court in *Suever* and *Lusby-Taylor* and at both the trial court. *Orfield* is being litigated in the trial court.

In three pending cases, plaintiffs claim that the State Controller has an obligation to pay interest on private property that has escheated to the State, and that failure to do so constitutes an unconstitutional taking of private property: *Morris v. Westly*; *Trust Realty Partners v. Westly*; and *Browne v. Westly*. The *Browne* and *Trust Realty* lawsuits focus on the State's elimination of interest payments on unclaimed property claims, and the *Morris* lawsuit challenges both the elimination of interest and whether the State's custodial use of escheated funds entitles the claimant to constructive interest. The *Morris* case seeks a class action determination, and identifies a purported class that could be interpreted to include all persons or entities whose property has been taken into custody by the State. On behalf of the articulated class, the plaintiff in *Morris* seeks a declaration that failure to pay interest is an unconstitutional taking and, among other things, an injunction restraining the State Controller from pursuing the practices complained of in the complaint. The *Browne* and *Trust Realty Partners* cases are not styled as class actions suits, but in addition to seeking general and special damages in a sum according to proof at trial, each case seeks a common fund recovery and an injunction restraining the Controller from engaging in the acts alleged in their respective complaints. If the *Morris* case ultimately prevails as a class action, or the injunctions prayed for in either of the *Browne* or *Trust Realty Partners* cases are issued and upheld, in any case to require the State Controller to pay interest on escheated property as the plaintiffs allege is required by law, costs to the State could be in excess of \$500 million.

Action Seeking Damages for Alleged Violations of Privacy Rights. In *Gail Marie Harrington-Wisely, et al. v. State of California, et al.*, a proposed class action, plaintiffs seek damages for alleged violations of prison visitors' rights resulting from the Department of Corrections' use of a body imaging machine to search visitors entering state prisons for contraband. If this action is certified as a class action, and a court were to award damages pursuant to its statutory authority for every use of the body-imaging machine, damages could be as high as \$3 billion.

Actions Seeking Program Modification. In the following cases, plaintiffs seek court orders or judgments that would require the State to modify existing programs and, except as specified, do not seek monetary damages. Nevertheless, a judgment against the State in any one of these cases could require changes in the challenged program that could result in increased programmatic costs to the State in a future fiscal year in excess of \$400 million. Alternatively, in some circumstances, it may be possible that a judgment against the State could be addressed by legislative changes to the program that would cost less.

In *Williams, et al., v. State of California, et al.*, a class action for declaratory and injunctive relief brought by public school students against the State, the Board of Education, and

Department of Education and the Superintendent of Public Instruction, the class alleges inadequacies in the public education system and seeks a variety of programming changes. A conditional settlement has been reached, which provides proposed legislation which would fund a program to authorize school districts to spend up to \$800 million over a period of years for repairs of school facilities at the lowest performing schools; \$138.7 million for new instructional materials for students attending certain low performing schools; and \$50 million to conduct an assessment of facilities conditions, supplement county school superintendents' capacity to oversee low performing schools and to fund emergency repairs in low performing schools. The legislation also establishes requirements regarding the use of these funds and a variety of other provisions pertaining to education in California. Pursuant to the settlement agreement, the plaintiffs are required to notify the State on or before October 15, 2004, whether the plaintiffs agree that legislation has been adopted as of that date which substantially conforms to the terms of the settlement agreement. The parties have agreed to engage in consultation if substantially conforming legislation has not been adopted as of that date.

In *Natural Resources Defense Council et al. v. California Department of Transportation et al.*, plaintiffs obtained an injunction requiring the Department of Transportation (the "DOT") to comply with National Pollution Discharge Elimination System requirements under the Federal Clean Water Act in connection with storm water discharges from State highways and construction sites in the area that includes Los Angeles and Ventura Counties. There is an established dispute resolution procedure intended to resolve disputes without a return to Federal court. Subsequent modifications of the injunction have provided for, among other things, studies of pilot projects to address control of the sources of storm water pollution and the performance of studies of pilot projects to retrofit highways with storm water pollution control facilities. There has been no agreement regarding what measures arising out of these studies will be implemented. Plaintiff's position is that the DOT should be required to retrofit its facilities with devices to treat storm water regardless of whether any construction is planned in any given area. For planning purposes, the DOT is including an additional 3% in the cost of all construction and maintenance projects to pay for compliance measures. This 3% increase amounts to \$500 million through Fiscal Year 2006-07. While the impact of a judgment of the scope sought by the plaintiffs is difficult to determine, it is possible that a judgment that would require the State to retrofit all its highway facilities throughout the State could cost billions of dollars.

The following cases seek reforms to State programs for the treatment of institutionalized disabled persons. Some rough estimates suggest the financial impact of a judgment against the State in any of these cases could be as high as \$1 billion per year in programming costs going forward.

In *Stephen Sanchez, et al. v. Grantland Johnson, et al.*, the plaintiffs have appealed a decision dismissing a class action seeking declaratory and injunctive relief, alleging, in part, that provider rates for community-based services for developmentally disabled individuals are discriminatory under the Americans with Disabilities Act (the "ADA") and violate the Social Security Act, the Civil Rights Act and the Rehabilitation Act because they result in unnecessary institutionalization of developmentally disabled persons.

In *Capitol People First v. Department of Developmental Services*, a consortium of state and national law firms and public-interest groups brought suit against the Department of Finance, California Department of Developmental Services and California Department of Health Services. The suit alleges that defendants are violating the Lanterman Act, the ADA, and the

Rehabilitation Act by needlessly isolating thousands of people with developmental disabilities in large facilities. The case seeks sweeping reforms, including requiring the State to offer a full range of community-based services.

Action for Damages for Alleged Destruction of Indian Burial Sites. On January 16, 2004, *John Tommy Rosas v. United States of America, et seq.* was filed in Federal district court. In his complaint, plaintiff, in his individual capacity and as a vice-chairman of the Gabrielino/Tongva Indians of California Tribal Counsel, alleges violation of numerous Federal and State statutes, and provisions of the U.S. and State Constitutions, by a variety of Federal agencies, corporations, individuals and four State entities. The factual allegations pertain to an agreement among various defendants allegedly permitting the development of areas identified by plaintiff as sacred sites and Indian burial areas. Plaintiff seeks damages in the amount of \$525 million. Plaintiff has not properly served the State agencies as defendant. In February 2004, the corporate defendants filed a notice to dismiss, which is pending before the court.

Local Government Mandate Claims and Actions. In a test claim filed by the County of San Bernardino, now pending before the Commission on State Mandates (the "Commission"), the Commission is being asked to determine the costs incurred by the county to provide state-mandated care of medically indigent adults ("MIAs"). The amount demanded in the claim for unreimbursed costs for Fiscal Year 2000-2001 is just over \$9.2 million. The test claim poses a potential for a negative impact on the General Fund in the amount of the unreimbursed costs for all similarly situated county claimants for a period of years, as determined by the Commission. Certain estimates of the annual cost of the services rendered by all counties to MIAs exceed \$4 billion. How much of that will be determined to be "unreimbursed" to the counties by the State is unknown.

In recent years, the counties have received approximately \$1 billion annually in VLF revenue and \$410 million annually in sales tax revenue to fund various public health programs, which include the programs that provide services to MIAs. The State law that authorized the transfer of the e portion of this revenue to the counties and the authority to transfer the revenue to the counties were automatically repealed as a result of a provision of State law, which was triggered as a result of a separate final appellate court decision that awarded the County of San Diego unreimbursed costs for medical services rendered to MIAs. Various regulatory and statutory steps have been and are being taken to address this reduction in revenues.

Six lawsuits are pending that challenge the State's practice in recent years of deferring payments to local governments for certain state-mandated services and programs by making a budgetary appropriation of \$1,000 for each program, to be divided among all 58 counties. Four lawsuits were consolidated in the Sacramento County Superior Court (*County of San Diego v. State of California, et al.*; *County of Orange v. State of California, et al.*; *Sacramento County v. State of California, et al.*; and *County of Contra Costa v. State of California, et al.*). In this consolidated case, the trial court ruled that a single \$1,000 appropriation for the costs of a program to provide mental health services to disabled students did not constitute full reimbursement of the mandated costs of that program, as required by the State Constitution and that the plaintiff counties were relieved of the obligation to provide the mandated mental health services absent adequate good faith reimbursement from the State. The Administration has not yet determined whether to appeal this judgment. Two additional lawsuits alleging that the State's practice violates the State Constitution were consolidated in San Diego County Superior Court (*County of San Diego v. State of California, et al.* and *County of Orange v. State of California, et*

*al.*) These plaintiff counties are seeking full payment for the unreimbursed costs of implementing a variety of programs over the last few years. A hearing on the counties' motion for judgment on the pleadings is scheduled for October 15, 2004. The County of San Diego has alleged unreimbursed costs in excess of \$40 million through Fiscal Year 2004-05 for a variety of programs. The County of Orange has alleged in excess of \$116 million for unreimbursed state-mandated costs. The effects of a final determination by an appellate court that the contested appropriation practices are unconstitutional or that the State is required to appropriate an amount equal to the amount of the mandated costs, if applied to each of California's 58 counties, could result in costs in excess of \$1.5 billion for existing unreimbursed mandates.

## APPENDIX B Rating Categories

Description of certain ratings assigned by S&P, Moody's and Fitch:

### **S&P**

#### Long-term

### **AAA**

An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

### **AA**

An obligation rated 'AA' differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

### **A**

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

### **BBB**

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

### **BB, B, CCC, CC, and C**

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

### **BB**

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

### **B**

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

## **CCC**

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

## **CC**

An obligation rated 'CC' is currently highly vulnerable to nonpayment.

## **C**

A subordinated debt or preferred stock obligation rated 'C' is currently highly vulnerable to nonpayment. The 'C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action taken, but payments on this obligation are being continued. A 'C' also will be assigned to a preferred stock issue in arrears on dividends or sinking fund payments, but that is currently paying.

## **D**

An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

## **r**

The symbol 'r' is attached to the ratings of instruments with significant noncredit risks. It highlights risks to principal or volatility of expected returns which are not addressed in the credit rating. Examples include: obligations linked or indexed to equities, currencies, or commodities; obligations exposed to severe prepayment risk—such as interest-only or principal-only mortgage securities; and obligations with unusually risky interest terms, such as inverse floaters.

## **N.R.**

The designation 'N.R.' indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular obligation as a matter of policy.

Note: The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign designation to show relative standing within the major rating categories.

### Short-term

## **SP-1**

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus sign (+) designation.

**SP-2**

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

**SP-3**

Speculative capacity to pay principal and interest.

Commercial paper

**A-1**

This designation indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong safety characteristics are denoted with a plus sign (+) designation.

**Moody's**

Long-term

**Aaa**

Bonds rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

**Aa**

Bonds rated 'Aa' are judged to be of high quality by all standards. Together with the 'Aaa' group they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in 'Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the 'Aaa' securities.

**A**

Bonds rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

**Baa**

Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

**Ba**

Bonds rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

## **B**

Bonds rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

## **Caa**

Bonds rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

## **Ca**

Bonds rated 'Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

## **C**

Bonds rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Note: Moody's applies numerical modifiers 1, 2, and 3 in each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

### Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by many of the following characteristics:

Leading market positions in well-established industries.

High rates of return on funds employed.

Conservative capitalization structure with moderate reliance on debt and ample asset protection.

Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

Well-established access to a range of financial markets and assured sources of alternate liquidity.

## MIG/VMIG—U.S. short-term

Municipal debt issuance ratings are designated as Moody's Investment Grade (MIG) and are divided into three levels—MIG 1 through MIG 3.

The short-term rating assigned to the demand feature of variable rate demand obligations (VRDOs) is designated as VMIG. When either the long- or short-term aspect of a VRDO is not rated, that piece is designated NR, e.g., Aaa/NR or NR/VMIG 1.

### **MIG 1/VMIG1**

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

### **MIG 2/VMIG 2**

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

### **MIG 3/VMIG 3**

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

### **SG**

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

## **Fitch**

### Long-term investment grade

#### **AAA**

**Highest credit quality.** 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

#### **AA**

**Very high credit quality.** 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

#### **A**

**High credit quality.** 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

## **BBB**

**Good credit quality.** 'BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

### Long-term speculative grade

## **BB**

**Speculative.** 'BB' ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

## **B**

**Highly speculative.** 'B' ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.

## **CCC, CC, C**

**High default risk.** Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. 'CC' ratings indicate that default of some kind appears probable. 'C' ratings signal imminent default.

## **DDD, DD, D**

**Default.** The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. 'DDD' obligations have the highest potential for recovery, around 90% - 100% of outstanding amounts and accrued interest. 'DD' ratings indicate potential recoveries in the range of 50% - 90% and 'D' the lowest recovery potential, i.e., below 50%.

Entities rated in this category have defaulted on some or all of their obligations. Entities rated 'DDD' have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated 'DD' and 'D' are generally undergoing a formal reorganization or liquidation process; those rated 'DD' are likely to satisfy a higher portion of their outstanding obligations, while entities rated 'D' have a poor prospect of repaying all obligations.

### Short-term

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

**F1**

**Highest credit quality.** Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

**'NR'** indicates that Fitch does not rate the issuer or issue in question.

Notes to long-term and short-term ratings: A plus (+) or minus (-) sign designation may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' long-term rating category, to categories below 'CCC', or to short-term ratings other than 'F1.'
