Founded in 1983, The Managers Funds offers individual and institutional investors the experience and discipline of some of the world's most highly regarded investment professionals.

Investments in The Managers Funds are not deposits or obligations of, or guaranteed or endorsed by, any bank. Shares of the funds are not federally insured by the Federal Deposit Insurance Corp., the Federal Reserve Board, or any governmental agency.

Letter to Shareholders

Dear Fellow Shareholder:

Although the turn of the calendar over to the year 2000 went rather smoothly for most of the world, the financial markets have been anything but smooth throughout the first half of 2000. Uncertainty about the rate of inflation, the sustainability of corporate profit growth and the actions of the Federal Reserve Board (“the Fed”) to slow the economy and tame the stock markets have all contributed to creating one of the most volatile market environments ever.

The domestic stock market began the year in much the same way that it finished 1999, with huge variations in returns between “types” of stocks and seemingly broad investment indices. For example, while small capitalization stocks, as measured by the Russell 2000 index, had risen almost 11% into mid-March, the Dow Jones Industrial Average had lost more than 11%. Investors focused almost exclusively on *New Economy* stocks while all but ignoring others. The tide turned sharply in late March, however, as the Fed’s effort to cool the economy had an effect. Investors also began to worry that many of the newest *new economy* companies might not be able to survive their early unprofitable stages long enough to make it into the black. As a result, stocks of companies in technology, media and telecommunication businesses (“TMT stocks”) fell sharply in late March and April. Given the meteoric rise of TMT stocks in the previous months, a sharp correction was not all that surprising.

Many investment pundits and economists believe that the wealth effect created by strong stock market returns over the past few years has been significant in supporting consumer spending and thus economic growth. Because of this, there has been concern that any severe break in stock prices would reverse the virtuous economic cycle that we have been experiencing and send the economy into a downward spiral. This doesn’t seem to have happened. While anecdotal evidence suggests that the economy is slowing, it doesn’t seem to be in any danger of reversing.

Due to a number of cross currents, the fixed-income markets were also very active throughout the period. In its effort to control inflation and maintain economic growth within a sustainable rate, the Fed raised the Fed Funds Target and Discount Rates three times for a total of one full percentage point during the first half of 2000. Meanwhile, the Federal Government proceeded to buy back 30-year U.S. Treasury bonds, which drove the price of those securities higher and thus the effective yields lower. The Treasury also announced that it will reduce the amount of debt it issues going forward. As a result, the yield curve for Treasury securities has moved into what is known as an inverted shape where short-term Treasuries provide a higher yield than do long-term securities.

In addition to the Government’s monetary policy actions, Congress began to debate whether or not the Federal government should continue to guarantee debt issued by Government Sponsored Entities such as GNMA. Although the debate is unlikely to yield any decisions soon, the uncertainty weakened confidence in agency securities, which also spread to other investment grade debt as well.

What all of this meant for investors during the period was that short-term debt securities performed well because, as they matured, investors were able to reinvest at higher rates. Long-term Treasury securities also performed well because their coupons remained stable while their prices rose. Meanwhile, investors holding medium-term securities, particularly corporate issues, realized no benefit from rising rates while the prices of their securities were flat or drifted lower.

Along with the markets, The Managers Funds made a few significant changes during the first half of 2000. In an effort to better diversify the management styles of the two sub-advisors of Managers Income Equity Fund, we replaced one of the Fund’s sub-advisors, Scudder Kemper Investments, Inc., with Armstrong Shaw Associates Inc. Jeff Shaw and his investment team at Armstrong Shaw have been successfully managing mid- and large-capitalization equity portfolios with an “absolute value” investment philosophy since 1984.

Within Managers International Equity Fund we have added a third sub-advisor, Mastholm Asset Management, L.L.C., to whom we are gradually raising the allocation to a target of one third of the Fund's assets. Mastholm, formed in 1997, combines the talents of three portfolio managers who have developed their international growth equity investment discipline over the last 15 years.

In late June, we added a brand new Fund to our family, Managers Small Company Fund. This Fund combines the portfolios of two sub-advisors. HLM Management Co., Inc. is a team oriented "emerging growth" manager that has been managing exclusively small- capitalization and private equity portfolios since 1983. Kalmar Investment Advisors, Inc. has been managing small company portfolios since 1982, using a "Growth with Value" philosophy developed by founder Ford Draper Jr..

In addition, on August 1st, we expanded our family of funds by acquiring three new funds, Managers Short Duration Government Fund, Managers Intermediate Duration Government Fund, and Managers U.S. Stock Market Plus Fund. All three Funds are currently being sub-advised by Smith Breeden Associates, Inc., a well respected, privately owned institutional investment manager that specializes in managing fixed-income securities. The largest of the new Funds is Managers U.S. Stock Market Plus Fund, an enhanced index fund intended to mimic the performance of the S&P 500 index while utilizing the fixed income talents of Smith Breeden Associates, Inc. to add value.

A more in-depth description of all of our portfolio managers, including the new additions, is available on our recently improved internet website, www.managersfunds.com. In addition, the performance results of all of our Funds are listed in a table on the following page.

As always, should you have any questions on this Semi-Annual Report, please feel free to contact us at 1-800-835-3879. We thank you for your continued investment in The Managers Funds.

Sincerely,

Peter M. Lebovitz

Past performance is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed may be more or less than the original cost. For a Prospectus including fees and expenses, please visit our website at www.managersfunds.com, or call The Managers Funds LLC at (800) 835-3879 or your investment adviser. Read the prospectus carefully before you invest. The Managers Funds are distributed by The Managers Funds LLC, a NASD member.

- (a) Total return equals income yield plus share price change and assumes reinvestment of all dividends and capital gain distributions. Returns are net of fees and may reflect offsets of Fund expenses as described in the Prospectus. No adjustment has been made for taxes payable by shareholders on their reinvested dividends and capital gain distributions. Returns for periods greater than one year are annualized.
- (b) Morningstar proprietary ratings reflect historical risk-adjusted performance as of 06/30/00 and are subject to change every month. The ratings are calculated from the Funds' three-, five- and ten-year average annual returns (if applicable) in excess of 90-day Treasury bill returns with appropriate fee adjustments, and a risk factor that reflects fund performance below 90-day Treasury bill returns. For the three-, five- and ten-year periods, respectively, each of the Equity Funds rated, other than the International Equity Fund, were rated against 3,642, 2,328 and 783 equity funds, the International Equity Fund was rated against 1,148, 701 and 141 international equity funds, and each of the Income Funds were rated against 1,684, 1,287 and 381 taxable fixed-income funds. The top ten percent of the funds in an investment class receive five stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star.
- (c) Small Company's return is since inception (June 19, 2000).

* Non-incoming producing security

(a) Security exempt from registration under Rule 144A of the Securities Act of 1933. This security may be resold in transactions exempt from registration, normally to qualified buyers. At June 30, 2000, the value of these securities amounted to the following:

<u>Fund</u>	<u>Market Value</u>	<u>% of Net Assets</u>
Emerging Markets	\$1,912,912	13.2%
Bond	4,468,917	11.2%
Global Bond	230,004	1.0%

¹ Yields shown for each investment company represents the June 30, 2000, seven-day average yield, which refers to the sum of the previous seven days' dividends paid, expressed as an annual percentage.

² Some or all of these shares were out on loan to various brokers as of June 30, 2000, amounting to:

<u>Fund</u>	<u>Market Value</u>	<u>% of Net Assets</u>
Capital Appreciation	\$11,820,313	3.3%
Special Equity	45,218,682	2.1%

³ Collateral received from brokers for securities lending were invested in these short-term investments or government investments.

⁴ Zero coupon security.

⁵ Variable rate security. Coupon rate disclosed is that in effect at June 30, 2000.

Investments Definitions and Abbreviations:

ADR/GDR: Securities whose value is determined or significantly influenced by trading on exchanges not located in the United States or Canada. ADR after the name of a holding stands for American Depositary Receipt, representing ownership of foreign securities on deposit with a domestic custodian bank; a GDR (Global Depositary Receipt) is comparable, but foreign securities are held on deposit in a non-U.S. bank. Sponsored ADR/GDRs are initiated by the underlying foreign company.

AMBAC: Ambac Assurance Corp.

FGIC: Financial Guaranty Insurance Co.

FNMA: Federal National Mortgage Association

New York registered shares: A security whose shares are registered on the New York Stock Exchange.

Registered shares: A security whose owner has been recorded with its issuer or issuer's registrar.

Yankee Bond: A foreign bond denominated in U.S. dollars and registered with the Securities and Exchange Commission for sale in the United States.

Abbreviations have been used throughout this portfolio to indicate amounts shown in currencies other than the U.S.

Dollar (USD):

CAD: Canadian Dollar

DKK: Danish Krone

EUR: euro

GBP: British Pound

JPY: Japanese Yen

NOK: Norwegian Krone

SEK: Swedish Krona

Notes to Financial Statements

June 30, 2000 (unaudited)

(1) Summary of Significant Accounting Policies

The Managers Funds (the "Trust") is a no-load, open-end, management investment company, organized as a Massachusetts business trust, and registered under the Investment Company Act of 1940, as amended (the "1940 Act"). Currently the Trust is comprised of 10 investment series. Included in this report are six equity funds, Managers Income Equity Fund ("Income Equity"), Managers Capital Appreciation Fund ("Capital Appreciation"), Managers Small Company Fund ("Small Company"), Managers Special Equity Fund ("Special Equity"), Managers International Equity Fund ("International Equity") and Managers Emerging Markets Equity Fund ("Emerging Markets Equity") (collectively the "Equity Funds") and three fixed-income funds, Managers Bond Fund ("Bond"), Managers Global Bond Fund ("Global Bond") and Managers Short and Intermediate Bond Fund ("Short and Intermediate Bond") (collectively the "Fixed-Income Funds"), collectively the "Funds."

The Funds' financial statements are prepared in accordance with accounting principles generally accepted in the United States which require management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting periods. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements:

(a) Valuation of Investments

Equity securities traded on a domestic or international securities exchange are valued at the last quoted sales price, or, lacking any sales, at last quoted bid price. Over-the-counter securities for which market quotations are readily available are valued at the last quoted sales price, or, lacking any sales, at the last quoted bid price. Fixed-income securities are valued based on valuations furnished by independent pricing services that utilize matrix systems, which reflect such factors as security prices, yields, maturities, and ratings, and are supplemented by dealer and exchange quotations. Short-term investments, having a remaining maturity of 60 days or less, are valued at amortized cost, which approximates market. Investments in other regulated investment companies are valued at their end of day net asset value per share. Securities for which market quotations are not readily available are valued at fair value, as determined in good faith and pursuant to procedures adopted by the Board of Trustees.

Investments in certain mortgage-backed, stripped mortgage-backed, preferred stocks, convertible securities and other debt securities not traded on an organized market, are valued on the basis of valuations provided by dealers or by a pricing service which uses information with respect to transactions in such securities, various relationships between securities and yield to maturity in determining value.

(b) Security Transactions

Security transactions are accounted for as of trade date. Realized gains and losses on securities sold are determined on the basis of identified cost.

(c) Investment Income and Expenses

Dividend income is recorded on the ex-dividend date, except certain dividends from foreign securities where the ex-dividend date may have passed are recorded as soon as the Trust is informed of the ex-dividend date. Dividend income on foreign securities is recorded net of withholding tax. Interest income is determined on the basis of interest accrued. Discounts and premiums are amortized using the effective interest method when required for Federal income tax purposes. Non-cash dividends included in dividend income, if any, are reported at the fair market value of the securities received. Other income and expenses are recorded on an accrual basis. Expenses that cannot be directly attributed to a particular fund are apportioned among the funds in the Trust, and in some cases other funds in the family, based upon their relative average net assets.

Each of the Equity Funds, except Emerging Markets Equity and Small Company, had certain portfolio trades directed to various brokers who paid a portion of such Fund's expenses. For the six months ended June 30, 2000, under these arrangements the custody expenses were reduced as follows: Income Equity - \$10,112; Capital Appreciation - \$28,843; Special Equity - \$30,384; and International Equity - \$28,001.

In addition, each of the Funds has a "balance credit" arrangement with the custodian bank whereby each Fund is

Notes to Financial Statements (continued)

credited with an interest factor equal to 0.75% of the nightly Fed Funds rate for account balances left uninvested overnight. These credits serve to reduce custody expenses that would otherwise be charged to the Funds. For the six months ended June 30, 2000, under these arrangements the custody expenses were reduced as follows: Income Equity - \$2,585; Capital Appreciation - \$6,617; Special Equity - \$12,915; International Equity - \$124; Emerging Markets Equity - \$326; Bond - \$834; Global Bond - \$171; and Short and Intermediate Bond - \$99.

The Managers Funds LLC (the "Investment Manager"), a subsidiary of Affiliated Managers Group, Inc. ("AMG"), has contractually agreed, through at least December 31, 2000, to waive fees and pay or reimburse Small Company to the extent that the total expenses of the Fund exceed 1.30% of the Fund's average daily net assets. Small Company is obligated to repay the Investment Manager such amount waived, paid or reimbursed in future years provided that the repayment occurs with three (3) years after the waiver or reimbursement and that such repayment would not cause the Fund's expenses in any such year to exceed 1.30% of the Fund's average daily net assets.

Total returns for the Funds would have been lower had certain expenses not been offset.

(d) Dividends and Distributions

Dividends resulting from net investment income, if any, normally will be declared and paid annually for Global Bond and the Equity Funds, except for Income Equity. Dividends resulting from net investment income, if any, normally will be declared and paid quarterly for Income Equity and monthly for Bond and Short and Intermediate Bond. Distributions of capital gains, if any, will be made on an annual basis and when required for federal excise tax purposes. Income and capital gain distributions are determined in accordance with Federal income tax regulations, which may differ from generally accepted accounting principles. These differences are primarily due to differing treatments for losses deferred due to wash sales, equalization accounting for tax purposes, foreign currency and market discount transactions. Permanent book and tax basis differences, if any, relating to shareholder distributions will result in reclassifications to paid-in-capital.

(e) Organization Costs (Emerging Markets Equity only)

Organization and registration related costs of \$10,588 have been deferred and are being amortized over a period of time not to exceed 60 months from the commencement of operations on February 9, 1998.

(f) Federal Taxes

Each Fund intends to comply with the requirements under Subchapter M of the Internal Revenue Code of 1986, as amended, and to distribute substantially all of its taxable income and gains to its shareholders and to meet certain diversification and income requirements with respect to investment companies.

(g) Capital Loss Carryovers

As of December 31, 1999, Short and Intermediate Bond and Global Bond had accumulated net realized capital loss carryovers from securities transactions for Federal income tax purposes as shown in the following chart. These amounts may be used to offset realized capital gains, if any, through December 31, 2007.

<u>Fund</u>	<u>Capital Loss Carryover Amount</u>	<u>Expires Dec. 31,</u>
Short and Intermediate Bond	\$2,344,832	2002
	7,662,253	2003
	70,508	2004
	179,401	2005
	212,653	2007
Global Bond	151,705	2007

(h) Capital Stock

The Trust's Declaration of Trust authorizes for each series the issuance of an unlimited number of shares of beneficial interest, without par value. Each Fund records sales and repurchases of its capital stock on the trade date. Dividends and distributions to shareholders are recorded on the ex-dividend date.

Notes to Financial Statements (continued)

At June 30, 2000, certain unaffiliated shareholders, specifically omnibus accounts, individually held greater than 10% of the outstanding shares of the following Funds: Income Equity- 1 owns 22%; Capital Appreciation- 1 owns 32%; Special Equity- 1 owns 39%; International Equity- 2 own 37%; Emerging Markets Equity- 1 owns 27%; Bond- 2 own 35%; and Global Bond- 1 owns 22%.

(i) Repurchase Agreements

Each Fund may enter into repurchase agreements provided that the value of the underlying collateral, including accrued interest, will be equal to or exceed the value of the repurchase agreement during the term of the agreement. The underlying collateral for all repurchase agreements is held in safekeeping by the Fund's custodian or at the Federal Reserve Bank.

If the seller defaults and the value of the collateral declines, or if bankruptcy proceedings commence with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(j) Foreign Currency Translation

The books and records of the Funds are maintained in U.S. dollars. The value of investments, assets and liabilities denominated in currencies other than U.S. dollars are translated into U.S. dollars based upon current foreign exchange rates. Purchases and sales of foreign investments, income and expenses are converted into U.S. dollars based on currency exchange rates prevailing on the respective dates of such transactions. Net realized and unrealized gain (loss) on foreign currency transactions represent: (1) foreign exchange gains and losses from the sale and holdings of foreign currencies; (2) gains and losses between trade date and settlement date on investment securities transactions and forward foreign currency exchange contracts; and (3) gains and losses from the difference between amounts of interest and dividends recorded and the amounts actually received.

In addition, the Funds do not isolate that portion of the results of operation resulting from changes in exchange rates from the fluctuations resulting from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

(2) Agreements and Transactions with Affiliates

The Trust entered into a Fund Management Agreement under which the Investment Manager, provides or oversees investment advisory and management services to the Funds. The Investment Manager selects portfolio managers for each Fund (subject to Trustee approval), allocates assets among portfolio managers and monitors the portfolio managers' investment programs and results. Each Fund's investment portfolio is managed by portfolio managers who serve pursuant to Portfolio Management Agreements with the Investment Manager and the Fund. Certain Trustees and Officers of the Funds are Officers of the Investment Manager and of AMG.

Investment advisory and management fees are paid directly by each Fund to The Managers Funds LLC based on average daily net assets. The annual investment advisory and management fee rates, as a percentage of average daily net assets for the six months ended June 30, 2000, were as follows:

<u>Fund</u>	<u>Investment Advisory and Management Fee</u>
Income Equity	0.75%
Capital Appreciation	0.80%
Small Company	0.90%
Special Equity	0.90%
International Equity	0.90%
Emerging Markets Equity	1.15%*
Bond	0.625%
Global Bond	0.70%
Short and Intermediate Bond	0.50%

*For the six months ended June 30, 2000, the Investment Manager voluntarily waived its portion of the investment

Notes to Financial Statements (continued)

advisory and management fee, amounting to \$28,017, or 0.40% on an annualized basis.

The Trust entered into a Administration and Shareholder Servicing Agreement under which The Managers Funds LLC serves as each Fund's administrator (the "Administrator") and is responsible for all aspects of managing the Funds' operations, including administration and shareholder services to each Fund, its shareholders, and certain institutions, such as bank trust departments, broker-dealers and registered investment advisers, that advise or act as an intermediary with the Funds' shareholders. During the six months ended June 30, 2000, each of the Funds, except Emerging Markets Equity and Global Bond, paid a fee to the Administrator at the rate of 0.25% per annum of the Fund's average daily net assets. The Administrator waived its entire administration fee from January 1, 2000 through April 30, 2000, amounting to \$11,743. Effective May 1, 2000, Emerging Markets Equity paid a fee to the Administrator at a rate of 0.25% per annum of the Fund's average daily net assets. Global Bond paid a fee to the Administrator at the rate of 0.20% per annum of the Fund's average daily net assets.

Rexiter Capital Management Ltd., the portfolio manager for Emerging Markets Equity, is an affiliate of the Fund's custodian and transfer agent, and pursuant to its Portfolio Management Agreement, is entitled to receive a fee from the Investment Manager not to exceed 0.75% of the average daily net assets.

The aggregate annual fee paid to each outside Trustee for serving as a Trustee of the Trust is \$16,000. In addition, the in-person and telephonic meeting fees the Trustees receive are \$1,000 and \$500 per meeting, respectively. The Trustee fee expense shown in the financial statements represents each Fund's allocated portion of the total fees and expenses paid by the Trust.

(3) Purchases and Sales of Securities

Purchases and sales of securities, excluding short-term securities, for the six months ended June 30, 2000, were as follows:

Fund	Long-Term Securities		U.S. Government Securities	
	Purchases	Sales	Purchases	Sales
Income Equity	\$ 52,173,673	\$ 46,408,378	N/A	N/A
Capital Appreciation	492,213,675	362,809,638	N/A	N/A
Small Company	5,484,774	40,935	N/A	N/A
Special Equity	1,018,418,298	680,860,000	N/A	N/A
International Equity	312,646,635	299,497,202	N/A	N/A
Emerging Markets Equity	6,155,353	2,627,381	N/A	N/A
Bond	7,582,112	2,650,407	N/A	\$ 445,781
Global Bond	16,518,101	13,714,103	\$4,241,663	1,819,757
Short and Intermediate Bond	7,014,288	6,918,502	4,495,213	4,219,917

(4) Portfolio Securities Loaned

The Funds may participate in a securities lending program providing for the lending of corporate bonds, equity and government securities to qualified brokers. Collateral on all securities loaned are accepted in cash and/or government securities. Collateral is maintained at a minimum level of 100% of the market value, plus interest, if applicable, of investments on loan. The custodian invests collateral received in the form of cash temporarily in money market funds. Earnings of such temporary cash investments are divided between the custodian, as a fee for its services under the program, and the Fund loaning the security, according to agreed-upon rates.

(5) Risks Associated with Collateral Mortgage Obligations ("CMOs")

The net asset value of Funds may be sensitive to interest rate fluctuations because the Funds may hold several instruments, including CMOs and other derivatives, whose values can be significantly impacted by interest rate movements. CMOs are obligations collateralized by a portfolio of mortgages or mortgage-related securities. Payments of principal and interest on the mortgage are passed through to the holder of the CMOs on the same schedule as they are received, although certain classes of CMOs have priority over others with respect to the receipt of prepayments on the mortgages.

Notes to Financial Statements (concluded)

Therefore, the investment in CMOs may be subject to a greater or lesser risk of prepayment than other types of mortgage-related securities. CMOs may have a fixed or variable rate of interest.

(6) Forward Commitments

Certain transactions, such as futures and forward transactions, dollar roll agreements, or purchases of when-issued or delayed delivery securities may have a similar effect on a Fund's net asset value as if the Fund had created a degree of leverage in its portfolio. However, if a Fund enters into such a transaction, the Fund will establish a segregated account with its Custodian in which it will maintain cash, U.S. government securities or other liquid securities equal in value to its obligations in respect to such transaction. Securities and other assets held in the segregated account may not be sold while the transaction is outstanding, unless other suitable assets are substituted.

(7) Forward Foreign Currency Contracts

During the six months ended June 30, 2000, International Equity and Global Bond invested in forward foreign currency exchange contracts to manage currency exposure. These investments may involve greater market risk than the amounts disclosed in the Funds' financial statements.

A forward foreign currency exchange contract is an agreement between a Fund and another party to buy or sell a currency at a set price at a future date. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked-to-market daily, and the change in market value is recorded as an unrealized gain or loss. Gain or loss on the purchase or sale of contracts having the same settlement date, amount and counter party is realized on the date of offset, otherwise gain or loss is realized on settlement date.

The Funds, except Income Equity, Capital Appreciation, Small Company and Special Equity may invest in non-U.S. dollar denominated instruments subject to limitations, and enter into forward foreign currency exchange contracts to facilitate transactions in foreign securities and to protect against a possible loss resulting from an adverse change in the relationship between the U.S. dollar and such foreign currency. Risks may arise upon entering into these contracts from the potential inability of counter parties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

Open forward foreign currency exchange contracts at June 30, 2000, were as follows:

International Equity			
Foreign Currency	Settlement Date	Current Value (in U.S. Dollars)	Unrealized Gain/Loss (in U.S. Dollars)
Sell Contracts			
(Receivable Amount \$34,312,629)	08/22/00	\$ 35,125,799	\$ (813,170)
Global Bond			
Foreign Currency	Settlement Date	Current Value (in U.S. Dollars)	Unrealized Gain/Loss (in U.S. Dollars)
Buy Contracts			
British Pound	07/25/00	\$ 246,771	\$ (4)
euro	07/25/00	3,022,017	(7,865)
Japanese Yen	07/25/00	3,921,065	47,053
Total Buy Contracts		\$ 7,189,853	\$ 39,184
(Payable Amount \$7,150,669)			
Sell Contracts			
Canadian Dollar	07/25/00	\$ 74,209	\$ (249)
Danish Krone	07/25/00	42,065	(2,091)
euro	07/25/00	1,594,057	(38,595)
Japanese Yen	07/25/00	1,427,822	(5,596)
Norwegian Krone	07/25/00	209,759	(9,759)
Total Sell Contracts		\$ 3,347,912	\$ (56,290)
(Receivable Amount \$3,291,622)
